## WINSLOW'S ANKLE BRACE 1900.

Patented December 17, 1895.

The only perfect Ankle Support made.

Can be attached to any skate.

We desire to call your attention to Winslow's Ankle Brace. It can be attached to any skate. It is made of steel, handsomely nickel plated, with a rib running through the center which strengthens the brace and makes it light, strong and durable. They are trimmed with the best quality Russet Grain Leather.

There have been many attempts at making an Ankle Brace, but this is the only good one ever offered to the public.

Four years have proved it to be a splendid article. Each pair in a box.

PRICE  
75c.  
PER PAIR.

## Winslow's Double Runner Skate.

This skate is especially adapted for children learning to skate, is strapped and ready for use. The runners are so wide apart that a child can stand on them with perfect ease. They are adjustable and can be made from a 6 inch to a 9 inch skate by simply adjusting the thumb screw.

PRICE, 50 cts. PER PAIR.

THE ABOVE SPECIALTIES ARE MANUFACTURED BY

# HARDWARE

Adelbert M. Woods, Wolcott, Conn., is about establishing a general store in that town, and would be pleased to hear from manufacturers and jobbers catering to that class of trade, with catalogues and discount sheets, giving him the necessary information in regard to the line of goods most desirable to carry.

Garland Chain Co., Rankin Station, Pa., have recently acquired the good will and business of the American Steel & Wire Co., in connection with the manufacture of galvanized pump chain, rivets, etc. They are increasing their facilities in order to give more attention to these particular lines than has been the case in the past.

An interest in the New York Export & Import Co., 56 Pine Street, New York, has been acquired by Henry T. Seymour, who has been connected with the Hardware trade of New York city for a number of years. This company acts in the capacity of selling agents for the products of leading manufacturers, having achieved considerable success in introducing a number of new lines in foreign countries. In the interest of this department of their business, it is in contemplation that Mr. Seymour will make a business trip around the world, visiting the various offices and agencies established by the company, in such places as Bombay, Calcutta, Hong Kong, Singapore, Shanghai and Manila, investigating the respective advantages of the future export trade and its many requirements.

Art Stove Co., Detroit, Mich., have recently elected as president of the company Henry Stephens, who is largely identified with the lumber business and well known in that connection for a number of years. He will succeed the former president, Neil McMillan.

I. L. Waterman and A. L. Waterman, composing the firm of I. L. Waterman & Son, have recently established themselves in business at 35 Warren Street, New York, as manufacturers' representatives. The members of this concern have had many years' experience in this locality in the Hardware and kindred metal trades, including brass and copper. Several first-class connections have already been made, and they are desirous of adding a few additional lines. Manufacturers, with a view of extending their trade in this market, might find it of advantage to open communication with this firm.

Grand Rapids Refrigerator Co., Grand Rapids, Mich., have in preparation an entirely new catalogue of their line of goods which will contain 124 pages, and will show the Leonard Cleanable Refrigerator in every grade—in zinc, nickeloid and with porcelain linings, and, in fact, embrace every one of their various styles of cabinet work and finish. They will be pleased to receive requests to forward this catalogue upon application, which will be promptly complied with.

The Union and Electric Supply Co. was recently incorporated at Providence, R. I., for the purpose of engaging in the business of selling and otherwise disposing of Hardware and other kinds of merchandise. The capital stock is stated at \$100,000; 500 shares each of preferred and common stock of the par value of \$100 a share. The incorporators are William H. Angell, of Swansea; Clarence S. Angell, of Barrington; Howard L. Perkins, of Cranston, and William L. Adams, Charles E. Dudley and Frederick S.

Clark, of Providence. The incorporators have all for some time been employed as clerks or otherwise connected with the well-known house of the Belcher & Loomis Hardware Co., Providence. At a subsequent meeting the following officers were elected: President, C. S. Angell; vice-president, W. H. Angell; secretary, W. L. Adams; treasurer, H. L. Perkins. The electrical end of the business will be under the management of W. L. Adams, who has managed the electrical department of the Belcher & Loomis Hardware Co. for several years past.

Under the title of "Should Old Acquaintance Be Forgotten" will be found on another page in our paper the initial reminiscence paper of an old Hardwareman, who for fifty years and over has been in close touch with the trade. His subsequent articles, commencing with the period when Southern trade only was canvassed by traveling salesmen from New York, who without large catalogues and many trunks of samples still sold large bills at good profits, will be looked forward to with undoubted interest.

At the November meeting of the Board of Governors of the Hardware Club of New York, the following gentlemen were unanimously elected to membership in the club:

H. R. Ayers, 97 Liberty Street.  
George M. Landers, New Britain, Conn.  
William T. Brown, 126 Nassau Street.  
Lowrie C. Briggs, 10 Jay Street.  
Frank C. Jennings, 190 Water Street.

E. I. Du Pont De Nemours & Co., Wilmington, Del., have recently published an extremely attractive booklet under the title of "Field, Marsh and Fen," which deserves special mention for its artistic get-up. It has twenty pages of reading matter, printed on coated paper of high finish, the many illustrations, which are of unusual excellence, and the text, being printed in a characteristic brown which show them off to the best advantage. It is worthy of a wide distribution.

Charles S. Lawrence, now the Greater New York representative of Tower & Lyon, was instrumental in publishing in 1894 the fine lithographic picture of Representative Hardwaremen of New York City, still ornamenting a number of business offices identified with the industry. He is now engaged in his leisure moments in the preparation of a new grouping that promises to be even more popular, of the leaders in the trade to-day. There is every reason to believe it will be eagerly sought after, and will prove a truly representative gathering.

As will be noticed in their advertisement on page 39, the Laffin & Rand Powder Co. announce the publication of their 1901 calendar which will be ready for the trade at an early date, and will undoubtedly prove an acceptable addition to the office equipment of the dealer receiving it.

William H. Cole, of the firm of Tower & Lyon, 95 Chambers Street, New York, has in contemplation a visit to the Pacific Coast immediately after Christmas, in the interest of the Union Hardware Co., and the number of leading manufacturers for whom his firm has been the representative for so long a period. That he will be received by the jobbers of the Coast with a welcome greeting goes without saying, and he will no doubt return home laden with the fruits of his trip in the shape of big orders representing his entire line of goods, so many of which are of special importance. Warren M. Tower will accompany Mr. Cole on the trip, and he anticipates increasing his geological experience while visiting the Canyons of the Colorado. Before returning from this six weeks' trip, they intend visiting British Columbia and other British provinces.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

## Editorial Trade Review.

The movement of business progresses favorably in all sections of the country, and from present indications the retail holiday trade will prove to be of larger volume than any similar season in a decade. Full employment for the workers producing wages that leave a margin for savings, with the prospect of another four years' happy continuance, opens the pocketbooks of the people, and benefactions are widely distributed at this the holiday season, warming many hearts with unexpected sunshine, and finding new opportunity for the development of that interest in the unfortunate, which shows we are but human even if we seek the almighty dollar, and treasure it for the good which it may accomplish.

The steadiness given to the general market at the present time is commented upon favorably by the trade. What business demands for the commencement of the 20th century, is that we shall have no "boom" conditions to unsettle confidence in the future, but a steadily progressive programme, founded on common sense and past experience, that will enable stock orders to be given without fear of wide fluctuations either one way or the other, so that all branches of trade may be benefited by the present conditions surrounding every branch of the industry, and the natural growth of the consumer's wants will furnish an increase of trade that will make the year memorable for its aggregate business.

Fearing a natural upward trend to prices, which is so apt to follow a large demand for staple supplies, a number of long-headed buyers are already on the manufacturers' books with orders covering Spring requirements. In-

dications point to a larger domestic demand than usual, arising from the growing cash surplus among our agricultural communities, whose products have been sold at record prices and the proceeds already banked for prompt payments in the future for improvements seriously contemplated to increase present facilities for production.

This state of affairs is likely to continue unless some unwise movement is inaugurated to advance present quotations unnecessarily and stultify the efforts of the whole trade, now ready and willing to take the fullest advantages of the prosperous state of affairs noticeable on every hand.

The stiffening prices seen in all recent transactions in iron and steel tell a story of their own to the wary buyer for stock, creating as it does a greater degree of confidence respecting future values. Especially is this the case with the transactions in Heavy Hardware, or lines of goods in which material enters more largely than labor. Where orders are possible of being placed at prices lately in vogue, advantage is taken to protect stock possibilities by booking their accustomed specifications for future delivery.

When comparisons of last month's trade are made with the tide of traffic prevailing a year ago, it is remembered how much higher quotations were at that time, and how great a volume of business it must show when the recorded amount of sales are placed beside the increased tonnage of to-day's business. The sales for the present month, as reported by the jobbers, continue in ample fullness, and the returning travelers give every encouragement for the continuance of these conditions.

The long spell of favorable weather has had a good effect in hastening forward the completion of many building enterprises that might otherwise have been postponed until Spring. It even permitted outdoor work to be prosecuted with vigor, all of which had its effect upon the extraordinary demand for staple requirements, which bids fair to open the new year under the most encouraging auspices if not discouraged by too much juggling with the discount sheets.

The mild weather has interfered with the hopes of the skate manufacturers in the marketing of a large product at present quotations. Unless we obtain freezing weather between now and the holidays it is feared that the stocks of skates carried over from last season will be found almost sufficient for current wants among the greater part of the retail trade. The skate business has always realized the greatest sales when ice production follows closely upon Thanksgiving Day.

The absence of snow is also mourned by the Eastern markets, as orders for sleds, snow shovels, ice chisels, etc., have to be given early in the season to anticipate positive delivery on time, and the large amount of space required by these bulky goods makes an active market the most desirable one.

In footing up the present stocks in the annual inventory it will be a matter of surprise for many of the jobbers to notice the great differences that have been produced by the changing fluctuations of the year. It would seem almost incredible that so great a difference could have prevailed on a number of leading lines, as this comparison of cost will give evidence of. Let us hope all the old stocks have been pushed out during the year with but little or no loss, and that the inventory will show only fresh new goods bought at the lowest prices prevailing since

June first. One consolation is still to be enjoyed: at present prices there can be no possible drop that can demoralize Spring trade.

Many of the buyers are anticipating greater concessions in prices of steel goods, shovels, scythes, etc., which they argue are still held at prices abnormally out of proportion to those prevailing a few years ago under equally as favorable conditions in the markets for material. The trade is slow to realize how terribly demoralized were prices in these extensive lines at the period referred to, many orders being booked at prices unproductive of any profit, and that a similar condition of affairs is scarcely possible. Orders, they know, must be booked without much greater delay, or the chances for prompt delivery will surely be jeopardized.

### A Statistical Abstract of the World's Commerce.

A statistical abstract of the world which will show the imports and exports of every country in the world having statistical reports is the ambition of the Bureau of Statistics of the Treasury Department. To present in a single volume a picture of the world's commerce, not only of today, but extending back over a long term of years, and to show that commerce in detail as to principal articles, country by country, with quantities and values stated in United States currency and measures of quantity, is a work of no small magnitude, but of such great importance to the commercial interests of the country that it is being resolutely undertaken by the Bureau of Statistics. The details of this work, which will be carried on under the personal supervision of the Chief of the Bureau, have been entrusted to Mr. Benjamin T. Welch, whose long service in the Bureau especially fits him for this duty.

The opening chapter of the proposed volume has already been completed. It shows the total imports and exports of each country of the world having statistical records, from the earliest date for which the figures are attainable down to the present time. In the case of the United Kingdom, the report begins with the year 1800, and shows the total imports, total exports, and excess of imports or exports in each year from that date to the present time. In the case of Austria-Hungary, the record begins with the year 1860; Belgium, 1831; France, 1831; Germany, 1872; Italy, 1861; Netherlands, 1860; Russia, 1861; Spain, 1860; Norway, 1860; Sweden, 1860; Canada, 1851; Mexico, 1873; Argentina, 1870; Chile, 1860; China, 1868; Japan, 1874; India, 1851; Australia, 1851; Egypt, 1874, and Cape of Good Hope and Natal, 1851, in each case the figures covering the entire period from the earliest date named to the present time. The subsequent chapters will give the details of the commerce of each of these countries, the principal articles imported and exported during a term of years down to the latest attainable date, and the principal countries from which its exports are obtained and to which its exports are distributed.

The figures on the total commerce, country by country, which have already been completed, afford material for some interesting comparisons with our own growth meantime. The imports for home consumption of the United Kingdom, for instance, which in the year 1800 amounted to \$81,310,000, amounted in 1890 to \$2,043,896,450, an increase of 2400 per cent., while in the case of the United States, the imports for home consumption in 1800 were \$52,121,891, and in 1899, \$685,441,392, an increase of 1215 per cent. Taking the export side, the contrast is much more clearly in favor of the United States. The exports of articles of home production from the United Kingdom in 1800 were \$111,107,000, and in 1899 \$1,287,151,345, an increase of 1059 per cent.; in the case of the United States, the exports of home products in 1800 were \$31,840,903, and in 1899, \$1,203,931,222, an increase of 3681 per cent.

In the case of France, the comparison is equally interesting. The imports for consumption into France in 1831 were \$72,182,000, and in 1899, \$872,032,000, an increase of 1108 per cent.; while the exports of articles of home production were, in 1831, \$88,088,000, and in 1899, \$801,452,000, an increase of 810 per cent. In the case of the United States the imports for home consumption in 1831 were \$82,008,110, and in 1899, \$685,441,889, an increase of 734 per cent., and the exports of articles of home production were, in 1831, \$59,218,583, and in 1899, \$1,203,931,222, an increase of 1933 per cent.

The official data covering the commerce of the German Empire in its present form begin with the year 1872, in which year the imports for home consumption were \$793,726,000, and in 1899, \$1,304,977,000, an increase during that period of 64 per cent. The exports of home products were, in 1872, \$564,165,000, and in 1899, \$801,452,000, an increase of 42 per cent. A comparison of the figures of the commerce of the United States covering the same period shows the imports for home consumption in 1872 to be \$560,419,034, and in 1899, \$685,441,892, an increase of 24 per cent., and the exports of home products in 1872, \$428,487,131, and in 1899, \$1,203,931,222, an increase of 181 per cent.

One especially interesting fact developed by a study of these figures is that in the case of the United States they show, with much greater frequency than in any other countries, a favorable "balance of trade," or excess of exports over imports. In the United Kingdom, Germany, France, Belgium, Italy, Netherlands, Sweden and Norway, and Spain, the imports exceed the exports, in some cases by large sums, and this is true also of China and Japan. In the newer and greater producing countries, Canada, Mexico, Argentina, Australia and India, the exports exceed the imports in nearly every case, though in sums which are insignificant when compared with the enormous balance of trade in favor of the United States in recent years.

The commerce of forty-seven countries other than the United States is pictured in the opening tables of the proposed volume. Of this number, eighteen countries show an excess of exports over imports, and twenty-nine show an excess of imports over exports. The principal countries which show an excess of exports over imports are Canada, Mexico, Argentina, Chile, Australasia, India, Egypt, Spain, Austria-Hungary and Russia. A study of the detailed figures in this group of favored countries whose exports exceed their imports, and a comparison of their exports with that of the United States alone furnish a striking evidence of the phenomenal prosperity of our own country. No one of the eighteen countries whose exports exceed imports shows a favorable balance of trade approaching that enjoyed by the United States, and a compilation of the excess of exports in the entire group of eighteen countries having such excess gives a grand total of only \$414,845,000, in the latest attainable year, as against an excess of \$544,542,131 in favor of the United States alone in the fiscal year 1900.

### Chinese Banknote Five Centuries Old.

In the showcases devoted to exhibits of early printing from Japan and China, the British Museum authorities have just placed an interesting addition—a Chinese banknote issued during the reign of the Emperor Hung-Wu, A. D. 1368-99. This is the earliest specimen of a banknote known to exist in any country, and is three hundred years earlier than the establishment at Stockholm of the first European bank which issued notes. About eighteen inches in length and half that in width, it is a curious looking document.

Mr. Bowser—Hulda, how do I look in this evening dress?

Mrs. Bowser—Why, Daniel, you look just splendid.

Mr. Bowser—I ought to, Hulda. I don't think I ever was more uncomfortable in my life.—*Ex.*

## LEGAL CORRESPONDENCE.

Conducted by William Marston Seabury, Attorney and Counsellor at Law,  
No. 43 Cedar Street, New York.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Editor "HARDWARE," No. 277 Broadway, New York City.

QUESTION: Kindly inform me what steps are necessary to be taken to wind up the affairs of a corporation in New York State?

REPLY: The New York statutes generally provide three methods for dissolving a corporation. An action may be brought by the Attorney-General of the State in the nature of a *quo warranto*, for the failure of the corporation to exercise its franchise or for the misuse of its franchise. An action may also be instituted by the Attorney-General where a corporation has remained insolvent for a year, and also upon some other grounds mentioned in the statute. The third means provided by the statute is a special proceeding for the voluntary dissolution of the corporation, which may be instituted by a majority of the directors when, in their opinion, it is for the best interest of the creditors and stockholders that the corporation should be dissolved. This latter proceeding is perhaps the commonest and the means most frequently used to terminate the existence of a corporation in New York State. The directors petition the Supreme Court in the county where the company has its principal place of business, and a referee is appointed to determine the facts alleged in the petition. If the corporation is insolvent and about to be sued, often the best thing the directors can do is to commence this proceeding and have a receiver appointed, when all suits will generally be restrained and the claims in time adjusted. After the necessary facts are in the possession of the directors' attorney, this decree can generally be obtained in four days and it frequently happens by taking this action promptly a creditor to a large amount is prevented from obtaining judgment against the corporation, and having his claim paid in full to the exclusion of smaller creditors.

QUESTION: My brother died recently leaving an insurance policy payable to his estate. He left no will and I am the only member of his family. Kindly tell me how I should proceed to collect the insurance?

REPLY: You should at once apply for letters of administration upon your brother's estate to the Surrogate of the county where he formerly resided or in which he owned personal property at the time of his death, and you should have the doctor who attended your brother sign the proper proofs of death required by the insurance company. The insurance company will not pay you the amount of the policy until you are able to show them that you have been duly appointed administrator of your brother's estate. No time should be lost in preparing proofs of death, as the insurance companies require these proofs of death to be filed with them generally not later than forty or sixty days after death. We would advise your consulting a lawyer at once and placing the matter in his hands.

QUESTION: Some months ago we delivered several cases of goods to Messrs. ——— and Company on thirty days' credit. We thought the company to which we delivered the goods was a company of the same name which was rated by Dun and Bradstreet as having good credit. We have since learned that the concern that received the goods is worthless and has been obtaining credit on the name of the good concern. We sent them goods amounting to \$500 and never received a cent. We understand that several creditors are contemplating an attachment of some of the goods and our agent has seen some of our goods still in the cellar of the store. What would you advise us to do?

REPLY: In cases of this kind the most important thing is to act promptly. A delay of a day, or sometimes of a few hours, is fatal to your interests. We are of the opinion that your best course would be to adopt the theory that the title to these goods is still in you, and that by the terms of

your sale you were still the owner of the goods until they were paid for. If you can take this ground, we would advise you to replevin the goods at once. Of course it will be necessary for you to place the matter in the hands of a lawyer to conduct for you. In this way if you can locate your goods you will, in all probability, recover them, and if you prove your case you would be entitled to a judgment against the firm in question for the balance due you, and for any damages you may have sustained by virtue of the wrongful detention of your goods.

QUESTION: I am desirous of forming a partnership with two friends of mine. What steps should I take to put matters in proper shape?

REPLY: You should communicate with a lawyer and state the terms upon which you would agree to become partners. It is not absolutely essential to the valid existence of a partnership that the articles of co-partnership should be in writing; but we would advise your insisting upon the agreement being reduced to writing, as it is much wiser and safer for all parties concerned. You should instruct your lawyer that you desire your interests protected, and it is wise to insert certain clauses, if possible, which permit you to withdraw under favorable terms should you and your partners disagree. It is also well to impose certain limitations on your partners, as, for instance, by agreeing in the articles of co-partnership that none of the partners will make or indorse notes in the firm name without the knowledge and consent in writing of all the partners. It should be borne in mind that each partner has authority to bind his co-partners within the scope of the partnership business, and for this reason it is to the interest of the firm for one partner to limit his co-partners in the matter of making notes or indorsing them. If the full name of at least one of the partners is not to be a part of the firm name and title, we would call your attention to Chapter 216 of the Laws of 1900, requiring him to file a certain certificate in the office of the County Clerk of the county in which you intend to do business.

## The Van Wagoner &amp; Williams Hardware Co.

The Van Wagoner & Williams Hardware Co., Cleveland, Ohio, was sold on November 20th to Walter D. Sayle, Cashier of the East End Banking and Trust Co., of Cleveland, Ohio, who purchased the property in the interest of the banks in the city of Cleveland who were stockholders in the company. This was the outcome of the report of a committee previously appointed by the guaranteed stockholders to take such action as might seem best for their interests and improve the future welfare of the company.

The company was crippled in the panic of 1893, and was reorganized with insufficient working capital. This condition soon became apparent to the banks of Cleveland, who owned about one-quarter of the guaranteed stock, and they expressed their willingness to be assessed, in common with the other guaranteed stockholders, for the purpose of providing the needed capital. About three-fourths of the guaranteed stock was held by Eastern banks, who were unwilling to advance any money for this purpose at that time, and ever since have steadily refused to contribute their portion of the capital evidently needed to develop the company and insure its permanent success. After repeated efforts to obtain the same, it was finally determined that this capital could not be obtained from the present guaranteed stockholders, and it was, therefore, decided to sell the company as the best way to serve the interests of all concerned.

The present owners intend to continue the plant as a going concern, and they are now considering what course is the best to pursue in order to put it in a favorable condition for successful and continuous operation.

A Frenchman named Dufour claims to have found a way of melting and molding quartz like glass.

## HARDWARE NOTES WITHIN THE PITTSBURGH RADIUS.

The age of the earth may be millions of years, but earth was never so young as she now is. Look about and compare.

If our merchants were to take more grains of salt than quinine, there would be fewer unassimilative dispositions.

The poker's admonition: "Hook on to me and I'll rake you good and hard." This is the tag motto noted as a stove display.

The Hardware dealers of every city may fund an enterprise aiming to maintain artificial ice rinks. There is a profitable end in sight.

Cold weather is coming on a-skate, and the small boy is daily blocking the Hardware dealer's window. But, as usual, there will be more in looks than sales.

A notable novelty in the shape of a traveler's post card is of sheet metal reduced almost to the thinness of foil. The metal has a slated surface.

Extract of an advertisement: "We lubricate our sales of patent axles with Mather Thousand Mile Axle Oil, and thus place our patrons and ourselves miles ahead of our competitors."

Andrew Carnegie is come home. His arrival was not heralded by cannonades and red fire, but by the boom of the iron and steel mills and blast furnaces. Fortuna smiles benevolently upon the laird's town.

I recently noted a Hardware dealer's delivery wagon, the body constructed along the lines of a mammoth wire mouse-trap. The driver himself was a monster mouse, i. e., he was accoutred in a semblance of mouse pelt uniform. It was not at Pittsburgh.

The autocar for business purposes is in little use here. The congested horse vehicle traffic does not admit of a wide use. But the cycle-autovehicular interest is as well developed as in larger metropolitan centres with magnificent street expanses, but fewer business fronts.

The first snows have fallen, and the waters are slowly creeping upon the river sands. River coal traffic is "looking up and down." Pittsburgh is not materially dependent upon river channel shipments, but during the period of car shortage, the waterways are of an importance not to be trifled with.

The typographical drum majors leading the army of American advertisement writers have accomplished great feats for the Hardware advertiser; yet quite a few dealers have learned that the public do not always become patrons through being amused by freak types, borders, sketches and such. It's merit alone that has won the success for the Hardware dealer, minus specialist.

Fireproofing wood promises to become more of a feature in the near future. Contractors are interested in the new developments in wood fireproofing, and Hardware dealers devote much valuable time to the consideration of personal and printed claims. The latest wood embalming process has been given various tests, but builders' time has been too valuable of late—any such innovations can only be casually introduced.

Mercantile statistics exhibit an insignificant number of failures, bad debt and hard-up cases in Pittsburgh's Hardware, iron and steel branches. Home pride, home money market, solid citizen wealth form the rock upon which Pittsburgh's industry and commerce are built. Eastern panics would affect local interests only in the sense of stock and bond holdings. The home money market seems practically unassailable.

A visit to the mills and salesrooms would prove the sheet steel industry to be in excellent condition as regards business expansion to fields thus far but indifferent buyers; while the immediate domestic demand meets anticipations. The demand includes all styles of embossed steel sheetings, sheet steel registers, crestings, eaves trough, steel sidings, conductor pipe, cornices, skylights, roofing, etc., the novelty line experiencing unchecked development.

A Hardware dealer of my acquaintance has a scheme in hand, which he expects will enable him to establish a special department. Beginning with this season, he will give with every bicycle selling at \$50, an office desk ordinarily selling at \$15 to \$18. He claims having secured optional orders aggregating \$500 in ten days, and curiously enough, the desks are of more interest to the prospective buyers than the wheel. Both desk and wheel are on exhibit at the main house and sales depots.

A Western Hardware house has plans and specifications in hand providing for the erection of a building with metal parts from the foundations up, every fixture in the store to be constructed of metal. It will be an expensive affair if built, but would be a monument of imperishable fame. So let's have this iron structure. It would be palatial, no matter how sober in construction. It would be a permanent exposition of American evolution of the metal industry—a fitting finis of a century of invention and improvements.

We are now practically unequalled in the production of tin, galvanized and copper ware, go where you may. That is, the one now catalogued as staples is the best and most comprehensive to be found in any market. But new enterprise is waiting to enter the field, and it looks as if its success in competition could only be facilitated by original and unique designs of the highest standard of quality. The novelistic mind will achieve great things in this line during the next decade, which will probably record the highest evolution in this class of goods.

The grateful heat of natural gas fuel meets one in almost every Pittsburgh business office, and natural gas continues to be the popular illuminant. Of course, the boom is all vanished, but few small industries now employing this fuel as power. Coal product fuels are now so abundant and inexpensive, natural gas would have been discarded had the supply been adequate to the industrial demand. The chief characteristic of natural gas as power fuel has proved to be unreliability and such a quantity cannot be thought of in a community striving for steady progress.

The store windows are gradually assuming holiday features, and 'tis well to anticipate the happy season. The Hardware dealer, by dint of various experiments, now practically occupies the same position as the jeweler, as a holiday purveyor. The mode of gift-giving has undergone a great change, the majority of persons now preferring the useful to

the ornamental and luxurious, the clientage for the latter class of gifts being conditionally large in so wealthy a city as is Pittsburgh. Holiday window displays are generally heralded by cutlery, but in these days of unlimited Hardware product evolutions, window space given over to cutlery seems almost a sacrifice; windows up to January should be changed weekly, and only such goods should be exhibited as would entail profits characteristic of the opportunity. Few look for bargains at such seasons. Cheap things will sell without special trouble. So get out the things of household use, art and ornament; things that please men, women and children, business men, artisans and professional men, and holiday buyers will crowd your salesrooms. Make your press announcements conjunctive with the exposition of your product. The advertisement will never fail to attract while the exhibit can but make the attraction the more potent.

J. B. RINDFLEISCH.

### "Should Auld Acquaintance Be Forgot."

You ask me to write up some of the old matters with which I was associated when young. How can I expect to compare favorably anything that I may indite with those emanating from so many abler pens? I have many doubts that my contributions would in any manner prove interesting to your many readers. So I shall not write anything relating to my reminiscences of over fifty years' experience in the Hardware trade with any such expectations; still, while my moving accidents by flood and field have been "crowned with sweet memories," and not a few bitter disappointments, I cannot forget my first appearance in mercantile life, when I entered the employ of William E. Millet, music dealer, at 329 Broadway, in 1846. This store was located next door to Stephen Conover's Hardware establishment, and I believe that "the influence" must have percolated through the walls, for while Mr. Millet was always kind to me, and I was with him about two years, while my time was employed in selling copies of "Melrose Abbey Waltzes," "Blue Bells of Scotland," and other musical publications, my mind would revert to Hardware, and I determined to "go higher," as I thought. I was full of life then, as well as possessed of an exuberance of fun (and have not gotten over that yet Hop). I recollect that my employer was about to move to a new location a block above the old store, and I was instructed to place in the window a notice to that effect. I did so, by putting in a prominent position, the following:

"Millet the music man  
Has gone to a better place above."

This notice attracted general attention, and proved a "good ad.," as was attested by the crowds in front of the window, asking if my kind employer had left this mundane sphere, etc., etc. I will say, just here, that I enjoyed the friendship of Mr. Millet to the day of his death, many years after I left his employ. After two years in the music store I placed a "want ad." in the columns of the *New York Commercial Advertiser*, then edited by Francis Hall & Son, corner of Pine and William Streets, soliciting a position in the Hardware business, and next day, lo and behold! I received an answer from James M. Weed, who succeeded Smith & Ruthven and Ruthven & Weed, at the corner of Platt and Pearl Streets, and Mr. Weed engaged me instantaneously. I was three years with Mr. Weed, and the only clerks in that store were his brother George W. Weed, and myself. I wonder if there are any of the "old timers" living who remember "Wash?" He was certainly a curiosity in dress, and general demeanor, but withal, in possession of a kind heart. We got along very pleasantly together. Shortly after my baptism in the mysteries of locks and screws, and other adjuncts of a jobbing Hardware house, I met on the street the financial editor of the *Commercial Advertiser*, an old and true friend of my widowed mother, who hailed me with congratulations upon

my advent in the Hardware trade, and he said to me that I probably agreed with the poet in deed as well as thought,

"That music hath charms to sooth the savage breast,  
But pots and pans could soften all the rest."

Ah, how well I kindly remember James M. Weed and his son Randolph! His son, I believe, is living in Utica, N. Y., and holds some high position in that city at the present day. Also how well I bring to mind the noble-hearted men in the Hardware trade at the time of my boyhood! There was Felix Ingoldsby, the Hyslops, the Wolfe family, George D. H. Gillespie, Lee, Coffin, Bruff and others. "Large eternal fellows" were the Hardware men of 1850. But while we pay our homage of love and affection to the men of those days—remember their worth, and nobleness of character—let us not live on the past, but cheerfully and gratefully acknowledge that the "Hardware men" of the present day are worthy successors to those of fifty years ago in every qualification that constitutes the true merchant and honorable citizen. Let any man study the faces of the present members of the Hardware Club, and he will agree with me that:

"There are large, eternal fellows making music hereabout,  
And large, eternal men are yet to be;  
And long will be the long, long years before the breed runs out,  
Strong as iron in the mountains, clean as saltness in the sea."

No wonder that my associations of boyhood days have not failed to leave their impressions on my mind, and up to the present day the influence of the noble men associated in the Hardware trade has had the effect of making those with whom they came in contact better men. I will close these reminiscences, commencing with 1846, and may drop you a few lines commencing with 1850. You know who I am, but to others will simply subscribe myself as a Hardware veteran.

KANT YOU GESS.

### English Wrought Iron Gates.

The apathy of the British nation about its old iron gates is astounding. Unless something is done, and done quickly, the old gates of Henry VIII.'s Sunbury Palace, on the Shepperton Road, will be lost to us forever.

The Yankees have taken our stud horses and our fancy dogs. The more reason, therefore, why they should not be permitted to cart away our old gates. But they will, unless somebody stops them.

Fortunately, this beautiful example of antique English beaters' ironwork is in the hands of a man who has the honor of his country sufficiently at heart to keep it here if he can. That man is Mr. Harman, of 136 Brompton Road.

And beautiful, indeed, these gates are. They are more than that, they are unique. It was the early days of iron gateways in England when Henry VIII. built this palace of Sunbury, while the flame of his love for Anne Boleyn still burned bright. Evidence of that is the arched pediment or frieze surmounting the gates.

The South Kensington Museum authorities covet this treasure, but their hands are so tied with building operations, not to mention red tape, that before they are ready to put down the money—less than £1000—the golden moment may have passed forever.

Less ancient, but not a whit less beautiful, are the great gates of Carshalton Park. Every wanderer round London knows them, tucked away in a lane in the middle of lavender land.

These were built in 1716-20 for the Scawens. The carved stone shafts are softened in the manner that nothing but time can accomplish, yet so wonderfully preserved that the pheasants hang there like dead birds. The iron piers are twenty feet high.

It will be a strange and shameful thing if for lack of a ready 6000 guineas the nation loses this legacy of the centuries.—*London Mail*.

## CONSULAR COMMERCIAL COMMENTS.

### MOLTEN WOOD IN FRANCE.

Vice-Consul-General Hanauer, of Frankfort, under date of September 29, 1900, says:

Molten wood is a new invention by M. De Gall, inspector of forests at Lemur, France. By means of dry distillation and high pressure, the escape of developing gases is prevented, thereby reducing the wood to a molten condition. After cooling off, the mass assumes the character of coal, yet without showing a trace of the organic structure of that mineral. This new body is hard, but can be shaped and polished at will; is impervious to water and acids, and is a perfect electrical nonconductor. Great results are expected from this new discovery.

### GERMANY'S FOREIGN TRADE IN NEEDLES.

Under date of October 20, 1900, Vice-Consul-General Hanauer, of Frankfort, writes as follows:

Germany has almost ceased to be a customer of foreign countries for needles, having imported only 128,000 marks' (\$30,720) worth during the first half of the present year, whereas she exported in the same period to the value of 6,679,000 marks (\$1,602,960) in sewing, embroidery, darning and knitting needles, or 38 per cent. more than she exported in the same time of 1899. The best customers were China, with 56.7 per cent.; France, Austria-Hungary, and British East India, with about 4 1-2 per cent. each, etc.

### RUSSIAN LICENSES FOR TRAVELING AGENTS.

Mr. Peirce, chargé at St. Petersburg, sends under date of September 29, 1900, translation of a note from the Russian Ministry for Foreign Affairs, the substance of which follows:

A note of the Council of the Empire, sanctioned by the Emperor on June 5, 1900, which is to take effect from January 1, 1901, authorizes commercial firms and industrial enterprises, both Russian and foreign, which do not pay less than 150 rubles (\$77.25) as impost on the industry, to avail themselves of traveling agents in Russia. The traveling agents will be held, as formerly, to pay a personal tax of 50 rubles (\$25.75) per annum. By the time this law will take effect, the Ministry of Finance will elaborate detailed rules with regard to the delivery of the industrial license, as well as for the payment of the supplementary taxes by foreign firms and by their traveling agents. Copies of the rules will be sent the United States embassy at St. Petersburg.

### HARVESTING MACHINES IN INDIA.

Consul-General Patterson writes from Calcutta, October 10, 1900:

Answering inquiries of a United States company regarding the use of harvesting machinery in cutting grass and grain in India, I have to say that India is not a hay-producing country. The grass is cut and used green for horses, but is not cured as hay. The common fodder for cattle is rice straw. In this part of India (Bengal), rice and jute are the principal crops, and the quantity of grass grown is comparatively small. Wheat is extensively grown in the western part of India, for which Bombay is the principal shipping port. The United States consul at Bombay can give the desired information from there. For further information from here, I would advise correspondence with the following-named firms in Calcutta, who are dealers in agricultural machinery and tools: Messrs. T. E. Thomson & Co., Limited; Jessop & Co., Limited; W. Leslie & Co.

### CONDITION OF LABOR AND MANUFACTURE IN GERMANY.

In regard to the present condition of German industries, I send the following translation of an article which appeared in the *Ostdeutsche Presse* under date of August 30, 1900:

The high price of coal and the coal famine generally is making itself felt in every branch of industry where this mineral is needed. It is not surprising to read of numerous laborers being dismissed from the iron and steel foundries. To be sure, those iron and steel industries which are employed by the merchant marine and the newly planned navy have plenty to do and are reaping a golden harvest.

Without question, we have reached a turning point in our industrial development. Ominous clouds which foretell no good are rising over all the great industrial States of Europe.

What is the cause of the present crisis in German industrial circles? One year ago the war in South Africa began, which not only put an end to German exports to that part of the world, but cut off the import of gold from the Transvaal at the same time. Money became scarce and the rate of interest high. Germany has several billion dollars invested in foreign countries which is not bringing in the expected returns. German industries during the past few years have been multiplying rapidly. There has always been plenty of money in the country, but the need is now greater than the amount at hand. Many small merchants, shopkeepers, etc., in order to get rich in a hurry, invested their savings in "wild-cat" enterprises. Government securities have sunk in value, while money for new undertakings can only be obtained at high interest.

The coal strike early last Spring led to such high prices for fuel that many factories were closed down. The scarcity of coal caused much distress among the poor people last Winter, which was an exceptionally severe one. The price of coal to-day is 25 per cent. more than it was one year ago, and bids fair to go even higher. Inasmuch as one-half of the population of the Empire felt the rise in coal at once, they were compelled to cut down expenses in other things. The effect of this was noted in many industries. Again, the high price of coal increased proportionately the price of production, and this became especially noticeable in foreign countries where German products were compelled to compete with the products of other nations. In addition to this, the present troubles in China do not promise to mend matters.

The real secret, however, of the present stagnation in many branches of German industries is this: German foreign markets have not increased proportionately with the increase of home production. During the past year, German exports to China and South Africa have practically ceased. The Empire's exports to the United States, England, the Orient, South America, and the Balkan States have been on the increase; but these markets have fallen far short of consuming all that German manufacturers have produced. Then, the most powerful factor with which German industries have had to contend has been the development of independent industries in those countries where Germany has always had her best markets. Especially has this been the case in the United States with all textile products.

Without question, the competition of the German laborer is not as prosperous as it was a few years ago. The number of idle workmen is increasing, and hard-earned savings must be used. How long present conditions will last remains to be seen.

JNO. F. WINTER,

ANNABERG, October 17, 1900.

Consul.

"There are two kinds of business courtesy."

"What are they?"

"Well, the kind we extend to people who have paid and the kind we extend to people who haven't paid."—*Ex.*

## THE NATIONAL HARDWARE ASSOCIATION.

Among the items of interest that were not included in our report given in the preceding issue of *Hardware* covering the proceedings of the Convention proper, may be mentioned:

### THURSDAY AFTERNOON.

The delegates, accompanied by the ladies and including other visitors, were welcomed as guests of the Richmond jobbers and manufacturers, and participated in an all-round visit to various points of interest within the limits of the city and its suburbs.

### THE THURSDAY EVENING SESSION

was devoted to the continuation of the "Collocution" which formed so large a part of Wednesday's proceedings. A number of prominent manufacturers participated in the discussion, and the remarks were listened to by the delegates with a great deal of attention. One of the most important features connected with the holding of a convention of this character is that an opportunity is given to the manufacturers to reply at once to adverse criticism on the part of the numerous delegates, and not have antagonistic questions become bones of contention to last through a long correspondence extending over several months. It will be noticed in this Convention that the leading manufacturing concerns had representatives present, who were able to take up every question of importance as it arose, enter manfully into every discussion, and usually held their own as to the necessary justification for movements on their part that are claimed by the jobbing fraternity as jeopardizing their interests.

### THURSDAY EVENING.

Thursday evening was devoted to the continuation of the "Collocution," but this time it was upon the topic of "Market Conditions: Are Not Present Values on a Reasonably Sound Basis?"

The first speaker was F. R. Dickerson, of the American Tin Plate Co., who made the following remarks:

### F. R. DICKERSON'S REMARKS.

I am going to call your attention to four things that I think make present values on a sound basis. From a business standpoint I would put the settlement of the silver question as one of the reasons. I believe that is going to put business on a safe basis, not for four years, but I trust and hope forever, so far as a 50-cent dollar is concerned.

The next thing—not, perhaps, in importance—is the present position of capital. We have noticed for the past ten or twelve days the enormous business which has been transacted on Wall street, averaging about 1,000,000 shares a day, whereas for three months or more preceding the election there was absolutely no business, we might say, on Wall street. They simply traded among themselves. Now the business which is being done there is no doubt partly speculative, but up to last Saturday I had been almost daily in conversation and connection with bankers and with safe deposit officials, and I am told from most reliable authority in New York that a great many people have brought stocks and bonds into safety deposit vaults during the period since November 7 up to last Saturday. Not only is capital seeking investment to-day, but it is seeking it in larger quantities than ever before.

The next point I would like to observe is that industrial corporations, if I may say it aloud, called trusts, will do a great deal to offset the damage which a panic creates through the whole country. I think, in all sincerity, these large corporations do a great deal toward keeping prices on a dead level.

And then our export trade. We are exporting more largely

now than at any time before in the history of the country. There have been no two consecutive days since last July when the company with which I am connected have not had inquiries for tin plate from some portion of the world outside of the United States. We have had calls from Japan, Northern Africa and all through Europe.

I believe that business to-day is on a reasonably safe basis.

He was followed by F. L. Clark, of the American Steel Hoop Co., who made the following remarks:

### REMARKS OF F. L. CLARK.

In ordinary commercial reports I note a great many headings, "Market Conditions." The last few days have shown that the market is certainly on an ascending scale.

What is the answer from the industries of this country to-day upon the subject? Ask the foreman or superintendent of your works, what about the market conditions—are they on a solid basis? He will tell you that it is even to-day a difficult matter to secure labor; that men are employed. And if men are employed, market conditions are good. He will tell you that it is extremely difficult to get even common labor.

Ask your building inspectors in your cities—those that are licensed to build—what about market conditions to-day, and I think they will tell you that indications for building in the coming Spring are better than ever before.

So, in looking over these subjects from these different standpoints, I think I would say as a prophet that market conditions to-day are on a safe basis, and if there is any change it will be upward for some time and not downward.

Henry R. Towne, president of the Yale & Towne Mfg. Co., added his quota to the discussion in the following:

### HENRY R. TOWNE'S REMARKS.

The topic assigned for this evening's discussion is one that concerns the interests of us as manufacturers. I have opinions, of course, as to the probable trend of the market.

There are two influences which always enter into the solving of this question. One of them is the question of normal values and the other the question of abnormal conditions. Normal values are lower in this country than ever before—lower because of the great advance in the utilization of machinery and in the higher efficiency of labor. I think, so far as normal influences are concerned, the tendency is toward lower values rather than higher. To offset that are the abnormal conditions which environ us at the present time. The Presidential election which has just closed has, as one of the preceding speakers correctly stated, settled the pre-eminently important question for an industrial and commercial nation like ourselves of the standard of value. That question being settled, confidence is restored, uncertainty is at an end and we are going to see an enormous development of industries and a great investment of capital in new enterprises of every kind. Now these conditions tend while they last to increase consumption above the normal level. That increased consumption brings with it a greater demand on the producing facilities of the country. Added to that is the enormous increase in the export of our manufactured products.

To sum up the situation covered by the question which is the subject of this discussion, I believe that everything in the existing condition favors a maintenance of present values and an advance in some directions.

A longer and more extended address was made by William H. Matthai, of the National Enameling and Stamping Co. Altogether it proved an exceedingly interesting evening, and

those in attendance greatly enjoyed the remarks of the various speakers. At the

#### FRIDAY MORNING SESSION

reports were received from various committees. The one from the Committee on Nominations reported the names of the following officers, who were unanimously re-elected:

#### ELECTION OF OFFICERS.

##### PRESIDENT:

John Bindley, Bindley Hardware Co., Pittsburgh.

##### FIRST VICE-PRESIDENT:

Richard W. Shapleigh, A. F. Shapleigh Hardware Co., St. Louis.

##### SECOND VICE-PRESIDENT:

Brace Hayden, Dunham, Carrigan & Hayden Co., San Francisco.

The following gentlemen were re-elected to fill expiring terms on the Executive Committee:

Samuel A. Bigelow, Bigelow & Dowse Co., Boston.

J. D. Moore, Moore & Handley Hardware Co., Birmingham, Ala.

T. James Fernley, the inimitable, was also re-elected secretary-treasurer of the association.

#### CLEVELAND TO HAVE NEXT CONVENTION.

Earnest efforts having been made by the manufacturers and business men of Cleveland to induce the association to meet in that progressive city next year, they were crowned with success, as after due consideration that city was decided upon as the place for the holding of the next convention, which was settled by decisive vote in favor of that city as against the selection of New Orleans, which was the principal competitor for the honor. A change was made also in the time of holding the convention, it having been determined to hold it on the second Wednesday in October, instead of the usual and customary date in November.

#### MANUFACTURERS PRESENT.

An extremely large number of manufacturers were represented at the convention, either by the principals or others in the employ of the concern. Among the large number attending we give the following:

Alabama Steel & Wire Company, Birmingham, Ala.: R. D. Carver.

American Axe & Tool Company, New York City: F. E. Corey.

American Screw Company, Providence, R. I.: J. A. Nealey, W. H. Pritz.

American Steel & Wire Company: Frank Baackes, T. B. Coles, D. A. Merriman, T. H. Taylor.

American Steel Hoop Company: Frank L. Clark, J. W. Brainard, Severn P. Ker, W. A. Kingsley.

American Tin Plate Company: Howard M. Davis, Frank R. Dickerson.

American Wringer Company, New York City: Geo. Reuter, Jr., R. B. Munn, Jas. Richins, H. A. Taylor.

Atha Tool Company, Newark, N. J.: Edward Ingalls, Joseph B. Weed, Ed. F. Ross, H. H. Beers.

E. C. Atkins & Co., Indianapolis, Ind.: N. A. Gladding, Julian W. Perkins, A. H. Potter.

Baeder, Adamson & Co., Philadelphia: Chas. B. Adamson.

Baker-Vawter Company, Chicago: G. F. Watt.

G. & H. Barnett Company, Philadelphia: A. W. Barnett, Tom Almgill, J. M. Hottel.

Bellaire Stamping Company, Harvey, Ill.: H. L. Pipp, W. H. Pipp.

Boston & Lockport Block Company, Boston: M. H. Tarbox.

Brittan & Mathes Company, Pittsburgh: Arthur Brittan.

Carborundum Company, Niagara Falls, N. Y.: W. W. Acheson, Jr.

Clendenin Bros., Baltimore, Md.: Geo. H. Harper.

Cleveland Stone Company, Cleveland, Ohio: H. W. Caldwell.

Cleveland Twist Drill Company, Cleveland, Ohio: E. G. Buckwell.

Clinton Wire Cloth Company, Clinton, Mass.: Wm. H. Howard, C. F. Fairbanks, Jr., Walter H. Howard.

Columbia Lighting Company, Cleveland, Ohio: Chas. Patterson.

P. & F. Corbin, New Britain, Conn.: Chas. H. Parsons, J. W. Ryan, W. E. Bartholomew, Geo. L. Haven, Geo. A. Overton.

Corbin Cabinet Lock Company, New Britain, Conn.: Geo. W. Corbin, Geo. L. Corbin.

Dayton Roll & Wringer Company, Dayton, Ohio: G. H. Jantz.

Henry Disston & Sons, Philadelphia: Samuel Disston, Harry C. Disston.

Eagle Lock Company, New York City: H. B. Plumb.

Geuder & Paeschke Mfg. Company, Milwaukee, Wis.: T. A. Musgrove.

H C Tack Company, Cleveland, Ohio: C. C. Paine.

Jones of Binghamton, N. Y.: Gerry Jones.

Kearney & Foot Company, New York City: J. D. Foot, W. S. Tragle, R. C. Brinkley, Jr.

Keen & Hagerty Mfg. Company, Baltimore, Md.: D. M. Walke.

Kelly Axe Mfg. Company, Alexandria, Ind.: J. P. Kelly, Geo. T. Price.

Lake Erie Iron Company, Cleveland, Ohio: F. W. Davis.

Lamson & Sessions Company, Cleveland, Ohio: Geo. M. North.

Lovell Mfg. Company, Erie, Pa.: F. A. Denison, A. W. Walker.

McKinney Mfg. Company, Allegheny, Pa.: C. M. King.

Mallory-Wheeler Company, New Haven, Conn.: Russell Hotchkiss.

Midvale Steel Company, Philadelphia: Samuel Griffith.

H. M. Myers Company, Beaver Falls, Pa.: Chas. S. Hubbard.

National Enameling & Stamping Company, New York City: F. G. Niedringhaus, W. H. Matthai.

Nicholson File Company, Providence, R. I.: Wallace L. Pond.

Ohio Tool Company, Columbus, Ohio: Wm. E. Jones, Wm. G. Miller.

Old Dominion Iron & Nail Works Company, Richmond, Va.: Arthur B. Clark, R. M. Blankenship, H. R. Wayt.

Oliver Iron & Steel Company, Pittsburgh, Pa.: Henry B. Lupton.

Oneida Community, Niagara Falls, N. Y.: P. B. Noyes, G. N. Miller, H. M. Reynolds.

Chas. Parker Company, Meriden, Conn.: Fred. Pease, L. C. Parker, W. H. Lyon, C. C. Parker.

Peck, Stow & Wilcox Company, New York City: A. R. Treadway, W. R. Walkley.

Peters Cartridge Company, Cincinnati, Ohio: T. H. Keeler.

Pike Mfg. Company, Pike Station, N. H.: E. Warren Smith.

Reading Hardware Company, Reading, Pa.: J. E. Harbster, W. H. Bennett, G. N. Jacobi, Fred. L. Stellwagen, T. B. Hendrickson.

Richmond Cedar Works, Richmond, Va.: T. K. Parrish.

Richmond Leather Company, Richmond, Va.: J. H. Lyon.

Richmond Stove Company, Richmond, Va.: R. G. Reynolds.

Jno. A. Roebling's Sons Company, New York City: A. B. Conover.

Russell & Erwin Mfg. Company, New York City: Geo. J.

Laighton, B. A. Hawley, B. A. Earl, J. H. Van Newkirk.

St. Louis Shovel Company, St. Louis: J. C. Birge, S. S. Gould.

Sargent & Co., New York City: T. J. Atkins, Louis Sargent, Charles Clark Adams, Frank Guildener, Thos. Parkes, Jr., Edward Dunning.

O. P. Schriver & Co., Cincinnati, Ohio: O. P. Schriver.

Simonds Mfg. Company, Fitchburg, Mass.: J. B. Curtis.

Standard Chain Company, Pittsburgh: Robert Garland.

Standard Horse Nail Company, New Brighton, Pa.: Fred. S. Merrick.

Standard Wheel Company, Terre Haute, Ind.: D. P. Hale.

Stanley Rule & Level Company, New Britain, Conn.: Robert N. Peck, Alex. W. Stanley, Chas. B. Stanley.

Stanley Works, New Britain, Conn.: Geo. P. Hart, L. H. Pease, D. B. Woodbury.

J. Stevens Arms & Tool Company, Chicopee Falls, Mass.: T. E. Muzzy.

Stowell Mfg. & Foundry Company, Milwaukee, Wis.: A. W. Wagner.

Tower & Lyon, New York City: Warren M. Tower, Chas. S. Gallagher.

Tredegar Company, Richmond, Va.: Col. Archer Anderson, G. B. Hobson.

Tubular Rivet & Stud Company, Boston: W. C. Bray, Geo. L. Knight.

Van Wagoner & Williams Hardware Company, Cleveland, Ohio: L. F. Blue.

Wadsworth-Howland Company, Chicago: W. A. Campbell.

J. D. Warren Mfg. Company, Chicago: J. D. Warren.

Wilcox Mfg. Company, Aurora, Ill.: D. W. Simpson.

Winchester Repeating Arms Company, New Haven, Conn.: Irby Bennett.

Worcester Wire Company, Worcester, Mass.: W. H. Stoddard.  
Yale & Towne Mfg. Company, New York City: Henry R. Towne, Edward E. Magovern.

Among others who were present at the proceedings were the following:

T. E. Oliver, Oliver Bros., purchasing agents, New York City.  
J. R. Johnson, Barber & Ross, Hardware merchants, Washington, D. C.  
Geo. E. Eddy and Wm. Gardner, Henry Keidel & Co., manufacturers' agents, Baltimore.  
Geo. A. Smith, Smith & Courtney Company, dealers in machinists' and railroad supplies, Richmond, Va.  
Henry Olthmer, Wholesale Saddlery Association, Chicago.  
A. P. Mitchell, *Hardware*, New York City.  
Daniel Stern, *American Artisan*, Chicago.  
R. R. Williams, Hardware Editor *The Iron Age*, New York City.  
H. H. Roberts, manager *The Iron Age*, Chicago.  
C. M. Avery, C. M. Avery & Co., manufacturers' agents, Chicago.  
W. C. Heimbuecher, manufacturers' agent, Chicago.  
J. K. Wilson, Weir & Wilson, manufacturers' agents, Baltimore, Md.  
R. K. Carter, purchasing agent, New York City.  
C. B. Carter, secretary Southern Hardware Jobbers' Association, Knoxville, Tenn.  
Fred. H. Cozzens, secretary Inter-State Retail Hardware Dealers' Association, Detroit.  
Thos. P. Smith, secretary Pacific Coast Hardware Association, San Francisco.  
V. A. Moore, V. A. Moore & Co., manufacturers' agents, Atlanta, Ga.

#### SOUVENIRS.

The usual number of souvenirs were distributed by the manufacturers at the convention, among which may be mentioned:

Cleveland Twist Drill Co., Cleveland: Watch charm, handsomely plated, in the shape of a taper shank twist drill.

Bellaire Stamping Co., Harvey, Ill.: Enameled plaque.

Carborundum Co., Niagara Falls, N. Y.: Carborundum stick pin and carborundum pen knife sharpener.

E. C. Atkins & Co., Indianapolis, Ind.: Desk calendar on beveled board, with a raised medallion figure in the centre.

Reading Hardware Co., Reading, Pa.: Thermometer in ornamental bronze representing an escutcheon for a door.

Russell & Erwin Mfg. Co., New York City: Stick pin with their monogram trademark in enamel.

G. & H. Barnett Co., Philadelphia: Manicure file.

Standard Chain Co., Pittsburgh: Nickered pocket match safe.

Oneida Community, Kenwood, N. Y.: Miniature double spring game trap.

#### Ohio Hardware Association.

A meeting of the Executive Committee of the Ohio Hardware Association was held at the Grand Hotel, Cincinnati, on Wednesday, November 21st. Frank Harrison, of Toledo, who was away on a vacation for his health, was the only member absent. The present officers of the association are as follows: President, O. M. Scott, Marysville; vice-president, W. P. Bogardus, Mt. Vernon; financial secretary, W. C. Jones, Columbus; treasurer, H. G. Woodward, Sidney; Executive Committee, George B. Meyer, Cincinnati; George Guyton, Ada; Frank Harrison, Toledo; A. C. Rohrbacker, Akron; H. P. Davidson, Cleveland; Frank Winter, Lancaster; James B. Carson, Hamilton; S. H. Brown, Washington Court House.

An interesting programme was arranged for the annual meeting in February. There is every indication from the enthusiasm shown by the committee over the place selected, and the co-operation promised by the business men of Cincinnati, where the convention will be held on February 26th, 27th and 28th, that it will prove to be the record convention in the association's history.

#### New York Credit Men's Association.

The Business Literature Committee of the New York Credit Men's Association keep their members well posted by the dissemination of legal points of interest comprising new decisions of our courts, etc., affecting the interests of the mercantile community. In the last circular distributed by the committee we note the following:

##### NEW BANKRUPTCY LAW DECISION.

CHICAGO, Nov. 8.

A new ruling on preferences under the National Bankruptcy law has been announced by Judge Kohlsaat in the United States District Court. It is held that the giving of a chattel mortgage within four months of the filing of a petition in bankruptcy in pursuance of an agreement to give the mortgage, made more than four months prior to the time of filing the petition, is not a preference within the meaning of the statute. This decision was given in the case of John Boetter, proprietor of the Germania Summer Garden, whose petition was filed some weeks ago.

##### ANOTHER CASE DECIDED LAST WEEK WHERE OUR MEMBERS ARE INTERESTED.

A plumber recently filed a petition and schedules in bankruptcy showing assets of about \$25, and liabilities of \$6,898 unsecured, distributed mostly among the large wholesale plumbers' supply houses, many of whom belong to our Association. Suspecting fraud, a number of the creditors retained counsel to unearth it. It was discovered that he had collected \$998 from the city on a contract a few days before filing his petition. He claimed he had delivered it to his sister-in-law to repay a loan. Evidence was collected and placed before Referee Pendleton proving the falsity of this claim, and the referee has ordered him to turn this money over to the trustee for the benefit of the creditors. He also recorded a deed of his house to his wife shortly before the bankruptcy. This will be immediately contested with the result that the creditors who have prosecuted will probably be paid in full.

This shows the superiority of the Bankruptcy Law over the old assignment laws from the creditors' standpoint, where they take advantage of their opportunities to follow the debtor. The attorney says that it would have been virtually impossible to reach this result under the old system; and with only a few improvements we are seeking, the present law would come close to stopping the old familiar practice.

#### Peters Cartridge Co.'s New Calendar.

The Peters Cartridge Co. have excelled all their previous successful efforts in getting out their calendar for 1901 for the trade. This company has several times introduced some decidedly pleasant and satisfactory innovations in the line of ammunition that have made it famous with the expert sportsmen of the world. So in the matter of a calendar, it has this year departed somewhat from what has been accepted as the ammunition type of calendar, and has gotten out a calendar that is a decidedly pleasing novelty in this line.

The background shows a large number of little game shooting scenes, covering a wide range of field shooting. The special points of interest, however, are the three elegantly-executed vignettes, the upper one showing a typical trap shooting scene, with its little group of eager contestants and friends, and still more eager dog, ready to dash away and retrieve the bird. Below, on one side, are a company of Uncle Sam's boys engaged at long range rifle practice under the direction of an officer with a telescope. At the right is a group of gentlemen engaged in revolver practice. The effect of the calendar, whether taken as a whole or in detail, is most pleasing.

The Peters Cartridge Co. will be pleased to send this calendar to any sportsman who wishes the same, upon receipt of ten cents for mailing expenses. It is mailed free to dealers.

## THE PAN AMERICAN EXPOSITION, 1901

The task which Paris had in selecting the Goddess most beautiful, was trifling compared with that of deciding which of the many beautiful features of the Pan-American Exposition is most to be admired. One feels the difficulty of making such a decision now that the buildings are reaching a stage of completion and their architecture, their color, and their landscape setting, all present features that excite enthusiastic admiration. One feels the difficulty now that the framework of the principal buildings has been covered with staff and the staff itself is receiving the varied tints and brilliant hues which, together with the architecture, are to distinguish in outward appearance this Exposition of all the Americas from any that has preceded it, and which will mark the beginning of a new era in Exposition building.

First one grows enthusiastic over the graceful towers and minarets, outlined against the sky, and the arcaded facades with overhanging eaves which are reminders of those picturesque mission buildings that tell of Spanish occupancy of California and Mexico. Or one falls to admiring the colonnades and pavilions, the loggias, domes and lanterns, with their elaborate sculptural adornments, and the grilled windows with their richly moulded frames. All these features of the Exposition architecture, speaking of Moor-

and Spaniard and the fantastic ideas which they originated, and artists and architects of later generations perpetuated, greet the delighted vision now that the Exposition structures are nearing completion. Surely, one thinks, this will be the great feature of the Pan-American over which the millions who come here next Summer will rave.

### THOSE BEAUTIFUL TOWERS.

But then you look at those beautiful towers of the Machinery and Transportation Building, which Director of Color Turner has succeeded so well in painting, or the pavilions of the same building where the color has been laid on with a richness and beauty that it is simply impossible to describe, and you say that if the whole Exposition is to be like this, radiant in all the colors of the rainbow, this, indeed, will be the feature which will make it the most beautiful the eye of man ever gazed upon. Then next you go enthusiastic over the sculpture, the beginnings of which are now in evidence, or the landscape effects, which are in a most remarkable state of advancement, considering that a

winter is yet to intervene, and so it goes and you are fairly bewildered by the beauty you see around you already, though the opening of the gates is yet six months away, and the finishing touches will add many times to the impression to be obtained from the *tout ensemble*.

From the Electric Tower, that wonderful work in engineering, the eye glances westward and catches the glint of the sunlight on the now completed towers of the Machinery and Transportation Building. Fancy a campanile of some old Mexican cathedral, rejuvenated by magic, exquisitely colored by the hand of an artistic genius and thrust against a Venetian sky. If you can do this you can, perhaps, get a faint idea—only a faint and inadequate one—of the beauty of the towers of this building. The architect gave Mr. Turner a splendid opportunity when he presented him with these towers in all their glory of pillar and pilaster, finial and arabesque and profuse sculptural adornment and left him to add the color. And Mr. Turner nobly measured up the requirements of the occasion and has joined with the architects and sculptors and designers to give us a creation whose radiant beauty will compare with the most splendid conceptions of artistic genius in any age and whose perishable nature is the only thing about it one has to regret.

It seems almost impossible that the builders of the Exposition can give us another structure so wonderfully beautiful as this, the first to reach completion, is seen to be. Yet there are others whose charms may rival it and one waits with impatient expectancy to see how the Electric Tower will appear when it has received the elaborate decorations planned for its embellishment and the ivory-like hues blended with blues and greens and gold which the staff will take on before the picture is finished, and when it is done and there is nothing to be added to complete the beauty of the Tower by day, there will still remain the task of deciding whether the spectacle by day is equal in beauty and grandeur to the spectacle at night when myriads of electric lights illuminate it, from the fountain and cascade at its base, to the farthest point thrust against the starry sky. And this, indeed, is a task that might well stagger even a better judge of beauty than the shepherd boy Paris, whose decision between the goddesses won for him the fairest woman of her time.

EDWARD HALE BRUSH.

UP-TO-DATE GLIMPSE OF  
PAN AMERICAN EXPOSITION  
VIEW OF NORTH TOWERS OF MACHINERY BUILDING FROM THE ROOF

### "Comstock's Philosophy."

J. B. Comstock has figured in Hardware history as "The Man in the Corner" for so long a time that he has "cornered" the name, and it would be a misnomer to apply it to any one else. He possesses the happy faculty of giving trade information applying to the products of the Corbin Cabinet Lock Co., New Britain, Conn., in a style original and quite unique, by sandwiching between the cuts and list prices shown on the pages of their monthly circular, "Our Monthly Letter," as they call it—gems of philosophic thought and ethical sentiment that would hold their own in the way of apt expression and concentration of wisdom with Rochefoucauld, Emerson, Colton or even our ancient oracle Epictetus. From his November letter we extract the following:

"In the past few months we have heard it stated frequently and with emphasis that the young man starting upon a career has not so good a chance for achieving success as had the young man of a generation ago, but I really cannot see that the facts bear out this assertion. The country is constantly growing bigger and richer with the introduction of new pursuits and development of old ones, and the restless energy and ambition of young men were never so valuable as at the present time, or its value so universally recognized. 'Lack of young blood' is occasionally given as the reason why an old establishment fails to hold its own, and this single fact is recognized as sufficient cause for losing ground. The hey-day of youth is put in harness and turned to account in all the branches of trade, and young men with talent can find ample opportunity for its exercise. Changed conditions, new methods, new ideas require the nervous force and mental elasticity of young men in their execution, and the 'boys' of a house, who carry out the plans that insure its growth, are necessary to its prosperity.

"The same conditions hold good in other fields of effort. Literature, art, the drama, the pulpit, law, the sciences—all have their 'boy wonders' who are given the greater prominence because of their youth and whose crudities and rawness are forgiven because of the hope of greater things to come when experience has brought riper judgment. The portraits of famous people in the newspapers show more youthful faces than ever before. Even in our homes the rule is growing to be 'Parents, respect your children' and the wholesome discipline of an older day has given way to a dangerous laxity in the desire to foster the growth of any undeveloped talent in the coming generation.

"The larger size of the big institutions gives the young man a chance to rise higher in them than would have been possible in former days. And if he is willing to forego pleasures that tax his strength needlessly and to undergo privation, working and living with a single aim as did the men who are to-day at the head of affairs, he has just as good a chance to start for himself and an equal prospect for success. If some of the old lines of endeavor are closed to him there is a still greater number of others to take their place. There are new and growing concerns all about us owned and run by young men who have the bearing and the concentrated earnestness that command success, and I am sure that the number is greater than has ever been known before. The country has need of young men of promise, and they can command and do receive a reward in proportion to their worth, just as they always have done."

### Motor Lawn Mowers.

The cricket-ground horse, with his soft felt shoes, is doomed. The lawn mower will in future be fitted with a motor. The *Irish Wheelman* is informed that some "well known lawn mowers and agricultural implement makers have running one of their large lawn mowers fitted with a motor, supplied by the Motor Carriage Supply Company. The motor is doing its work well, and, no doubt, in due course, the motor mower will become a common object."—*London Express*.

### Notable Catastrophes in the United States.

The greatest conflagrations which the United States has ever had were the one in Chicago in 1871, in which \$190,000,000 of property was destroyed; the fire in Boston in 1872, in which the damage was \$80,000,000, and the blaze in New York in 1835, in which 600 warehouses were destroyed and the damage was \$30,000,000. As the population of New York at that time was only about 250,000, or about like that of Newark, N. J., now, the loss was severer proportionately than one many times larger would be in 1900. Chicago's fire, though—and Chicago had a population of only a little over 300,000 at the time—was the most destructive which ever occurred anywhere in the world, with the possible exception of that in Moscow in 1812. Chicago's certainly exceeded the damage at the conflagration in London, which is called the Great Fire, which occurred in 1666.

Johnstown, Pa., in 1889, furnished the most destructive of floods (Johnstown's being from a bursting reservoir), of the United States until that at Galveston on September 9, 1900. The property loss at Johnstown was approximately \$10,000,000, and the loss of life was 2150. The destruction at Galveston was over 5000 in life and about \$30,000,000 in property. The bursting of a reservoir in Mill River Valley in Massachusetts in 1874, destroyed several little villages and drowned 150 persons. Floods on the Mississippi have frequently destroyed from \$5,000,000 to \$10,000,000 of property at a time, and more than once drowned from 1000 to 1500 people.

The most destructive tornado which ever hit a large city in the United States was that which destroyed 400 lives and \$10,000,000 in property in St. Louis, in 1896. Louisville, the second largest city every struck in the United States by a tornado, lost 100 lives and \$2,500,000 of property in 1890. A tornado ravaged the coast of Georgia and South Carolina in 1893, which destroyed 1000 lives and \$2,000,000 of property. The most remarkable collection of tornadoes which ever visited the United States at any one time was on February 9, 1884, which afflicted Virginia, North Carolina, South Carolina, Georgia, Mississippi, Tennessee, Kentucky and Illinois, sixty distinct storms being traced on that day in those States, in which 1000 persons were killed and 15,000 buildings destroyed.

Charleston, S. C., in 1886, had the severest earthquake ever experienced in a city of the United States, in which the destruction of life was fifty and that of property \$5,000,000. New Madrid, Mo., and the lower Mississippi Valley had a series of earthquake shocks in 1811 which destroyed many villages, but the aggregate losses were not as great, owing to the region being sparsely peopled and most of it having no people at all, as in Charleston.

The Coast of the Atlantic and of the Gulf of Mexico has had many hurricanes and a few tidal waves, but none of them approached in destructiveness that which has just occurred at Galveston. With characteristic American courage, elasticity and adaptability, however, the afflicted communities quickly recovered from the effects of these disasters. New York more than doubled its population in the fifteen years immediately following its great fire in 1835. Chicago has five times as many inhabitants now as it had at the time of its conflagration in 1871. Before the embers of Boston's fire of a year later were put out, the property owners of the burned district were offered more for the land which was covered than was asked a day earlier for the land and the buildings which were upon it. A new and greater Galveston is already rising on the ruins of the old. This is the American way.—*Leslie's Weekly*.

"You ought to be ashamed to swear so dreadfully at the caddy. He is the minister's little boy."

"It's all right. His father believes in infant damnation."—*Life*.

## RECENT TRADE PUBLICATIONS.

**LALANCE & GROSJEAN MFG. CO.**, 19-21 Cliff Street, New York. Booklet having reference to the agate nickel-steel ware cooking utensils with which this well-known company have been long identified.

**EVERY STAMPING CO.**, Cleveland, Ohio, are distributing an ornamental line of blotters, attractively gotten up, in the interest of their Never-Break Cooking Utensils, and also the Never-Break Sled Skates.

**LAWRENCE STOVE MFG. CO.**, Buffalo, N. Y. Pamphlet catalogue of 28 pages, covering the line of Gas Heaters and Hot Plates manufactured by this progressive concern, the contents of which embrace a large variety of these goods, provided with all modern improvements, thoroughly up to date. In connection with its contents, a page is devoted to cuts they distribute for advertising purposes, which is an excellent feature, showing that they have electrotypes of all their specialties, which they are glad to furnish free of charge to their patrons.

**WORTHINGTON PUMPING ENGINE CO.**, 120 Liberty Street, New York. Souvenir catalogue distributed at the Paris Exposition; oblong pamphlet of 52 pages on the finest coated paper, and with superb half-tone illustrations, the artistic excellence of the entire pamphlet being of the highest grade for this line of work. The reading matter is printed in four languages, and exhibits in a manner reflecting great credit on the company their superior product of Worthington pumps exhibited by the allied Worthington Companies, and comprising the largest exhibit of pumping machinery of a single type ever shown in an exposition.

**SAM'L C. TATUM CO.**, Cincinnati, Ohio. Pamphlet catalogue of 56 pages for 1901 of ice cream freezers, copying presses, mechanics' tools and Hardware specialties manufactured by this well-known firm. Embraced in its contents is a full description of their "Queen" and "Pearl" ice cream freezers, which popular product met with great success during 1900. The contents include the "Standard" and Column copying presses, chest rollers and rigid truck casters, "Samson" truck casters, and Standard letter-boxes manufactured by this firm; also dumb-bells, quoits, harness hooks, match safes and similar Hardware specialties with which they have been identified for many years.

**ALLEN, COMSTOCK & CO.**, 11 William Street, New York. We have received from this well-known firm an interesting pamphlet of 26 pages, having reference to the Drawback on Exports, and filled with valuable information for manufacturers and exporters. This embraces a statement of the purpose of the customs drawback law, its advantages to manufacturers and exporters, and includes in its contents tables of foreign currencies, weights and measures, and the value of foreign coins, information regarding which is essential to every one exporting Hardware of any description. Any one interested in the large and growing export business of the country would find this pamphlet very valuable.

**RED JACKET MFG. CO.**, Davenport, Iowa. Catalogue and price list No. 26 of Red Jacket Quick Repair hand and power pumps, tubular well valves, cylinders, wrought iron pipe, pipe fittings, brass goods, hose and hose fittings, and well supplies. Included in the contents of this catalogue will be found a line of haying tools, which include hay carriers, hay forks, tracks, pulleys, slings, etc. The catalogue is a pamphlet of 184 pages, printed on good paper and well illustrated. It seems to be replete with information regarding this line and compiled in a

manner that would indicate the amount of care made necessary in its construction. It has a very attractive bright red cover, with gold embossed title and a portrait of the celebrated Indian, Red Jacket, ornamenting it.

**CLEVELAND PNEUMATIC TOOL CO.**, 74 Frankfort Street, Cleveland, Ohio. Thirty-six page pamphlet catalogue, embracing their manufactures of Pneumatic hammers, drills and other pneumatic appliances. This catalogue is printed in the highest style of art on superb coated paper, enabling them to show the most graphic illustrations of the various operations of the tools referred to in its contents. This method of illustrating is worthy of commendation, as one sees at a glance the various uses to which these tools may be applied, shown in the most graphic manner imaginable, by giving the actual operation as well as the description and designs of the several tools. This class of tools is rapidly coming in vogue in all large plants where speed and accuracy are considered essential.

**UP-TO-DATE MFG. CO.**, Terre Haute, Ind. Pamphlet catalogue of 36 pages, oblong in shape, printed on good paper, and well illustrated, showing their line of wire fencing and gates, which are illustrated throughout in good form, conveying a perfect idea of the ornamentation, and showing that from their various ornamental styles the name they have selected for the company is not out of place, as they are certainly up to date. They also manufacture in addition a number of wire specialties, such as tree and shrubbery guards, arches for vines and flowers, flower guards, etc. Included in the assortment shown in this catalogue is a number of wire and iron signs, modern in style and construction. In the circular which accompanies the catalogue we notice the statement is made that they make over 150 styles of fencing.

**CHICAGO FLEXIBLE SHAFT CO.**, 158-160 Huron Street, Chicago, Ill., 32-page pamphlet catalogue, large size, oblong, of Stewart Gas Blast Furnaces and Rotary Pressure Blowers, which are made by this company. This catalogue is handsomely printed on excellent paper, the frontispiece showing the office and works of the Chicago Flexible Shaft Co., opposite which is an illustration of their extensive plant at Dundee, Ill. The Stewart Gas Blast Furnaces are illustrated throughout with fine half-tone illustrations, each of them occupying full pages, and showing the great variety of purposes to which they are specially adapted; also the uniformity of the work performed, and the economy and facility of their operation. These furnaces are provided with burners adapted to different kinds of gas, either illuminating gas, water gas, natural gas or gasoline gas. They are improved to the extent that always insures an absolutely uniform mixture, producing perfect combustion and making no smoke, soot or odor, there being no necessity for the furnaces being connected with the chimney. The manufacturers call attention to the great advantage of using a gas blast furnace in machine shops and manufacturing establishments, as well as the great saving of time, economy of fuel and cleanliness, and the convenience thereby secured, producing, as they invariably do, superior work. In addition to the sizes illustrated in this catalogue, the company have patterns for other numerous sizes and styles, and adapted for a great variety of purposes. They solicit correspondence on the subject, and would be pleased to receive any communication having reference to the adoption of these improved methods in any manufacturing plant.

## NEW GOODS AND SPECIALTIES.

### Milwaukee Automatic Hub Coaster and Brake.

The Milwaukee Automatic Machine Co., Milwaukee, Wis., are placing before the Hardware and sporting goods trade the Milwaukee Automatic Hub Coaster and Brake, which we here illustrate. It is a simple device, which combines an absolutely free coaster and brake in one. It can be attached

MILWAUKEE AUTOMATIC HUB COASTER AND BRAKE.

to any bicycle, and the general symmetry of the machine will not be disturbed by its appearance. It is constructed of the best material possible, light in weight and compact in mechanism, every effort being made to avoid anything of a complicated character in its construction. It is readily adjusted, or can be taken off the wheel without the necessity for the assistance of an expert. In its action, the moment the rider stops pedaling, the wheel will coast without binding, while a back pressure on the pedals will immediately put the brake in operation, and not even require a "kick-off" to release it, as it is at all times under the full control of the rider.

### Toy Freezers.

North Bros. Mfg. Co., Philadelphia, Pa., are distributing through the Hardware and housefurnishing goods trade the toy freezers of the "Lightning" and "Gem" patterns which have become deservedly popular, and are meeting with large sales. In fact, they are fac similes or models of their celebrated freezers of the same name, so that they are not simply sold as playthings, possessing no merit except as toys, but through their use ice cream can be made in them precisely the same as in the larger freezers, if the usual methods for freezing cream are adopted. The can, when full, holds nearly a pint. The pails are made of cedar, and are put together with electrically-welded wire hoops, all of the metal parts of

TOY FREEZERS.

these toy freezers being handsomely tinned, so that independent of serving as a toy for the children's amusement, they would be found very convenient should a small amount of ice cream be desired in the sick room or for invalids. The goods are handsomely finished, put up singly in strong paper boxes, and packed one-half dozen in a case.

### Rapid Air Rifle.

The Rapid Rifle Co., Ltd., Grand Rapids, Mich., are manufacturing the Rapid Air Rifle, of which we give an illustration in this article. It is an all-metal, full-nickled air rifle, and presents the appearance of a fine, high-grade hammerless

sporting rifle. It is light, and of a commendable size that will be appreciated by the boy who secures one. Among its uses that of a target rifle for lawn practice is a desirable feature. It is calculated for BB shot, and it is so constructed that the ball will not drop out when gun is pointed downward, if inserted before cocking. The inner barrel is slightly swedged at the breech, and is true to gauge, consequently making it much more accurate as a shooter if the balls are round and true to size, as it is possible to get a smooth bore. The breech block is so constructed that it cannot blow out.

RAPID AIR GUN.

The "Rapid" revolving disc used in connection with the plunger insures long use and a perfectly air-tight plunger-head, thus preventing the escape of air when gun is discharged, creating a loud report, and giving increased velocity as the result. The revolving disc distributes the wear of the sear over a space about 2 1/8 inches, while heretofore it has been confined to about 1/16 of an inch. The company have applied for a patent on the "Rapid" link attachment, which prevents bending of wire when cocking the action. This method of construction insures a straight pull, and provides a simple and strong action to the rifle. The manufacturers claim that the rifle is constructed with a special view to adjustability, ease of replacement, durability and simplicity. Parts are easily procured and placed, which means quick service in case of breakage. Even the sights are adjustable, and so arranged as to get results similar to those obtained in sporting rifles.

### Sheet Steel Registers and Ventilators.

Canton Steel Roofing Co., Canton, Ohio, are meeting with unqualified success in the distribution of their new sheet

SHEET STEEL REGISTERS AND VENTILATORS.

steel registers and ventilators. They seem to meet a requisition that has long been needed for something of this kind that may be relied upon as being absolutely non-breakable. By the new process of construction, manufacturing them as they do entirely from sheet steel and steel plates, from their careful construction and the use of this modern material, they are made absolutely indestructible under ordinary risks. The illustration that we present herewith shows one of the several patterns in which these goods are placed upon the market, presenting externally many of the features that are common with corresponding styles of registers, but much

smoother, handsomer and better finished goods are possible than has previously been the case in the marketing of registers and ventilators manufactured from cast iron. A full line of sizes is manufactured, running from 4 x 6 to 36 x 36 inches, and these are finished in all the various styles of modern finish, which include japanned black or white, brass, bronze, copper, etc., while the prices at which they are supplied to the trade do not exceed those made from cast iron, notwithstanding the many advantages of the use of this more serviceable material.

#### Sears Blacksmithing Device.

George Sears & Co., Clinton, Iowa, are placing before the market through the Hardware and supply trade, the blacksmithing device which we illustrate herewith. It is marketed under the name of the Little Giant No. 1, and is one of a number of blacksmithing devices that are made by this firm

SEARS BLACKSMITHING DEVICE.

that have caused a great deal of comment and attention from blacksmiths who have unanimously pronounced them great labor savers in the facility with which they accomplish the desired results. The No. 1 is a tool that weighs 250 pounds, and is mounted on a heavy stand covering a floor space of 1 x 3 feet, and among the capabilities and capacity of this device, the following may be mentioned: As a punch it will punch a 1-2-inch hole through 7-16-inch iron; a 3-8-inch hole through 3-8-inch iron, and is provided with the following sizes of punches: 3-16, 1-4, 5-16, 3-8, 7-16 and 1-2 inch, and these punches are furnished with each machine. As a power shear it will cut 3 x 1-2, 4 x 7-16, and 5 x 3-8 inch cold iron, and will also cut plow steel. As a round iron cutter, it will cut any size bolt or bar up to 3-4 of an inch. Each machine is furnished with all the necessary punches, dies and tools necessary for the work, and is sold under a guarantee from the makers. When complete with all attachments, it includes six punches and revolving die. The manufacturers state that the lever on all their machines is but 36 inches

long, but with this leverage the power is something remarkable. It is built on scientific principles, the parts of which are extremely simple, and yet is one of the most durable machines on the market. It can be sold at a moderate price. The knives in the shears are provided with two cutting edges, which enable them to be reversed and interchanged when necessary.

#### Leonard Cleanable Refrigerators.

The Grand Rapids Refrigerator Co., Grand Rapids, Mich., who are the manufacturers of the Leonard Cleanable Re-

FIG. 1—THE LEONARD SLIDING AND ADJUSTABLE SHELVES.

frigerator, are preparing for next season's trade by adopting a number of very valuable improvements connected with the manufacture of this important line of goods. We illustrate herewith in Fig. 1 the Leonard Cleanable Refrigerator, with their latest improved sliding and adjustable shelves. This has been a feature in construction long desired by the users of refrigerators. Sliding shelves have been adopted in almost every other desirable article in connection with the domestic economy, but this is the first time that this valuable improvement has been embodied in the construction of a re-

FIG. 2.—LEONARD PORCELAIN LINED REFRIGERATOR.

frigerator. By means of this patent, anybody can place the shelves at any desired height in the refrigerator by simply changing the guide strips from one slot to the other, which may be done without the use of any tool whatever, as they are not fastened by screws or locks of any kind. By a close adjustment of this kind, an opportunity is given to put in an extra shelf for pies, etc., that do not require much height of space, and the capacity of the refrigerator is increased fully one-third without extra cost. In Fig. 2 is shown a new line which this company has added to their refrigerators this season. It is their porcelain-lined refrigerator, of which they

manufacture five sizes. The lining is composed of real porcelain enamel of similar construction to that made popular in the blue and white kitchen utensils, the blue, of course, being turned outside and the white inside. The porcelain is in solid sheets, and is made to fit all parts of the provision chamber, the joints being laid in cement and held in place by nickel strips.

#### Lawrence Odorless Blue Flame Heaters.

Lawrence Stove Mfg. Co., Buffalo, N. Y., are manufacturers of the Lawrence Odorless Blue Flame Heaters, illus-

LAWRENCE ODORLESS BLUE FLAME HEATERS.

trations of which we present herewith. They have polished steel drums; all ornamentation, including base, is finished in nickel, making it an extremely attractive heater to be handled by the Hardware trade. The Style No. 3 shown in our illustration, is made in two varieties, with plain top and also with nickel top. The latter style has proved to be an extremely popular one, having a removable urn, which admits of heating water very quickly when desired. It is fitted with wood handle cocks, instead of valves, as they are claimed to give better results in the long run, and are not apt to leak, the housekeeper being able to tell at a glance whether the gas is on or off. It is guaranteed by the manufacturers to be odorless in operation, and is furnished with a mica door for lighting. It presents every indication of being a popular seller with the trade. The company manufacture several lines of similar heaters adapted for any purpose from the bath room to the parlor. They comprise a complete line of sizes in both flueless and flue-connection heaters, embodying in their construction all the latest improvements connected with the manufacture of gas heaters.

#### Ideal Ball-Bearing Clamp.

Thomas Hall, 10-14 Water Street, Brooklyn, N. Y., is manufacturing and distributing through the Hardware and

IDEAL BALL-BEARING CLAMP.

supply trade the Ideal Ball-Bearing Clamp, an illustration of which we give herewith. It is a very convenient appliance, adapted for machinists and all other mechanics, especially model, pattern and cabinet makers. Among its numerous commendable features may be mentioned: It is self-adjusting to uneven surfaces. It will lie flat on surface plate, and close true without side motion. It is very easy to operate by hand only; a nut turned by the fingers will quickly adjust to the proper thickness, while the powerful eccentric on the lever makes a tight grip. The use of a wrench is entirely unnecessary. The balls allow the work to revolve, or the

clamp to swing, on the work, while at the same time keeping a firm grip on the material. Among its conveniences, it may be used as a vise, and possesses unusual strength, being made entirely of steel.

#### Automatic Safety Window Fixtures.

New Century Mfg. Co., 48 East Eighth Street, New York, are manufacturing the New Century Automatic Safety Revolving Window Fixtures and Sash Locks, which form one of the recent improvements in builders' window attachments, and which have become extremely popular with architects and builders, the devices possessing merit and utility. The cut indicates one of the many positions into which the Automatic Safety Revolving Window may be placed, either for cleaning or ventilating purposes. The device is a new one for turning the sash in windows so that they may be cleaned on either side from the interior of the room, the cleaner remaining standing on the floor, enabling the work to be much more quickly and better done, with greater safety. By using this special fixture, the liability to accident is avoided, and the customary step-ladders, window seats, or even expert window cleaners are not required. The most perfect ventilation can be secured by this automatic fixture even in rainy weather, as the window can be adjusted at any angle, entirely excluding the rain and admitting the air. Ventilation is possible from top, bottom and centre of window at the same time, or from either, as may be desired. The patent automatic latch, which is one of its special features, prevents the

AUTOMATIC SAFETY WINDOW FIXTURES.

sash from being turned, except at points indicated. Consequently it cannot be revolved by accident or carelessness. The bar locks in connection therewith prevent the slide bars from sliding up and down when sash is turned. The safety bolts, another feature, allow the window to be revolved at any point, but only after purposely releasing the bolts. These safety appliances make these fixtures especially desirable for dwellings, hotels, schools, hospitals, etc., and especially so in the modern office buildings as at present constructed.

#### Cutlery in China.

The Chinese have not yet learned to appreciate a well finished tool of any kind, and will not pay the extra expense of finishing, and the only tools that they require seem to be those that they cannot actually do without, such as razors, cheap knives, scissors, needles, saws, chisels, etc. For these articles the demand is very great, and the entire question is whether they can be manufactured cheaply enough to meet their requirements. In the question of razors alone there would be a tremendous market, as all Chinese shave their heads, as well as their faces. Germany is supplying a great number of these, and there is no reason why other makers should not have their share of the trade. The demand for better qualities will increase as the Chinese learn to appreciate a superior article, but to commence with, the foreigner must make according to the Chinese model.—*Exchange*.

**PATENTS** Preliminary Consultation Free.  
HENRY J. MILLER,  
55 Equitable Building, BOSTON.

REVIEW OF THE MARKETS.

**Wire Nails:** The amount of business still being done in Wire Nails is of considerable importance, resulting from the fact that stocks have not been kept up to any degree of fullness, orders having for some time been intended only for immediate requirements, and were frequently renewed. As no surplus stock is heaped up at the mills, the indications are that present prices may continue for some time. Quotations are named as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

|                                    |        |
|------------------------------------|--------|
| To jobbers in carload lots .....   | \$2.20 |
| less than carload lots .....       | 2.25   |
| To retailers in carload lots ..... | 2.30   |
| less than carload lots .....       | 2.40   |

New York prices continue without change, as follows:

|                                          |                |
|------------------------------------------|----------------|
| To retailers, carload lots on dock ..... | \$2.48         |
| less than carload lots on dock .....     | 2.55           |
| Small lots from store .....              | \$2.60 to 2.65 |

**Cut Nails:** There is almost an invariable steady demand from some sections for cut nails, not being seriously affected by the wire nail market, except in point of prices. This unchanging demand keeps the market in satisfactory condition, prices remaining at same standard as has prevailed for some time. The following quotations represent the market, f. o. b. Pittsburgh, terms 60 days, 2 per cent. off in 10 days:

|                                              |        |
|----------------------------------------------|--------|
| Carload lots .....                           | \$1.95 |
| To jobbers in less than carload lots .....   | 2.00   |
| To retailers in less than carload lots ..... | 2.10   |

New York quotations remain as previously reported.

|                                                      |                |
|------------------------------------------------------|----------------|
| To jobbers in carload lots on dock .....             | \$2.13         |
| less than carload lots on dock .....                 | 2.18           |
| To retailers in less than carload lots on dock ..... | 2.31           |
| Small lots from store .....                          | \$2.30 to 2.35 |

**Barb Wire:** Few changes in volume of sales are noticeable in this leading staple, the domestic demand for which continues very good, while the export demand is of greater activity. Prices remain as previously quoted for domestic trade, as follows, f. o. b. Pittsburgh, net cash 60 days, or 2 per cent. discount for cash in 10 days:

|                                                       |        |
|-------------------------------------------------------|--------|
| To jobbers in carload lots, Painted .....             | \$2.50 |
| Galvanized .....                                      | 2.80   |
| To jobbers in less than carload lots, Painted .....   | 2.55   |
| Galvanized .....                                      | 2.85   |
| To retailers in carload lots, Painted .....           | 2.60   |
| Galvanized .....                                      | 2.90   |
| To retailers in less than carload lots, Painted ..... | 2.70   |
| Galvanized .....                                      | 3.00   |

Ellwood and Baker Wire is 5 cents and Washburn & Moen Glidden 10 cents per 100 pounds higher than the prices above named.

**Plain Wire:** Market is reported in steady condition, with prices firm in harmony with previous quotations. Demand for manufacturing purposes is still very fair. Quotations are as follows, f. o. b. Pittsburgh, terms 60 days, or 1 per cent. discount for cash in 10 days:

|                                    |        | Base sizes. |        |
|------------------------------------|--------|-------------|--------|
|                                    |        | Plain.      | Galv.  |
| To jobbers in carload lots .....   | \$2.15 | \$2.15      | \$2.55 |
| less than carload lots .....       | 2.20   |             | 2.60   |
| To retailers in carload lots ..... | 2.25   |             | 2.65   |
| less than carload lots .....       | 2.35   |             | 2.75   |

Above prices are for the base numbers, 6 to 9. The other numbers of Plain Wire and Galvanized Wire take the several advances noted in the following table:

PLAIN FENCE WIRE ADVANCES (CATCH WEIGHTS.)

| Nos.             | Base                    | Galvanized.   |
|------------------|-------------------------|---------------|
| 6 to 9 .....     | \$0.06                  | \$0.40 extra. |
| 10 .....         | advance over base ..... | .40           |
| 11 .....         | " .....                 | .40           |
| 12 and 12½ ..... | " .....                 | .40           |
| 13 .....         | " .....                 | .40           |
| 14 .....         | " .....                 | .40           |
| 15 .....         | " .....                 | .75           |
| 16 .....         | " .....                 | .75           |
| 17 .....         | " .....                 | 1.00          |
| 18 .....         | " .....                 | 1.00          |

Russell & Erwin Mfg. Co., New Britain, Conn., and 43-47 Chambers Street, New York, have recently issued their price

list No. 4, which applies to their catalogue, Volume 9. List prices and discounts are included of the large line of goods of the company's manufacture. Quotations are also made on the extensive assortment of miscellaneous goods which the company carry in stock, thus giving a very complete set of general quotations.

**Linseed Oil:** The Dean Linseed Oil Co. quote as follows:

|                                      |                       |
|--------------------------------------|-----------------------|
| In lots of less than 5 barrels ..... | .61 cents per gallon. |
| In lots of 5 barrels or more .....   | .60 cents per gallon. |

The five-barrel price only applies to deliveries of that quantity at one time.

|                                                          |
|----------------------------------------------------------|
| Bottled Linseed Oil, 2 cents per gallon higher than Raw. |
| Calcutta Oil, 85 cents per gallon.                       |

THE ALBANY TRADE.

The closing month of the closing year of the century brings to mind many thoughts for the consideration of every person, not excepting the busy Hardware dealer. And be he a man of mature years, indulging in retrospect, the remarkable changes that he has witnessed probably challenge comparison with any of the other branches of trade.

While penning these few lines, our eyes light upon an old, old Hardware invoice hanging in a frame on our office wall, bearing the date of December, 1797. It is well preserved, the engraved heading being in bold, graceful script, and the written items perfectly legible. It is quite a remarkable fact that the person who signed and received payment on this bill was well known by one of the present attaches of our company. The signer must have been a very young man when he receipted the bill, for many years after, when our colleague knew him, he was past seventy years of age.

The items on the invoice include a pair of brass candlesticks and a steel snuffer, genuine bone knives and forks and carvers, an ivory-top caster, a japanned knife tray, a sieve and a bread basket. These are extended in pounds, shilling and pence, as it was before the day of the American dollars and cents. A brief glance at this quaint old invoice forcibly reminds us of the remarkable changes that have come to the Hardware trade in the interval. Some of the articles are now practically obsolete, and others are superseded by those of different materials which displace the bone, ivory and japanned-finished wares. The past, even in Hardware, is a subject too voluminous for a brief newspaper article. We must drop it and come down to the present time.

If the fickle weather of the past few weeks will now settle down to what is more seasonable, we may expect an excellent sale of holiday goods. Customers are ready to buy, and the merchants have prepared most tempting displays of attractive goods now classed as Hardware, but which, a few years ago, were foreign to Hardware stores. Everything depends upon the weather, that buyers and dealers may draw together for the profit of the seller and the gratification of the shopper.

Inventory, so soon to be considered, will not present as many conflicting problems as was the case a year ago. Then it was unquestionably a wise conclusion, in view of the unusual past advances in prices, to deduct from inventory footings a liberal discount covering possible declines that would naturally follow. The inevitable sag came, and large volumes of goods were judiciously moved by the jobbers at low prices, which they could well afford to do.

For quite a period uncertainty prevailed, but soon a better outlook was presaged and a strong tone was given to the market in leading lines, and with the almost certain result of the coming National election, which presaged a restora-

tion and continuance of confidence, values strengthened and fears of lower prices were dispelled.

The conditions now seem most auspicious. The demand for goods is active; orders for Spring needs are flowing in; mills are running steadily and merchants and consumers are decidedly busy.

In the present state of affairs, do not the existing market prices represent the true inventory values, and will not these values be sustained, at least through another year?

A perusal of the excellent report of the National Hardware Convention, contained in the preceding issue of *Hardware*, leads one to think that these conditions will continue.

ALBANY HARDWARE & IRON CO.

#### THE BALTIMORE TRADE.

December has brought us a large number of small orders and fewer remittances, but we expect the latter part of the month will reverse this order of things, as Christmas is coming, and the many little hoardings will likely be spent before its arrival, thereby filling the coffers of the retailer, from whence it comes in the direction to gladden the hearts of the jobber, who will, in turn direct its course to the vaults of the big manufacturer; so we can all be happy together, and sing praises for the good things enjoyed during the close of the nineteenth century.

Barring a few small sections in our territory, trade is in fine shape and likely to so continue for a long time.

The small sections referred to, including one county on the eastern shore of Virginia, are being given our most careful attention, deeming it, as we do, bad policy to urge the sale of goods upon merchants dependent upon farmers who are at the present time practically insolvent, and whose only security lies in the profits to be made on their next year's crops, which, if not realized, means for them financial ruin, and a change among the land owners of the county.

The demand continues for cutlery, guns, ammunition and other profitable goods, which we, particularly at this season of the year, push to the front. There is, however, a conspicuous absence of skate orders; nor do we expect many until after the first good freeze. The President's able and favorably-criticised message, now before Congress, for its deliberation, has cast a ray of sunshine upon the dark views of the political pessimist, and now let us hope such legislation will follow as to reflect a tower of light that will forever emblazon the Stars and Stripes upon the masthead of prosperity, and carry the stately ship over broad waters, bearing peace, liberty and justice and American manufactured goods to all men.

H. W. WEBB & SONS.

#### THE CLEVELAND TRADE.

The meeting of Congress this week causes some uneasiness in business circles, but as the election failed to seriously affect business, we may suppose that Congress will avoid experimental legislation. Common sense seems to be increasing and manifesting itself in politics. The magnificent business outlook could hardly be improved, and to keep things as they are ought to satisfy the most extravagant optimist.

Trade is surprisingly good and no cloud appears. The cry for improvement will continue to cause criticism, as the ideal is always in advance of the real, but this is a promise of growth if practical common sense prevails.

We are compelled to be a big nation, and must adjust ourselves to that. We are compelled to have colonies, and we ought to give the world a lesson in colonial management, comparable in excellence with our home government, and in doing so become a missionary to all people.

It is a test of our ability to use great power wisely for the benefit of the governed, and emphasize the value of popular government to all the world. We feel confident that this will be the result, and that this is the meaning of our compulsion into colonial expansion. "The love of the best" will continue to impose criticism; love of country will cause fear of failure, but the colonies will in the end be proud to be

affiliated with a nation so strong, so wise and so just, and the colonies of other nations will rise up and call us blessed. It is a great opportunity offered to a great people which must not be neglected.

THE LOCKWOOD-TAYLOR HARDWARE CO.

#### THE PITTSBURGH TRADE.

We can report business in a very prosperous condition. November footed up a good increase on sales of the same month last year.

The only "fly in the ointment" is the silly competition among jobbers themselves on a few of the leading staples. Nails, wire and shovels are sold below the cost of handling. The jobber's differential provided by the makers of these goods is small enough; indeed, those who have studied the subject of cost of selling, believe it is not large enough to cover that cost. Yet in the face of this, we are all giving away the larger part of our differential. When we consider what a large part of our total sales is made up of these items, it becomes a serious matter.

We are just emerging from a flood in our rivers. A sudden rainfall of two inches over the whole watershed of the Allegheny and Monongahela Rivers concentrated at Pittsburgh, and gave us twenty-seven feet of water, enough to flood cellars and cause a great deal of extra labor and some loss. These freshets usually come in January, February or March, a November visitation being very unusual.

LOGAN-GREGG HARDWARE CO.

#### THE SAGINAW TRADE.

In regard to trade conditions of the North Central States, the month of November has been an exceedingly active one in the Hardware line, although the weather has been open and the season backward. It does not seem to hamper trade in the least; collections are remarkably good, and the outlook is favorable. Cattle and hogs are bringing good prices. The potato crop, which is quite important in this locality, is large and bringing a fair price. The sugar beet industries this year have been more profitable than any previous season. The coal mines in this region are working full capacity, and employing more miners than ever before. All these things help to stimulate trade in this section of the country.

MORLEY BROTHERS.

#### THE COLUMBUS TRADE.

The situation is about the same as two weeks ago, as far as weather and trade are concerned. The weather is mild, and so far has not interfered with outside work only for a few days this Fall. Trade is still active, compelling us to work often at night in order to get goods off with any degree of promptness. There seems to be a tendency among retail dealers to place orders for Spring goods earlier than usual. Whether this is the result of efforts on the part of salesmen or with a belief that goods will be higher in the Spring is hard to tell. We are of the opinion that some goods will be higher, as there is no question but that they are too low. We are also of the opinion that other articles will be lower in price, as many goods are unreasonably high. A gentleman closely identified with a large manufacturer of a certain line of goods, said he felt certain they would have to reduce prices, as there was just 110 per cent. profit at present prices. Of course such unreasonable profits cannot be retained long, and, as a rule, when the break comes, it keeps on a down grade until there is no profit, and often times a loss, to the manufacturer. So the profit, no doubt, averages up about where it should be. Hardware, like a great many people, has its ups and downs.

THE SMITH BROS. HARDWARE CO.

#### THE ST. PAUL TRADE.

With the skies cleared from all political troubles for some years, we feel that business can and will go ahead without trouble of any kind; that values will be established firmly, and on a higher basis than for some time past. In fact, we

believe that we will have some years of business prosperity, and we hope that in all ways all people will be happy.

Our own section, while not blessed with a good crop, still manages to do some business; our orders are very satisfactory, and with a firmer market our dealers will, no doubt, be pleased with their sales.

The writer was at Richmond with the Hardware Jobbers, and had a pleasant time renewing acquaintances, talking over the trials and pleasures of jobbing Hardware with many, and now feels that it paid to attend the meeting. May we all meet in Cleveland next year with unbroken ranks!

C. W. HACKETT HARDWARE CO.

#### THE DAVENPORT TRADE.

The Iowa Hardware Jobbers will hold their regular quarterly meeting at the Savory House, Des Moines, on the 12th inst. The secretary, John Tredway, urges all members to be present. Following the National Hardware Convention so quickly, it is hoped that the same enthusiasm and harmonious effort will prevail that made the meeting at Richmond so interesting and profitable.

There is very little to say of trade conditions; of course there is no buying or selling, except for immediate needs, as jobbers and retail dealers alike are trimming stocks as closely as possible, preparatory to inventory.

The National Hardware Convention at Richmond was a great success in every way, and we are glad to note that *Hardware* and other trade papers were well represented there. For valuable space devoted to the interests of the Hardware trade, for cordial personal greeting at the Convention, and for kind words printed, we are truly thankful.

SICKELS, PRESTON & NUTTING CO.

#### THE SAN FRANCISCO TRADE.

Industrially, politically and meteorologically, everything conditional to the local trade is all right, and it never felt better. As a matter of fact, although the San Francisco and Oakland Retail Hardware Association is only about nine months old, it is feeling in such fine feather that it has decided on having a combination jollification-and-first-anniversary-meeting two days before this issue of *Hardware* goes to press. For this festival occasion, additional to much other attraction, the following gentlemen have important parts assigned them on the programme: O. F. Sites, secretary and treasurer of the Palace Hardware Co., and president of the Association; Henry Gracey, proprietor of two Hardware stores, and secretary of the Association; John P. Maxwell, Oakland Hardware dealer, and Frank F. Osborn, president and manager of the Osborn Hardware & Tool Co.

At a meeting within the past fortnight of the Executive Committee of the Pacific Coast Hardware Jobbers' and Manufacturers' Association, Wakefield Baker, of the firm of Baker & Hamilton, was re-elected president. The following vice-presidents were elected to represent the various cities represented at the meeting, viz., San Francisco, Seattle, Tacoma, Portland, Marysville, Sacramento, Los Angeles and San Diego: Charles Holbrook, of Holbrook, Merrill & Stetson, San Francisco; J. S. Goldsmith, of Schwabacher Hardware Co., Seattle; Frederic Mottet, of Hunt & Mottet Co., Tacoma; Henry Hahn, of Wadhams & Co., Portland; H. Cornforth, of J. R. Garratt Co., Marysville; Wm. Schaw, of Schaw, Ingram, Batchelor & Co., Sacramento; C. C. Reynolds, of Harper & Reynolds Co., Los Angeles; Melville Klauber, of Klauber, Wangenheim & Co., San Diego.

The matter of the case now before the Inter-State Commerce Commission, which case was brought by complaint of the Business Men's League, of St. Louis, against the Atchison, Topeka and Santa Fe and other railroads, was taken up for consideration. The final hearing of this case before the Inter-State Commerce Commission will take place in Washington, D. C., on the date of this issue of *Hardware*. A. C.

### JAP-A-LAC

is the hardest, smoothest, most elastic, brilliant and durable finish on the market for . . .

**Floors and Interior Woodwork.**

It is also used on Furniture, Wire Screens, Radiators, Iron Fences, Carriages, etc. Architects should specify it. Painters should use it. Builders Should insist on it. Our magazine advertising is creating a demand for

**JAP-A-LAC.**

Dealers should write for our money-making proposition.

**The Glidden Varnish Co.,**  
Cleveland, Ohio.

Rulofson, manager of the Hardware department of Baker & Hamilton; Harvey D. Loveland, superintendent of the San Francisco Merchants' Mutual Adjusting Agency, and E. S. Pillsbury, attorney for the Pacific Coast Jobbers' and Manufacturers' Association, departed December 1st to be present at the Washington meeting

J. H. Kruse, largely active in lumber and Hardware, and distinguished for being the longest in the San Francisco trade, expresses himself as being pleased with the very decisive business revival. He is conscious of upwards of a million dollars' worth of building contracts withdrawn in the midst of the McKinley-Bryan campaign, and now reopened and being pushed along to completion. He favors this business expansion, also America's expansion ideas, and hopes that the name America will soon become so respected that he shall never again learn, as he recently did, of a shipment to England of a 1000 dozen scissors to get the Sheffield stamp.

TRADES PRESS ASSOCIATION.

#### Our Commercial Relations with Germany.

A good deal of anxiety seems to have been wasted with reference to the trade relations between the United States and Germany. It will be remembered that a fear was expressed some months ago that certain trade restrictions proposed in Germany might seriously interrupt the commercial relations between that country and the United States, and especially decrease our exports to that country in agricultural products. Figures just issued by the Treasury Bureau of Statistics show that our exports to Germany, in the ten months ending with October, 1900, were \$27,000,000 greater than those in the corresponding months of last year, an increase of about 20 per cent., and that our imports from Germany show an increase of \$8,000,000, a gain of over 10 per cent. Of the forty great articles which compose the bulk of our exports to Germany, more than two-thirds show an increase in 1900, as compared with 1899. Those which show the principal decrease are hog products, corn, wheat, fertilizers and certain lines of machinery. Those which show an increase are cotton, flour, fruits, tobacco, timber, mineral oils, cotton seed oil, oilcake and meal, tallow, paraffin, rosin, turpentine, coal, copper, builders' Hardware, scientific and electrical instruments, agricultural implements, sewing machines, cars and furniture.

Copper shows an increase of more than \$3,000,000, mineral oils \$2,000,000, tobacco and agricultural implements nearly \$1,000,000 each, and unmanufactured cotton over \$28,000,000, while in the list of articles which show a decrease there are but two cases in which the falling off is as much as \$1,000,000—corn showing a reduction of a little more than \$1,000,000, and wheat little more than \$2,000,000.

The following tables show the principal exports to Ger-

many in the ten months ending with October of 1899 and 1900:

PRINCIPAL ARTICLES IN WHICH EXPORTATIONS HAVE INCREASED.

|                                      | 1899.<br>(10 months.) | 1900.<br>(10 months.) |

Fletcher Hardware Co.'s New Catalogue.

The Fletcher Hardware Co., Detroit, Mich., have recently published, and are now distributing to the trade, the most important catalogue they have ever issued in connection with their business. It is a handsomely bound volume with half morocco back and corners, of 1,264 pages, in addition to an index of 60 pages, the size of the pages being  $8\frac{1}{2} \times 11\frac{1}{2}$  inches, making it an extremely attractive and useful volume. The frontispiece gives an illustration of the main warehouse, office and salesroom, 61-69 West Woodbridge Street. Opposite this illustration is given a full-page cut of their storage warehouse, 78-82 West Woodbridge Street. In connection therewith a full-page illustration is given of the receiving and shipping dock for all points on the Great Lakes. These three illustrations convey an admirable idea of the extent of the facilities possessed by this house for the transaction of the business indicated by the contents of this catalogue. The catalogue is intended to cover their entire line of Hardware without going into unnecessary details of description, but shows only a partial line of their Sportsmen's goods.

This, they explain, is on account of the fact that they issue a separate catalogue annually, which includes in its contents all kinds of ammunition, fishing tackle, bicycles, bicycle sundries, etc., believing it desirable that this class of goods should be exploited annually rather than rely upon the contents of the main or large catalogue, as so many new ideas are annually developed and new goods of importance added to stock, making it necessary that more frequent consideration be given to this line of goods. The catalogue under review is fully illustrated throughout, being printed on excellent paper for the purpose, and the numbers and descriptions are thorough, giving every indication of the trained knowledge of a catalogue compiler thoroughly conversant with the line of goods he is engaged in compiling. The illustrations throughout are uniformly wood cuts, very few, if any, half-tones being used, giving more distinct impressions regarding the goods, and verifying in the illustration the description which accompanies it. It is divided into fifteen departments, each occupying several divisions in the catalogue proper, commencing with (1) Mechanics' Tools, (2) Farm and Garden Tools, (3) Wire Fencing, Poultry Netting, Screen Cloth, Doors and Windows, Glass and Putty, etc. Each division is designed to embrace every article that would naturally be sold under that head, so that the stove and tinware dealer desiring to find articles more especially in his line would find the several divisions that apply exclusively to his end of the Hardware business. The dealer in house-furnishing goods would find embraced for his wants all the leading goods in the House-Furnishing Hardware line, a department which completes the book and covers nearly one hundred pages. Over one hundred pages are given to Cutlery and Plated Ware, a very complete line being shown, and illustrated with full-size cuts almost invariably; especially is this the case on pocket knives; 250 pages are devoted to Builders' Hardware. We mention these separate divisions as giving an idea how thorough and complete each division of the catalogue will be found. The index covering, as previously noted, 60 pages, embraces every article in the catalogue under a very taking arrangement in regard to the use of types, by which any reference can be readily made, the goods being cross-indexed under all the various heads that could be naturally applied to them. The care and consideration given to a volume so expensively elaborate as is a catalogue of this description, cannot but prove beneficial to the business itself, by increasing the facilities through which mail orders can be sent in an intelligent manner, that predicates prompt shipments and increased sales.

"Bobby, dear, wouldn't you like to be a missionary when you grow up?"

"An' git et! Not on your life!"—Ex.

THIS ILLUSTRATES OUR STYLE No. 1,

With one side turned off and the other turned down for a half or night light, or for other purposes where a small light is required temporarily; the little needle valve at the same time removing any obstruction from the rear of the gas orifice. Made in  $\frac{1}{2}$ ,  $\frac{3}{4}$  and 1 foot sizes when the needle valve is withdrawn. Can be turned into alignment.

PRICE—EACH 35c.

### Survival of the Curfew in England.

The revival a few days ago in Buckingham of the ancient custom of ringing the curfew bell is a reminder that this picturesque relic of Norman England still survives in more than thirty towns and cities throughout the country. At some of these the bell is rung at certain stated periods only. Thus, at Pershore, in Worcestershire, the curfew is only heard between November 5 and Candlemas, and at Brackley Church from Michaelmas to Lady Day only; while its original significance is, of course, entirely a thing of the past. "The knell of parting day" is—or was until recently—still tolled from Canterbury Cathedral, and from the Church of St. Nicholas, Bristol, every evening. By a code of instructions dated 1481, the suffragan of the Bristol diocese was directed "to ring curfew with one bell at IX. of the clock."

### Petroleum from New Zealand.

Before very long the New Zealand Oil Co. will begin to contribute to the world's supply of burning and lubricating oil. The mining lands acquired by the company extend over about 1200 acres, and it is reported that they include a very large quantity of oil-bearing shale. It is anticipated that the new industry will grow rapidly, as with oil at present prices there is a margin for very handsome profits. The property is situated in the South Island near Invercargill, and the Scottish blood in the working staff will no doubt insure a vigorous development. There is a sufficiently wide market in the islands themselves for the products of the company during the first year or two, but eventually New Zealand will enter the lists as an oil-exporting country. —Exchange.

### Give You Your Money's Worth.

Coldwell Lawn Mower Co., Newburgh, N. Y. [*Lawn Mowers*]: We think HARDWARE is enterprising, pushing, up-to-date, so to speak, and has a certain amount of get-up-and-get spirit about it, combined with a certain flavor of "I give you your money's worth when you advertise with us," that we like it—not for fun or sentiment, but for real business, and so long as you continue thusly you can count on our continuance.

## Soft Putty.

As a general rule glaziers' putty is required to harden after exposure to the atmosphere, and for this reason it is made with an oil capable of oxidation. But it is often the case that a soft putty is required, viz.: one which will not harden by exposure, and to make this white lead and tallow are needed. Take two gallons of linseed oil and mix with one pound of pure tallow, then add sufficient white lead to obtain the desired consistency, and you will have a putty which will remain soft forever. When it is necessary to loosen old glaziers' putty from window frames, etc., it should be gone over with nitric acid, which will enable the workman to take out the putty in about an hour after the application of the acid.—*Exchange*.

There is a little settlement of New Hampshire people in Kiowa County, Colorado. Among other things they brought with them the New Hampshire aversion to using any more words in conversation than are absolutely necessary. Two of them met on the road recently and indulged in the following dialogue: "Mornin', Si." "Mornin', Josh." "What did you give your horse for bots?" "Turpentine." "Mornin'." "Mornin'." A few days later the men met again, and here's the way a hard-luck story was told in mighty few

words: "Mornin', Si." "Mornin', Josh." "What did you say you gave your horse for bots?" "Turpentine." "Killed mine." "Mine, too." "Mornin'." "Mornin'."—*New Orleans Picayune*.

The Old Stager—Young man, if you would be successful, you must do two things. First, get some enemies.

The Aspirant—And second?

The Old Stager—Second, irritate them so that they will make you prominent.—*Ex*.

Artist (unfolding sketch)—It's the best thing I ever did.

Editor (ominously)—Oh, well, you mustn't let that discourage you.—*Ex*.

**PITTSBURGH STOVE AND RANGE CO.**, successors to the Anshutz-Bradberry Co., Pittsburgh, Pa. New catalogue for 1900-1901 trade, consisting of 90 pages, handsomely printed and illustrated on coated paper, and covering their entire product of Tremont Stoves, Ranges and Furnaces. The illustrations show that they are now manufacturing a full line of handsomely finished steel ranges, which are marketed under the name of the Clinton Tremont Ranges, thoroughly up to date, made for coal and wood, and a large number of nickel parts, making them very attractive in appearance. They also make the Keystone Tremont Ranges, of cast iron, with drop oven-door, which are shown in great variety. A number of other designs are given, and included in its contents a line of parlor stoves is shown, making the assortment an extremely attractive one for the Hardware and stove dealer carrying this style of goods.

**STRATTON MFG. CO.**, Erie, Pa. 56-page pamphlet catalogue, oblong, of the Dandy Green Bone Cutter, which has been manufactured by this company for the past seven years. It has proved a very popular specialty with the Hardware trade that have handled it, and the demand for it has compelled

the manufacturers to increase their facilities for production. The larger part of this catalogue is taken up with a number of testimonials from dealers and consumers who have added this specialty to their other facilities, in which it is spoken of in the highest terms. The manufacturers refer to the Dandy Bone Cutter as being a cutter and not a grinder. It will not grind oyster shells or anything of the kind, but as a bone cutter it is referred to as being a machine that they warrant to cut dry or green bones, just as they come from the butcher shop, without clogging, and to cut them fine enough to be used for chickens four days old. Hardware dealers desiring to add an article of this description to their stock will find this catalogue a very desirable one to send for.

House Owner—You didn't pay the rent last month.

Tenant—No? Well, I suppose you'll hold me to your agreement.

Owner—Agreement—what agreement?

Tenant—Why, when I rented you said I must pay in advance or not at all.—*Ohio State Journal*.

Capitalist (engaging coachman)—Are you married?

Coachman—No, sir. These 'ere scratches came from a cat.

## HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Hardware Stores.

Amarillo, Tex.—The Stringfellow-Hume Hardware Co. has been incorporated; capital stock, \$100,000. Incorporated by R. L. Stringfellow, H. E. Hume and H. B. Jones, all of Amarillo.

Brookston, Ind.—The McConnell Hardware Co. has been incorporated; capital stock, \$2000; directors, J. E. McConnell, John C. Kennery, Charles E. Holwerda, Grant Holwerda, John Roadruck and W. E. Morris.

Carrollton, Miss.—The Carrollton Hardware and Improvement Co. has been incorporated; capital stock, \$6000.

East Providence, R. I.—B. Kalunian & Bros., 2 Warren Avenue.

Fiskdale, Mass.—John Monahan.

Mansfield, Mass.—H. E. King, Winter Block.

Mineral Wells, Tex.—The Mineral Wells Hardware and Implement Co. has been incorporated; capital stock, \$35,000; incorporated by A. A. Mayer, Cicero Smith, H. N. Frost, J. L. Riggins and J. E. Quarles.

Plymouth, Pa.—Eugene Doyle.

Portland, Me.—L. W. Bradstreet, 921 Congress Street.

Portland, Ore.—The Consolidated Implement Co. proposes to engage in the implement and Hardware business and deal in railroad materials and supplies. The capital is fixed at \$10,000. A. H. Breyman, J. F. O'Donnell and M. L. Archambeau are the incorporators.

Riverside, Cal.—Franzen Bros., Dickson Block.

San Diego, Cal.—Walter E. Williams, Fifth Street.

Sedalia, Mo.—Peter Hoffman.

Tillamook, Ore.—Eleazar Jones.

Trenton, N. J.—Wyckoff Bird.

Wilmington, Del.—S. L. Fell & Co., 7 West Fourth Street.

### Changes and Improvements.

Atlanta, Ga.—The Anderson Hardware Co., which recently removed their place of business to the corner of Peachtree Street and Edgewood Avenue, have completed every detail connected with the establishment of this large Hardware store, and are now attractively and conveniently situated in their new quarters.

Ballard, Wash.—C. G. Sanborn is enlarging and rebuilding his place of business on Ballard Avenue.

Caledonia, Ohio.—The firm of Doyle & Lee, dealers in Hardware and farm machinery, have sold out to C. E. Harrison and Scott Irely. An invoice of the stock has been completed and Harrison & Irely are now in possession.

Connellsville, Pa.—A limited stock company has purchased an interest in Edgar Turner's Hardware store at the corner of Main and Pittsburgh Street, and the store

will be managed by the Turner Hardware Co., Ltd., of which Edgar Turner will be president and Charles D. Schell secretary-treasurer and general manager.

Crete, Neb.—A. E. Small & Co., of Fairmont, have purchased the stock of Hardware, queensware and business of Mrs. Lu Norris of this city, and have taken possession. N. W. Norris, who managed the business for his mother, removes to Lincoln January 1 to engage in business on a larger scale.

Des Moines, Ia.—Lewis E. Bolton, of the firm of Lewis E. Bolton & Sons, wholesale and retail Hardware dealers on East Sixth Street, has purchased a tract of land 44x142 feet for warehouse purposes, and as soon as his lease of his present warehouse expires will erect a modern building on the property for his wholesale business. It is the intention to largely increase their jobbing business and use the new building for it exclusively. The retail business will in all probability be continued in the East Side business district.

Ellington, N. Y.—D. J. Eigenbroadt has established himself in his new Hardware store.

Fisher, Ill.—E. H. Kelly has moved his Hardware stock into his new brick building.

Florence, Ala.—Johnson, Paulk & Co., Hardware merchants, have traded their stock of goods to Asa Allen, of Tupelo, Miss.

Middletown, Pa.—Joe A. Smith, of Annville, has purchased the Hardware store of Samuel Cottrell, and will consolidate the two stores.

Pennsburg, Pa.—The Hardware store conducted by G. W. Gerhart, on Main Street, has passed into the hands of John F. Weyand, who will conduct it with his carriage business.

Plymouth, Ohio.—H. J. Willment has sold his stock of Hardware to Nimons & Nimons and Beaver & Huffman.

Reading, Pa.—Bright & Co., Hardware dealers, have awarded the contract for their three new warehouses at Spruce and Canal Streets to George W. Beard & Co. The firm will erect a four-story brick building, 40x140 feet, to be used for general storage purposes, as their present capacity is crowded. There will also be a one story building, 40x50 feet, which is intended for the storage of cement, and another 36x40 feet, the latter to be used as a salt house. The foundations will be very heavy and a platform will be built along the front of the buildings, connecting all.

Sandusky, Ohio.—It is announced that Gary & Schisler have dissolved partnership by mutual consent. Mr. Gary takes the Hardware on the west side of the store.

Sergeant Bluff, Ia.—The Hardware firm of Ingvolstad & Reed has been dissolved, Mr. Ingvolstad buying his partner's interest in the business.

St. Johnsville, N. Y.—James McRae &

Son have purchased the Hardware business of Harry Walrath and are now in possession of the same.

Syracuse, N. Y.—Packard Brothers are purchasers of the G. Fred Tucker bankrupt stock of Hardware, corner of North Salina and Butternut Streets.

Tallahassee, Fla.—A few years since the Gilmore-Davis Co. opened a Hardware store in the Saxon Building, on Monroe Street. Their business has grown so rapidly that Mr. Saxon has been obliged to double the size of the brick store.

Toledo, Ohio.—The Starr Avenue Hardware Co. will change its name, in accordance with an agreement with the Star Hardware Co., which objected to the similarity of names.

Upper Sandusky, Ohio.—Frank Beidler has added a new line of goods to his stock of Hardware, namely, stoves.

Wessington Springs, S. Dak.—O. O. England, who has been engaged in the Hardware business for the past eight years, has sold his stock of goods and store building to William Kennedy, who recently moved from Parkston.

West Rutland, Vt.—Charles M. Smith is laying the foundation for a new Hardware store, to be built next to the Manley Block on Main Street.

### Business Embarrassments.

Milledgeville, Ga.—Frank Johnston, who has been engaged in the Hardware business in this city, has filed a petition for bankruptcy in the United States Court in Macon. H. C. Tindall was appointed receiver. Mr. Johnston's liabilities are about \$48,000; assets, \$30,000.

### Fires in Hardware Stores.

Amarillo, Tex.—Stringfellow & Hume. Loss, \$5000; insurance, \$3000.

Gallitzin, Pa.—E. Nelson.

Hopkinton, Ia.—Hucker Bros.; loss, \$3500; insurance, \$1500.

Lynch, Neb.—W. M. Healey. Loss, \$2900; insurance, \$1300.

Phoenix, N. Y.—N. A. Hughes.

Red Lake Falls, Minn.—A. Brady.

Shelbyville, Mo.—N. C. Miller.

Stafford, Kans.—John Garvin.

Wilkesbarre, Pa.—Phelps, Straw & Co.

### Burglaries in Hardware Stores.

Bangor, Me.—William P. Dickey & Co. Loss, \$35.

Brasher Falls, N. Y.—T. D. Ratchford. Loss, \$50.

Brooklyn, N. Y.—Bassler Bros., 504 Fifth Avenue. Loss, \$200.

Cripple Creek, Colo.—John Wright Hardware Co. Loss, \$300.

Ensley, Ala.—Byrum & Butcher. Shotguns.

Foreston, Minn.—T. F. Neumann. Loss, \$500.

High Point, N. C.—Beeson Hardware Co. Cutlery and razors.

Lamar, Mo.—N. Johannes & Sons. Shotguns and revolvers.

## HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Etc.

Beaver Falls, Pa.—The Sanitary Screen Ventilator Co. has been organized and a plant with the necessary power leased for the manufacture of a screen for use in steam and electric cars and houses. The screen, which is an invention of B. F. Stark and J. O. Thomas, and which has been tried by the Pittsburgh and Lake Erie railroad, is a combination of plates of glass placed at such an angle as to prevent cinders from passing along, as with the ordinary wire screen.

Canton, Ohio.—The Ohio Mica Co. has been incorporated with a capital stock of \$25,000.

Canton, Ohio.—The Corrugated Cutter Co. has been incorporated to-day by C. A. Hill, Noah A. Walker, S. B. Webber, Lorenzo D. Connell and Chas. E. Taylor, with \$12,000 capital stock. The company will make a patent cabbage cutter and other things.

Des Moines, Ia.—The McNeeley Mat Wire Co. has filed articles of incorporation with the secretary. Its capital is \$10,000. G. W. McNeeley and Henry McNeeley are the incorporators.

Harrisburg, Pa.—The American Nailless Horseshoe Co., of Philadelphia, has been incorporated. Capital, \$1000. Incorporators: H. D. Shaifer, B. A. Rheinstrom, G. A. Lang, H. S. Townsend, F. S. Busser, all of Philadelphia.

Indianapolis, Ind.—The Modern Tool Co., has been incorporated. Capital stock, \$40,000. Directors: Bennett Wallace, Frank L. Gallagher and George E. Shafer.

Jamestown, N. Y.—Tangent Grip Pulley Co. has been incorporated to deal in power appliances and mechanical goods. Capital, \$20,000. Directors: F. W. Gurney, T. W. D. Addenbrook of Jamestown, and L. R. Sage of Oberlin, O.

Leetonia, Ohio.—Ohio Mail Box Co. has been incorporated to manufacture mail boxes. Capital, \$150. Incorporators: V. Figley, W. J. Weaver, S. A. Worman, Sarah C. Weaver, Minnie E. Figley.

Macon, Ga.—The inventory of the Macon Shear Co. has been completed and the papers signed transferring a half interest in the concern to S. D. Flood, of Dallas, Texas. He will be general manager of the factory, and its business will be entirely under his control.

New Haven, Conn.—Connecticut Cutlery Co. has been incorporated. Capital, \$6000. Incorporators: H. L. Brown, O. L. Hemming.

Oregon City, Ore.—The Willamette Mfg. Co. has filed articles of incorporation in the County Clerk's office. The capital stock is \$4000. The principal place of business will be in Oregon City, the object be-

ing to engage in the manufacture of ax and pick handles, and other wooden articles.

Pendleton, Ind.—The Hussey Mower and Implement Co., incorporated, to manufacture the mowing machine recently patented by R. W. Hussey, of this city, has located its factory at Upper Sandusky, O.

Rochester, Mich.—The Rochester Handle Co. has been incorporated with a capital stock of \$30,000.

Rochester, N. Y.—Articles of incorporation of the Ontario Drill Co. have been filed with the county clerk. The object of the concern is the sale and manufacture of grain drills and other agricultural implements. The company is capitalized at \$25,000 and the directors for the first year are William P. Thistlethwaite, Charles J. Thistlethwaite and Joseph L. Thistlethwaite.

St. Louis, Mo.—The Implement Wood Stock and Mfg. Co. has been incorporated. Capital, \$50,000. Incorporators: James L. Wood, H. W. Benton, A. B. Hayard.

St. Louis, Mo.—The Jackson Filter Co. has been incorporated for \$500,000, all paid in and divided into 5000 shares of \$100 each. Powell Jackson holds 4,998 shares, E. G. Tutt 1 and Albert H. Miller 1.

Wallingford, Vt.—Wallingford Mfg. Co. has been incorporated to manufacture Hardware specialties. Capital, \$50,000. Incorporators: H. E. Barden, J. Gilroy, both of Granville; H. B. Barden, S. C. Saunders, L. J. Folsom, all of Wallingford.

### Changes and Improvements.

Alexandria, Ind.—The Kelly Ax Mfg. Co. will establish a plant at Alexandria to manufacture scythes and sickles.

Cohoes, N. Y.—Plans are being prepared for a new building to be erected on the site of the burned ax factory of Fred. W. Peck, on Saratoga Street. The building will be of brick, and when completed will be equipped with machinery for the manufacture of axes and edge tools. Mrs. Peck, of Lansingburg, will operate the plant with the assistance of her son, and will give employment to 100 men.

Dighton, Mass.—The petition of George E. Wilbur and others for the dissolution of the Century Stove Co. has been heard through George F. Williams, counsel for the petitioner, and as there was no obstacle to the granting of the petition the court ordered the proclamation made and entered a decree of dissolution.

Fort Washington, Pa.—Hundreds of workmen are engaged on the new industrial plant being erected by Hoopes & Townsend. The firm recently purchased 275 acres of land along Pine Run, with the view of erecting a complete plant for the manufacture of the bolts and nuts now turned out at the Philadelphia shops. The firm expect to occupy the new site within three years, at which time they will employ at least 2000 workmen, most of whom will reside on the property. The rolling mill is to be 700 feet long and the foundations of the steel mill are now laid.

Kansas City, Mo.—The establishment of the John Deere Plow Co., which occupies the five-story warehouse at the corner of Thirteenth and Hickory Streets is to be increased. It has been announced by Charles Deere, the head of the company, that an addition will be built to the Kansas City warehouse, having a fifty-foot frontage on Hickory Street and being six stories high. The main building will also be raised to six stories.

Peoria, Ill.—So rapidly is the business of the Culter & Proctor Stove Co. expanding that they find themselves cramped for room in their already large quarters, at Fayette and Water Streets, and the company have decided to add a third story to a portion of their building.

### Recent Fires.

Charleston, W. Va.—The plant of the Jennings Mfg. Co., makers of wooden handles, has been burned. Loss, \$15,000; insured for half. The same company operates a plant at Newcastle, Ind.

Fair Haven, Conn.—Fire supposed to have been caused from spontaneous combustion started in the cellar at the National Wire Co.'s mill recently. The fire burned through the flooring of the main mill and threatened to do extensive damage. Loss, \$200.

Geneva, Ill.—Fire has destroyed the farm machinery manufacturing plant of the Appleton Mfg. Co. Loss, \$100,000; partly covered by insurance.

Tacoma, Wash.—The plant of the Torkelsons Co., manufacturers of asbestos goods, has been destroyed by fire.

Toledo, Ohio.—The plant of the National Cement and Rubber Mfg. Co. has been destroyed by fire. The company was organized in 1807, with a capital stock of \$25,000. Its officers are as follows: President, D. V. R. Manley; vice-president, William S. Hubbell; secretary-treasurer and general manager, E. P. Hubbell.

Troy, N. Y.—Fire has damaged the old nail factory and the old spike factory, which are located in the Wynantskill valley, at the junction of Burden Avenue and Mill Street. All of the burned property was owned by The Troy Steel Co., but had not been used for manufacturing purposes for five or six years. The loss is estimated by a member of The Troy Steel Co. at \$50,000, and is insured for the full amount.

Winooski, Vt.—The main buildings of the Porter Screen Mfg. Co., near Hood's crossing, have been destroyed by fire at a loss varying from \$100,000 to \$125,000, and taking employment from 200 men.

### Recent Embarrassments.

Meriden, Conn.—The Chapman Mfg. Co. has asked for the appointment of a receiver, and will be kept in operation until the matter is decided. The company manufactures leather novelties, sleigh bells, bicycle bells, etc., and gives employment to more than one hundred hands when in full operation.

## A PROFITABLE MEDIUM TO ADVERTISERS.

Gilbert & Bennett Mfg. Co., Chicago and New York. [Wire Goods]: You have reason to be proud of HARDWARE'S success both as a journal of interest and of usefulness to your readers, and as a profitable medium to the numerous advertisers. From the fact that our card has been steadily published in its columns from the first number, it must be concluded that we have found you a satisfactory medium.

# You Can Sell It!

SARGENT'S GEM FOOD CHOPPER is an article for kitchen use, intended to take the place of chopping bowl and knife. It is carefully made and nicely tinned; self-cleaning and self-sharpening, with steel cutters that cannot break.

Chops all kinds of meat, both raw and cooked, fruits, vegetables and other articles of food. Chops quickly, quietly and easily; is easy to take apart, easy to put together, easy to adjust.

### New Companies, Agencies, Etc.

Albany, N. Y.—The Brooklyn Gas & Gasolene Co. has been incorporated with \$5,000 capital stock. Adam Schauf, John Schauf, and Christian Kranenburg, incorporators, to manufacture, sell, rent and lease gas and gasolene engines, motors and automobiles.

Buffalo, N. Y.—Adirondack Cycle and Specialty Co. has been incorporated to manufacture bicycles; capital, \$25,000. Directors—A. L. Lerch, P. A. Powers, and J. L. McGraine, Buffalo.

Cleveland, O.—Ohio Cycle Pump Co. has been incorporated. Manufacturing automatic pumps. Capital, \$50,000. Incorporators—F. S. Sholes, J. N. Coffin, C. B. Smith, G. P. Rust, C. K. Fanves.

Indianapolis, Ind.—The C. G. Fisher Co. has been incorporated to deal in bicycles, with \$15,000 capital. Directors—Carl G. Fisher, Charles Koehring and George Koehring.

Mansfield, O.—Cummings & McBride have forwarded the incorporation papers for Mansfield's new automobile manufacturing industry. The papers were sent to Charleston, W. Va., and the new concern will be incorporated under the laws of the State of West Virginia. It will be known as the Beardsley & Hubbs Mfg. Co. The capitalization of the company will be \$100,000. The incorporators are: V. S. Beardsley, C. G. Hubbs, E. L. Sanderson, B. W. Willett, S. E. McBride. The company will manufacture the automobile known as the Darling patent. The Beardsley & Hubbs Buggy Co. will discontinue the manufacture of buggies and turn its attention to the manufacture of automobiles exclusively.

New York, N. Y.—Anti-Rust and Gun Bore Treatment Co. has been incorporated; capital, \$10,000. Directors—W. S. Armour and F. N. Armour, New York City; H. L. Laques, Passaic, N. J.

New York, N. Y.—C. J. Downing & Co., has been incorporated to deal in bicycles, etc. Capital, \$5,000. Incorporators: C. J. Downing, V. L. Rice, Carrie M. Downing, all of New York City.

Port Jervis, N. Y.—P. C. Rutan, 46 Front Street.

Reading, Pa.—The Reading Saddle and Mfg. Co., recently organized, has applied for a charter. The company is composed of Miller M. Deem, John L. Ennis, Edgar L. Fulmer, Zug L. Brown and William Rick. They will occupy the building formerly occupied by the American Saddle Co., 318 Maple Street. The company will manufacture cycle saddles, tool bags, pedals and other articles of steel, leather, wood and iron, and will retain all the principal hands employed by the Amer-

ican Saddle Co. They will have about 50 hands at the start, and will retain the nickel-plating works as heretofore, and have secured the plant as operated by the American Saddle Co.

Strasburg, Va.—Orland C. Cullen is erecting a large shop, 20 x 40 feet, two stories high, for the construction of his Ball-Bearing Rifle Guns at the Warren White Sulphur Springs. The factory will contain a completely equipped ordnance plant.

St. Catherines, Ont.—Co-operative Cycle and Motor Co., Limited, has been incorporated with \$250,000 capital. Provisional Directors—William G. Nott, Percy E. Verity and Charles F. Verity, Brantford; James McBurney, Henry Hunter and James Ross, Toronto, and James A. Coulter, Ingersoll.

Utica, N. Y.—Clough Mauser Arms Co. has been incorporated; manufacture and sell firearms; capital, \$500,000; incorporators—E. H. Riley, M. P. Richards, of Utica, N. Y.; J. M. Clough, of Belcher-town, Mass.; H. C. Stone, of Oneida, N. Y.; E. E. Risley, Williamstown, Mass.

### Changes and Improvements.

Addison, N. Y.—The bicycle factory has resumed operations to supply the trade for the coming season.

Amesbury, Mass.—The Mobile Co. of America, Ellis & White, Eastern agents, have found that their business required larger quarters, and have taken the suite of rooms over the main entrance of the Wilman block.

Bayshore, N. Y.—Bayshore Bicycle Mfg. Co. has made additions.

Buffalo, N. Y.—Joseph Strauss & Son, Buffalo's newest jobbing firm, mean to make a specialty of frames and built-up wheels, the former in particular. To that end, and to enable the quoting of close prices, they are fitting up a frame building plant on their premises, 694-696 Michigan Street.

Chicago, Ill.—A three-story factory building at 299-305 West Lake Street, is under contract of sale to the Imperial Automobile Co., at a price of \$50,000. The factory building is 100 x 100 feet in foundation dimensions.

Columbia, S. C.—William F. Steiglitz has bought the gun, locksmith and repair store owned by the late F. W. Husemann, and has opened for business.

Cortland, N. Y.—Frank S. Bliven succeeds Kennedy Bros.

Des Moines, Iowa.—T. E. McGavran succeeds McGavran & Weston.

Detroit, Mich.—The American Bicycle Co. having practically abandoned the Clipper bicycle, Macauley Brothers, the well-known Detroit dealers, who handled the wheel for seven years, have transferred their faith and allegiance to the Eagle. They will control the State of Michigan on the Torrington machine.

Hudson, N. Y.—William Petry, proprietor of the sporting goods emporium at 430 Warren Street, has bought of Edmund Denegar the three-story building in which his store is located, and contemplates erecting an addition in the Spring for the repairing of pneumatic wagon tires and repairing of automobiles.

Ipswich, Mass.—E. E. Currier, South Main Street, is having an addition erected.

Joliet, Ill.—A. A. Clendenin has purchased the entire camera, photographic supply and optical business of A. C. Johnston and will continue at the same location.

Knoxville, Iowa.—Fred Brackney has added repair shop.

Madison, Me.—James Felker; closed.

Omaha, Neb.—National Cycle Co. have sold out to Omaha Cycle Co.

Reading, Pa.—Cameras and washing machines have been added to the bicycle business of the Globe Cycle Co., 843 Penn Street.

Rockford, Ill.—R. Reynolds succeeds Forbes & Reynolds.

Scotland, S. D.—J. P. Serr succeeds Engel & Serr.

Vassar, Mich.—Ralph W. Cross succeeds Cross Bros.

Whitney Point, N. Y.—A new building has been built on the Reporter lot, to accommodate the bicycle works.

### Recent Embarrassments.

New York, N. Y.—S. Wallis Merrihew, of 154 Nassau Street, has filed a petition in bankruptcy with liabilities \$33,080 and no assets. The debts were contracted at Wilmington, Del., as the Donald-Merrihew Cycle Co.

New York, N. Y.—Schedules in bankruptcy of S. Slomka's Sons & Co., manufacturers of sporting goods, at 79 Chambers Street, show liabilities of \$17,032 and assets of \$1,325, which was realized from the sale of their stock.

Waterbury, Conn.—A petition in bankruptcy has been filed in the United States District Court by R. G. Remillard and Prique Valois, who have been carrying on a bicycle business at 383 South Main street, under the title of the Brass City Cycle Works. The assets of the firm are \$732.15, and the liabilities are \$1,994.26.

### Recent Fires.

Granite City, Ill.—Fire in the target factory and tempering department of the Markle-Shot Tower and Lead Works, has completely wrecked all but the fireproof tower, and that was badly warped. The loss is estimated at \$100,000, partially covered by insurance.

Indianapolis, Ind.—As the result of a fire which attacked the store of the H. T. Hearnsey Vehicle Co., this concern suffered a loss of about \$20,000, fully covered by insurance.

San Diego, Cal.—Young & Churchill; loss about \$600; insurance, \$450.

## Columbian 1000-Shot Air Rifle.

Patented  
Oct.  
24, 1893.

CHAMPION  
MODEL.

This Air Rifle possesses advantages over all the Air Rifles now  
on the market. The materials used in its construction are  
the best. The appearance and workmanship is far ahead of  
any other Air Rifle made. It has an adjustable sight it shoots stronger  
and more accurate, less liable than any other to get out of order, all  
parts are interchangeable. We think we have the right to claim this as  
the "Champion" of all Air Rifles. List, per doz., Enamelled, \$30.00; Full Nickel, \$42.00.

**CARY MANUFACTURING CO.,**

19 and 21 Roosevelt St., New York.

Everybody hates  
"A QUITTER."

The Jobbers and Dealers  
know who are the  
"Quitters" in the bicycle  
tire business and they  
know that the makers of

## GOODYEAR TIRES

are finish fighters.

Be on the winning side and handle our  
tires. There is profit in them.

**THE GOODYEAR TIRE & RUBBER CO., Akron, O.**

## PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

## Can You Afford-

to carry in stock unknown brands of stove polish that your customers know nothing about, brands they do not call for, the quality of which is inferior, gives them dissatisfaction, and the consequent sale of which brings discredit to your store? Your best judgment answers NO! Then sell ENAMELINE, the Modern Stove Polish. Paste, Cake or Liquid. If you are doing business for a profit it will pay you to handle our whole line.

J. L. PRESCOTT & CO., NEW YORK.

## U. M. C. Uniformity.

There are times when perfect ammunition is a necessity—not a luxury. Then the superior system of U. M. C. construction and loading proves itself a friend indeed.

## If it is a Food Chopper Without a Lid, Don't Buy It.

A distinguishing and exclusive feature of the STAR FOOD CHOPPER is a plate hinged at the top of the hopper which, when pressed on the food to be cut, forces it upon the feed screw, thus preventing the possibility of injuring or soiling the fingers, which is liable to occur in using the other choppers.

The STAR is unquestionably the best machine of its kind ever offered to the public. It will cut without crushing raw or cooked meat, sea food, fruit, vegetables, etc., into coarse or fine pieces, according to the cutter used, of which three accompany each chopper.

It has eliminated all the objectionable features of other choppers, and has added several improvements that are distinctly its own. It is always in order, and the knives require no sharpening.

No other chopper has the many merits of the STAR. None is more simple in construction or easier to understand or clean. From start to finish in the small points as well as in the large, the STAR FOOD CHOPPER is the best.

**CHAS. D. BROWN, Agent,**

**160-162 Duane Street, New York City.**

We make a specialty of making to order only, a superior quality of Cast Steel Wire Springs, either for extension or compression.

These Springs are all oiltempered and are made of an extra quality of wire drawn specially for our own use, of the same grade of stock as we use for the Springs that we put in our Spring Scales.

# HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. *Size of page, 4 x 7 inches.*

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. *Page, 4 x 7 inches.*

- FOUR EDITIONS:  
A, 200 pages, - - \$1.00  
A F, 200 pages with flap, 1.25  
A 2, 400 pages, - - \$1.50  
A F 2, 400 pages with flap, 1.75
- FOUR EDITIONS:  
B, 200 pages, - - \$1.00  
B F, 200 pages with flap, 1.25  
B 2, 400 pages, - - \$1.50  
B F 2, 400 pages with flap, 1.75

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. *Page, 4 1/2 x 8 inches.*

- FOUR EDITIONS:  
C, 200 pages, - - \$1.00  
C F, 200 pages with flap, - 1.25  
C 2, 400 pages, - - 1.50  
C F 2, 400 pages with flap, - 1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. *Page, 5 x 8 inches.*

- FOUR EDITIONS:  
D, 240 pages, - - \$1.50  
D F, 240 pages with flap, - 2.00  
D 2, 480 pages, - - 2.50  
D F 2, 480 pages with flap, 3.00

## MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers, turn to AU      For Chisels, turn to CH  
" Parers, Apple " PA      " Cutlery, " CUT

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

## WHY IS THE

PAT. 1898.

## O.K. WASHER THE BEST WASHING MACHINE?

—BECAUSE—

- 1.—It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.
- 2.—The tub is made of Louisiana Red Cypress Lumber.
- 3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap-suds, and cleaning them without rubbing them to pieces.
- 4.—This washer is made by experienced mechanics, and will out-last any other washer on the market.
- 5.—The lid on tub closes tight, no escape of steam.
- 6.—Has a solid wringer box with iron brackets.

Manufactured by H. F. BRAMMER MFG. CO.,

## WINSLOW'S ANKLE BRACE 1900.

Patented December 17, 1895.

The only perfect Ankle Support made.

Can be attached to any skate.

We desire to call your attention to Winslow's Ankle Brace. It can be attached to any skate. It is made of steel, handsomely nickel plated, with a rib running through the center which strengthens the brace and makes it light, strong and durable. They are trimmed with the best quality Russet Grain Leather.

There have been many attempts at making an Ankle Brace, but this is the only good one ever offered to the public.

Doctors have proved it to be a splendid article. Each pair in a box.

PRICE  
75c.  
PER PAIR.

## Winslow's Double Runner Skate.

This skate is especially adapted for children learning to skate, is strapped and ready for use. The runners are so wide apart that a child can stand on them with perfect ease. They are adjustable and can be made from a 6 inch to a 9 inch skate by simply adjusting the thumb screw.

PRICE, 50 cts. PER PAIR.

THE ABOVE SPECIALTIES ARE MANUFACTURED BY

**The Samuel Winslow Skate Manufacturing Company, Worcester, Mass.**

## A BUILDING'S CROWNING GLORY IS ITS ROOF

## P & B RUBEROID ROOFING

Is a "crowning glory" to any building. And it isn't a  
fleeting glory either! It is always *there!* Unlike its tar-  
and-paper or asphaltum imitators, it won't rot out or dry  
out. Its backbone is the best, strongest felt, specially pre-  
pared to resist weather, water, heat, steam, acids, gases,  
alkalies, etc., and *we can prove* that it will outlast any roof-  
ing made. Extremes of temperature will not affect it. It  
is clean and easily applied, tasteless and odorless. We'd  
like to send you samples.

# HARDWARE

At the December meeting of the Board of Governors of the Hardware Club, the following new members were admitted:

Adolph Boskowitz, 237 Broadway.

Arthur V. Davis, Pittsburgh Reduction Co., Pittsburgh, Pa.

Clinton Elliott, 257 Broadway.

Charles F. Fairbanks, Jr., Clinton Wire Cloth Co., Clinton, Mass.

William L. Hermance, 313 Greenwich Street.

Alexander M. Orr, 41 Park Row.

The Winchester Repeating Arms Co., New Haven, Conn., has issued a very characteristic and artistic calendar of the hanging variety, being 26 inches in length. A. B. Frost is the artist whose pictures are selected, and naturally they are gems of the first water, one entitled "Fresh Meat for the Outfit," in which the hunter has killed a doe, which lies at his feet; and the other, "Winter Fun on the Farm," in which the hunter and boy are out rabbit-shooting, and have "made a good bag," judging by appearances.

The Columbia Desk Calendar for 1901 is now being distributed by the American Bicycle Co. from the Columbia Sales Department, Hartford, Conn. It has been distributed for a number of years, and established a line of admirers that look forward to its annual production with anticipation. It will be sent to any address on receipt of five two-cent stamps, and will form a very valuable part of the equipment of a desk at the present time.

Showing the continued popularity of the Warren Patent Cabinet Shelving, the Company report that among recent orders have been these from T. M. Patton, Sterling, Neb.; J. C. Moore, Arbela, Mo.; Hunter & Rae, Sioux Rapids, Ia.; William Lee, McGregor, Tex.; Wortham Bros. Co., Tuscola, Ill.; Hardwicke & Etter, Sherman, Tex.; R. C. Meihnsner, Walnut, Ill.; John French, Bloomfield, Ind.; E. A. Weatherbee, Lincoln, Me.; Olson Bros. & Johnson, Palmer, Ia.; Shuey & Rider, Westfield, Ill.; Wells & Emmerson, Port Arthur, Ont.; Elvebak & Fossness, Bricelyn, Minn., and T. H. Young, Caney, Kans.

The Nicholson File Co. of Providence, R. I., find that the demand for their advertising novelties exceeds all expectations. About two years ago they published a pamphlet called "File Philosophy," describing the manifold uses of files, while but a few months ago they began the distribution of a handsome enameled plaque to be used as a sign. The former is now in its fifth edition, and the original supply of signs, although large, is completely exhausted, requiring the placing of a further extensive order. The advertising schemes of this company seem always to be well appreciated.

James N. Stanley, the well-known New England representative of Landers, Frary & Clark, New Britain, Conn., for a number of years, will be transferred to the factory on or about January 1st, to take entire charge of the cutlery manufacturing department. In order that the territory formerly covered by Mr. Stanley shall not suffer neglect in consequence of his promotion, it will hereafter be traveled by Leon H. Coffin, who, during the several years he has been with the company, has spent five of them traveling in the Northwest territory, and of late in charge of the shipping department at the factory. Mr. Coffin is thoroughly equipped in every respect to do justice to the present opportunity.

Magnolia Metal Co., 266-267 West Street, New York, are distributing to the Hardware and supply trade and others handling their line of Anti-Friction Metal, a very attractive and characteristic sign adapted and intended for store use, manufactured from pure aluminum, and printed thereon in black and red in a manner that would attract attention in whatever position it may be placed. This is certainly a unique, and, at the same time, an up-to-date manner of calling attention to their well-known wares.

The Laffin & Rand Powder Co., 99 Cedar Street, New York, have issued their usual calendar for 1901, which on the present occasion presents features of artistic excellence which makes it exceedingly novel and desirable. It forms a group of seven cards connected by a cord, on which are shown the American warriors from 1700 up to the present time, covering the two centuries, which includes the American Indian of 1700, the soldier of 1776, the minute man of 1812, the soldier of the war with Mexico, the representative of our army during the Rebellion, and the Rough Rider of the Spanish war. They state that they will be glad to mail these to any subscriber of *Hardware* desiring one, on receipt of six cents to cover postage. The historical interest excited by this admirable combination makes it a calendar well worth the attention of our readers.

The Harrington & Richardson Arms Co., Worcester, Mass., are distributing to the Hardware and Sporting Goods trade a very handsome calendar, one of the John A. Lowell & Co. productions, the vignette of which is a superb steel engraving showing a hunter's camp with its tent and interior fixings, canoe, etc., all displayed in very natural order. It is certainly an admirable advertisement of the field of action for which their productions form an important factor. They state that they will be glad to send a copy of this to any of our subscribers if they will mention *Hardware* when requesting the same. This is an opportunity well worth taking advantage of.

The Standard Tool Co., Cleveland, Ohio, manufacturers of Twist Drills, etc., is erecting a fine office building, 46x72 feet, two stories and basement, with all modern conveniences. The present office will be remodeled and made a part of their stock room, which will afford better facilities for carrying the stock necessary to meet promptly the large demand for their product.

R. H. Tracy, of C. E. Jennings & Co., 101 Reade Street, New York, the edge tool and saw manufacturers, intends becoming one of the residents of Port Jervis, New York, having been appointed superintendent of the saw factory of C. E. Jennings & Co. located at that place, the duties of which responsible position he will assume in a very short time.

Acorn Brass Works, Chicago, Ill., have recently succeeded in securing the exclusive control and manufacture of the celebrated Doran Hydro-Carbon Lighting System, which is claimed to be far superior for interior and street lighting to many of the systems now on the market. Each lamp is claimed to give a 1,250 candle-power light, which, with equal facility with electricity, can be turned on or off in an instant, while at the same time it may be regarded as absolutely safe, simple and satisfactory. The manufacturers firmly believe they are far in advance with their perfect system of illumination.

# HARDWARE

VOL. XXII

DECEMBER 25, 1900.

NO. 6.

**HARDWARE** is a Review of the American Hardware Market, specially devoted to the Retail Trade.

**HARDWARE** is published on the 10th and 25th of each month. The subscription is \$1.00 a year, payable in advance.

Subscriptions may commence with any issue.

Remittances should always be made in the safest manner available to the remitter. Post-office and Express Money Orders are always safe and may be sent at our own risk.

Register your letters when you remit by cash.

**Foreign Subscriptions.**—For each copy to be mailed outside the United States, the Canadas, and Mexico, the price is \$1.50 a year, postage prepaid.

**Change of Date.**—It takes two weeks to change the date, after your subscription is renewed.

**Expiration of subscriptions.** The date on the wrapper indicates when your subscription expires.

**Change of Address.**—Always give both your old and your new address when you ask us to change your address.

**The Name of your Post-office and of the State you live in** should always follow your own name when writing to this office. We cannot find your name on our books unless this is done.

Letters should be addressed

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

## Editorial Trade Review.

The close of the nineteenth century is witnessing in the Hardware industry a phenomenal holiday trade that is unsurpassed by any other period on record. The people have money to spend, with a good prospect of continued employment ahead, and a well-grounded belief that the coming year for industrial prosperity will be a noted one.

The tendency toward higher prices for the approaching season is noticeable in several important lines; and this, if it doesn't accomplish anything else, will check any inclination to weaken the market by loose quotations of an irregular character. While "boom" conditions would be considered undesirable, a certainty of rigid prices governing transactions for Spring trade would be regarded with satisfaction, and would produce good results.

Now that the necessity for ordering full stocks in anticipation of the annually growing wants of the retailer is fully understood by the jobber, and the steady business which the possession of such stocks always creates, by enabling the prompt shipments which follow orders when placed with the traveling representative, makes a happy state of affairs all around, and inspires a confidence in future transactions which should be the foundation of an unusually successful business for 1901.

The manufacturers and jobbers have received rush orders for the satisfying of the holiday demand. The advent of ice-making temperature for several days in this vicinity had the effect of making great inroads on the stocks of skates, and a general movement for an extra supply for present use. The admirable weather for Christmas shopping which it has been our good fortune to

enjoy has been a prominent factor in the prosperous conditions surrounding holiday trade. The orders have, however, been restricted to requirements for immediate sales, and general orders for Spring delivery are in course of formation, which will be based upon such new discount sheets as may be promulgated when the new year has fairly started.

But few changes in prices that possess importance enough to affect transactions of any moment are at present noted, although consultations have been had over items that do not seem to promise a commensurate profit at present quotations. But liberal allowance will be made for the slight changes in raw material at present market conditions, and conservative purchases will prevent any speculation in market values under existing provocation.

Few buyers have much reason to fear anything but a satisfactory market, when they get ready to make out orders for spring delivery. The general conditions being confident in tone, present less apprehension of any radical changes that would permanently affect demand. The year is really coming to an end with a safe and satisfactory feeling everywhere prevailing, and full of promise for the future.

Financial collections are reported by the jobbers as being exceptionally good, bills being discounted by retailers who have never previously been in shape to avail themselves of this additional profit. And with the volume of money now in the ordinary channels of trade, it would seem as though financial stringency in commercial circles was a thing of the past and no longer an object of dread.

One noticeable fact is brought out by the general prosperity among the working classes, and that is the great expansion in their power of consumption in the way of household appliances and other house-keeping conveniences. There is more rivalry among such consumers in regard to adding to their home equipment than among the citizens of the wealthier class, who luxuriate in ornamental requirements more especially, and the Hardware stores are not so apt to receive as great benefit.

## Immense Growth of Our Metal Export.

An illustration of the rapid growth of our manufacturing interests is found in the fact that the exportation of manufactures of metals during the year about to end will reach \$200,000,000. The figures of the Treasury Bureau of Statistics for the 10 months ending November 1st show that more than \$100,000,000 worth of iron and steel and more than \$50,000,000 worth of copper had been exported during the 10 months and these figures, coupled with those relating to the less important manufacturing metals and the articles manufactured from metals, but not included under these general terms, will bring the total for the year up to fully \$200,000,000. In steel rails the exports of the year will aggregate \$12,000,000, or an average of a million dollars per month, while it was not until 1897 that the figures for any entire year reached as much as \$1,000,000. In the fiscal year 1890 the total value of steel rails exported was \$315,000; in 1896 it was only \$540,000; in 1897 \$2,500,000; in 1898 \$4,500,000; in the fiscal year 1899 \$5,250,000, and in the calendar year 1900 will be fully \$12,000,000. Nearly one million dollars' worth of these exports of steel rails in 1900 go to Europe; another million dollars' worth to Mexico; nearly two millions to South America; four millions to British North America, and two million dollars' worth to Asia and Oceania. American locomotives also go along with the American steel rails, and the total for the year seems likely to reach about five million dollars in value. The American rails and locomotives are in turn accompanied by American cars, of which

the exportation for steam railways will amount to three million dollars during the year, and for other railways more than a million dollars. Add to this a proper share of the \$6,000,000 worth of electrical machinery and \$6,000,000 worth of telegraph, telephone and other electrical instruments and scientific apparatus exported, and it will be seen that for the construction and operation of railways outside of the United States the manufacturers of this country will supply during the year about to end fully \$25,000,000 worth of material.

The rapid growth in the exportation of metals and those of which metals form a large proportion in value is illustrated by some figures regarding our export trade of the decade. Manufactures of brass, for instance, of which the exports in 1890 amounted to \$467,313, were in the fiscal year 1900 \$1,866,727. Agricultural implements, including plows, cultivators, mowers, reapers and other machinery of this character, amounted in 1890 to \$3,859,184 and in the fiscal year 1900 to \$16,094,886. Pig iron exports in 1890 amounted to only 18,458 tons valued at \$300,832, while in the fiscal year, 1900 they amounted to 160,690 tons valued at \$3,124,853. The bar iron exportations in 1890 amounted to 2,087,376 pounds and in the fiscal year 1900 to 18,457,435 pounds. Wire exportations in 1890 amounted to 21,529,962 pounds and in 1900 amounted to 236,872,806 pounds, the average exportation for each month in 1900 being thus nearly equal to the annual exportations in 1890. In nails the exportations in 1890 amounted in round terms to 15,000,000 pounds, and in 1900 to 113,862,461 pounds. The total iron and steel exports in 1890 amounted to \$25,542,208 and in the fiscal year 1900 to \$121,858,344, and in the calendar year 1900 will reach \$140,000,000 in value.

In copper the growth in exportations has been equally striking, the total exportation of copper in the fiscal year 1890 being \$2,349,292 in value and in the fiscal year 1900, \$57,851,707, while in the calendar year 1900 it seems likely to considerably exceed \$60,000,000.

### Death of Henry L. Pratt.

Henry L. Pratt, president of the Millers Falls Co., Millers Falls, Mass., died at his home in Brooklyn, N. Y., of heart failure, on December 13th, after an illness extending over a year. Mr. Pratt was born in Shutesbury, Mass., July 14, 1826, and was consequently 74 years of age at his death. Some of the early years of his life were passed in the vocation of a country school teacher, for which his natural ability eminently fitted him. His attention was afterward given to the manufacturing business, and after engaging in the making of chairs for a number of years, he in 1868 sold his interest in that line, and moved to Greenfield, Mass., where, associating himself with Gunn & Amidon, who were then manufacturing bit braces and other tools in that place, Mr. Pratt organized a stock company with them, using their established business as a base. An undeveloped water-power at Millers Falls was purchased, a new factory was built, and the organized company became known as the Millers Falls Co., and became the synonym the world over for goods in which quality was ever regarded as the corner-stone of a success that was rapidly achieved. The first salesroom and office opened in New York was at 87 Beekman Street, in 1868, with Mr. Pratt as president of the company, and in charge of the business, a position occupied by him from that date until the day of his death. Mr. Pratt possessed a wide and varied experience in business matters that made him a safe adviser, whose counsel was frequently asked for in matters of moment. His kindness of heart was well known, and his sympathy with those in misfortune could always be counted upon. He had an inventive temperament, seeing improved conditions possible in labor-saving devices whenever brought to his attention, and he was frequently found, not at his desk poring over the problems regarding distribution, but in his little work-shop in his place of business, oc-

cupied at his work-bench investigating the merits of the tools under consideration. Being of quiet, domestic tastes, in a social way he was fond of genial companionship, kept himself fully posted on current events and could give graphic illustrations of any subject under discussion, and enjoyed unusual pleasure in listening to a good story graphically told by another. His devotion to church work and interest in his Bible Class in Plymouth Church, Brooklyn, came from a membership in that historic church extending over thirty years, and really formed one of the restful conditions of an active business life that brought physical rest and mental ease to his declining years. The purity of his life and Christian example proved a powerful incentive for others by whom he was loved and esteemed. He was a prominent member of the New England Society and the Congregational

HENRY L. PRATT.

Stoughton. She is his sole survivor. The interment was in Greenwood Cemetery, Dr. Newell Dwight Hillis, pastor of Plymouth Church, officiating at the funeral services.

### The Ferris Stove & Mfg. Co.'s Increased Plant.

The Ferris Stove & Mfg. Co., of St. Louis, Mo., recently completed negotiations with the Standard Range Co., of Terre Haute, Ind., whereby the former company purchases outright the interest of the latter, and, as a result of the deal, contemplate the establishment of a large stove manufacturing concern in the plant of the Standard Range Co. on North Sixth Street, Terre Haute. This will employ from 50 to 75 men the year around, and is intended to be the principal manufacturing point for the company, which is one of the largest in the business. The Ferris Co. produce stoves, ranges, heaters, air-tight stoves, steel ranges, steel roofing and galvanized conducting troughs. An idea of the business done by the Ferris Co. may be gained from the fact that since January they have shipped 25,000 stoves alone, and the business in other lines is proportionately large. It is intended to use the Terre Haute factory as an auxiliary factory, the main office remaining in St. Louis. At the Terre Haute factory will be manufactured the "Queen" steel ranges, with which the Ferris Stove & Mfg. Co. have been long identified; also, the cooking and heating stoves marketed under the same name, metal roofing, galvanized gutter and conductor pipe.

## LEGAL CORRESPONDENCE.

Conducted by William Marston Seabury, Attorney and Counsellor at Law,  
No. 43 Cedar Street, New York.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Editor "HARDWARE," No. 277 Broadway, New York City.

QUESTION: Would you advise me to make a will? I have a wife and four children, one of which I adopted. I desire my wife to have the use of my property during life, and to be equally divided among the children at her death. About how much would it cost to have my will drawn or could I draw it myself?

REPLY: We would certainly advise you to make a will. There are few instances where it is wiser for a man not to make a will. As a general rule if a person has made a valid will, a great deal of expense and trouble, too, and possibly litigation among his descendants may be avoided. It is especially necessary in the case you describe as to your adopted child. As to the cost of your will, this would depend entirely upon the will itself and what you desire to have in it. A will such as would accomplish your purpose would probably cost you from ten to twenty dollars. Other wills involving difficult trusts and special clauses, which require study on the part of the lawyer before they could be safely inserted in the will, would cost more. Under no circumstances would we advise you to attempt to draw your own will; unless perhaps you could not possibly obtain the aid of legal advice. A will is not a composition or a mere statement of wishes, but it is a legal document and one constructed by the Courts upon legal principles. The only safe way, therefore, of accomplishing what you desire, is to have some one who is familiar with the law and who is in a position to study the decisions of the Courts construing certain clauses in wills, draw your will for you.

QUESTION: Some time ago I was a member of the firm of A, B & Company. C wished to become a member of the firm and agreed to pay \$2000 in cash and \$3000 in two months for a third interest in the business. Articles of partnership were drawn, by which it was agreed that if before the two months expired, C should desire to withdraw from the firm he could do so. Upon which A and B agreed to return to him the \$2000 deposited with them, less the amount of C's withdrawals during this time. The two months have elapsed and C still wishes to remain as a partner, but he failed to pay the \$3000. A and B desire to dissolve the partnership as to C and continue as before, as C is useless to their business. How can this be done? C refuses to dissolve the partnership in a friendly way and demands the whole \$2000 back. Is he entitled to it? What do you advise?

REPLY: If dissension exists between the partners as a rule a receiver can be appointed. From the facts as they are before us, C has failed to comply with the terms of the partnership agreement by not paying his \$3000 after deciding to remain as a partner. The partnership may be dissolved by the commencement of an action for this purpose. An injunction should also be obtained restraining C from the collection of any firm accounts, etc., pending the determination of the action. We are of the opinion, from the knowledge of the facts in our possession, that C would not be entitled to the return of his whole \$2000, and that if before the two months had elapsed he did not notify you of his desire to withdraw, he would not be entitled to any part of the money referred to. As your first step toward getting rid of C, we would advise you to remove all your firm money from its present account, if C has access to it. It must be remembered, however, that this money is practically trust money and must be kept as such by you. This course would, however, prevent C from collecting the money due the firm, which would put you to the necessity of a law suit to have him account to you. We would, therefore, advise you to consult a lawyer personally.

Time is money, and many people pay their debts with it.

## Death of Ernest F. Pflueger.

Ernest F. Pflueger, president of the Enterprise Mfg. Co., Akron, Ohio, died at Massillon, Ohio, on the afternoon of Sunday, November 18th. His death was not unexpected, as he had been failing rapidly for a month previous. Two weeks before his death he slipped and fell, breaking his leg in two places, and this increased his sufferings to such an extent that death resulted. Mr. Pflueger for many years was identified with the business interests of Akron. He was known throughout the United States as the inventor and manufacturer of Pflueger's Luminous Baits. In a few years he built up a business that made him independent, and he was active in the management of the affairs of the company until the failure of his health, about eighteen months ago. Besides his widow, he leaves six children, four sons and two daughters, all residing in Akron. Mr. Pflueger was born in Baden-Baden, Germany, in 1843, making him fifty-seven years of age at the time of his death. He came to America when five years of age, and spent his boyhood in Buffalo. It was there he learned the baker's and molder's trade, removing when twenty years of age to Erie, Pa., where he engaged in the grocery business. Thirty years ago he removed to Akron, opening a grocery store on the site of the block on South Howard Street, which is now known as the Pflueger Building. The Enterprise Mfg. Co., with the success of which his later years were identified, was established by him in 1880. He had obtained patents on seventy inventions, all of which are embodied in the articles manufactured by the company. Although the business was started on a very small scale, so great was the demand for the unique goods manufactured under his administration, the concern soon grew to large proportions, and it is estimated that after all debts are paid, Mr. Pflueger's estate will be worth over \$100,000. He carried \$23,000 life insurance. Through the conditions of a will, prepared last Spring at Mr. Pflueger's request, he divided his property equally between his children, Mrs. Pflueger receiving her dower interest, amounting to one-third of the personal property and a life use of one-third of the real estate. Mr. Pflueger spent a number of years in the early development of his extensive business in traveling throughout the United States, and in this way established many friendships, with large concerns which he retained up to the time of his death.

## Death of Emil Grosh.

Emil Grosh, a well-known citizen of Toledo, Ohio, died suddenly at Goshen, Ind., December 3d. His death is said to have been due to an affection of the heart. He leaves a widow and two sons. The deceased was 58 years old. He resided at 334 West Woodruff Avenue and the family was a most happy one in all respects. Emil Grosh was one of the most active business men of Toledo for many years. For the past six years Mr. Grosh has not been engaged in active business, having amassed a sufficiency to keep him in his declining years.

For 20 years he was associated with William H. Maher in the cutlery business, the firm name being Maher & Grosh. The business prospered and was one of the best known firms in the United States. The store was located on Adams Street and the business is being carried on at present by Mr. Maher. For many years the firm advertised extensively in all the leading papers in the country and the mail orders poured in rapidly. The grade of cutlery was of the best, and Maher & Grosh stamped on any edged tool was a sufficient guaranty of its excellency. They employed many salesmen and the business flourished until the firm had established almost a world-wide reputation.

Personally, Mr. Grosh was a pleasant gentleman to meet, and he made a friend of every one with whom he came in contact. He was highly respected in both business and social life and his death will be universally regretted by all who know him.

## CONSULAR COMMERCIAL COMMENTS.

### COMMERCIAL AND INDUSTRIAL CONDITIONS IN GERMANY.

In his annual report for 1900 (to appear in the forthcoming edition of *Commercial Relations*) Consul-General Mason, of Berlin, submits statistics showing the general industrial and financial situation of the industrial conditions in Germany from which we make the following extracts:

"In the preceding reports of this series, there has been during the past six years little or nothing to record except a steady and rapid development of manufacturing industries and commercial activity throughout the Empire. During the critical period of 1894, 1895 and 1896, when the iron and steel interests of the United States were in a depressed and struggling condition, American visitors who came to examine the coke-making plants in Westphalia and Silesia were surprised to find furnaces and rolling mills generally in active operation, and the cutlery, Hardware and other assimilated industries busy and prosperous. This was due to various causes, which were explained at the time, one of which was the steady and rapid development of shipbuilding, the improvement of the State railways, and the fact that the export trade to South America, Australia and other new markets was becoming established through the influence of German steamship lines and the enterprise of German bankers and capitalists in making large and judicious investments in foreign fields.

"This has gone on steadily, the producing capacity of all leading German industries growing steadily from year to year, until the present limit of judicious expansion has been apparently reached. In several branches of iron and steel manufacture the point of highest prosperity has been passed, production has overtaken the demands of both home and foreign trade, and, in the face of a falling metal market, conservative managers have begun during the past three months to visibly shorten sail. Most of the works are still busy upon orders booked several months ago; but, with the exception of shipbuilding, locomotives, gas engines and certain forms of electrical machinery, the demand has slackened, and deliveries which a year ago could not be promised under four or five months are now made in as many weeks.

"The German exhibit at the Paris exposition is conceded on all hands to have been—especially in the departments of machinery, chemicals and all that relates to the application of science to industry—a triumphant vindication of German methods and a display which alone would establish the right of the Fatherland to a place in the front rank of industrial and commercial nations.

"As has been above intimated, there is inevitably a reverse side to the medal, and some of the clouds on the horizon are of a nature to inspire a certain degree of anxiety. In addition to acknowledged overproduction in cement, iron tubing and various other manufactured products and the temporary stoppage in export to China and the South African States, there is the fact that the wide and enormous expansion of industries and commerce has so absorbed German capital that there is now serious stringency in the money market, which has helped to depress securities of all kinds and embarrass many manufacturers who operate independently of syndicates and combinations. It is well known that German banks finance industrial and commercial enterprises to an extent unknown in any other country, and it is estimated by the *Moniteur Industriel* that German investments of various kinds in foreign countries now amount to not less than 7,500,000,000 marks (\$1,785,000,000), distributed throughout Turkey, Africa, China, Mexico, South America, Canada and the United States. There are invested in the one hundred and

fifty German stock companies which manufacture electrical machinery and equipments more than \$200,000,000, or nearly four times the amount of such investments in 1896. To this may be added 450,000,000 marks, or more than \$100,000,000, invested in electric tramways, lighting and power plants during the same period. The average dividends paid by the electric manufacturing companies in 1899 was 9.3 per cent.; but nothing could prevail against the downward tendency of industrial investments, and electrical stocks have shared in the general drop which has taken place during the past six months.

\* \* \* \*

"It is beyond the scope and purpose of this report to undertake any discussion as to what or how much all this may mean beyond the obvious fact that, notwithstanding her progress and prosperity during the last thirty years, Germany is still poor in accumulated wealth in comparison with France and England, and that her available capital is so wholly invested and actively employed that all share values—even the best—are kept by pressure of the money market inordinately low. Writers in other countries, especially England, have painted the situation in sombre colors, inveighed against the zeal of German banks in financing industrial and foreign enterprises, and predicted stormy weather for German metal industries in face of the increased cost of fuel and the overshadowing competition of the United States. While these general aspects of the situation are clearly recognized in Germany, there is no outward symptom of trepidation or panic, and business men of all classes face the future with apparent confidence. While many are disposed to admit that the creative energy of the past few years has pushed production beyond the present capacity of home and foreign markets, they insist that this activity is the result of much deeper and more permanent influences than those which determine a merely temporary industrial revival, and that their present position, attained through advanced technical and commercial education, industry, frugal living and the skillful application of science to manufacturing processes, cannot be undermined by any mere stringency of money or other temporary cause. Their people have been trained for generations to hard work and plain living, and, while new and wider markets are urgently necessary, they have acquired the capacity of cheap manufacture, the ships and the national force as a world power to secure and retain them.

\* \* \* \*

"Here, as elsewhere, the United States is frankly recognized as Germany's most richly endowed, most aggressive and most formidable rival. On the other hand, the Empire is, after Great Britain, our best customer, and anything which checks the prosperity of her people will diminish to that extent their ability to maintain the reciprocal trade which is now so heavily in favor of the United States. In the commercial competition between the two countries, all natural advantages—cheap and superior ores, coal, lumber, cotton and food materials—are and will remain strongly on the side of our country. To these, Germany can oppose her higher technical and mercantile education, cheaper and more tractable labor, and a merchant marine capable of carrying her products to every market on the globe. Rivals thus endowed and equipped can surely afford to sink all petty jealousies and resentments and meet each other in a spirit of manly emulation and mutual respect."

## THE PAN AMERICAN EXPOSITION, 1901

### HORTICULTURE AT THE PAN-AMERICAN.

THE BEAUTIFUL BUILDING FOR FRUITS. OTHER PRODUCTS AND THE PLANS FOR OUTDOOR EXHIBITS.

Horticultural exhibits at Buffalo will have a beautiful setting in and about an exceedingly handsome building 220 feet square. The height of the building is 236 feet to the top of the lantern, and the general proportions are of commanding grandeur. Situated in a position of great prominence on the western side of the grounds, the approach from the east is through the esplanade, past the basins of aquatic plants, the fountains and the great urns containing beautiful tropical foliage effects; up the curved incline which is bordered by many odd varieties of fruiting trees and shrubs, to the magnificent doorway which is the subject of the accompanying illustration. Probably no horticultural exhibit has ever had such elegant and appropriate surroundings and no former display has been so well worthy of it.

The Horticultural Building is connected by semicircular conservatories with the Graphic Arts Building to the north and the Mining building to the south. These conservatories are themselves very beautiful architectural features of the Exposition and the fine floral displays in them will enhance their attractions to visitors. They connect the three buildings in this group, but are distinct and separate buildings, having their own individual style and their exhibits of entirely different character. The court upon which the three buildings of the group face contains one of the superb Esplanade fountains.

Fruits of all kinds will be placed on exhibition during the Summer. Much of the fruit will be preserved in cold storage, though the exhibit will change as the season advances and the different varieties ripen. A number of States have made arrangements to provide collective exhibits that will properly represent the horticultural products of their particular section. California is arranging for a special exhibit of the wonderfully diversified fruit productions of that State. Other States are taking the matter up with the prospect of making the horticultural exhibit the most complete ever attempted. The same care that characterizes other sections of the Exposition will be given the horticultural division with the view of making it representative as to character rather than exhaustive in detail.

Large as the Horticulture Building is, it will not contain

all the horticultural exhibits. A plot of ground has been provided extending across the west front of the building on the opposite side of the grand canal, and extending south as far as the Elmwood gate. This plot has been under course of preparation for many months and will present a restful attraction in pastoral contrast to the hum of busy, energetic action which will be so characteristic of other portions of the Exposition.

### A MIGHTY MAGNET.

WHY THE PAN-AMERICAN EXPOSITION WILL ATTRACT MILLIONS TO BUFFALO IN 1901.

The Pan-American Exposition at Buffalo is bound to be the National Summer resort of 1901. Its location, in an ideal Summer climate and almost within sound of the world's most tremendous and grandly magnificent cataract, is the most cheaply and conveniently accessible to the multitude. In itself the Exposition will combine invaluable information, superlative fascination, prodigious pleasure and infinite amusement of a quality to educate, amaze, dazzle, electrify and delight people of every age, calling and condition. A scene of surpassing and stupendous loveliness by day, at night—touched by the mysterious and sun-born wand of electricity, whose lofty throne is a glowing, radiant tower, 375 feet in height—it is transformed

into a fairyland of illuminated fountains, flowers, statuary and architectural visions of gleaming color and elaborate and exquisite ornamentation, almost beyond the conception of the eye, and drowning the most vivid description in a veritable flood of artificial light, in the production of which the awful power of Niagara is harnessed to the most gigantic and complete electrical illuminating plant ever projected and supplied with two hundred thousand miniature suns.

Promenade concerts by the most famous bands; classics and popular games, contests and pastimes in the Stadium covering ten acres, with seats for 12,000 spectators and a course a quarter of a mile in length—and literally a mile of the most varied, unique, novel and attractive entertainment, including some two score Oriental, semi-tropical, savage and semi-civilized productions, weird and wondrous illusions, rare wild beasts and strangely grotesque feats, dances, and ceremonies, will afford a surfeit of harmless entrancement, fun and frolic.

### THE BEAUTIFUL ORIENT.

Nearly three millions of dollars will be required to con-

struct and equip the wonderful Midway at the Pan-American Exposition. The greatest care has been taken to prevent any approach toward the "fake" show and the visitor may rest assured that he will not be submitted to fraud or extortion so long as he remains upon the Exposition grounds. It is difficult to single out any attraction in this section as more prominent or worthy than another, for all have their special merit and novelty.

The subject of the accompanying illustration, the Beautiful Orient, will represent life as it existed in the East before the advent of the modern tourist. Gaston Akoun, director of this concession, is arranging to have native representative characters to convey proper impressions of Oriental customs and manners of living. He will have plenty of room in which to display the different salient features that would appeal in the strongest terms to people accustomed to our Western civilization. A holy Mecca will be the meeting place of tired and worn pilgrims who will constantly arrive,

management as the Streets of Cairo, which was so popular at the World's Fair, though it will be three times as large. About 300 Orientals will be employed in different ways with this attraction, a conglomerate Eastern city with distinct local features—a history in a nutshell.

The greatest care has been exercised by Mr. Frederick W. Taylor, the Pan-American Exposition's Director of Concessions, to secure only the best and most novel and attractive entertainments from the hundreds submitted for his approval. He even made a special trip to the Paris Exposition to see what it had to offer in that line. The thirty acres of space exclusively devoted to the Midway, with its six thousand feet of frontage upon the asphalted main avenue, will be filled with over thirty amazing, amusing and instructive special exhibitions, including such magnetic features as the Indian Congress, Streets of Mexico, House Upside Down, Scenic Railway, A Trip to the Moon, Captive Balloon, Old Nuremberg, Florida Everglades, African Village, The Steeplechase,

make their offerings in the various mosques or religious temples and disperse. Eight streets will diverge from this objective point, each representing a distinctive local section of the Orient. A street in Constantinople will be thoroughly Turkish, even to the vagabond dogs. Morocco will be represented by a street which will illustrate the life and habits of the Moors. Algerian life will receive attention and a street will be borrowed from Algiers for the purpose. Typical illustrations in a like manner will be taken from Egypt, Tunis, Persia, Tripoli and Turkey in Asia. While looking through these sections visitors could easily imagine themselves in the midst of the ancient city the counterpart of which they are visiting.

A Bedouin Arab encampment will lend variety and Sahara Desert nomads will live in their interesting characteristic way. Natives from all countries will live on the grounds with their camels and different domestic Oriental animals, cabins, tents and huts. Restaurants, tea houses, shops and fruit stands for the sale of Oriental goods of great variety will be provided. The Beautiful Orient is under the same

Moving Pictures, Venice in America, Darkness and Dawn, Johnstown Flood, The Beautiful Orient, Thompson's Aerio-Cycle, Roumanian Village, Filipino Village, Fire Dance, '49 Mining Camp, Hawaiian Volcano and Village, Miniature Railway, Animal Show, Mirror Maze, Old Plantation, Ostrich Farm, Japanese Tea Garden and other first-class and fascinating introductions to many happy hours. Each exhibition is distinct and complete in itself and some of them upon a big scale, combining a number of special and unique features. In every way the Pan-American Midway promises to present the most stupendous, sensational and entrancing aggregation ever assembled in one place, and far surpassing those of all previous Expositions.

"Great joke on Jarley."

"What was that?"

"Went fishing and didn't catch anything. Ordered a half dozen bass to be sent to his house, so that his wife would think he caught 'em. When the basket was opened, they turned out to be bottled Bass."—*Tit-Bits*.

### Old Dominion Horse and Mule Shoes.

The Old Dominion Iron & Nail Works Co., Richmond, Va., are manufacturers of the Old Dominion Horse and Mule Shoes, which have long been noted for their superior excellence, and have achieved a well-deserved popularity, especially with their extra light steel shoes, on account of their light weight, superior metal, model shape and exceedingly fine fashion. In addition to the usual line of Horse and Mule Shoes required by the trade throughout the country, they make a number of styles of special shoes such as Long

EXTRA LIGHT STEEL SHOE.

Heel Shoes, used in cities having cable car slots in the streets. They have an extra heavy long heel. They are good for any purpose where extra heavy heels are desirable. Extra Heavy Mule Shoes, for use in cities having large stone paving blocks. Especially adapted to cotton truck mules in Southern cities. Cow Boy Shoes, a light, round shoe; heels

SHOWING QUALITY OF MATERIAL.

turned, holes opened, and ready for use. They are the best shoes for use on ranches and prairies at remote distances from blacksmith shops. To indicate the quality of material used in the manufacture of the Old Dominion Shoes, we give herewith in Fig. 2 a Mule Shoe with a clip and heels drawn down and tied in a knot. The light spots show the marks of the hammer used in forging it in this shape.

“What’s the matter over there? What’s the crowd doing in front of that house?”

“The man who lives there has just inherited \$100,000. Those are friends of his who have come to tell him how to invest the money.”—*Ex.*

### Morley Brothers' New Catalogue.

Morley Brothers, Saginaw, Mich., have issued for the advancement of their interests in the jobbing business a large edition of a general Hardware catalogue, the most ambitious volume offered in that line that they have placed in the hands of their customers up to date. It contains 1274 pages, each 12 1-2x9 1-2 inches, and is bound in stiff covers with leather back and corners, making it an admirable volume for general handling, and one likely to stand the frequent reference which so important a catalogue is apt to get. The frontispiece, occupying a full page opposite the title, gives illustrations of their main establishment, together with their factory, repository and their iron, steel and heavy Hardware warehouse, showing the extensive facilities they possess for the transaction of their important business, and also the factory in which is conducted the business of manufacturing the “Blue Line” Lumbering Tools, Easy-Rolling Shelf Ladders, Harness, Horse Collars and Strap Work, which are among the salable products which this concern are distributing to the general trade. The catalogue is divided into a number of departments, including Hardware, Tinware, Housefurnishing Goods, Saddlery Hardware, Cutlery, Silverware, Bicycles and Bicycle Sundries, Guns and Ammunition, Fishing Tackle and Sporting Goods generally. These different lines are all illustrated and described in this catalogue, together with the productions from their own factories, as above indicated. In the few remarks which preface the general contents, they state that “To facilitate the prompt and careful filling of mail orders which are particularly solicited, we have, in compiling this catalogue, attempted to make it so plain that if you will use our figures and numbers we will clearly understand your wants, and can make prompt and accurate shipments.” They also state that owing to the constant changes in prices, they have deemed it advisable to issue no discount sheet to apply to this extensive catalogue, but will be pleased to quote prices upon application. Another feature in regard to the catalogue is the fact that all lines illustrated are carried in stock. When this is not the case, the articles are marked for “Direct Shipment.” It is certainly a complete catalogue in every respect. It is well indexed, which is an important feature, so that under the many heads and subheads a single reference will in all cases find the article desired. The thinness of the paper on which the index is printed would seem to justify adverse criticism, as that being the most frequently handled part of the catalogue, it should have been on paper twice as substantial. They adopt the usual method of classification, commencing with Axes and Mechanics’ Tools and Heavy Hardware, and finishing with a department devoted to Sporting Goods generally. Nearly 200 pages are allotted to Builders’ and Miscellaneous Hardware, and nearly 200 pages given to Tinware, Housefurnishing Goods and Tinnery Tools. This will indicate how largely these goods are represented in their pages, and a casual glance through its contents shows the greatest care in the compilation of the many articles that are embodied in the volume, the descriptions being full and complete, quantities of full packages in all cases being given, and descriptions so clearly stated as to make errors in ordering very few and far between if proper attention is given to the reading matter. No effort has been made to make a large catalogue that would be of unlimited proportions on account of the large cuts used in connection therewith. In this particular instance, while the cuts are all of a size that almost explain themselves, there are few that occupy half or full pages, the effort evidently being made to condense the information as much as possible without the necessity for devoting too much space to unusual illustrations. We congratulate the customers of Morley Brothers that they are able to have before them a catalogue so thoroughly prepared as to make merely nominal their labors of ordering by mail.

### New England Hardware Dealers' Assn.

The eighth anniversary of Ladies' Night was celebrated by the New England Hardware Dealers' Association, on December 12th, at the United States Hotel, Boston. The reception was given in the parlor at 5 o'clock, and was very largely attended, the proceedings making an extremely interesting hour. The company were received by President and Mrs. George W. Burditt, assisted by Ex-President William D. Parlin and Mrs. Parlin, Secretary and Mrs. James A. Farless, and Mr. and Mrs. Myron H. Tarbox. Both at the reception and at the dinner the Ladies' Arion Orchestra furnished an exceptional programme of enjoyable music. The banquet took place promptly at 6 o'clock, and President and Mrs. Burditt at the head of the procession marched with the hundred members and other guests to the banquet hall. After a blessing had been asked by the Rev. O. S. Davis, of Newtonville, Mass., the guests did excellent service to the dinner provided by the hotel. At the close of the dinner President Burditt gave the company an address of welcome, which was brief, and listened to with the usual felicity experienced by all who have had the opportunity of enjoying his remarks. He offered at the conclusion a toast, "Our Lady Guests," which was responded to by Elisha J. Neale, of Lowell, Mass., which was a very interesting discourse and listened to attentively. Mr. Neale's address was followed by a vocal solo by Robert L. Van Buskirk, accompanied by Louise S. Allard. Rev. Sarah K. Dixon, of Tyngsboro, Mass., who was prevented by illness from delivering an address at the previous Ladies' Night, was more successful on this occasion, and delivered an extremely interesting address, taking for her subject, "A Plea for Perspective," which was thoroughly enjoyed by those present. A cornet solo followed, rendered by Ethel E. Edgecomb. Rev. O. S. Davis, of Newtonville, Mass., closed the oratorical part of the entertainment with an address on the subject of "The Outlook of Life," which he delivered in an extremely pleasing manner, illustrating the subject with a number of interesting anecdotes, at the conclusion of which the meeting was brought to a termination by all joining in singing "Auld Lang Syne." The Entertainment Committee consisted of Elisha J. Neale, Hiram W. Colton, Austin H. Decatur and E. M. Richardson. They certainly did themselves proud by providing such a successful array of talent, which was thoroughly appreciated by those participating. The Secretary, James A. Farless, without whose presence no meeting of the New England Hardware Dealers' Association would be considered perfect, assisted the Entertainment Committee to the fullest extent in making a success of this occasion.

### Exclusive Agencies.

Colonel J. G. Stowe, United States Consul-General at Cape Town, who has been such an observant guardian of American commercial interests in South Africa, has this to say about the appointment and protection of "exclusive agents:-"

"While exclusive agencies may not be the best means of promoting trade in a manufacturing country, in a manufacturing country such agencies are, I maintain, often desirable. Many of the United States manufacturers have what may be called representatives here, in the agents of American export commission houses, who introduce the goods, cable the orders, buy in the United States market, and pay not only for the goods, but the insurance, freight, stamps, etc. Such houses ought to be protected, and business men know what that means, without any detailed explanation.

"The same may be said in regard to what are known as resident agents, exclusive or otherwise; those who go to all the expense and labor to introduce a new article, and spend money for freight, duty, expense of traveling and advertising. It is found to be a common practice after goods have been introduced by such an agent—even an exclusive agent—for

the manufacturer to fill orders received through another source, without making a price that will warrant reserving a commission for the one who has been the means of placing the goods upon the market; and often the shipment reaches one of the very customers who have been induced through the promoter—if so he may be called—to buy.

"It has been said, and very truly too, that a foreign merchant who purchases goods at first through an agent, is apt to place his second order with export houses through whom he has the habit of exporting, and who, he thinks, are in a position to treat him economically; and these houses do not usually order through the exclusive agent, the introducer of these goods, but insist upon dealing direct with the manufacturer. Even if the manufacturer introduces his products through his own salaried men, it may happen that the second order will reach the manufacturer through the importing house. Yet, one of the best moves a manufacturer can make is to send his own men to exploit his goods, even if they are in only one specific line, and charge the expenses of the trip to advertising. The export commission houses would encourage such work, and, while the manufacturer might not get a second order direct from the new customer, orders would come through the export commission house or a resident agent.

"Manufacturers must do business with this country in one of the following ways:

"(1) They must introduce their goods by a visit from their own salesmen; and, if only one visit is made, they must depend upon the importing agents to furnish later orders.

"(2) They must keep their own men here constantly, which would not be economical when only one line is represented.

"(3) They must depend upon the very uncertain and unsatisfactory method of advertising, and even then they must not expect so many direct orders from customers as through the commission houses; and, while the commission houses will buy and forward, yet they will naturally consider the trade not so permanent as if steps had been taken as above suggested."—*American Trade*.

### "Ye Olde Harde Ware Store."

The John E. Bassett & Co., 754 Chapel Street, and 321 State Street, New Haven, Conn., issue annually an extremely quaint little booklet under the title of "At the Sign of Ye Olde Harde Ware Store." The fact that this store was established in 1784 gives them an exceedingly good basis for some very cute and attractive advertising. The little booklet is composed of twelve pages of light green coated paper, the letter press being in color with old-time initials, and the whole bound in a heavy red paper cover, making it a very attractive get-up, and it has no doubt reached a stage where its arrival is annually anticipated among their local customers. To justify the adjective we use that this is a quaint publication, we make a few extracts herewith, but the original style adopted by the artist who prepares it must be seen to be appreciated:

\* \* \*

It's a noticeable sign, is the sign of the old Hardware store. It's an unusual sign. Few businesses, established as was this before Washington was President, remain to-day on the ground where they were started. It's a sign of stability. No business could have lasted so long had it not stood well with the public, for it is the public that judges business methods and decides if they shall continue.

As the Christmas season approaches and the Christmas buying begins, we wish to call attention to the many attractive articles which you'll find best at the sign of Ye Olde Harde Ware Store.

\* \* \*

Every well-dressed dog wears a coat, sometimes pants, a collar and oftentimes a tie; but the collar is the chief mark of quality. A good collar is a decided adjunct to a high-bred dog, while it would also give grace to a cur, and so long as the law requires that dogs should be dressed to that extent, why not have the collar a good one?

### Improved Price Cards and Holders.

John S. Menagh, 134 Newark Avenue, and 170 Pavonia Avenue, Jersey City, N. J., is the proprietor of one of the leading Hardware stores in that city, and is thoroughly equipped for the management of an extensive business by being the inventor of a number of labor-saving devices and appliances that facilitate the transaction of a retail business to an unusual extent. This is a branch of the business that is not always taken hold of by the proprietor himself, and for that special reason has not the time and attention given to it, necessarily during after hours, that has been devoted to it by Mr. Menagh. Among the numerous special devices that he has adopted in the transaction of his own business, and now advertised to sell to other stores requiring such facilities, we desire to call attention to his Price Cards and Holders, an advertisement concerning which will be found in another column. As will be noticed in the illustration herewith, the Price Cards are reversible, and are intended to be used about the store by being placed in frames which are fastened to the wood-work of the shelving. On these Price Cards, it is intended to show the cost and selling prices of the goods on the shelves where these cards are placed. The frames are intended to measure 11 1-2x29 3-4 inches, and are made on the premises. They are hung between brackets, which are fashioned from bar iron bent in such a form that the frames can be turned around, and either side face the front. Each frame is designed to contain four price cards,

IMPROVED PRICE CARDS AND HOLDERS.

two on each side. They are arranged so that they are readily removed that changes may be made in the prices when necessary, and are all carefully protected from dust and finger-marks by having glass in front of them. The cards themselves are made of heavy cardboard, which is covered with plain white paper, ruled in accordance with the various goods to which they may relate. The frame is so constructed that by turning the catch to one side and removing the side of the frame, which is hinged at the top, the card can be removed. After the desired correction in price is made, it is easily returned and the side of the case put back in its original position. Each of the price cards has the names printed on them of the articles in large black type, and for all purposes, and to all appearances, are as thoroughly arranged as if they formed a portion of a price book. In fact, in Mr. Menagh's own store they may be considered to hold this important relation, the cards being a practical duplication of the pages of his own special price book, and his system includes giving the price-book page in one corner of the price card, so that the fountain-head of information may be constantly referred to, for the price cards in both his stores always agree with the price book. The improved Price Card Holder, which is also advertised in single and double frames, is made in two sizes, one 11 1-2x15 1-2 inches, and the other 11 1-2x29 3-4 inches, as noted in the illustration herewith. The smaller holder holds one 10x14 card on each side, protected by glass of the same size, while the larger admits two cards of the same size on each side, which are likewise protected by glass in front. These frames are carefully constructed, and the necessity for a hinged side has been done away with, the price cards and their protected glasses being put in and taken out through slits in one of the sides. When

in position, they are securely held by a small catch, so there is no danger that by an untoward movement the cards may be shaken out. By moving the catch the cards may be changed with very little trouble. Mr. Menagh takes a great interest in this improved method of conducting business, and would be pleased to furnish these Price Card Holders to any Hardware merchant who would consider it advantageous to follow his price system. The Price Card Holders are furnished without glass, to avoid the danger of breakage in transportation, glass of the size required, 10x14, being readily obtained anywhere as cheaply as he could furnish it. The price cards, however, are sold separately from the Holders. He has also prepared to furnish a special price book like the one he has in use for his own convenience, the book having 400 pages, 10x14 inches in size, in order that each page may be a correct copy of the price card, or vice versa. He has also included in the convenient articles for the fostering of this system, an Easy Sign Marker, which may be obtained from Mr. Menagh by those desiring to mark the price cards and price books in the same manner that he does. There is no doubt but what the orderly system and thorough application of labor-saving methods adopted through the use of these appliances has been of great assistance in the main and branch store conducted by Mr. Menagh, and would be found equally advantageous by any Hardware store doing a large and extensive retail business in any part of the country. The careful conduct of a business of this kind, assisting the clerks in the ease with which sales may be accomplished, has its effect in many other directions, as it inclines to care and attention being given to all the details of an immense establishment, orderly methods, and a thorough appreciation of improved facilities, making a successful business a natural result.

### A Favorable Balance of Trade.

The commercial record of the United States in the calendar year 1900 will surpass that of any preceding year, both in exports and in the excess of exports over imports, or "favorable balance of trade," as this excess is usually termed. The imports will be slightly below those of one or two preceding years, and when considered in their relation to population show a smaller importation for each individual than at almost any other period in many years. Basing the estimate for the year upon the eleven months' actual figures already received by the Treasury Bureau of Statistics, it seems probable that the exports of the calendar year 1900 will reach about \$1,470,000,000, and the imports \$825,000,000, making the excess of exports over imports, or favorable balance of trade, \$645,000,000, a sum greater by \$25,000,000 than that of any preceding year. It is only since 1873 that the exports have with any regularity exceeded the imports or produced the favorable balance of trade which has almost continuously characterized our commerce during the last quarter of a century. Yet it remained for the closing year of the century to present not only the highest figures of exports, but the highest record of excess of exports over imports, or favorable balance of trade in the history of our commerce.

Considering the exports alone, it may be said that for the calendar year 1900 they will be double those of the calendar year 1888, three times those of 1872, four times those of 1869, and five times as much as in 1867. On the import side the figures are less imposing. They will aggregate for the year about \$825,000,000, against \$840,000,000 in the calendar year 1892, when they reached the high-water mark of the century's imports.

Wunn—You see, to keep the house from getting robbed while I was out, I tried the plan of leaving the gas on at full force.

Tuther—And did it keep you from getting robbed?

Wunn—I thought it had until the bill came in.—*Indianapolis Press.*

### The Shattuck Hammerless Gun.

Schoverling, Daly & Gales, 302-304 Broadway, New York, are largely interested in the distribution of the Shattuck Hammerless Gun, an illustration of which we give herewith. It forming one of their most important specialties, and has become one of the most popular double-barrel breech-loading hammerless guns ever marketed through the Hardware jobbing trade. Notwithstanding the moderate price at which

goods are packed the most rigid inspection is exercised and the development of the slightest flaw or imperfection is sufficient to cause rejection. Hand labor is employed throughout in forging, grinding, cutting, straightening, tempering and polishing, hence careful watch may be kept for flaws and a finished product of the best quality assured.

Dealers should ask drummers to show them the Goodell No. 75 steel, or full particulars may be obtained from the makers,

THE SHATTUCK HAMMERLESS GUN.

this gun is marketed, it is esteemed especially for its shooting qualities, which have proven to be of such an excellent character that this feature alone is largely instrumental in its wide distribution. In construction it is extremely simple, nothing complicated, is made with polished blue steel barrels, or the genuine twist barrels, both styles having their admirers. It has a top-snap lever action, double bolt, and is provided with a matted extension rib, with walnut stock having a checkered pistol grip and fore end, with a rubber butt, and is made in 12 and 16 bore. The business done in this gun has been so phenomenally large during this season that the factory has been scarcely able to fill orders as promptly as they would desire, but Schoverling, Daly & Gales are well supplied, and have abundant confidence in their ability to control the trade.

Goodell Company, Antrim, N. H.; New York office, 10 Warren Street.

### "Elk" and "Dixie" Bicycles.

The Arcade File Works, Anderson, Ind., and 97 Chambers Street, New York, have just issued to the trade their Advance Catalogue Circular of the "Elk" and "Dixie" Bicycles made by them, in which they briefly describe the style and equip-

ment of their line for 1901, comprising four models, which, with options offered, will, they think, cover the demands of the cycling public.

### The Skating Season is With Us.

The Union Hardware Co., 95 Chambers Street, New York, represented by Tower & Lyon, while making the same general line of Ice Skates as in the past few years, are presenting some entirely new high-grade goods possessing special features. Their new Flanged Blade, one of their latest improvements, has been applied to many numbers of their steel skates. Their new patterns in Screw Clamp fastening have taken the

GOODELL KITCHEN STEELS.

it is sold makes it an attractive leader for the Hardware or cutlery dealer.

While this steel is sold at a low price, the makers desire it understood that the quality is thoroughly A1. The sharpener is made from the best quality of special crucible steel. It is not rolled nor cast, but is carefully forged under the hammer, insuring a close grain and fine temper. It is then carefully ground and turned to true size and shape, after which it is cut by a special process to secure the rising cutting edges so well known on the best grade of steels. From the time the metal enters into the manufacturing process until the finished

popular fancy, and also their new Lock Lever Club for ladies' use. Increased sales of Donoghue Racing Skates are reported, and the great demand for the Union Hardware Co.'s Hockey Skates proves their superior selling qualities. The quality, finish, shape and general all-round mechanical excellence of this make of skates leave little room for further improvement.

Sister-in-Law—How like his father the boy is!  
Mother—He's certainly like him in one way. He generally keeps me up half the night.—*Ex.*

### The New York Credit Men's Association.

The bi-monthly meeting and dinner of the New York Credit Men's Association was held Wednesday evening, December 12, at the Drug Club. Mr. A. H. Watson, President of the Association, presided at the meeting, and, after a short address of welcome, introduced Mr. Richard Young, of the Richard Young Co., who addressed the Association as follows:

ADDRESS OF RICHARD YOUNG.

You have placed before me the difficult task of treating one of the greatest subjects occupying the thought of our commercial community. Never in the history of this, or any other country, have such rapid commercial strides been made as those of this nation during the last decade, and especially in the past year, when our foreign trade reached more than \$2,250,000,000—our exports aggregating \$1,400,000,000—and this is but the beginning of an era of development which is to assume proportions far exceeding the expectation of the most sanguine, if we are wise enough to take advantage of our opportunities.

Four years ago in England the most jealous antagonism existed towards American competitors. This has largely disappeared, and we find now a commendable rivalry and a steady, rapid increasing demand for American goods of all varieties. With the quick steamer service, goods can be landed and collections returned quite as promptly as from our far Western States. These remarks apply generally to the English speaking people everywhere, and especially to Australasia. While the population is only 5,000,000, the Australians are among the richest per capita of any people in the world, and are liberal buyers of fine quality goods, are fine merchants and favorable to America.

Norway and Sweden, though a small market and contiguous to England, we think an excellent field for operation. The people are bright, honorable and friendly. They have generally a high sense of honor, and with ordinary care there should be no difficulty with credits. France and Germany have great possibilities for us commercially. Generally credits are safe, and for large transactions. Letters of credit will be given without hesitation. Russia, with its vast population, is not such an encouraging field for operation, owing to the comparative poverty of the masses, and the strong preference for France. Turkey, with its 40,000,000 people, scarcely 1,000,000 are possible customers for many of our goods. The people, as a nation, are very poor, and their wants limited. There are many merchants anxious for our American manufactures, but they should open credits in New York, and this can be safely required as they demand such a credit for nearly all goods which they send abroad. We have heard much of the possibilities of developing trade with the Orient, but it is well to remember that of the 400,000,000 in the Chinese Empire, not more than 1,000,000 can be considered as consumers of a general line of our goods. Japan, with 40,000,000, is a more promising field, but here also we are confronted with customs unaltered for hundreds of years, and not more than 1,000,000 can be expected to purchase anything in the nature of luxuries.

To do a successful foreign business and realize the possibilities which await us, there are certain conditions which must be conformed to. If our business is of sufficient importance, we should send our own representatives, who should speak the language of the people. Samples should well represent goods, and scrupulously avoid sending anything inferior. The opportunities for successful business in the United States are greater than anywhere else, and must continue so for many years, with a population growing at the rate of 1,250,000 annually, and with the new possessions Americanized and developed, we can safely predict a still more rapid advancement than before. We think it quite safe to assume that in ten years we will head the list of nations in foreign trade as we do now in exports.

The presiding officer then introduced Mr. Wm. R. Corwine, of the Merchants' Association of New York, who said:

ADDRESS OF WM. R. CORWINE.

Mr. Young has taken us across the Atlantic to England, the Continent and large parts of the world, and brought up in China and Japan, touching Australia *en route*. He has generalized and told us how we may increase our trade. I have spent some time in Japan and China, and the growth of trade since I was there has been so remarkable, had I the figures with me and read them, it would sound like the story of Aladdin's lamp.

Trade will increase in the next fifteen years with such rapid proportions that we will be appalled at the enormous value as time goes on. Cheap rates must be provided by

the closest possible routes, and we must have in turn better banking facilities throughout the world by means of which we may be able to collect for the goods sold direct, through our own banks in New York, and not have to conduct a triangular banking operation.

Mr. Young points out rightly that before many years New York will be the great financial center of the world. He is right. That development may be laid down upon lines so absolutely sure of success that there can be no possible doubt as to the future. There is another factor entering into the development of the foreign trade which I want to allude to, and which is something that we all have at heart. The improvement of the Consular Service of the United States. The class of men sent as Consuls were not a class of men, by a long shot, as the members of this Association. They were appointed, as a rule, and are appointed as a rule, simply because those in power at Washington desire to get rid of them. In getting rid of them they do this country a great deal of harm. There have been men of high standing who have received their appointment through accident. No matter how honest a man may be, or how ambitious he may be, he is not capable of giving the full measure desired unless he has had some training of the commercial conditions, or unless he has an ability to grasp the conditions of the country to which he is accredited. In past times there was little belief that this country was going to expand in trade to the extent to which it has expanded. Their horizons were bounded by the Congressmen's district from which they came. The Spanish-American war came, as we know, and I don't suppose there is a man in this room who did not feel proud, however he may have disagreed about the political bearing of that war, it came and ended as it ought.

To conclude, there is a motto on the back of your menu which reads: "A cheap credit man is the most expensive luxury a house can have." A cheap credit man is a luxury, and somebody has got to bear the burden of his cheapness.

The presiding officer then introduced Dick S. Ramsay, President of the Hide and Leather Bank, who said:

ADDRESS OF DICK S. RAMSAY.

We live in a State that is justly called the Empire State. We live in a nation that is the blest of all nations of the world. We have everything in the world that the earth produces. Now let us utilize all of that. There is no place in the world that should do the business so cheaply in the shipping line as New York City. There is no reason why a large proportion of the business community of the whole country should not be transplanted to the State of New York if we could expand the Erie Canal. You can save from \$1.50 to \$2.00 a ton on every ton brought to this city and transported to Europe. As a matter of credits, I won't undertake to talk about credits, because this intelligent audience is dealing in that line perpetually. I want to say this one thing. In my whole entire business life I have practiced this one thought. That if you want to get down to the facts as regards whether it is safe to trust a man, find who the man is, what his character is, how he lives, and how he treats his neighbor, and see that he is a fairly good man, then it is safe to trust him. You cannot make a man sign a mortgage on his wife and children; such a man will certainly dupe you. If you find him honorable in his deportment, honorable in the town that he lives, I won't ask that he drinks water all the time. Let him be fairly straight in his walks of life, and that man is pretty near safe to trust, and I think you will all bear me out.

These set speakers were followed by reports from the chairmen of the various committees, showing active work all along the line.

Eclipse Mfg. Co., Elmira, N. Y., have issued their fourth annual catalogue relating to the Morrow Coaster and Brake, in which they explain and illustrate the workings of the Brake in such detail as will enable riders and dealers to understand its perfect construction, and its superior mechanism. It is explained that the Brake is made from a superior quality of steel, and that each working part is tempered and constructed in such a way as to make its performance indicate its utility and endurance, as every part of its skilled construction is combined in an harmonious manner in order to work as a unit.

Casey—Phat do yez prefer as a chaser after dhrinking whiskey?

Cassidy—Anything but me woife.—*Ex.*

## RECENT TRADE PUBLICATIONS.

**J. L. BOARD ENGRAVING Co.**, 176 South Clinton Street, Chicago, Ill. Four-page circular, under the head of "Business Helps for Busy Men," referring to "Easy" Sign Markers, "Universal" Stamp Racks and Metal-Bodied Rubber Type, manufactured by this concern.

**MATCHLESS METAL POLISH Co.**, 69 Frankfort Street, New York. Envelope circular and price list of high-grade Metal Polishers and Buffing compositions in wide variety made by this company. This includes a large line, and covers almost every requirement for which such goods may be desired.

**R. M. PANCOAST**, Camden, N. J. Eight-page pamphlet entitled "Fresh Air In-Doors," and exploiting the merits of the Pancoast Window Ventilator, which is a ventilator possessing novel features of great utility that makes it admirable for the purpose designed, in all large offices, buildings, halls, churches, passenger car windows, etc., etc.

**STANDARD TOOL Co.**, Cleveland, Ohio, and 94 Reade Street, New York. Calendar for 1901, designed for general distribution throughout the trade for use in the superintendent's or master mechanic's office, and containing considerable information in addition to its use as a calendar in demonstrating the utility of the tools manufactured by this well-known company.

**PELOUZE SCALE & MFG. Co.**, 133 South Clinton Street, Chicago, Ill. Envelope-size circulars exploiting the convenient Pelouze Postal Scales which, under the names of the "National," "Princess" and "Countess," are popular specialties handled by the Hardware trade, the two latter being designed for useful holiday presents for a lady's or gentleman's desk, being made of silver or seal leather. They are very convenient little specialties, and deserve a wide distribution.

**ARCHER IRON WORKS**, of 36 La Salle Street, Chicago, Ill. Twelve-page catalogue of Steel Wheelbarrows, Lumber Carts, etc., which are shown in all their many varieties, well illustrated, complete with list prices throughout. Embraced in its contents are prices on steel trays, both riveted and pressed, and a description of their lumber carts for saw mills and wood-working shops, which have achieved a popularity for the purpose of hauling lumber in lumber yards, and large plants requiring a light conveyance of this description.

**G. A. CROSBY & Co.**, Chicago, Ill. Four-page large size booklet, designed to show their present facilities of an electrical character, their entire shop equipment of machinery being up to date, and of the latest and best designs, the entire plant being operated by electric drive. Illustrations are given of their present extensive plant, and several of their varieties of presses and similar machinery, foot and power shears, slitting shears, etc., for the manufacture of which this concern has succeeded in obtaining a leading position.

**RUSSELL & ERWIN MFG. Co.**, New Britain, Conn., and 43 Chambers Street, New York. Booklet of 12 pages, nicely printed on coated paper, and well illustrated throughout with miniature engravings, showing the Wayne design in door and window trimmings manufactured from wrought real bronze in several finishes, including Natural bronze color, polished, Chocolate background, light bronze relief, Old copper, mottled, and Regular oxidized copper. This includes a complete line of Locks made from wrought steel, embracing mortise lock sets, sliding door sets, front door and vestibule sets in large variety, together with wrought bronze push button, flush sash lift, push plate, etc.

**GOODYEAR TIRE & RUBBER Co.**, Akron, Ohio. Oblong catalogue of 24 pages of the Goodyear-Akron Bicycle Tires. It is printed on excellent paper, and finely illustrated, showing their line of single-tube Tires in large variety, together with Unguaranteed Tires for 1901 marketed under the name of the "Goodyear" and "Ajax." Included in the contents is the Goodyear Detachable Tire, made to fit any common or detachable rim; Endless Inner Tubes, Universal Pedal Rubbers, Frame Guards, Repair Plugs, Schrader Valves, etc.

**E. W. BLISS Co.**, Brooklyn, N. Y. Sixteen-page catalogue of the "Bliss" Inclined Power Presses, which have been favorites among manufacturers of sheet metal goods for a number of years. The range of work for which they are adapted includes nearly every kind of blank cutting, perforating, forming and combination die work; in fact, covering a large proportion of the operations required in the manufacture of cans, pieced tinware, electrical goods, brass goods, trimmings, etc. This line of goods has been recently re-designed, and entirely new patterns made of increased weight and strength, making this little catalogue a very desirable one for those interested in the use of machinery of this description.

**ALBANUS L. SMITH & Co.**, 1305 Arch Street, Philadelphia, Pa. Catalogue of 36 pages of the United Flexible Metallic Tubing Co., Ltd., manufacturers of Flexible Metallic Tubing. A very handsomely gotten-up catalogue on coated paper, oblong in shape, superbly illustrated throughout, it giving an admirable idea of their facilities for the manufacture of the class of goods exploited therein, which cover almost everything possible within the reach of the useful applications of Flexible Metallic Tubing, which has obtained considerable vogue for its use as an armoring for electric wires, more particularly in lamps hanging from the ceiling. Reference is made to the fact that it is the use of such tubing that is a complete defense against the attacks of vermin. The rapid development of steam pressure gained by the wide distribution of tubular boilers has given a great impetus to the increased use of metallic tubing, and it is now employed in thousands of cases where rubber, which is vulcanized and charred at a comparatively low temperature, would be found absolutely useless.

**WHITE, VAN GLAHN & Co.**, 49 East Forty-second Street, New York. Booklet of 12 pages, very handsomely printed on coated paper, and finely illustrated throughout, having for its title page "Hardware Problems Solved at 49 East Forty-second Street." Among the half-tone illustrations with which the booklet is filled is a view of the front of the store, showing its attractive window, the interior of the store very artistically displayed, the show cases and general appearance. On another page is a fine cut showing the method of using sample boards in cases behind glass, indicating the compact form in which these goods are presented to the customers, whose wants they undoubtedly develop. Interspersed throughout are illustrations of the style of goods in the way of pearl-handled knives in sets, carvers, forks and steels in sets, scissors, knives, etc., forming a part of the high-grade stock carried at this branch store. At the conclusion it is stated that while no mention has been made of the many other things incorporated in their stock that would interest the reader, they have everything included in the word Hardware on hand at this store, the main store being at 15, 16 and 17 Chatham Square, where it has been a landmark for a half century.

## NEW GOODS AND SPECIALTIES.

### Heller's Mice-proof Seed Cases.

W. C. Heller & Co., Montclair, N. J., are manufacturing the Mice-Proof Seed Cases, an illustration of which we give in connection with this article. These seed cases are made to contain a certain number of drawers, which are made from hard wood, pine, North Carolina pine, oak, ash or cherry, constituting the fronts and backs, being painted, stained or varnished, as desired, the fronts and backs being 3-4 inch thick. The sides and bottom are made of one piece of the best patented rolled galvanized steel, and in this fact consists their mice-proof feature. The steel is embedded in the wood ends by a patented process, and secured by wire brads driven from the inside through the wood and metal, thus making a box that is constructed on a scientific principle, with no nails or rough edges on the outside to tear the shelving, and so closely constructed that it is impossible for the finest seed to escape. On the right-hand

HELLER'S MICE-PROOF SEED CASE.

side of this box, near the front, is a depression which is enameled and upon which the cost and selling price of the contents of the box can be marked. The said marks can be rubbed off and changed at any time without injuring the enamel. By the use of a case of this description, the Hardware dealer handling seeds is able to condense this department in much less space, and in a receptacle that will not only prove the most serviceable seed box he could add to his fixtures, but by an increased utility would make the cost extremely moderate. All seed cases are equipped with these steel boxes. W. C. Heller & Co. issue in connection with this department of their business, a catalogue containing full instructions and description in regard to this line of goods, they being made in a number of sizes suitable for the requirements of the dealer who handles a small allowance of seeds or a much larger line. These drawers are all fitted with solid bronze drawer-pulls and card clips, and having the steel division between each box, it is not possible for seeds to get mixed.

### Thacher Belt Fastener.

Among the many devices that have been invented for the fastening of belts while in use, the Thacher Belt Fastener is, perhaps, the most popular. It is an invention free from the defects of lacing, which is the system most generally adopted, one of the principal faults of which is, that the lacing yields unnecessarily to the labor required of it, and this con-

stantly affects the tension of the belt, which requires frequent renewals with the usual attendant delays. The putting of this fastener on a belt takes two or three minutes, while lacing takes from eight to twenty minutes. Cost about same and consider time of men lost. Thacher Fasteners do not weaken the belt where teeth go through. Do not break the grain or fibre. Teeth take up so much less space than other hooks and do not tear or rip the belt. Then again a loss of strength to the belt itself by punching for the incision of the lacing, may be safely entertained as greatly weakening it. Frequently a further loss is incurred through its tendency to yield, preventing the belt running true. This, of course, necessitates extra wear and tear on the belting. This is all overcome by the use of a belt fastener like the one under consideration, which, being constructed of the best quality of malleable iron, is guaranteed to stand the severest test without breaking. Then again, it is claimed that a number of other points should be considered, among which may be mentioned: Economy of cost, time saved when applying, and the lessened wear and tear on the belting, while at the same

THACHER BELT FASTENER.

time affording a smooth operating surface. No punch is required for its application; the two ends of the belt are brought together on a block of wood, the hook driven through, and clinched invariably toward the break in the material. The clinched side of the hooks, it is intended, shall run next to the pulley. On wide belts two or more hooks are required, and the hook should not be as wide as the belt, an eighth to a quarter of an inch on each edge being left. No punching of holes required. Makes an endless, continuous belt. No pulling apart. It is guaranteed to stand the tensile strain according to the line of work to which the belt may be adapted, and can be used on all sizes, widths, kinds and makes of belting. The Thacher Belt Fastener is manufactured by the Thacher Belting Hook Co., Cleveland, Ohio, who will be glad to furnish additional information upon request.

### Bell Gas Stove.

The Vacuum Gas Stove Co., 128 W. 23d Street, New York, are the manufacturers of the Bell Gas Stove, illustrations of which we give herewith. They are manufactured in a number of extremely ornamental styles, being regarded by the company as specimens of artistic execution in the line of gas stoves presenting new scientific features. The style shown in this article is designated as the Parlor Urn Heater, and is placed upon the market as handsomely plated as most silver table ware. They are but 17 inches high, and weigh but 12 pounds. Each burner itself is a miniature gas furnace entirely enclosing the flame, so that no gases can escape without being consumed. The heat by

its peculiar construction is deflected to the floor, and, different from similar stoves, the gases are not thrown upward from the top of the stove, but from the lower part of the heater, making it much more effective for this purpose. It is claimed by the manufacturers that by the perfect consumption of gas in its operation, they are a sanitary appliance in the heating line deserving of consideration. The urn in the heater can be turned aside as shown in cut,

BELL GAS STOVE.

and the stove used for cooking or light housekeeping purposes equally as well as a gas plate with or without an oven. Or the stove can be used to heat the kitchen, and can be placed on the table or on top of the range. It is intended to be used as an ornamental parlor heater, and in that desirable form should prove an extremely salable article. Among the commendable features of this system of heating, the manufacturers call the attention of dealers to the fact that the Bell Stoves consume less than half the gas made necessary by the ordinary illuminating flame gas heaters. As well as being much more hygienic to burn in a room than the ordinary coal stove, it is extremely economical as compared with all similar appliances. In fact, it is as economical to burn as coal in most cases. They dwell upon the fact that the hygienic features and their facilities for both cooking and heating would naturally make them a salable specialty with any Hardware dealer interested in this line of goods.

#### Majestic Bolted Barrow With Improved Tray.

The Michigan Wheelbarrow and Truck Co., Saginaw, W. S., Mich., are placing before the Hardware and supply trade the Majestic Bolted Barrow with improved Tray (Fig. 1),

FIG. 1.—MAJESTIC WHEELBARROW WITH IMPROVED TRAY.

of which we give an illustration herewith. While the barrow to all appearances resembles the usual style marketed for general purposes, the special feature of this barrow consists of the tray, the peculiar construction of which is shown in Fig. 2. It is something entirely new in the wheelbarrow line. It will be noticed that the three pieces of the bottom are held together with iron rods, which pass through both ends of each piece about 2 1-2 inches from the end. In order to draw the three pieces tightly together, the ends of the rod are clinched, thus making the tray far more durable than is usually the case in this grade of barrow. The manufacturers

state that it cannot warp, break, split or get out of shape in use, nor is there a disposition to check when exposed to the weather, as all the trays are kiln-dried, so that they cannot open up. Even when in service wheeling damp earth, etc., the condition of the barrow will be found extremely tight. It is undoubtedly made for continuous service, and is referred to by the manufacturers as being thoroughly reliable, being constructed from good stock. The tray above re-

FIG. 2.—THE MAJESTIC TRAY.

ferred to is mounted on the several grades of the company's products marketed under the names of the Standard Bolted, Valley, Saginaw and Michigan frames. Notwithstanding the increased cost of manufacturing included in the ripping out, boring the holes, the iron rods, the putting together, and the extra cost of bending, which makes it more expensive, this improved tray is offered at the same price as the company's one-piece bottom tray.

#### Little Giant Grass Hook.

H. S. Earle, 705 Fourth Avenue, Detroit, Mich., is the patentee and general sales agent for the Little Giant Grass Hook, which, although manufactured from patents of as recent a date as February 13 and June 26, 1900, has achieved such unusual popularity with the trade handling it as to give it a deserving distinction among all hooks of a similar character. As will be seen from the illustration, considerable originality is noticeable in its construction. It is, in fact, a miniature scythe, scientifically adjusted at a proper angle, so that to a practiced hand it looks just right, and is claimed by the manufacturer to hang just right and cut equally as well. It so nearly approaches the perfect characteristics of a scythe that a small lawn may be mown with it, or in connection with the use of a lawn mower the grass growing close to trees, fences and other places not easily reached by a lawn mower may be carefully trimmed and kept in proper order. It is equally as serviceable in cutting corn or clipping hedges. The patentee, Mr. Earle, says that any jobber

LITTLE GIANT GRASS HOOK.

who at the present time is unfamiliar with the merits of this tool of his, may have a sample for the asking, and he makes us, to some extent, responsible for having this done by our readers, as he will undoubtedly be disappointed if each of them doesn't request this sample so freely offered. Of course, this refers more particularly to the jobbing element, and we trust will be unanimously availed of. Among other specialties largely handled by Mr. Earle, and with which his name is identified, is the Be Ve Be Scythe, manufactured by the North Wayne Tool Co., Hallowell, Me.; also, the Little Giant Corn Knife and the Brooks' Corn

Hook, with a serrated edge, manufactured by the same company. He also is general sales agent for the S. S. Tro-Tem-Pla Hoe, manufactured by the Ely Hoe and Fork Co., St. Johnsbury, Vt.

#### Nicol's Curling Iron Heater, With Shield.

Nicol & Co., 55 West Washington Street, Chicago, Ill., are manufacturing and distributing through the Hardware and Notions trade the patent Curling Iron Heater illustrated herewith, which has already met with an extended sale, continued use indicating its growing popularity. It is designed, by the use of a new shield, for the prevention of the curling irons becoming soiled or blackened by the process of heating. It is intended for use on an ordinary lamp chimney, stove or grate fire, and the shield so protects the iron it makes the usual wiping unnecessary, takes less time, and avoids the customary washing of the bang, which is necessary when the hair becomes smoked from contact with an unprotected iron. The shield can be used with the iron inside, either in a lamp chimney or the fire, and will heat as easily, while

NICOL'S CURLING IRON HEATER, WITH SHIELD.

it can be readily separated by pressing the thumb-piece or handles of the curling iron together.

#### Argand Vapor Lamp.

Argand Vapor Lamp Co., 1149 Fourteenth Avenue, Detroit, Mich., are the manufacturers and patentees of the Argand Vapor Lamp, which we illustrate in the accompanying cut, which represents the Style A, the length of which is 40 inches, and the capacity of the tank one quart. It is also manufactured in several other styles, circulars giving full particulars regarding which may be had upon request. The Argand Vapor Lamp in its construction is designed to manufacture its own gas from common gasoline, thus causing it to be a gas plant within itself. The gasoline is contained in the reservoir at the top of the lamp. Through this reservoir passes a feed-pipe manufactured from heavy seamless brass tubing, through which the gasoline is conducted to the generator, which is concealed in the burner. The gas becomes mixed with air (burning about 95 per cent. air), and produces a blue flame, which when applied to the Welsbach mantel, which forms a part of the outfit, is enabled to give out a bright, steady, white light of intense brilliancy, at a cost claimed by the manufacturers to be but 1-6 of a cent per hour. The gasoline cannot escape except through the burner, and there the hole is so small as to make no fear of risk regarding the same. Every effort is made in its construction to produce an article as perfect as the best of material and skilled labor can manufacture. Attention is called by the company to the fact that the insurance companies now issue permits for the use of these lamps without extra charge, that should be considered sufficient endorsement of their perfect safety. In addition to this, the company have a system of careful and thorough inspection, which tests their perfect manufacture

before one of them is permitted to leave the factory, and it is consequently guaranteed by them in every way for one year. The generator is entirely concealed from view in the burner, and to all appearances the light is an ordinary gas jet. It is a well-known fact that gasoline frequently clogs up the chan-

ARGAND VAPOR LAMP.

nels through which it is supplied. The Argand generator is so constructed, having this emergency particularly in view, that every channel is accessible without taking the generator apart. This enables it to be easily cleaned, and restores it to its original usefulness in a very few minutes' time without even removing the mantel. This is a feature the manufacturers claim worthy of consideration. The Argand Vapor Lamp Co. are desirous of making agents for the sale of this improved lamp in all parts of the United States, Canada and Mexico, and would be pleased to open up correspondence with dealers who contemplate the addition of a line of similar specialties to their present stock.

#### Adjustable Socket Wrench.

The Smith & Egge Mfg. Co., Bridgeport, Conn., are the manufacturers of the Adjustable Socket Wrench, an illustration of which is herewith presented. It is a very useful tool for the use of the machinist or even the farmer, as it can be used in many places that cannot be reached by other wrenches, such as putting up hangers, running taps and reamers, and for adjusting lag screws. It will be found extremely handy in the tool room, machine shop and on the farm. It is made in three sizes, as follows: 6 in. Adjustable

ADJUSTABLE SOCKET WRENCH.

from 1-4 to 1-2 in. square; 9 in. Adjustable from 5-16 to 3-4 in. square; 12 in. Adjustable from 1-2 to 1 in. square.

**PATENTS** Preliminary Consultation Free.  
**HENRY J. MILLER,**  
 55 Equitable Building, BOSTON.

# REVIEW OF THE MARKETS.

**Wire Nails:** There is still an unusually good demand for wire nails in a regular way. The orders are not exceedingly large, but still stocks are undoubtedly kept well assorted, judging by the specifications received from the dealers. Prices continue as heretofore published, and are as follows, f. c. b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots	\$2.20
less than carload lots	2.25
To retailers in carload lots	2.30
less than carload lots	2.40

New York prices continue without change, as follows:

To retailers, carload lots on dock	\$2.48
less than carload lots on dock	2.55
Small lots from store	\$2.60 to 2.65

**Cut Nails:** At the recent meeting of the cut nail manufacturers, held on the 13th inst., December prices were reaffirmed to continue through the month of January. A fair demand exists, and sales are steady for the season, with no special indication of change in quotations, which remain as follows, f. o. b. Pittsburgh, terms 60 days, 2 per cent. off in 10 days:

Carload lots	\$1.95
To jobbers in less than carload lots	2.00
To retailers in less than carload lots	2.10

New York quotations remain as previously reported.

To jobbers in carload lots on dock	\$2.13
less than carload lots on dock	2.18
To retailers in less than carload lots on dock	2.31
Small lots from store	\$2.30 to 2.35

**Barb Wire:** The demand is certainly a very good one from the West. The demand for barb wire has been notably better this season than it was anticipated it would be. It is evident that there will be no immediate change in price, as orders are being booked ahead in sufficient quantity at present prices to warrant this assumption. It has been difficult to obtain barb wire as promptly as it was required on orders from trade centres. The demand continuing will undoubtedly make this condition of affairs perceptible for some time to come. Prices continue as previously quoted, as follows, f. o. b. Pittsburgh, net cash 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots, Painted	\$2.50
Galvanized	2.80
To jobbers in less than carload lots, Painted	2.55
Galvanized	2.85
To retailers in carload lots, Painted	2.60
Galvanized	2.90
To retailers in less than carload lots, Painted	2.70
Galvanized	3.00

Ellwood and Baker Wire is 5 cents and Washburn & Moen Glidden 10 cents per 100 pounds higher than the prices above named.

**Plain Wire:** The market for plain wire is still in a satisfactory condition, the demand being above the average for the season of the year, and indications point to the probability of this state of affairs continuing for some time to come, as a confident feeling prevails in the market. Prices continue firm at previous quotations, which are as follows, f. o. b., Pittsburgh, terms 60 days, or 1 per cent. discount for cash in 10 days:

		Base sizes.	
		Plain.	Galv.
To jobbers in carload lots	\$2.15	\$2.55	
less than carload lots	2.20	2.60	
To retailers in carload lots	2.25	2.65	
less than carload lots	2.35	2.75	

Above prices are for the base numbers, 6 to 9. The other numbers of Plain Wire and Galvanized Wire take the several advances noted in the following table:

**PLAIN FENCE WIRE ADVANCES (CATCH WEIGHTS).**

		Base sizes.	
		Plain.	Galvanized.
6 to 9	\$0.05 advance over base	.40	.40 extra.
10		.40	
11		.40	
12 and 12½		.40	
13		.40	
14		.40	
15		.40	
16		.40	
17		.40	
18		.40	

**Augers and Bits:** At a recent conference of the manufacturers of Augers and Bits, new prices were agreed upon, which are slightly lower than the nominal prices formerly quoted. The regular quotation to the retail trade has been established at 70 per cent. discount. Following the example set by other manufacturers of lines of goods that are of large consumption, a classified list has been adopted by which to regulate special quotations.

**Ship Augers and Bits:** A revised list has been adopted on Ship Augers and Bits, by the manufacturers, by which the larger sizes are advanced in price. Discounts remain as before, L'Hommedieu's being quoted at discount 15 and 10 per cent. and Snell's, Watrous' and Ford's at discount 40 per cent. The new list is as follows:

**SHIP AUGERS, WITH OR WITHOUT SCREWS.**

Sizes.	Per dozen.	Sizes.	Per dozen.
4-8 inch and under	\$7.50	16½ and 17-8 inch	\$57.00
4¼ " 5-8 inch	9.00	17½ " 18-8 "	72.00
5½ " 6-8 "	10.50	18½ " 19-8 "	86.00
6½ " 7-8 "	12.00	19½ " 20-8 "	101.00
7½ " 8-8 "	13.50	20½ " 21-8 "	115.00
8½ " 9-8 "	15.00	21½ " 22-8 "	130.00
9½ " 10-8 "	16.50	22½ " 23-8 "	144.00
10½ " 11-8 "	18.00	23½ " 24-8 "	158.00
11½ " 12-8 "	21.00	24½ " 25-8 "	187.00
12½ " 13-8 "	24.00	25½ " 26-8 "	216.00
13½ " 14-8 "	25.50	26½ " 27-8 "	245.00
14½ " 15-8 "	27.00	27½ " 28-8 "	274.00
15½ " 16-8 "	31.50	28½ " 29-8 "	330.00

**SHIP AUGER BITS, WITH OR WITHOUT SCREWS.**

1-8	4½	5½	6½	7½	8½	9½ and 10-8ths inch.
to 4-8	and 5	and 6	and 7	and 8	and 9	
\$6.00	7.50	9.00	10.50	12.00	13.50	15.00 per doz.

In Sets of Bits, 32 1-2 quarters, one each from 2 to 8-8ths inch, in plain boxes, per set, \$9.00.

**Chisels and Drawing Knives:** The irregularity in the prices of Chisels and Drawing Knives, that have been a feature in the market for some time, has not been the fault of the manufacturers, who have done their best to sustain prices. The manufacturers, in a recent conference, and with a desire to make a market price that would be satisfactory all around, have established a discount of 70 and 10 per cent., as the regular price to be quoted to the trade, and this they hope will be adhered to.

**Steel Squares:** A slight reduction has been made by the Associated Manufacturers in the published quotation of the discounts on steel squares, which is now established at a discount of 70 per cent.

**Wood Screws:** Under date of December 20, 1900, the Rogers Screw Co., Providence, R. I., quote as follows:

**BASE DISCOUNTS.**

Flat Head Bright	85 per cent.
Blued	85 per cent.
Add 5 per cent. for bluing.	
Flat Head Brass	82½ per cent.

They also make announcement of the fact that a full assortment of round head wood screws will shortly be among their productions.

**Cordage:** The cordage market has felt a slight weakening, which creates some irregularity in regular quotations. While the present prices do not show much profit over the prices of the raw material, an effort is being made by the manufacturers to get the trade in line without suffering unnecessary loss in the manufactured article, with a hope that the market will soon recover its strength under the more regular conditions. The following quotations represent the market at the present time:

	Pounds.	Cents.
Manilla, 7-16 inch and larger	93	
¾ inch	10½	
½ inch and 5-16	10½	
Sisal, 7-16 inch and larger	6½	
¾ inch	7½	
½ inch and 5-16 inch	7½

**JAP-A-LAC**

**JAP-A-LAC** is the hardest, smoothest, most elastic, brilliant and durable varnish on the market for floors and interior woodwork. Made in the following colors, which will stain and varnish by one application: Oak, Walnut, Mahogany, Cherry or Orange, Malachite Green, Ox Blood Red, Brilliant Black, Dead Black, Natural or Light, Ivory or White, Yellow, Spruce, Drab.

Architects should specify it. Painters should use it. Dealers should insist on it. Our Magazine advertising is creating a demand for JAP-A-LAC. Dealers should write for our money making proposition.

THE  
**GLIDDEN VARNISH CO.,**  
Cleveland,  
Ohio.

**Linseed Oil:** The Dean Linseed Oil Co. quote as follows:

In lots of less than 5 barrels.....61 cents per gallon.  
In lots of 5 barrels or more.....60 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time.

Bolled Linseed Oil, 2 cents per gallon higher than Raw.  
Calcutta Oil, 85 cents per gallon.

**THE BOSTON TRADE.**

Although the season is drawing to a close there seems to be an unusual demand for general assortment, and December sales will show a marked improvement over those of last year.

The weather conditions have been most favorable throughout New England, and in some sections there has been an abundance of snow, which has created a demand for such goods as are always called for under those conditions; while in other portions the cold weather has caused a lively demand for Ice Tools, Skates and kindred goods.

Prices seem to be adjusting themselves, and such lines as have been held too high are being gradually reduced, and those which have been ruling at unreasonably low prices the last ninety days are becoming firmer and reasonable advances have already been made.

The decline in Screws is nothing more than anticipated, and is welcomed by the general trade.

There seems to be a unanimity of opinion as regards the coming year, and we trust that the predictions of the most sanguine will be fully realized. **FRYE, PHIPPS & Co.**

**THE PHILADELPHIA TRADE.**

It is gratifying to report that trade, for this period of the year, is keeping up unusually well, and the cold snap of the past few days has made a large demand for skates, sleds and other holiday goods. Of course, the time is now approaching for salesmen to withdraw from the road, and stock-taking has begun, although the pressure of business is such as to make the taking of stock more difficult than usual.

Manufacturers are still talking of advances in prices, although one or two Spring lines have gone through the inevitable yearly pressure, with the result of somewhat lower prices. This, however, does not extend to the general line of goods, and a very firm tone is manifested by many manufacturers, with considerable talk of higher prices.

It is generally felt that the country at large is in most excellent shape, and the anticipation of a good business next year seems to be widespread and general.

We trust all your readers will be satisfied with the results of the year, and wish them all the compliments of the season.

**BIDDLE HARDWARE Co.**

**THE PITTSBURGH TRADE.**

A Christmas issue of *Hardware* should contain only pleasant reading, and we are glad to be able to add our quota to the general make-up.

The year is ending with an excellent condition of business. Employment is general at good wages throughout the whole

section. Mills and mines are all running at fair margins for profit, and even Hardware jobbers will say that this has been one of their good years.

There are quite a number of "sky scrapers" projected for the coming year, to be built on one prominent street. Out of a dozen on paper, certainly three or four will reach the building stage next Spring—we are glad to see our capitalists investing their money in this way. It shows their confidence in the future of Pittsburgh, and we are quite sure they will have no cause to regret it.

We wish all your readers a Merry Christmas and a Happy New Year, and that there may be for all "Peace on earth, good will to men."

**LOGAN-GREGG HARDWARE Co.**

**THE CLEVELAND TRADE.**

There is no combination or trust in the country that can injure the business of the middle class as the railroads can by discrimination in freight rates. They can, and have, ruined the business of men, corporations and cities, and built up the most gigantic corporation on the business they destroy. Their power is more dangerous than all the trusts ever organized. If Congress has any sincere desire to protect the people against trusts, let them pass the Cullom bill, or some other, that will give the railroad commission the power to enforce its directions. Nothing less than such action will satisfy the business men.

The denial of equal rights in transportation is equivalent to the denial of the inalienable rights of life and liberty, and a nation that cannot prevent this is unworthy of respect, and the party that will not try to do it is unworthy of confidence. The possibility of such an enormous evil should not exist in a country that professes to give equal rights. Under the interstate commerce commission law properly amended, unjust discrimination can be prevented, and it is the first duty of Congress to make the law effective. It will not injure, but benefit, the railroads, as well as other business, to prohibit discrimination. This is the one thing necessary to check the growing impression of favoring government control of transportation lines.

All other pools and combinations have the elements of self-destruction if they attempt to injure the public.

November and December were record-breaking months in the Hardware trade, and "every prospect pleases."

**THE LOCKWOOD-TAYLOR HARDWARE Co.**

**THE DAVENPORT TRADE.**

The Hardware balance sheets for the new year will not be as satisfactory as they were one year ago. The twenty dollars a ton decline on staple goods of April 1st, 1900, will again be brought to mind when dividends are declared January 1st, 1901. Just now money is a very cheap commodity; as its purchasing power decreases, prices will advance. It has been said that a fool and his money is soon parted, but the man who now exchanges his money for property, especially for Hardware, is no fool. A soft answer turneth away wrath, and soft weather turns away much trade in Winter goods. Competition was at one time said to be the life of trade. At present, co-operation seems more conducive to the profitable life of trade than does competition. If the members of the National Hardware Association should decide to pool their interests, we trust Davenport will be selected as headquarters for the new incorporation.

**SICKELS, PRESTON & NUTTING Co.**

**THE OMAHA TRADE.**

The unusually mild weather prevailing during the past season has made circumstances under which business has been transacted somewhat peculiar. Our Summer weather has extended up to the present time, and, in consequence, large quantities of season goods are being carried over and difficulty has been experienced in supplying the demand for lines not ordinarily called for at this season of the year. A feature of the situation is the extraordinary demand for Barbed Wire and Builders' Hardware. Prices are well main-

THREE-BAR LEATHER  
shoe-soles and top-lifts (for heels) are the best.

Write us; we'll give you points.

Baxter Schenkelberger & Co,

350 Congress street, Boston.

tained and trade is considerably in excess of the average for this season of the year, notwithstanding the fact that it is running in entirely different lines from what is customary at this season. Some few orders for Spring goods are being placed, but the disposition of these is to hold off. Collections are above the average, and indications for the coming year point to an exceptionally large and satisfactory volume of business.

RECTOR & WILHELMY CO.

#### THE SAGINAW TRADE.

Business conditions in our territory are very satisfactory. Fall trade has been better than the average season, and collections are good. This is a salt-producing State, and the present price of salt is naturally of great benefit. All holiday lines are selling well, and a large Spring trade is looked for in general and Builders' Hardware.

MORLEY BROTHERS.

York, Pa.—The agricultural implement works erected during the past year by Samuel Morton and a number of other incorporators for the manufacture of several makes of patented farming implements and machinery will not be operated by the original company. Owing to circumstances which were not foreseen at the time of organizing the company the board of directors has determined upon leasing the works to Mr. Morton and two associates, William Evans and William H. Evans, his son. The new company will be known as the Morton-Evans Co. and will shortly assume charge of the plant.

# DORAN LIGHTING SYSTEM

Remember the *first* in the field will reap the harvest. Our improved Doran Lamp is the height of perfection in Hydro Carbon lamps. *Don't* confound this with the common 100 candle power gasoline lamp. We have something entirely new, pronounced by *all* who have seen it the *BEST* thing they ever saw.

A Few of Its GOOD POINTS:

1250 Candle Power.

No fount to fill and break mantles.

No shadow below, light all around.

Turned up and down instantly with a chain.

Simplicity. (It will surprise you.)

Practically Noiseless.

Every Lamp

Sold

Sells Another

Handsome, looks exactly like the best electric  
arc lamp.

Last, but not least, the cheapest system on  
the market, both in first cost and in operation,  
which is 1-6 of any other light of its  
power.

We are appointing agents now for every town and city in the U. S. It will be profitable to you because we have *positively* the best system of lighting ever invented. It has absolutely *no faults*. Every lamp guaranteed to be perfect and give satisfaction when received. As to our responsibility we refer to any bank or mercantile agency in Chicago.

## THE ST. PAUL TRADE.

With the near approach of the holiday season we always expect a decline in our business, but this year seems an exception, as our trade is keeping up splendidly, but the lack of crop, and consequent lack of money, is no doubt having a bad effect. Still, if these conditions had been normal, what would we have done with the orders? We should not have had room to handle them, as our business during the last three months has been all we could attend to.

We try to study out what will be the market for the Spring and cannot come to any conclusion. We wish some wise man would tell us whether prices will be strong or weak, whether the American Steel & Wire Co. will put their prices up or down, or leave them where they are, and while this prophet is at work he might as well do a whole lot of guessing, as we believe all are somewhat at sea in regard to the future. Still, Providence will, no doubt, take care of us as in the past.

C. W. HACKETT HARDWARE Co.

## THE SAN FRANCISCO TRADE.

The last holiday trade of the 19th century started in much earlier than has been its custom of late years—commenced fully two weeks before Christmas and progressed each day in a cumulative manner as the time of the arrival of the wonderful Santa Claus drew nearer.

The principal local trade interest event that has occurred since our last letter of a fortnight ago was the San Francisco and Oakland Retail Hardware Dealers' Association banquet on the evening of December 7th. Although the association is scarcely a year old, it is sturdy for its age and is destined to occupy an important place in San Francisco trade circles.

At the banquet, said a local paper next morning, practically every member was present. The repast was an excellent one, and after the guests had partaken of it generously, F. H. Ellis, chairman of the Arrangement Committee and toastmaster of the evening, called upon President Sites, who delivered the address of welcome. He predicted a brilliant future for the association.

The objects of the association were briefly outlined in a happy toast by F. F. Osborn, after which S. V. Armstrong told of some of the things the association has accomplished and is likely to bring about in the future. "The Relationship Between Jobbers and Retailers" was the subject of a well-handled speech by Henry Gracey. The closing toast was given by J. P. Maxwell, who related some incidents and conditions which he had observed among the trade while in the East.

TRADES PRESS ASSOCIATION.

## THE GRAPHITE INDUSTRY.

John A. Walker, vice-president of this company, having returned from Europe after a brief business trip, the occasion was celebrated by a banquet, tendered him by the office force and salesmen.

It was a particularly bright and fortunate gathering, as the managers of the New York, Philadelphia and Chicago branches were present.

While the affair was intended to be social, it gave Mr. Walker an opportunity which seldom presents itself,—that of talking to so complete a representation of the men over whom he presides.

His address was on the unique position occupied by the Dixon Co. abroad, and his experience with the foreign representative houses who are all enthusiastic on the matter of the Dixon Graphite Products.

These products are now being shipped to about every civilized country on the globe, and the fact shows conclusively that the European market is wide open for fine class goods "Made in America."

General business is more quiet, December being a rather dull month naturally, but we look forward to the brightest kind of a new century, which will break previous records.

JOSEPH DIXON CRUCIBLE Co.

## The Tubular Rivet and Stud Co.

From The Tubular Rivet and Stud Co., Boston, Mass., we have received two interesting catalogues, viz.: Their Rivet Catalogue No. 2 and their Machine Catalogue No. 6. The rivets of this company are made of carefully selected steel or Swedish iron, and are plated with japan, copper, tin, brass, nickel or silver. They are manufactured in many special styles to meet special demands. For some methods of riveting, "caps" are frequently used to give the appearance of a head on both sides. These caps are of two styles: concave and flat. The former are made from sheet metal and can be used either with the bevel pointed or tubular rivets. The latter are made from solid wire, and while adapted to either the bevel pointed or the tubular rivets, are especially intended for use with this firm's "Perfection" rivet, in which case the appearance of the rivet head and cap is exactly the same.

This company make four classes of riveting machines, viz.: hand machines, foot power with hand feed, foot power with automatic feed, and steam power, automatic feed.

In their hand riveting machines, the rivets are placed in position by hand and inserted by hand power. But in their foot power hand feed riveters the rivets are placed in position by hand and are inserted by foot power. In the foot power automatic machines the rivets are carried automatically to the setting tools and are inserted by foot power, while their steam power automatic feed carries the rivets automatically to the setting tools and inserts them by steam or other mechanical power.

Nephew—Oh, the gout is nothing, uncle, I shouldn't mind it if I had it.

Uncle—I shouldn't mind it, either, if you had it.—*Ex.*

# STANLEY RULE & LEVEL CO.

## Improved Carpenters' Tools.

SOLD BY ALL HARDWARE DEALERS.

CHARTER GAS ENGINE Co., 9-11 Wallace Street, Sterling, Ill. Thirty-two-page catalogue referring to the "Charter" Gas and Gasoline Engines used for such purposes as pumping, sawing, threshing, mining, boating, well drilling, cotton ginning, sheep-shearing, etc. Reference is made to the fact that the extreme simplicity of the "Charter" is evident, as it has no small or delicate parts, and its moving parts being reduced to a minimum number, it is so simple and compact that it is next to impossible to get out of order. The catalogue is given to a full description of the engine, and its many applications, its great utility for various purposes, showing its advantages over steam, and all other motors. In connection with the catalogue the company send out a full line of testimonials from nearly every State in the Union, Canada, Mexico, etc., and covering one hundred purposes to which the power of the "Charter" is applied. The catalogue includes list prices of all the various sizes and styles. De-

scriptions accompany the same, being lucid and easily understood.

Marlin Fire Arms Co., New Haven, Conn., have issued a calendar for 1901 in a very handy and convenient form for desk use, which they state they will be pleased to send to any one of our readers upon request, accompanied by their address, and enclosing stamp for postage.

## HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Hardware Stores.

Berlin, N. H.—The Hodgdon Hardware Co. has been incorporated to do a trading business. Capital, \$4000. Incorporators: J. A. Hodgdon, M. S. Hodgdon, Matilda Hodgdon, A. H. Eastman, J. H. Wright, all of Berlin.

Carthage, N. Y.—Chauffy Bros. are opening their new Hardware store in the R. R. Brown Building, which has been enlarged and repaired by J. L. Vinier to meet the demands. The stock of stoves, Hardware, tinware, etc., which the new firm recently purchased of Mr. Vinier, has been removed to the new location, and new goods of every description are being added to the stock.

Fairmont, W. Va.—The Jacobs, Hutchinson Hardware Co. is the name of a new firm formed to engage exclusively in the wholesale Hardware business here. A lot has been purchased adjoining the Free Press Building. A four-story brick building will be immediately erected. J. M. Jacobs, principal stockholder, has disposed of his Hardware business on Main Street.

Jersey City, N. J.—The F. L. Johnson Co. has been incorporated to deal in Hardware. Capital, \$125,000. Incorporators: Martha White, N. M. White, J. N. Quimby.

New Whatcom, Wash.—Elliott K. Reynolds, of Olympia, will soon open a Hardware store on Elk Street.

Waitsburg, Wash.—The John Smith Hardware Co. has filed articles of incorporation with the County Auditor. The capital stock is 120 shares of \$100 each. The trustees are John Smith, H. W. De Muth and J. P. Strickler.

Tonica, Ill.—The incorporation papers for the J. C. Lambert Hardware Co. have been filed with Recorder Wilson. The company is capitalized for \$6000.

### Changes and Improvements.

Albion, N. Y.—E. S. Willyoung has sold his Hardware business to Tyler & Bennett.

Birmingham, Ala.—W. A. Chenaweth has become associated with the Mayberry Hardware Co. in the capacity of vice-president and general manager.

Bloomfield, Neb.—E. E. Coleman has sold his Hardware interest here and moved to Norfolk.

Brink Haven, O.—Delong & Pinkley have moved their Hardware in the room formerly occupied by Day & Co.

Brockton, Mass.—The co-partnership existing between E. O. & Chas. A. Noyes has been dissolved, and Chas. A. Noyes will continue the business.

Burlington, Wis.—J. A. Miller and H. G. Miller have gone to Nashville, Tenn.,

where they have purchased a Hardware store.

Caribou, Me.—Irving & Ricker have decided to close out their store in the Maley Block, Sweden Street, and have sold their Hardware to James H. Glenn.

Chehalis, Wash.—C. W. Johnson & Co. have sold their Hardware business to Mills & Cowles, Hardwaremen of Olympia.

Clarksburg, W. Va.—J. L. Martin & Co., of Charleston, have purchased W. Harrison's Hardware store on Main Street and will continue the business in the same building.

Elmore, O.—The first of January John Banting, of Banting, Sanders & Co., and Phil Feilbach will go to Toledo with C. B. Banting to open a wholesale implement, Hardware and seed store.

Franklin, Ky.—J. A. Clark, an active member of the Franklin Hardware Co., has sold and transferred his entire interest in the firm to W. C. Grainger.

Penfield, Ill.—G. W. Hall has sold his Hardware, harness and furniture store to John Fowler, of Fowler, Ind., and has purchased C. J. Williams' Hardware store at Rantoul.

Plainfield, Vt.—The dry goods department of the store of H. A. Keniston has been closed out and a line of Hardware substituted.

Sioux City, Ia.—It is said that J. E. Bienkiron, who recently removed to Sioux City from Bancroft, Neb., will, January 1st, become a member of the Baker Hardware Co.

Sioux City, Ia.—L. J. Coombs has moved his Hardware and implement business from 312 Pearl to 324 Fourth Street—the store-room formerly occupied by the Limbach-Bleeg Co.

Susquehanna, Pa.—Frank L. Smith, East Main and Broad Streets, has disposed of his Hardware business to Fred M. Seeley.

Tuscaloosa, Ala.—The J. Snow Hardware Co., which has been owned by C. N. Maxwell and J. W. Sanders, has been changed in that Mr. Maxwell will now own and control the Hardware store.

Wrightsville, Pa.—An addition is being built to the Wrightsville Hardware Co.'s plant. This new apartment will be used as a polishing room. The company is also making arrangements for the opening up of the smaller part of the new foundry, which is situated next to the large one. A number of other improvements are being made about the plant.

### Business Embarrassments.

Brooklyn, N. Y.—A petition in involuntary bankruptcy has been filed against the firm of Shivera & Stevenson, of 337 Adams Street.

Crestline, O.—Bossler Bros., Hardware merchants, have filed a deed of assign-

ment to Henry L. Sosenheimer, of the same place. Assets and liabilities are each about \$2500. The assignee gave bond in the sum of \$5000.

Jordan, N. Y.—The Hardware firm of S. E. Mann & Son has filed a petition in bankruptcy.

Melrose, Wis.—Henry L. Stoker, Hardware merchant, has made a voluntary assignment for the benefit of his creditors.

Naples, Tex.—C. L. Mathews, a prominent business man, has gone into voluntary bankruptcy. Liabilities about \$45,000, assets \$35,000. Mr. Mathews was a large retail dealer in Hardware.

Quebec, Que.—Charles A. Parent, of Quebec, Hardware merchant, made a demand of assignment upon Joseph Dion, of Quebec, Hardware merchant, upon a claim for \$1003.85. Mr. Dion consented to assign, and E. A. Parent, of Quebec, bookkeeper, was appointed provisional guardian to insolvent estate.

### Fires in Hardware Stores.

Amarillo, Tex.—R. H. McAlpine. Loss, \$4500; insurance, \$2750.

Boston, Mass.—A. J. Tuttle, Portland and Causeway Streets.

Delmar, Del.—Irving Culver.

Dyersburg, Tenn.—Nichols & Suggs. Loss, \$6000; fully insured.

Etna, Ill.—O. P. Spillman.

Fulton, Ky.—Shacklett-Thomas Hardware Co. Loss, \$15,000; insurance, \$8500.

Youngstown, O.—Fire has destroyed the six-story building occupied by the Stambaugh-Thompson Co., dealers in Hardware. The loss is estimated at \$100,000, with \$75,000 insurance. The fire originated among the oils in the basement and spread so rapidly that several employees had narrow escapes from being trapped by the flames.

### Burglaries in Hardware Stores.

Chicago, Ill.—Frank Lauer, 223 North Clark Street. Loss, \$100.

Denver, Colo.—Kent & Stuchfield. Pocket-knives.

Johnstown, Pa.—George Fenn. Loss, \$30.

Kanona, N. Y.—G. E. Saltsman. Razors and pocket-knives.

Kansas, O.—Crookson's Hardware store. Laurens, S. C.—James Dunklin. Revolvers and cutlery.

Mattawamkeag, Me.—H. B. Wyman; \$100.

Penn Grove, N. J.—Edward G. Brick. Loss, \$9.

Rosenberg, Tex.—Kinch Hillyer. Loss, \$50.

Silver Creek, Neb.—W. E. Kerr; razors, etc.

South McAlester, I. T.—R. K. McAdams. Cutlery and guns.

Thorp, Wis.—C. H. Sheldon & Co.; revolvers, etc.

## HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Etc.

**Albany, N. Y.**—The Acme Ball Bearing Caster Company, of New York city, has been incorporated to manufacture casters and Hardware novelties. Capital, \$500,000. Incorporators: G. D. Mackay, L. E. Berger, P. B. Scarff, all of New York City; F. P. Magoun, of Bernardsville, N. J.; G. B. Magoun, of Babylon, L. I.; F. G. Landon, of Staatsburg; W. Ferguson, Jr., W. P. Reid, both of Babylon, L. I.; H. S. Cross, of Mount Vernon.

**Billings, Mont.**—The Common Sense Harrow Co. has filed articles of incorporation with the Secretary of State. The new company will manufacture harrows and other agricultural implements. The capital stock is \$25,000. Peter Yegen, Christian Yegen, J. W. Vaughan, G. G. Cochran, W. G. Kain, W. A. Vale and George W. Hubbard are named as trustees of the corporation.

**Boston, Mass.**—The Clark Mfg. Co. has been incorporated with a capital stock of \$150,000 to manufacture pulleys, shafting and other power transmission appliances.

**Bridgeport, Conn.**—A certificate of organization of the Benedict-McFarlane Co. has been filed with the Secretary of State. The corporation is organized for the purpose of manufacturing spoons, forks, in metal and silver plated ware. The amount of capital stock is \$100,000. The subscribers are M. S. Benedict, H. L. Benedict and F. H. McFarlane.

**Calhoun, Tenn.**—Calhoun is to have a \$10,000 stove foundry, with the Edward Bros. and H. B. Heneger as principal stockholders.

**Chicago, Ill.**—The Continental Chain Co. has been incorporated. Manufacturing chains and Hardware specialties. Capital, \$35,000. Incorporators: J. E. Hubbert, A. S. Furber, M. Guthman, all of Chicago.

**Cincinnati, O.**—The Cincinnati Iron Stove Co. has been incorporated. Capital stock, \$25,000.

**Cincinnati, O.**—The Cincinnati Nut, Lock & Mfg. Co. has been incorporated. Capital stock, \$10,000. Incorporators: Ebenezer W. Lewis, Jewett A. Mather, John F. Fisk, Jr., Elmer J. Timmons and Otis H. Fisk.

**Clayville, N. Y.**—Work has been begun in the upper part of this village upon the plant for a new manufacturing industry. John L. Babbitt, B. T. Babbitt, of Whitesboro, and F. T. Richards, of Washington Mills, have purchased the S. A. Millard property, consisting of about ten acres of land, with a number of tenement houses, and will establish a factory for the making of copper wire. The company will be known as the Babbitt & Richards Wire Co. and will be incorporated within a short time. The capital stock will be \$10,000. Two buildings are to be erected for the

use of the concern, the larger of which will be 32 x 67 feet, on the ground, and one story in height. This will be the main factory. The second building will be practically an annex. The main building will be constructed of stone and the smaller of wood. The plant is to be equipped with new machinery entirely.

**Eric, Pa.**—The Odin Stove Mfg. Co. has been incorporated. Capital, \$30,000.

**Jersey City, N. J.**—The Atlas Tack Co. has been incorporated. Capital, \$700,000; capital in Illinois, \$5000.

**Kansas City, Mo.**—The Kansas City File Works Co. has filed articles of incorporation in the office of the County Recorder. The capital stock of the concern is \$5000. The shareholders are Ephraim C. Soeey, Orion B. Dodge and Martin L. Bell. The company will manufacture files of all descriptions.

**Mt. Carmel, Conn.**—The Schatz Hardware Mfg. Co. has been incorporated to do a general Hardware business. Capital, \$10,000. Incorporators: L. P. Smith, J. F. Hemenway, A. Schatz, H. A. Schatz, J. A. Gouldrup, all of New York city.

**Oconomowoc, Wis.**—An axe handle factory has just been established in this city by Frank Morehouse and Orrin Hungerford.

**Ottawa, Canada.**—The Victoria Foundry & Machine Shop on Bridge Street is expected to be ready for operation in a short time.

**Peoria, Ill.**—A new company has just been formed that promises to add another valuable factory in the line of agricultural implements in this city. It is called the Colean Implement Co., and it is organized with a capital of \$25,000. The officers are: W. H. Colean, president; Charles H. Burdick, secretary; J. W. McDowell, treasurer.

**Vicksburg, Mich.**—The Clark Bros. Co. is the name of a new corporation recently organized in Vicksburg for the manufacture of the patent Clark regulator and alarm column. The following are the incorporators: Ellsworth E. Clark, O. E. Clark, Wesley L. Clark, Eugene Rischel, C. E. Mohner, W. A. Wood, all of Vicksburg, and Isaac A. Mills, of Detroit. The capital stock is \$20,000.

**Waynesboro, Pa.**—The Emmert Tool Mfg. Co. has been incorporated.

**Westboro, Mass.**—The Chamberlin Metal Weather Strip Co. has been incorporated and will manufacture metal weather strips and other building materials. The company is capitalized for \$5000. J. A. Hunt, of Westboro, is president, Forest W. Forbes clerk, and J. Ensign Weatherwax treasurer.

**York, Pa.**—Edwin Nichol, of Locust Street, has started a chain factory.

**York, Pa.**—The York Mica Co. has been organized. The officers of the company are: President, W. D. Arbegast; vice-president, W. H. Leonard; secretary and treasurer, W. D. Diller. A charter

will be applied for immediately and operations will begin about January 1st in Baltimore County, Md.

### Changes and Improvements.

**Charleston, W. Va.**—The handle factory recently burnt down will be rebuilt.

**Chicago, Ill.**—Raeder & Coffin have made plans for an extensive addition to the Harvey plant of the Buda Foundry & Mfg. Co., the building to be of brick with 100x200 feet ground dimensions. It will cost \$20,000.

**Cleveland, O.**—The Forest City Foundry & Mfg. Co. have bought the grounds and buildings of the Cleveland Co-Operative Stove Co. For the past ten years the foundry has rented the property of the stove company.

**Cleveland, O.**—The Standard Tool Co. have begun the erection of a new office building on Central Avenue. The building will be of two stories and will be used exclusively for the company's offices. The cost will be \$7000.

**Des Moines, Ia.**—The Economy Implement Co., of Monmouth, Ill., has completed arrangements to remove its business to Des Moines, and will be established in this city beginning January 1. W. S. Hartley is president of the company, and J. R. Carpenter secretary and treasurer. Both live in Monmouth. The company manufactures wagon boxes, shoveling boards, stock racks, hay racks, wheelbarrows and all kinds of wooden and willow ware. It has an established business, and will employ about thirty skilled hands as soon as it opens its Des Moines factory, which will be located on West Second Street, near the railroad tracks.

**Dunkirk, N. Y.**—A new hammer shop is to be built adjacent to one of the Brooks Locomotive Works.

**Fredonia, N. Y.**—Luke Bros. will build a large factory near the railroad and south of the canning factory.

**Glastonbury, Conn.**—The Williams Bros. Mfg. Co. are replacing the 200-light dynamo at their works with a 600-light machine. They will put in about fifty additional lights. The new dynamo will furnish the current for a motor to operate the new buffing department.

**Albany, N. Y.**—The Albany Recording Scale Co. have filed a certificate of the reduction of their capital stock from \$50,000 to \$30,000.

### Recent Fires.

**Evansville, Ind.**—The Vulcan Plow Works has been damaged by fire to the amount of \$10,000.

### Miscellaneous.

**Utica, N. Y.**—A meeting of the stockholders of the Utica Drop Forge & Tool Co. has been held at the offices of the company, No. 75 Genesee Street, and the election of directors as follows: Wm. Pierrepont White, H. Lawrence White, Charles A. Miller, John P. Campbell, Frederick S. Kellogg.

## The CONROY PATENT Refrigerator Fastener.

## SHOT GUNS! DO YOU HANDLE THEM?

Look into the merits of the **TOMLINSON CLEANER**, now in its 10th year. An absolute necessity to every owner of a shot gun. Has had a large sale both in this country and abroad. Four square inches of brass wire gauze in contact with the barrel, and although it cuts all foreign matter free, is too soft to injure the barrel metal. Can be handled with a good profit. We help you with liberal advertising. Made in all gauges from 8 to 20—fit any rod. Send for booklet of testimonials. "Used everywhere in the civilized world."

## BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Agencies, Etc.

Albany, N. Y.—The C. F. Webber Bicycle Works is the outcome of a retail business conducted by C. F. Webber. The new concern will engage in the manufacture of bicycles and automobiles on a small scale, a building having been leased for this purpose.

Buffalo, N. Y.—A certificate of incorporation of the Forsyth Mfg. Co., capitalized at \$50,000 to manufacture metal goods, bicycles and bicycle sundries, has been filed with the County Clerk. Charles E. Forsyth, Herbert B. Rose and Edgar A. Forsyth, Jr., are directors for the first year.

Danielson, Conn.—Lafayette Hoyle; repairing.

Des Moines, Ia.—The Hopkins-Sears Co. has been incorporated to manufacture and sell athletic goods. Capital, \$50,000. Incorporators: W. W. Sears, E. Hopkins, J. O. Hopkins, D. F. Hopkins, all of Des Moines.

Detroit, Mich.—The Rambler Cycle & Automobile Co. has been incorporated with \$25,000 capital, to manufacture and sell bicycles, etc. Incorporators: L. H. Foster, G. A. Stone, T. A. Parker and F. W. Aldrich, all of Detroit.

Indianapolis, Ind.—The Vehicle Rubber Tire Machine Co. has been incorporated. Capital stock \$8000. Directors: Charles M. Cooper, Calvin F. Darnell, Augusta Schmidt, John R. Duncan and Alfred R. Hovey.

Plaquemine, La.—Moorman & Son, who have an oar factory at Baton Rouge, on account of the demand for their product, have decided to put up a plant of the same kind here. They have secured a location on Bayou Plaquemine, about a half mile below town, and will begin immediately the construction of necessary buildings. There is an unlimited supply of ash in this vicinity which can be readily brought to the mills, and which naturally will attract factories of this character.

Portland, Me.—The Davis Tire Co. has been organized for the purpose of manufacturing and selling vehicles, with \$100,000 capital stock. The officers are: President, Harry L. Cram, of Portland; treasurer, Wm. F. Ellis, of Springfield, Mass.

Rochester, N. Y.—The Century Camera Co. has been incorporated. Capital, \$25,000. Directors: J. M. Walmsley, G. E. Mosher and G. J. McLaughlin, of Rochester.

Valparaiso, Ind.—Articles of incorporation have been filed by the Holman Gear Co. Capital stock, \$10,000. Directors: M. K. Johnson, T. H. Holman, Scoval N. Johnson, Milton A. Snider and Samuel P. Holman.

### Changes and Improvements.

Binghamton, N. Y.—The Dimock-Sheldon Mfg. Co., formerly of Newark, N. J., have begun operating their new plant in the Charles E. Lee block on upper Water Street.

Colfax, Wash.—A. C. Warner succeeds Howard & Lacey.

Fairfield, Me.—Clarence Weymouth; closed.

Haverhill, Mass.—George H. Durgin.

Kingston, N. Y.—An addition is being made to the sporting goods store of Harry Carr on Wall Street.

Middletown, Conn.—Receiver Betts of the Keating Wheel and Automobile Co. has about 1,200 wheels ready for market as soon as the season of 1901 opens, and has put the force of men at the factory at work on another lot of 1700 wheels. When these are completed, it will finish up what stock the company has on hand. There is some uncertainty yet as to the future of the company. The business will be conducted at least for a time by the receiver.

New Haven, Conn.—The Winchester Repeating Arms Co. are building a gasometer at the foot of Argyle Street, which will furnish gas for all the buildings of the plant. The tank will be about 50 feet in diameter and it is said that the cost of putting up the works will be from \$4000 to \$5000. It is believed that it will be completed in a few weeks.

New York, N. Y.—The Willis Park Row Bicycle Co. has purchased of the American Bicycle Co. the entire stock of sundries formerly carried by the Rambler Sales Department. The deal gives the Willis people a considerable stock of everything from tires to tire tape and toe clips.

Owego, N. Y.—E. H. Strong, 208 Front Street, succeeds Strong Bros.

Reading, Pa.—E. S. Youse succeeds G. D. Packer in the bicycle business, having purchased the stock, furniture and fixtures and good will of the Packer Cycle Co. He will continue the manufacture of the Packer bicycle as heretofore. In connection with the above, the new company will enter into another business, that of selling automobiles. Mr. Youse has completed negotiations with the Locomobile Co. of America for the sale of the "Locomobile" in this territory, which includes the county of Berks, the cities of Pottsville, Pottstown and Phoenixville.

Reading, Pa.—G. V. Keller, formerly Southern sales agent for the Relay Bicycle Co., who bought the patents and material for the "Racer" and "Flyer" wheels manufactured by that firm, has located in Charlotte, N. C. He has opened a factory in that place. He writes that there is a good demand for that style of wheel in the South. He has engaged Amos B. Cleaver formerly foreman at the Relay works, who will take charge of the shop. The latter will shortly leave for the South.

Salt Lake City, Utah.—Browning Bros., who conducted extensive jobbing establishments at Ogden and Salt Lake City, have sold their interests in the latter place, and will hereafter confine themselves to Ogden. The Salt Lake store will be conducted by the Western Arms and Sporting Goods Co., which has been incorporated with capital of \$30,000. W. W. Chisholm is president; M. H. Walker, vice-president; John H. Walker, treasurer; I. Milton Barrett, secretary and manager, and Owen Hogle is the other director and incorporator.

Saratoga Springs, N. Y.—Nelson G. Freeman has sold to the Ketchum Bicycle Co. his stock of bicycles and agencies for the Ramblers, Eagles, Ideals and Clippers, who will next season occupy a part of Mr. Freeman's store.

Shelburne Falls, Mass.—The Bickel Mfg. Co. who are occupying a portion of the silk mill, have begun putting together the Bickel patent adjustable bicycle pedal.

South Glens Falls, N. Y.—Howard Sherman; closed.

Springfield, Mass.—The J. Stevens Arms and Tool Co., of Chicopee Falls, will soon begin the manufacture of bicycles. The company employs 500 hands, and has heretofore confined its efforts to firearms and tools.

St. Johnsbury, Vt.—W. W. S. Browne has removed to the Hastings store.

Toledo, Ohio.—The Kirk Mfg. Co. will establish a New England distributing depot in Boston, probably before the first of the year. E. Buffum, who for several years past has been identified with the Yale bicycle, will be in charge.

Toledo, Ohio.—The latest addition to business interests is the branching out of the firm of J. G. Swindeman & Co. This company has closed a most successful year in the handling of bicycles and bicycle sundries, and will the coming year add to their business at 231 Superior Street a full line of rubber goods. This will include mechanical goods, druggists' and surgical supplies, rubber clothing of all kinds, and footwear, and special attention will be given to the wants of sporting men. The Cleveland and Pierce wheels will be handled, as well as a special cushion and rigid frame wheel made specially for this firm, and the Cleveland steam automobile and gasoline bicycle will also be handled.

### Recent Fires.

Rochester, N. Y.—Fred A. Mabbett & Co. Loss, \$200.

Southboro, Mass.—Moses Greenwood. Loss, \$1000; insured.

South Manchester, Conn.—Fay's bicycle shop. Loss slight.

### Recent Burglaries.

Columbia, S. C.—The gun and lock store store of Wm. F. Streiglitz was burglarized recently and pocket-knives and revolvers were stolen to the amount of \$150.

## Columbian 1000-Shot Air Rifle.

Patented  
Oct.  
24, 1893.

CHAMPION  
MODEL.

This Air Rifle possesses advantages over all the Air Rifles now  
on the market. The materials used in its construction are  
the best. The appearance and workmanship is far ahead of  
any other Air Rifle made. It has an adjustable sight it shoots stronger  
and more accurate, less liable than any other to get out of order, all  
parts are interchangeable. We think we have the right to claim this as  
the "Champion" of all Air Rifles. List, per doz., Enameled, \$30.00; Full Nickel, \$42.00.

Address "Box 88," care **HARDWARE**, 275 Broadway, New York. a

# OF COURSE, YOU TAKE A MAGAZINE,

Probably one in the subjoined list. If it is not, let us know, and we'll put it there. The first column shows the price you would have to pay for the magazine alone. The second column indicates the price at which we will send you "**HARDWARE**" and the magazine for a year. In many cases you will find the combined price is no more than the single one, and you know you can't afford to do without "**HARDWARE**." This offer applies to **New 1901 Subscribers only**.

ALL  
THE NEWS

## HARDWARE

HARDWARE  
EXCLUSIVELY

The name of the only Hardware Trade Journal in America with the motto "All the News; Hardware Exclusively."

It is published on the 10th and 25th of each month, which is as often as any dealer desires to receive a trade paper which he intends to read.

Has tabulated records of all new firms and companies and their various changes in the manufacturing line. All the new stores and business news among the jobbers and retailers of the country; with a Bicycle and Sporting Goods Record covering the changes daily occurring in that important line.

For the benefit of the retail dealer it has a "Prices Current" in every issue covering 32 columns of its pages. A careful consideration given to this department of the paper may save many dollars to its subscribers.

It offers to the advertisers advantages possessed by but few of its competitors in its legitimate field. In addition to foreign circulation, embracing 74 countries besides our own, it reaches within the limit of the United States every State and Territory, where trade and traffic have a foothold.

It has just completed its twentieth volume and is consequently in no experimental stage, waiting to establish a subscription list.

HARDWARE'S rate card is based on actual value. It is a paper for the Hardwareman, possessing the respect of the trade, the confidence of its patrons, the thanks of its subscribers and the courage of its convictions.

... PUBLISHED BY ...

THE HARDWARE PUBLISHING CO.,

275 Broadway, New York.

PRICE \$1.00 PER YEAR FOR 24 ISSUES.

## PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

.. The ..  
**Little Giant Grass Hook**

is a miniature scythe, looks  
right, hangs right and cuts  
right; the thing long sought  
for. Can mow a small lawn  
with it; can cut closer to  
trees, fences, etc. Can be  
used for cutting corn or  
clipping hedges.

Patented  
Feb. 13, 1900.  
June 26, 1900.

**"HAVE FOUND YOU VERY USEFUL."**

Alfred Field & Co., New York. [Cutlery, Guns, etc.]:  
We can say in all sincerity that we have found you very  
useful, and we can most cheerfully recommend you to  
our friends in the trade.

**"RESULTS ARE SO SATISFACTORY."**

Capwell Horse Nail Co., Hartford, Conn. [Horse  
Nails]: We have been liberal advertisers in your jour-  
nal for years, and the results are so satisfactory that we  
expect to be much more liberal for many years to come.

**"THE GOOD YOU HAVE DONE US."**

Samuel Winslow Skate Mfg. Co., Worcester, Mass.  
[Skates]: We congratulate you on your great success,  
and thank you for the good we think you have done us.

# HARDWARE BUYERS' DIRECTORY.

## CLASSIFIED INDEX TO ADVERTISERS.

**Acetylene Gas Burners.**

Drake Acetylene Apparatus Co., Cleveland, O.

## If it is a Food Chopper Without a Lid, Don't Buy It.

A distinguishing and exclusive feature of the STAR FOOD CHOPPER is a plate hinged at the top of the hopper which, when pressed on the food to be cut, forces it upon the feed screw, thus preventing the possibility of injuring or soiling the fingers, which is liable to occur in using the other choppers.

The STAR is unquestionably the best machine of its kind ever offered to the public. It will cut without crushing raw or cooked meat, sea food, fruit, vegetables, etc., into coarse or fine pieces, according to the cutter used, of which three accompany each chopper.

It has eliminated all the objectionable features of other choppers, and has added several improvements that are distinctly its own. It is always in order, and the knives require no sharpening.

No other chopper has the many merits of the STAR. None is more simple in construction or easier to understand or clean. From start to finish in the small points as well as in the large, the STAR FOOD CHOPPER is the best.

**CHAS. D. BROWN, Agent,**

**180-182 Duane Street, New York City.**

We make a specialty of making to order only, a superior quality of Cast Steel Wire Springs, either for extension or compression.

These Springs are all oil tempered and are made of an extra quality of wire drawn specially for our own use, of the same grade of stock as we use for the Springs that we put in our Spring Scales.

## "SIMPLICITY" STUDENT LAMP.

A One Hundred Candle-Power Light for Six Hours' Service One Cent. The illuminant is gasoline, stored in compartments in the lighting fixture, and on passing through a heating chamber reaches the orifice in the form of gas, which burns with a smokeless flame under a mantle heated to incandescence. The light is not affected by temperature, and will burn equally well in summer or winter. The lamp uses 1/4" stove gasoline, and is started by heating the burner with a small alcohol torch, supplied with each light. There is no odor like the old gasoline stove.

These lamps have been approved by the Board of Underwriters of Chicago.

Covered by eight patents in the United States and Canada. Ask for catalogue of complete line of lamps and our

# CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

## FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. THE FRED. J. MEYERS MFG. CO., - - Hamilton, Ohio, U. S. A.

**WHY IS THE**

PAT. 1898.

**O.K. WASHER THE BEST -  
WASHING MACHINE?**

BECAUSE

- 1.—It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.
- 2.—The tub is made of Louisiana Red Cypress Lumber.
- 3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap-suds, and cleaning them without rubbing them to pieces.
- 4.—This washer is made by experienced mechanics, and will out-last any other washer on the market.
- 5.—The lid on tub closes tight, no escape of steam.
- 6.—Has a solid wringer box with iron brackets.

Manufactured by H. F. BRAMMER MFG. CO.,  
DAVENPORT, IOWA.

AGENCY **JOSEPH RODGERS & SONS, LTD.**

**THE BEST IS EVER AND ALWAYS CHEAPEST.**

The merchant can recommend with confidence.  
The consumer will report superiority.  
Excellence will insure enlarged demand.  
Satisfaction will leave no ground for complaint.

Why, then, sell inferior Outlery when

**THE VERY BEST**

can be had at a small advance over poorer  
QUALITY?

# AGENCY

Used for Interior and  
Street Lighting.

of the **DORAN LIGHTING SYSTEM**

Remember the *first* in the field will reap the harvest. Our improved Doran Lamp is the height of perfection in Hydro Carbon lamps. *Don't* confound this with the common 100 candle power gasoline lamp. We have something entirely new, pronounced by *all* who have seen it the *BEST* thing they ever saw.

### A Few of Its GOOD POINTS :

#### 1250 Candle Power.

No fount to fill and break mantles.  
No shadow below, light all around.  
Turned up and down instantly with a chain.  
Simplicity. (It will surprise you.)  
Practically Noiseless.

Every Lamp  
Sold  
Sells Another

Handsome, looks exactly like the best electric arc lamp.

Last, but not least, the cheapest system on the market, both in first cost and in operation, which is 1-6 of any other light of its power.

We are appointing agents now for every town and city in the U. S. It will be profitable to you because we have *positively* the best system of lighting ever invented. It has absolutely *no faults*. Every lamp guaranteed to be perfect and give satisfaction when received. As to our responsibility we refer to any bank or mercantile agency in Chicago.

## WINSLOW'S ANKLE BRACE 1900.

Patented December 17, 1895.

The only perfect Ankle Support made.

Can be attached to any skate.

We desire to call your attention to Winslow's Ankle Brace. It can be attached to any skate. It is made of steel, handsomely nickel plated, with a rib running through the center which strengthens the brace and makes it light, strong and durable. They are trimmed with the best quality Russet Grain Leather.

There have been many attempts at making an Ankle Brace, but this is the only good one ever offered to the public.

Four years have proved it to be a splendid article. Each pair in a box.

PRICE  
75c.  
PER PAIR.

## Winslow's Double Runner Skate.

This skate is especially adapted for children learning to skate, is strapped and ready for use. The runners are so wide apart that a child can stand on them with perfect ease. They are adjustable and can be made from a 6 inch to a 9 inch skate by simply adjusting the thumb screw.

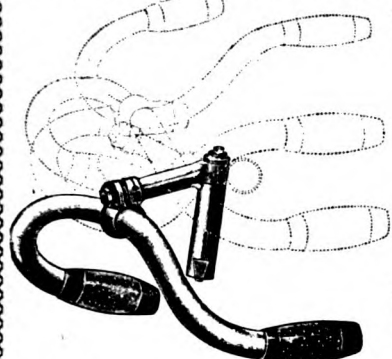

PRICE, 50 cts. PER PAIR.

## A BUILDING'S CROWNING GLORY IS ITS ROOF

## P & B RUBEROID ROOFING

Is a "crowning glory" to any building. And it isn't a  
fleeting glory either! It is always *there!* Unlike its tar-  
and-paper or asphaltum imitators, it won't rot out or dry  
out. Its backbone is the best, strongest felt, specially pre-  
pared to resist weather, water, heat, steam, acids, gases,  
alkalies, etc., and *we can prove* that it will outlast any roof-  
ing made. Extremes of temperature will not affect it. It  
is clean and easily applied, tasteless and odorless. We'd  
like to send you samples.

EVERY  
ROLL

**THE STANDARD PAINT COMPANY,**  
**85-87 John St., NEW YORK.**

# HARDWARE

Among the recent additions to the members of the Hardware Club of New York may be mentioned the following:

Robert H. Thomas, 216 Duane Street.  
C. E. Thurston, 220 Duane Street.  
W. H. Johns, Potter Building.  
Louis K. Comstock, 137 Broadway.  
O. J. Gude, 113 Broadway.

The Taplin Mfg. Co., formerly of Forestville, Conn., have removed their business to New Britain, Conn. This company are large manufacturers of such goods as bathroom and toilet specialties, eggbeaters, hotel and club goods in bronze and nickel, and other goods of a housekeeping character embodied in a very neat little catalogue, which they will be pleased to send to the trade upon request.

Cattaraugus Cutlery Co., Little Valley, N. Y., are distributing pearl paper cutters, inscribed "Pan-American Exposition, 1901." The company are also sending out thousands of descriptive books and maps relating to this great show, which will soon be an object of interest worth cultivating.

Iowa Farming Tool Co., Fort Madison, Iowa, during the past year have been building improved machinery to be used in their Finishing and Polishing departments, which have just been completed, and are now being moved into a new three-story brick and stone building, 50x150 feet, which also gives them a very material enlargement to their Forging department. Although the new finishing shops are considerably larger than the old ones, the company has recently completed still another two-story finishing shop 40x162 feet, which they anticipate will be in running order by the 15th inst. This will enable them to prepare for caring promptly for all rush orders, which invariably come in during the Winter and Spring. This new building will have a very complete equipment, and will be run and lighted by electricity.

C. S. Gallager, of the firm of Tower & Lyon, 95 Chambers Street, New York, departed on his Northwestern trip on Monday, January 7th, and will be away until the middle of March, visiting during his absence all the principal cities of the Northwest, including prominent points in Canada, such as Montreal, Toronto, Ottawa, etc., and going West as far as Omaha. The line of goods now controlled by Tower & Lyon present an importance to a buyer that commands attention at once, and the popularity achieved by Mr. Gallager in his long connection with the firm brings the assurance that the new century of trade will begin promptly upon his arrival upon the active scene in the trade centres above referred to.

H. S. Woolley, the London representative of John H. Graham & Co., New York, returned to this country to spend the holidays with his family, on the *St. Louis* on the 22nd ult. Mr. Woolley has been exceedingly successful in establishing an extremely important trade on the other side, and his recent trip abroad was the most extensive from a point of importance and length of time of any that he has undertaken. John H. Graham & Co., at their London office, 10 Duke Street, have on exhibition a full line of the many manufactures that they control, which are suitable for export, which department of their business assumes a prominence that surpasses all expectations of a few years ago.

The Union Metallic Cartridge Co., 313 Broadway, New York, are distributing a lot of valuable printed matter that should be sent for, if not already received, by every one of our subscribers, among which are Shooting Rules and Records, Game Laws of the United States and Canada, and the U. M. C. catalogue of ammunition of every description. Each and all of them may be had free for the simple asking, and certainly what is so well worth having is well worth asking for.

Lloyd Mfg. Co., Minneapolis, Minn., and the Lloyd Mfg. Co., Ltd., of Sowerby Bridge, England, manufacturers of wire specialties, have made H. P. Richardson secretary of their company. Frank A. Umsted has become the general manager, and F. H. Stedman general sales agent. All of these gentlemen have, until recently, been connected with the Hartman Mfg. Co., of Ellwood City, Pa., Mr. Richardson having been connected with them for nearly thirteen years, serving in various capacities, and finally as general manager. Mr. Umsted was the general sales manager of the Hartman Mfg. Co., and Mr. Stedman was employed by them as traveling salesman for some two years. It is intended to open an Eastern sales office in New York City, which will be under the management of these gentlemen.

In their advertisement in our present issue it will be noted that the Russell & Erwin Mfg. Co., of New Britain, Conn., and New York, note with pride the two dates 1839-1901, a period of sixty-two years, in which they have virtually led the procession of pioneer Hardware manufacturers. The Russell & Erwin Mfg. Co. were incorporated fifty years ago, January 1st, and this makes them one of the oldest Hardware corporations still in existence.

Neal & Brinker, 18 Warren Street, New York, whose hustling qualities in the industrial field are well known, have recently been appointed by the John C. Jewett Mfg. Co., Buffalo, N. Y., their Eastern and Export agents. This company is one of the oldest and largest manufacturers of refrigerators and ice chests, their business having been established as far back as 1849. They have recently issued an extensive catalogue covering their line of housekeeping goods, a very important department of which is that devoted to refrigerators. Neal & Brinker would be pleased to supply the trade with this catalogue upon request.

R. W. Hatcher has disposed of his interest in the Sandersville Hardware Co., Sandersville, Ga., to his partner, H. E. Cohen, who intends continuing the business, and will be pleased to hear from manufacturers in the way of catalogues, etc., or circulars, having reference to new and up-to-date specialties. It is Mr. Hatcher's intention to go to Cuba, and investigate the opportunities offered there in the Hardware line. As he is conversant with the Spanish language, he is well equipped to further the object in view.

W. P. Thompson, 88 Birchfield Road, Birmingham, England, is visiting the United States at the present time with a desire to represent a number of American manufacturers of Hardware specialties in Great Britain. Mr. Thompson has been engaged as traveling salesman for one of the largest Birmingham houses for nine years, which gives him an acquaintance in the Hardware trade that would justify a manufacturer in entertaining his proposition.

# HARDWARE

VOL. XXII

JANUARY 10, 1901.

NO. 7.

**HARDWARE** is a Review of the American Hardware Market, specially devoted to the Retail Trade.

**HARDWARE** is published on the 10th and 25th of each month. The subscription is \$1.00 a year, payable in advance.

Subscriptions may commence with any issue.

Remittances should always be made in the safest manner available to the remitter. Post-office and Express Money Orders are always safe and may be sent at our own risk.

Register your letters when you remit by cash.

**Foreign Subscriptions.**—For each copy to be mailed outside the United States, the Canadas, and Mexico, the price is \$1.50 a year, postage prepaid.

**Change of Date.**—It takes two weeks to change the date, after your subscription is renewed.

**Expiration of subscriptions.** The date on the wrapper indicates when your subscription expires.

**Change of Address.**—Always give both your old and your new address when you ask us to change your address.

**The Name of your Post-office and of the State you live in should always follow your own name when writing to this office.** We cannot find your name on our books unless this is done.

Letters should be addressed

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

## Editorial Trade Review.

The year just past, take it all in all, will in later memories be regarded by the dealer as having been an abundantly successful one, notwithstanding the scare the trade received when the wire nail market made that memorable slump in prices, affecting the entire wire trade. That had, after all, a good influence on subsequent business, holding the booming trend in check and making a study of newer conditions quite desirable.

Manufactured goods have brought fair average prices. No spasmodic unsettling changes have dominated the markets of the last six months, and the inventories now in progress will be priced up at quotations representing present markets, without the fear of a future slump to wipe out prospective profits based upon the inventory's fidelity to actual costs.

After a year of such boom ideas regarding business which prevailed a year ago, the return to clean, common-sense conditions of trade was effected so gradually that but little of loss resulted, as much of the stock held by the dealers had been purchased at lower prices than prevailed during the Winter and Spring. It shows a healthful state of affairs generally when the trade can settle down upon a basis so solid after a year which has presented such wide fluctuations for its consideration.

Profits for the year will be carefully gone over when inventories are finished, and a statement is in preparation. Many firms were very conservative a year ago in pricing up at moderate average costs, and they will feel in a much more satisfactory shape than if the prevailing quotations had formed the basis of the appraisalment of their stocks on hand.

The rapid changes of the slump period seemed to threaten the stability of trade for a short time, and made inactivity too noticeable, but confidence in the future soon developed and a feeling pervaded all branches that the business of 1901 will prove to be a steady demand for goods from the consumer and up through all branches of the industry, the steady movement which has already set in indicating that normal conditions will produce more gratifying results than would be possible under speculative purchases at widely fluctuating quotations.

Manufacturers' order books are fairly well filled with orders for future delivery. In some lines, where early orders were imperatively demanded in order to secure prompt delivery on specified dates, this is especially the case. No comparison is made, in special lines, of the conditions of the order books of a year ago, when previous orders, taken at unprofitable prices, were still unfilled, and in some cases were never completed. Many dealers have felt that a little delay in purchasing several lines which are still held up at stiff rates wouldn't jeopardize the obtaining of supplies when needed, so they have held aloof, waiting for easier conditions that in a number of cases failed to materialize. This delay in ordering has forced some manufacturers of leading specialties to heap up seasonable stock, so that deliveries may be assured the dealers at the end of their deliberations.

There is no wide divergence in prices obtainable from the manufacturers, the general tone being one of firmness and rigid conditions. In fact, on some lines of heavy goods advances—not necessarily large ones—have taken place, as order books get congested with the normal demand.

The feeling is noticeable in trade circles that prices will hold their own during the present season, and with the constantly increasing facilities the manufacturers are more likely to recede under a light demand than they are to advance, so that large stocks are apt to be avoided by the jobbers, trusting to find no difficulty in having orders filled at any time under a little pressure. Stocks are by no means heavy throughout the trade, and this alone will make a more general movement in all channels, and results by comparison look very encouraging.

The holiday trade was an admirable one, making December sales loom up more largely in every way than has been the feature for years. Special goods in many cases were added to the Hardware stocks for the first time, and sales of which have proven so remunerative they will form part of the regular assortment in the future. Every season finds new lines of goods added in this manner, which make new departments and a constantly increasing output, with results on the right side of the ledger.

Failures are few and far between; collections unusually good in almost every direction. Many store improvements are in contemplation, facilities for the prompter transaction of business are being added by up to date houses, and the brilliant promise of continued prosperity everywhere apparent opens the Twentieth Century in a substantial manner.

## United States Heads List of Exporting Nations.

The United States seems likely to stand at the head of the world's list of exporting nations in the year 1900. One by one the great nations have fallen behind in the race for this distinction until during the past five years only the United Kingdom and the United States could be considered as competitors for the distinction of being the world's greatest ex-

porter of articles of home production. In 1894 the United Kingdom led the United States by nearly \$250,000,000, and in 1897 the United States had so rapidly gained that she was but \$60,000,000 behind.

In 1898 the United States took first place, our exports in that year exceeding those of the United Kingdom by nearly \$100,000,000. In 1899 the United Kingdom again stood at the head of the list, her exports exceeding those of the United States by nearly \$35,000,000. In the eleven months of 1900, whose figures have been received by the Treasury Bureau of Statistics, the domestic exports of the United States exceed those of the United Kingdom by \$5,473,670, and should this rate of gain be maintained in December the United States will in the year 1900 show a larger exportation of domestic products than any other nation in the world.

Even this distinction, however, of heading the world's list of exporting nations but partially tells the story of the wonderful growth of our export trade as measured by that of other nations. Comparing the growth of our exports during the last quarter of the century with those of the other great nations of the world, we are able to better measure the wonderful progress shown. France shows no increase in her exports of domestic merchandise in the closing quarter of the century. Germany shows during the same period an increase of about 50 per cent., and the United Kingdom shows from 1875 to 1900 an increase of nearly 40 per cent., while the United States shows during that time an increase practically of 200 per cent.

The following table, compiled from official reports, shows the exports of domestic merchandise from the United States and the United Kingdom, respectively, in each calendar year from 1875 to 1899, and eleven months of the year 1900:

Calendar year.	Exports of domestic merchandise from—	
	United States.	United Kingdom.
	Dollars.	Dollars.
1875.....	497,263,737	1,087,497,000
1876.....	575,735,804	976,410,000
1877.....	607,566,495	967,913,000
1878.....	723,286,821	938,500,000
1879.....	754,656,755	932,090,000
1880.....	875,564,075	1,085,521,000
1881.....	814,162,951	1,138,873,000
1882.....	749,911,309	1,175,099,000
1883.....	777,523,718	1,166,982,000
1884.....	733,708,764	1,134,016,000
1885.....	673,593,506	1,037,124,000
1886.....	699,519,430	1,035,226,000
1887.....	703,319,692	1,079,944,000
1888.....	679,597,477	1,141,365,000
1889.....	814,154,564	1,211,442,000
1890.....	845,999,603	1,282,474,000

*1900.....	1,308,913,789	1,303,440,000

\*Eleven months.

Death of W. E. Gibbins.

William E. Gibbins, vice-president of the Woodruff Hardware Co., of Knoxville, Tenn., died at his residence in that city on January 3rd, after an illness of five weeks, in the fifty-eighth year of his age. Although he was for weeks in a critical condition, hopes were entertained of his recovery up to a very recent moment, as he had shown considerable improvement during the previous two weeks.

Mr. Gibbins was born in the town of Liberty, Kentucky, October 12th, 1843. Soon after hostilities began in the civil war, when only eighteen years old, he enlisted in Company D, Thirteenth Kentucky Infantry. His company commander was Captain W. W. Woodruff, the well-known and successful Knoxville Hardware merchant. Mr. Gibbins came with his command, under General A. E. Burnside, into East Tennessee and to Knoxville in the early Fall of 1863. On the afternoon of the 14th day of November of that year, while with his company, charging a regiment of General Longstreet's force advancing on Knoxville, at Huff's Ferry, near Loudon, he was severely wounded, and was brought to Knoxville, where he lay in the First Presbyterian Church, then used as a hospital, while Longstreet was laying siege to

Knoxville, and for some time afterwards. He walked on crutches, on account of his wound, for nearly two years.

At the close of the war, at the request of Captain Woodruff, who then established himself in the Hardware business that has grown to such large proportions, Mr. Gibbins came to Knoxville and accepted a position as salesman in the Hardware store. In 1870, he became a partner in the business, and remained in it to the day of his death, being vice-president of the Woodruff Hardware Co. He and Captain Woodruff were associated together for forty years, four years in the army and thirty-six years in business, and during all that time there never was a hard word or an unkind feeling between them.

Mr. Gibbins was an elder in the Second Presbyterian Church and had been for more than ten years. In 1867 Mr. Gibbins was married to Miss Helen Henry, daughter of Hon. John R. Henry, who served a term as State Treasurer of Tennessee. To them were born six children, all living.

Mr. Gibbins was one of the founders of the Southern Hardware Jobbers' Association, serving as president during the

WILLIAM E. GIBBINS.

first two years of the association's existence, during which time the organization grew from an exceedingly small membership until it embraced something like forty of the most prominent jobbing concerns in the South. At the Louisville meeting in 1895, he was elected chairman of the Executive Committee, and faithfully served in that capacity ever since that time. His good judgment and wise counsel have been of inestimable value, not only to the organization during its growth and development, but also to the individual members, and his removal from his earthly duties deprives the association of a comrade and brother whose place it will be hard to fill. He was a man of indomitable energy, unquestioned integrity and untiring industry, and one on whom reliance could always be placed as being broad and fair-minded as well as generous in all his transactions. The large personal acquaintance which he had in the Hardware industry will greatly miss his genial presence and sanguine personality.

A Handbook on Horse Feeding.

The Frank Miller Co., who have a world-wide reputation for their harness dressing, have brought out a compact handbook on Horse Feeding, by Robert Luce, a pamphlet of 127 pages. This is a book of information and suggestion gathered from the reports of experiment stations and other official publications in the United States, as well as from the practical experience of stud owners, contractors, horse railway companies, etc. The book is one that may be read with interest and profit by horse owners. A copy of the book will be sent postpaid to anyone applying for it by postal, or otherwise, to the Frank Miller Co., 351 W. 26th Street, New York City.

## LEGAL CORRESPONDENCE.

Conducted by William Marston Seabury, Attorney and Counsellor at Law,  
No. 43 Cedar Street, New York.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Editor "HARDWARE," No. 277 Broadway, New York City.

QUESTION: Some months ago I fell and broke my arm. I went to a doctor and he set it for me, and told me it would be all right in a few months. I did as he instructed me in every particular. After a long treatment my doctor removed my bandages and told me my arm was all right. I continued to suffer pain, nevertheless, and my arm began to swell to an alarming extent. I went to another doctor who informed me that my arm was in a very serious condition, and that this was owing entirely to the improper treatment which I received from my first physician. My second doctor states that I will never be able to use my arm to any extent again, and that if my arm had been properly treated at the outset, I would have been entirely well and strong by this time. Can I obtain any redress from this first doctor?

REPLY: If you can establish as facts what you have stated to us, you would have a good cause of action against this first physician for damages for your injuries, caused by his lack of professional skill. Every practicing physician, as well as every lawyer or other professional man or even one following a trade, is presumed to have the ordinary skill and knowledge of a man of ordinary ability in that particular trade or profession. Every physician is not required to be an expert in any particular line; but he is required to have sufficient knowledge to enable him to practice without danger as to the welfare of his patients. If, however, your proof is strong enough, we would advise you to commence an action against the doctor you refer to, to recover damages for your injuries. Under a recent amendment to Section 384 of the Code of Civil Procedure, an action against a physician for malpractice must be commenced within two years after the same accrued.

QUESTION: Kindly inform me through your legal correspondence column when the annual report of a Jersey corporation should be made for the purpose of taxation, the amount of a tax on a manufacturing corporation and when it must be paid?

REPLY: Under the New Jersey Corporation Law, a company incorporated under the laws of that State must in addition to its annual report, after the annual election of directors, make a report to the State Board of Assessors at Trenton, showing the condition of the company financially on the first day of January of that year and must file this report with the Board of Assessors by the first Tuesday in May. The amount of the tax, speaking in general terms, and without considering certain exceptions, is one-tenth of one per cent. upon the amount of the capital stock paid in and the value of the company's property. This tax is levied about the first of July and must be paid by the first day of July following. The filing of reports of corporations and the payment of corporation taxes should be attended to promptly, as by a delay or neglect to comply with the law, the directors frequently become personally liable for the debt of the corporation, or some other penalty is imposed.

QUESTION: Some time ago my father was killed by a trolley car. I wish to sue the railroad company, as I can prove gross neglect on the part of the motorman. What must I do in order to sue, and is it necessary to give any bond?

REPLY: Your first step is to procure letters of administration upon your father's estate. If your father left no property whatever, no bond need be given, and under these circumstances you should apply to the Surrogate Court for what is known as "limited letters." When these letters are issued to you as administrator, you will have the right to maintain the action you refer to. If your father left property, other than the cause of action above referred to, you will have to give a bond before the Court will appoint you as administrator.

## A Great Leather Collection.

A most interesting collection, consisting of over 130 varieties of hides, skins and leathers, each from a different species of fish, flesh or fowl, was some time ago on exhibition within the big show windows of a Union square jewelry shop. The collection is a unique one, and it is the result of many years' labor and the expenditure of a large sum of money. It was got together by the proprietors specially for purposes of comparison and identification, and though not now on exhibition it is continually referred to every day.

From the elephant to the mole all the animals are represented whose skins are capable of tanning. Among others, one can see here examples of the hides, skins or leather of the sea lion, alligator, chameleon, lizard, eel, turkey, crow, hawk, codfish, cassowary, porcupine, Persian goat, wild boar, dog, seal, calf, sea wolf, elk, Tampico goat, kangaroo, African antelope, porpoise, Rocky Mountain sheep, Rocky Mountain antelope, chamois, boa constrictor, shark, walrus, lamb, armadillo, elephant, cat, crocodile, garfish, pig boar, St. Bernard dog, West India pelican, wild swan, woodchuck, rabbit, monkey, sheep, Australian wolf, raccoon, black bear, buffalo, camel, Canadian wild trout, dogfish, European sturgeon, wildcat, opossum, badger, panther, skunk, wild turkey, wild duck, wild goose, chicken, eagle, horse, East India goat, luwack, ant eater, Russian dog, agouti, squirrel, guinea pig, prairie dog, wolf, fawn, black monkey, peccary, red monkey, nylghau, waterbok, gray gnu, hartebeest, lion, koodoo, caribou, alligator, mole, zebra, tapir, and of the American elk.

Some of the separate pieces of the leather are of great size. One is that of a boa constrictor, which, when alive, must have measured over twenty feet in length. There is also the skin of a big alligator, tanned whole. It is owing to the introduction of alligator leather into trade that these animals are now fast becoming extinct. One of the rarest of all the specimens is a piece of genuine mammoth skin, with some of the hair still on it, which was cut from the dead body of one of these great extinct animals, which had melted out from beneath the primeval ice of Siberia.—*Exchange*.

## How Asbestos is Mined.

Mining is carried on by cutting down the hills of asbestos-bearing serpentine, much as a farmer cuts down a stack of hay and straw, or by open quarrying on the level. The rock is blasted out, and the asbestos, separated from the containing rock, is "cobbed," that is, separated by hammering from inferior foreign matter. This cobbing is a comparatively easy matter in the case of the finer quality, as it usually separates readily from the gangue, but in the lower grades much difficulty is experienced in separating the fibrous matter from the non-fibrous. At best there is a great waste. Much of the asbestos is in the thin and narrow veins, and is wasted, as by the present mode of operating it does not pay to separate this from the serpentine. A machine that will enable these narrow veins to be utilized is needed.

When "cobbed," the asbestos is graded according to purity, color, and length of fibre into three grades, and bagged for shipment. The finest quality, or "firsts," finds ready sales at prices ranging from \$80 to \$100 per ton; "seconds" fetch from \$50 to \$70 per ton; while "thirds" may be valued at \$13 to \$15 per ton. In good mines the yield of asbestos is from 3 to 5 per cent. of the rock quarried, and the cost of mining may be put down at \$25 to \$30 per ton. Returns obtained by the Geological Survey of Canada show that for the year 1888, Canada's output was 4,400 tons, valued at the mines at \$255,000, and this the output of nine different mines. Over three-fourths of the whole was shipped to the United States, small quantities going to Great Britain, Germany, France, Belgium and Italy, and being used in domestic manufacturing.—*Popular Science Monthly*.

Touch not, taste not, handle not intoxicating drinks.

## CONSULAR COMMERCIAL COMMENTS.

### IRON AND STEEL IN TURKEY.

Consul Hughes, of Coburg, under date of October 23, 1900, sends the following translation from the *Neue Wiener Tageblatt*:

"Though in nearly all the Turkish provinces iron ore is to be found, there are no blast furnaces nor manufacturing shops, and the finished-iron business is of the most limited description. Import into Turkey, both in iron and steel, is consequently of considerable importance, amounting to 60,000 tons annually, valued at 18,500,000 francs (\$3,570,500). Imports at Constantinople alone are, on an average, 20,000 tons, worth 7,500,000 francs (\$1,447,500) per annum. Chief supplies are sent from Sweden and Belgium, while England, which takes the first place in all other trade with Turkey, sends only about 6000 tons per annum. Turkey imports from Austria-Hungary about the same amount as from England, but in the German business an improvement has been noticed of late. Formerly, the iron works of northern France did a strong business with Turkey, but they have long been compelled to give way to the more successful Swedish and Belgian firms. Quite recently, however, efforts have been made to recover the lost ground. What Russia sends to Turkey has not been of any weight hitherto, but her works have been trying hard to extend their trade with the Ottoman Empire from year to year. Besides railway and engineering requirements, iron bars and girders are the principal articles taken. The consumption in Constantinople increases rapidly and amounts to 3000 to 4000 tons annually, chiefly supplied by Belgium. The price for girders is from \$25 to \$30 per ton. The yearly export in bars from Belgium to Turkey amounts to 15,000 to 20,000 tons; the best sorts, however, are taken from Sweden. Tin plates and galvanized and corrugated sheets are almost exclusively imported from England."

### ELECTRICAL GOODS IN CALCUTTA.

Electricity as a motive power has not been used in Calcutta; but the Calcutta Tramway Co., Limited, is now preparing to change its lines from horse power to electricity, and the contract for the power station has been given to Messrs. Dick, Kerr & Co., Limited, of London. The first shipments for the plant are expected to arrive here in November or December of this year.

I have answered many letters from our various electrical companies relative to the use of electricity here, calling their attention to the proposed change in the tramway company's lines, and believe that, with proper efforts on their part, the contract might have been secured, as Americans are now competing successfully with the English companies, even in London.

Electricity is now beginning to be extensively used in Calcutta for various purposes, such as lighting, fans to take the place of punkhas that were pulled by coolies, for driving machinery, etc., and there is an opening here for the sale of electrical machinery and goods, which our manufacturers should take advantage of.

I would advise correspondence with Messrs. Kilburn & Co. here, who have an electrical plant and are furnishing electricity and electrical machinery and goods; also, with the following-named firms in Calcutta, who are dealers in such machinery and goods, viz., Osler & Co., Octavius Steel & Co., and the Calcutta General Electrical Co.

All machinery is now entered duty free in India, but there is a duty of 5 per cent. ad valorem on goods.

There is a direct line of steamships between New York and Calcutta, but a cheaper freight on machinery and goods not

required for immediate use would be by sailing vessels via the Cape.

CALCUTTA, October 16, 1900.

R. F. PATTERSON,  
Consul-General.

### Plating Aluminum.

Since the discovery of aluminum in quantities sufficient to make it available for the manufacture of kitchen utensils and ornamental articles, it has attracted much attention because of the brilliancy of polish it will take and because of the remarkable lightness of the goods made of it. There have been, however, many limitations to its introduction to the public. When made up into cooking utensils it did not hold its color well, became zincky and blackened the hands as any piece of zinc would. Its brightness could not be maintained after the utensil had been exposed to heat, and time exposure would dim it somewhat. There were other difficulties which were much greater and one was the fact that there was a limit to the variety of utensils or shapes into which it could be made because it could not be soldered like other metals.

All articles made from aluminum heretofore have been pressed, spun or stamped into shape and no joint of strength could be made by soldering. This was a serious drawback to the manufacture of goods from it and one that many inventors have been trying to overcome ever since the metal has been used in manufacture. An attempt to solder aluminum joints appeared in some of the goods put on the market, but the soldering left a black seam of foreign substance which detracted from the appearance of the article, and did not apparently stand the test for strength.

Experiments have been made with the metal and with new processes, under patent, by the Norton Manufacturing Company of Chester, down the river, and if the results thus far achieved should show permanency there will be a revolution in the use of the metal and a great variety in the appearance of articles made from it. To begin with, experiments have shown that the metal will take a plate deposit of any other metal used in plating, and thus the way is opened up to the handsome finish of goods made from it. Goods made from it by the Norton Mfg. Co. and sent out as samples for test (nothing has been made for the general market as yet) carry finish in gold, five tints of copper, two tints of brass, rose and green, silver in bright, satin and antique making a variety of coloring that has not been excelled in goods made from any other metals. The advantages of the metal, its lightness and resiliency, are thus preserved and the defects, such as turning to dull zinc color, blackening the hands, and the like, are remedied, the plate covering the metal and bringing it to any desired quality for handling.

The most interesting thing in connection with the discovery that aluminum will take plating of other metals, is that this fact opens a way for the soldering of joints, as solder can be applied to almost all other metals, certainly to all metals that are used in the plating bath. It will be seen that if aluminum can be soldered it can be put into hundreds of shapes which have not hitherto been thought possible, and its use will thus be greatly increased. The metal is now produced in large quantities at 35 cents a pound, the analysis being 99.75 pure.

The one thing about the new processes, which have not yet got beyond the experimental stage, is the question of the new metal holding the plating as well as other metals. As to this time will tell. If plated articles with an aluminum base can stand wear without the plating "blistering" off, the experiments have made a marvelous advance in the use of the metal and one that may open up for the patentees and manufacturers a profitable business.—*Hartford (Conn.) Courant*.

## HARDWARE TRADE ANNUAL BANQUETS.

### THIRTY-FOURTH ANNUAL BANQUET OF THE LOCKWOOD-TAYLOR HARDWARE CO.

The Lockwood-Taylor Hardware Company, of Water Street, Cleveland, Ohio, gave its thirty-fourth annual banquet to its traveling salesmen at the Colonial Hotel on December 29th last. Thirty-three covers were laid. Those present were: Hon. C. B. Lockwood, M. Taylor, J. Q. Riddle, J. C. Henry, J. J. Fite, C. T. Hird, O. H. Falk, Harry Hutchesson, G. T. Body, J. L. Wadsworth, W. P. Clark, W. B. Biggar, D. L. Hughes, A. M. Becket, J. H. Satterthwaite, G. R. Kranz, G. A. Smith, all of Cleveland, and the following salesmen present living out of town: D. C. Thompson, North Manchester, Ind.; J. F. Niele, Blanchester, Ohio; F. W. Howard, Warren, Ohio; M. C. Ripple, Milan, Ohio; J. R. Steel, Oil City, Pa.; M. S. Weber, Buffalo, N. Y.; C. B. Grieminer, Logansport, Ind.; S. W. Gano, Cincinnati, Ohio; E. A. Garver, Bryan, Ohio; F. C. Nicholas, Columbus, Ohio; C. H. Hutchesson, Punxsutawney, Pa.; H. W. Warren, Orrville, Ohio; H. L. Huddleston, Wauseon, Ohio, and A. E. White and F. J. Pemberthy, of Detroit, Mich.

### TENTH ANNUAL BANQUET OF KING HARDWARE CO.

In accordance with its custom for the last nine years, the King Hardware Co., of Atlanta, Ga., gave an annual banquet to its 45 employees at the Kimball House December 22. The occasion was one of much jolly mirth, and occurring as it did at the height of the Christmas season came as a fitting opening to the holiday festivities of those present.

All of the men connected with the company, from the President to the office boy, were seated at the board and until a late hour the evening was devoted to an enjoyment of the excellent menu prepared, discussion by the employees of the interests in which they are all concerned, and in gathering inspiration for the work of the coming year. President King, in opening the banquet, delivered a neat little address, in which he said that he always looked forward to these yearly banquets as an opportunity to become more thoroughly acquainted with his men and also to express to them his appreciation of the value and earnestness of their work.

The latest development attending the efforts of the company is the occupation of the large building on Peachtree Street, in the same block in which they have been located since the establishment of the firm. President King said last night that he regarded this step as marking an epoch both in the growth of the company and that of Atlanta. It was a tribute, he declared, to the importance of this city that it could support and furnish headquarters for such an extensive enterprise.

One of the most interesting features of the evening was the presence of Rev. J. L. King, the aged father of the sturdy young men who have, through their own efforts, built up such a magnificent trade monument to the greatness of Atlanta. Another prominent figure was W. E. Newill, the Vice-President of the company. He is regarded as one of the most thoroughly posted Hardware experts in the South, and much of the success of the company is due to his calm judgment and level head.

### SIXTH ANNUAL BANQUET OF THE GRAY & DUDLEY HARDWARE CO.

The Gray & Dudley Hardware Co., Nashville, Tenn., gave a banquet to the employees of the firm at the Tulane on December 26th, last. The 125 employees formed in a body at the store, and marched in divisions to the hotel, preceded by the Gray & Dudley Band. The small army was formed first of drummers, next of retail salesmen, who were followed in turn by the wholesale salesmen. The band gave an enter-

tainment in the Tulane rotunda, and Gov. Benton McMillin was given an ovation as he came among the assembled crowd.

About 9 o'clock the revelers repaired to the dining-hall, where spreads were laid for 125. For more than two hours mirth was king and the excellent menu was his cup-bearer. The banquet was more extensive and of longer duration than on previous occasions, but the flow of high spirits never flagged. Just prior to falling on the Mobile plants, a flash-light photograph was taken of the banquet scene.

R. M. Dudley presided as toast-master, and the esteem in which he is held by his men was attested by the prolonged and genuine applause which he received whenever he arose. John M. Gray, Jr., was first introduced, and after a few prefatory remarks, he said:

"It has been the custom of the Gray & Dudley Hardware Co. to meet on an occasion like this, which is the sixth annual banquet. We are here in a social gathering and we want to have a good time. I wish every stockholder in the company were here to-night. I think the stock of the company would advance.

"One hundred years ago a Hardware store was but a hole in the wall. Even a short time ago the conveniences of the modern Hardware store were strangers to the trade.

"Our sales during the past year were the largest in the history of the company, and I thank you each and every one for the part you have taken in making them such."

Mr. Dudley introduced J. T. Jenkins, the Treasurer of the company. He responded to the toast, "The Credit and the Traveling Man," as follows:

"For the purpose of the present occasion, it is necessary to divide salesmen into only two classes. First, those who sell their own property. A salesman of this class is a law unto himself. He has the right to make prices, terms and discounts on his ware, goods, or merchandise.

"It is of the other class, those who sell for others, that I am expected to speak. You may not be prepared for the assertion that the meaning of the word 'salesman' depends largely upon the occupation or experience of the person who uses it. To one not engaged in commercial or mercantile pursuits, salesman means a man who sells something; like inkstand means something to hold ink. To the average business man, salesman means one who is employed, usually under a contract that specifies the salary, states the period of time, and designates the territory. This contract is supposed to carry with it the idea of principal and agent.

"I must ask your indulgence long enough to say that I fear the words 'contract' and 'agreement' are sometimes accepted as having the same meaning. We seem to think that a contract is an agreement, and that an agreement is a contract. If these words are synonymous and interchangeable, I would like to feel sure of it. Nearly all contracts with salesmen express the amount of salary, length of time, and extent of territory. So far, I have not seen a contract that expressly states who is to fix the prices, terms or discounts.

"I assume that the customary contract is silent on these three points because of a vague or imaginary recollection of the time when there was an agreement in the minds of the parties to the contract that the owner of the property possessed exercised the right to fix prices, terms and discount. Until I went to St. Louis I was under the impression that the salesmen from St. Louis made the prices, etc., but I got the impression in St. Louis that the salesmen from Nashville have charge of these little items.

"Now, gentlemen, having outlined to you the average business man's definition of the word salesman, allow me to tell you that, to the mind of the credit man who analyzes and classifies, the word 'traveling-salesman' means the itinerant buyer for the retail merchants in his territory.

"It is clearly the duty of the buyer, let him be resident or itinerant, to obtain the best quality, the lowest prices, the longest terms of credit, the highest rate of discount, and the most indistinct date in which to discount. A recently developed and apparently the paramount duty of the itinerant buyer, is to obtain extensions on the maturing obligations of all the merchants for whom he buys. If indications are

worth anything, he is a poor buyer who cannot guarantee an extension (without interest) before he makes a sale.

"If there is a quality that all American people admire, it is loyalty. As an American, I congratulate the aforesaid buyer upon his allegiance to his principals, meaning, of course, the merchants for whom he buys."

The remainder of Mr. Jenkins' toast was devoted to The Credit Man.

R. H. Dudley then arose and said, in part:

"When you ask me 'what we are,' you open a favorite topic of mine. I find myself on the street, in private conversation, telling people what we are. We are, as I consider it, the largest Hardware jobbers south of the Ohio River and one of the largest in the United States. The fingers on one hand would count the firms that are larger than we are. We are in the finest Hardware store in the world. That is a fact. We gathered all the ideas possible in the United States by personal visits to the stores, and we have reliable authority as to what is elsewhere, and we can look a man in the eye and say that it is the finest in the world.

"We also have the largest storehouse in this town. We have more floor space than probably any store in this part of the country. We have the most systematically conducted business in the country. I am glad to be associated with such an establishment. There are not over two houses in the United States that do a larger cutlery business than the Gray & Dudley Hardware Co. I am fully satisfied that over five millions of people have a piece of Gray & Dudley cutlery in their possession.

"We have secured the five-story building which fronts on Market Street, near the rear of our mansion, and we will establish a harness and saddlery establishment there, all the machinery in which will be run by electricity.

"We are also in favor of new railroads. (Cheers.) You all know that.

"We have accomplished a great deal. Our success has been nothing short of phenomenal, and who has done this? Each individual seated at this table who has faithfully discharged his duty is responsible for it. No one is responsible for it, but it is the co-operation of all."

Mr. Dudley, in introducing W. C. Pollard, said that the company had followed military tactics in selecting the best men to attack the strongest fortifications of the enemy. Mr. Pollard responded to the toast, "Playing Around Louisville Like a Hoop Around a Barrel."

The following toasts were then responded to in the order named: Thomas Dale, "A Charge to Make I Have;" W. H. Fickling, "The Retail Department of the Greatest Hardware Store in the World;" W. H. Buchanan, "Changing Territory;" James Gowen, "Our Crew;" John M. Pichard, "Tribulations of the Floor-Walker in Verse;" R. H. Birthright, "Our Factories;" George W. Everett, "Twentieth Century Traveling Man;" H. T. Hill, "The Poor Moneyed Man;" Fred L. Martin, "The Specialty Man;" B. W. Haverfield, "The Art of Window Dressing;" Frank M. Gray, "The 'Moonlight' vs. 'Electric Light Towns';" Jake G. Boyle, "Bank Balances and Trial Balances."

G. W. Everett's original poem in response to the toast, "The Twentieth Century Traveling Man," touched a responsive chord in the hearts of his hearers, and he was enthusiastically applauded.

#### BANQUET OF BIDDLE HARDWARE CO.

Biddle Hardware Co., of Philadelphia, on Thursday evening, the 3d, entertained at dinner, in the Philadelphia Bourse, their force of salesmen and clerks, when a goodly number sat down to a varied repast.

After coffee was served, Charles M. Biddle made a short address of welcome, alluding to the fact the business had been started by his father and uncle in 1837, and had an unbroken record of sixty-four years.

He then turned the meeting over to James H. Ritter, of the same company, who acted as toastmaster. In Mr. Ritter's speech he called attention to the fact around the table sat ten men whose connection with the Biddle Hardware Co. covered a period of not less than 301 years—an average of thirty years per man—and expressed the belief that this record would probably be equal to that of any house in the country.

The dinner was entirely a "family" affair. Speeches were made by a number of the salesmen and others who were present, and all parted feeling they had spent a very enjoyable and profitable evening.

#### ANNUAL DINNER OF SMITH & HEMENWAY.

The Smith & Hemenway Co., 296 Broadway, New York, inaugurated the custom a year ago of entertaining their employees and friends at dinner as a desirable method of keeping them more closely in touch with their interests. In accordance with this custom, they provided a banquet at the Hardware Club on Saturday evening, December 29th, covers being laid for nearly fifty, which was attended by all but a few guests who were unavoidably absent. It was a very pleasing part of the entertainment that a number of guests present were the wives of some of the men connected with the house. The dinner was an excellent one, provided by the steward of the Hardware Club, of which the following was the menu:

MENU		
Olives		Celery
Oysters (Half Shell)		
Soup (Tomato)		
Fish (White Bait)		
ENTREE.		
Filet Mignon		
French Peas		Potatoes
Quail on Toast		
Salad		
Ice Cream		Cake
Coffee		Fruit

W. Pierrepont White, President of the Utica Drop Forge & Tool Co., acted as toastmaster, and did full justice to the occasion. He was well qualified for his position, and was able to add to the enjoyment by calling on a number of the gentlemen present for brief addresses, which partook more of the character of sociable talks on subjects more than usually pertaining to business affairs, and the desirability of keeping in harmony with everything in connection therewith. In another part of our paper we make a reference to the enterprise and activity of this young and progressive company, who are in every respect hustling members of the Hardware industry. After dinner a social hour was spent in the various rooms of the club, the party breaking up at 12 p. m. Among those present who participated in the speech-making were: L. P. Smith, President of the Smith & Hemenway Co.; J. F. Hemenway, Secretary and Treasurer of the Smith & Hemenway Co.; J. A. Gouldrup, L. H. Glazier, J. C. Curtin, C. E. Monroe, L. Noonan, M. O'Neill, G. Y. Patterson, W. M. Barrow, D. G. Smith.

The press was represented by Mr. Darville, of the *Iron Age*; Mr. Baltz, of the *Hardware Dealers' Magazine*; Mr. Raines, of *The Tradesman*, and Mr. Powers, of *Hardware*.

#### THE LAST LUNCHEON OF THE CENTURY.

A very pleasing affair took place at the Hardware Club on Monday, December 31st, when 25 members of the Club partook of the last luncheon of the nineteenth century. This was an impromptu affair, inaugurated by Charles Putzel and Wm. Willis Merrill, who, with their confreres, passed an extremely enjoyable two hours, materially assisted by a selected menu in which all the best things provided by the cuisine of the Club were represented. Ten or a dozen of the gentlemen present were called upon for brief remarks, and all responded, and the affair will be long remembered as a unique ending of the century. The following were the names of the gentlemen participating:

John F. Anderson, Jr.; Wm. Bishop, Samuel S. Bradley, John N. Blair, Frank M. Brooks, Eugene H. Conklin, John Day, Ethan Allen Doty, Joseph Fettretch, Henry L. Free-land, Albert H. Gleason, T. Foster Gaines, Henry Hopkins, Thos. F. Keating, Henry C. Kelley, Wm. Willis Merrill, Peter McCartee, John Oliver, Chas. Putzel, William S. Pitcairn, Clarence W. Seamans, Robt. Sickels, Robt. H. Swayze, J. Leonard Varick, Edw. C. Van Glahn.

### Corbin Cabinet Lock Co.'s New Catalogue.

The Corbin Cabinet Lock Co., New Britain, Conn., and 11-15 Murray Street, New York, have recently issued a volume of 866 pages, including index, of what is beyond doubt the handsomest and most complete illustrated catalogue and price list ever given to the special product with which their name is associated. It is a bound volume, in size  $8\frac{1}{4} \times 10\frac{3}{4}$  inches, with linen covers, and gilt imprint on back and side, making it especially attractive in a Hardwareman's library. It comprises their entire product of Cabinet Locks, Padlocks, Trunk and Suit Case Locks and Trimmings, Keys and Key Blanks, Miscellaneous Hardware, Post-Office outfits and supplies and Metal specialties of all kinds. Each line of goods is represented in regular order by its being grouped in separate divisions, according to the requirements of the different trades to which they apply. A very fine view of the general office and factories at New Britain, Conn., forms the frontispiece to this portly volume, followed by a complete price list of Cabinet Locks and extra keys, covering upward of 30 pages. Special attention is called in the early pages to the Corbin Pin Tumbler Cylinders, which are fully described, and the many advantages of them plainly demonstrated. The division of the volume is in six parts, each covering a separate department, as follows:

Part 1. Cabinet Locks, embracing Chest, Box, Desk, Drawer, Sub-Treasury, Machine, Cupboard and Wardrobe Locks, with a few specialties of other Locks of this kind.

Part 2. Padlocks, Cast and Wrought, with and without Chains.

Part 3. Trunk, Suit Case, Valise, Bag, Sample Case and Buckle Locks.

Part 4. Miscellaneous Hardware, embracing Furniture for Cabinet Locks of various kinds; Desk, Trunk, Bag and Box Trimmings; Label Holders, with and without pulls; Letter Boxes of various kinds; Coin Boxes; Mess Chest Fittings, and other similar articles.

Part 5. Brief reference to Post-Office Equipments, which are fully described in a separate catalogue.

Part 6. Keys and Key Blanks of all kinds.

In connection with the descriptive matter, we notice a departure from customary arrangements in Cabinet Lock catalogues, in this volume the numbers, material and prices being set next the illustration of the article, and above the general description, and as part of the description the numbers of the Key Blanks are given for every lock shown. This is a very desirable addition to the usual method of displaying these goods. A number of desirable additions to their regular line have been made since the publication of their previous catalogues, and all of which are embodied in the volume under review. This is especially noticeable in the finer grades of goods, those in which the Corbin Ball-Bearing Cylinders are used in the construction, such as Pin Tumbler Locks with and without master key, etc. Among the new goods, the trade will notice a new line of Mortise Cupboard Locks and a line of Half Mortise Cupboard Locks of fine grade, with narrow plates for sash doors, and ranging in sizes for wider styles. Many new patterns of padlocks have been added to their previous assortment, showing quite a number of Wrought Padlocks of especially attractive designs, fine Pin Tumbler Padlocks, Suit Case Locks, having improved hasps, and in many new patterns; Heavy Cast Bronze Padlocks, etc. A larger portion of the Miscellaneous Hardware shown in the catalogue is entirely new as far as cataloguing is concerned, and this includes a full line of Wrought Brass and Steel Hinges and Hasps for small boxes; Wrought Brass Flap Hinges; Table Hinges; Stay Hinges; Box Pulls of various kinds; also Mending Straps, Brackets, Corners and Corner Plates; Friction Catches; a number of new patterns of Key Checks and Heavy Cast Brass Hinge Hasps, etc. The largest assortment of new patterns of Keys and Key Blanks are shown in this catalogue that has ever been brought

to our attention, the assortment reaching into the thousands. In each division, special attention is called to the facilities for making special goods of similar construction that are needed for individual requirements, and a number of illustrations of such specialties are given. The catalogue is one in all its parts for the manufacturers to be proud of. Great care has been used undoubtedly in the compiling of it, showing a master hand in that line of business. Originality is displayed in the methods of conveying information, and although it is nothing new for handsome catalogues to be issued bearing the well-known name of Corbin, this is certainly the most ambitious in design and execution that has been given the trade for an important line of goods that no Hardware store exists but carries in stock. It will undoubtedly advance the interests of the manufacturers largely, and prove of great benefit to the trade wherever distributed.

### Forthcoming Hardware Conventions.

This month and the next will be largely devoted by the Hardware dealers to their State conventions. The following dates will indicate the time for holding some of them:

Jan. 17-18, East Tennessee Hardware and Implement Dealers' Association will hold their semi-annual convention at Knoxville.

Jan. 16-17, Pacific Retail Hardware Association will hold their third annual convention at Woodland, Cal.

Jan. 17, Hardware Merchants and Manufacturers' Association, of Philadelphia, will hold their annual meeting.

Jan. 15, Retail Stove and Hardware Merchants' Association, of St. Louis, Mo., will hold their annual convention.

Jan. 15-17, Kansas Retail Hardware Dealers' Association will hold their annual convention.

Feb. 5, Minneapolis Retail Hardware Association, at Minneapolis.

Feb. 6-7, Wisconsin Retail Hardware Association, at Milwaukee.

Feb. 8, Western New England Iron, Steel and Hardware Association, at New Haven, Conn.

Feb. 12, Kentucky Retail Hardware and Stove Dealers' Association.

Feb. 13-14, Iowa Retail Hardware Dealers' Association, at Dubuque.

Feb. 13, New England Hardware Dealers' Association, at Boston, Mass.

Feb. 19-20, Illinois Retail Hardware Dealers' Association will hold their annual meeting at Galesburg.

Feb. 19-20, Indiana Retail Hardware Dealers' Association, at Indianapolis.

Feb. 20-21, North Dakota Retail Hardware Dealers' Association, at Grand Forks.

Feb. 26-27-28, Ohio Hardware Association, at Cincinnati.

Feb. 28, Mar. 1-2, Minnesota Retail Hardware Dealers' Association, at Minneapolis.

Feb. 28, Eastern New York and Vermont Hardware Jobbers' Association.

Feb. 28, Missouri Retail Stove and Hardware Dealers' Association.

Feb. 28, Louisville, Ky., Retail Hardware and Stove Dealers' Association, at Louisville.

### Save Your Wheel.

A drop of oil at the right time and in the right place means long life and good working conditions to a bicycle. Don't condemn a wheel when the trouble may have been caused by your neglect to oil it properly.

Oil frequently and use but little oil at a time. The best oiler for this purpose is the Perfect Pocket Oiler. This oiler regulates the supply of oil to the exact amount needed. It does not leak and will save you the vexation of finding that the oil has all escaped from your can when you especially need a drop for your wheel. The Perfect Oiler only costs 25c. and is worth many times the slight difference in price over the cheaper oilers.

**Recent Calendars, etc.**

THE CANFIELD BRAKE CO., Corning, N. Y., are distributing a hanging calendar on which is depicted a beautiful goddess reclining in a position which makes the backing up essential of a large Automatic Cycle Brake, which forms the Company's product. The design is an original one, and the calendar quite attractive.

SCHILL BROS. CO., Crestline, Ohio, issue, among the calendars received, a very handsome one, which is a departure from any formerly distributed by them. A beautiful lithographic picture of a child holding a shell to her ear, the portrait itself being displayed in a large shell brilliant in gold and color effects, the sea breaking in surf lines upon a beach strewn with shells, forming the foreground. As a part of the picture is in bas relief, the effect is a fine one.

SNELL MFG. CO., Fiskdale, Mass., distribute a very pretty hanging calendar, showing in duogravure from a painting by Fleis, a pretty girl tickling a puppy she is holding in her arms. It is entitled "Good Friends," which is emblematic of the relations existing between the patrons and this old and well-known manufacturing company.

F. E. MYERS & BRO., Ashland, Ohio, issue their usual annual hanger, which shows on its immense surface the entire contents of their catalogue. Hung up in a Hardware store, it would undoubtedly stimulate wants and encourage sales.

**A Neat Little Announcement.**

One of the neatest things we have seen for the purpose of extending the compliments of the season was distributed by Louis Ernst & Sons, Rochester, N. Y. Having a portrait of the head of the firm on one side, and a vignette in color for a background, the text was as follows:

GREETING.

1901.

It is not often that we can extend to our friends the compliments of the season at the turn of a century. We therefore take advantage of this opportunity and wish you much happiness and prosperity for the coming year.

We thank you for your good will toward us in the past, and hope for a continuance of it in the future.

LOUIS ERNST & SONS,

ROCHESTER, N. Y.

**American Steel in Germany.**

Writing from Frankfort, November 20, 1900, Vice-Consul-General Hanauer says:

Mr. Wiegand, the director-general of the North German Lloyd Steamship Co., at a public festival last week, made a speech in which he defended his company against the attacks made on it by German industrial circles on account of the company's late purchase of 1,000 tons of steel in the United States. The director said:

We have, during the six years past, paid to German industries over 130,000,000 marks (\$30,940,000)—i. e., about 22,000,000 marks annually. The order given to American steel works, amounting to about 300,000 marks, is insignificant compared with these figures. It is not to save 10 per cent. in price that this order was given to a foreign concern, but the Lloyd Co. would not have reached its present position had it not utilized the improvements offered by outside manufacturers. We would like to see German industry brought to the utmost tension by foreign competition and not be afraid to meet it at home; thereby the only possibility exists for us to maintain our place in the international contest for economic fitness.

"I'm sure we shall be on good terms," said the man who had just moved into the neighborhood to the grocer at the corner.

"No doubt of it, sir. Especially," he added, as an afterthought, "if the terms are cash."—*Ex.*

**Lehman Carriage Heater.**

Lehman Bros., 10 Bond Street, New York, are placing upon the market the Lehman Carriage Heater, which is a very desirable thing for this time of the year for the heating of carriages or sleighs, and is being introduced through the Hardware trade, meeting with considerable success. This is a new device for the purpose of heating a carriage or similar conveyance that should meet the approval of the Hardware trade. We give herewith an illustration of this desirable article, which will be found a valuable provider of comfort to the riding public. The manufacturers seem to have solved the problem in a satisfactory manner, as nearly every previous contrivance having this beneficent object in view had some vital objection in meeting with the popularity that was desired. Previous methods, many of them, involved the necessity of smoke, odor, danger or trouble of some description, but the present device renders all such fears un-

LEHMAN CARRIAGE HEATER.

necessary. The Lehman Carriage Heater combines all the requisites for a carriage warmer. In construction, it is simplicity itself, consisting of a metallic case with special ornamented endplates, and possessing between its peculiarly constructed walls a carbonized material the heat-retaining qualities of which are truly marvelous. The case is provided with a perforated box, or drawer, which works in a metallic slide, and is held in place by a spring. Into this drawer is placed a piece of prepared carbon, the drawer is then inserted in heater, and the same requires no further attention until entirely consumed. It is estimated that two cents' worth will last twelve hours, making it an extremely economical appliance. All this is accomplished absolutely without smoke, odor or dirt. The heater is oval in shape, and the desirability of adding it to a Hardware stock is well worth the dealer's attention.

**A Beautiful Booklet.**

An extremely attractive souvenir booklet of 30 pages was recently issued by the Cleveland Twist Drill Co., Cleveland, Ohio, and entitled "Eleven Little Pictures." It is beautifully printed on the finest coated paper, 7x10 inches in size, and illustrated on every other page with superb half tones, showing the large plant controlled by the company, and the various parts of the office and factory premises, with only a single line of text at the bottom to individualize the illustrations. The cuts are very graphic, and well executed, and are designated as follows: "The general office is a busy place." "This is where your orders are put up." "The dining-room in action." "From whence comes a good deal that is good." "The circulating library is well patronized; new books are constantly added." "All the leading magazines, illustrated weeklies, and trade papers are here; the men know what the world is doing." "A little music after dinner is pleasant and elevating." "One section of the mechanical drawing class in night school." "Every man has a separate locker." "A part of the engine room."

In the few remarks that form the preface, the company state: "With pleasant surroundings and comfortable conditions, labor gives better results. Acting upon this supposition, we have inaugurated some reforms in shop-practice a few of which are illustrated in this little booklet."

Probably the most of the difficulties of trying to live the Christian life arise from attempting to half live it.

### A New Improved Vapor Stove.

The Sun Vapor Stove Mfg. Co., 29-31 East Atwater Street, Detroit, Mich., are manufacturing and distributing through the Hardware and stove trade a Gasoline Stove which appears to fulfil every requirement that has long been sought for in this direction, that is: An absolutely odorless, quick-lighting gasoline cooking stove. With their improved burner, illustrations of which we give in the course of this article, the manufacturers claim to have succeeded in over-

FIGS 1 AND 2. ODORLESS QUICK LIGHTING BURNER.

coming all of the usual objectionable features of gasoline stoves. By a perfect arrangement of perforated base and perforated walls, the air is scientifically mixed with the hydro-carbon vapor in such proportions that perfect combustion is the natural result, the vapor producing a blue flame from the moment the gasoline is admitted into the base or vaporizer, so that even when shut off no vapor or gasoline is left unconsumed to fill the room with odor by subsequent vaporizing. As soon as it is turned on it is ready to light, as no generating is required, and a full fire of intense blue flame is produced in less than a minute and a half. In construction, the burner is claimed to be simplicity itself, as there are only three parts, the base or vaporizer of cast brass, and the outer and inner shells of sheet brass, which set in grooves on the vaporizer, and which are removed by simply lifting them off. In operation, the makers claim it is equally as simple and perfect, being absolutely free from odor, smoke or soot, which is not always the case with gasoline burners. The valve is simply and easily adjusted, requiring no expert knowledge to operate, adjust or repair this stove. In durability the burner is claimed to deserve notice, since, although the walls are made of sheet brass, the vapor is made to burn in such a way that a cushion of air intervenes between the metal and the flame, so that the metal is not touched by the flame and cannot be burned out. As these stoves are all supplied with a new improved safety tank, all possibility of accident is prevented, even when filling, should

FIG. 3. THE VAPORIZER.

it be necessary, while the fire is burning. Immediately under the top burners is an entirely new feature, and one peculiar to the stoves manufactured by this company, viz.: A warming closet in which the heat reaches a temperature of 125 degrees during operation, thereby making it possible to keep a dinner warm for late comers, raise bread, warm plates and various other things, the convenience of which a house-keeper can appreciate. The stoves are manufactured in twelve different sizes, being well constructed of good material, and highly finished. They are free from many ob-

jections of older makes of vapor stoves, and are claimed to possess all the advantages and conveniences that have been introduced in recent years in their extended construction. They have now been upon the market for two years past, which has resulted in largely increased sales, and have caused a wide introduction into new territory. This the manufacturers claim is good evidence that they possess the merit claimed for them, proving their satisfaction to both dealers and consumers. The company issue a descriptive catalogue more fully explaining the merits of the stoves under discussion, which they will be pleased to supply upon application.

### Steel Sinks with Combination Overflow.

The Lalance & Grosjean Mfg. Co., 19-21 Cliff Street, New York, are asking the attention of the trade to the new patent Combination Overflow, which is supplied with the steel sinks of their manufacture. The principal features of this great improvement are shown in the illustrations which are given in this article. One of the main points of advantage possessed by the Combination Overflow is the great facility with which it can be removed for cleaning, it being necessary only to unscrew the perforated grates, or rings of outlet, and then removing the cup which carries grease below the overflow tube. Ordinarily, the combination overflows made in cast-iron sinks or iron and porcelain basins, the overflow tube in connection therewith being below the outlet in the bottom of the sink, form a natural receptacle for all greasy matter.

FIG. 1. OVERFLOW WITH PLUG OUTLET.

FIG. 2. OVERFLOW WITH STRAINER OUTLET.

This gradually accumulates, and eventually chokes the passage. Such obstruction is difficult to remove and it is very rarely discovered until the overflow is actually needed, by the plug, for instance, being left in the outlet when the tap is left running. A risk of this character is entirely eliminated, it is claimed, by the use of the patent Combination Overflow now offered by the Lalance & Grosjean Mfg. Co., and this device is fitted for coupling either to lead pipe or iron pipe, as may be desired.

BARNEY & BERRY, Springfield, Mass., publish a "Hand Book of Figure Skating," which is copyrighted and arranged for use on the ice, with 600 diagrams and illustrations, and suggestions for nearly 10,000 figures. It forms a very compact pamphlet of 125 pages, 6 1-2x3 1-2 inches, and is divided into three parts. Part I. treats of What To Do, describing figure skating and golf, the correct form, British and Continental, adapted to American skating; gives a brief history of skating and skating literature, showing the development of the art at home and abroad up to the present date. Part II. treats of What To Do It With, the elements, the strokes and the types of combinations. Part III. describes How To Do It, with brief hints and cautions for use on the ice. A great deal of thought and care has been given to the compilation of this pamphlet, which is printed on excellent paper, and fully illustrated. It is intended to be retailed at 50 cents, which price will permit a liberal discount to the Hardware trade handling it. It is a complete compendium of everything connected with skating, and is well worth the advertised price.

Mrs. Jones—Don't trouble yourself to see me to the door, Mrs. Smith.

Mrs. Smith—No trouble. Quite a pleasure, I assure you.

## RECENT TRADE PUBLICATIONS.

J. STEVENS ARMS & TOOL Co., Chicopee Falls, Mass. Sixteen-page envelope catalogue, printed in blue on white coated paper, and covering the line of Favorite Rifles, Bicycle Rifles, Ideal and Crack Shot Rifles, Target Pistols and Pocket Rifles, etc., with the manufacture of which this company has been identified for a number of years.

F. C. ATKINS & Co., Indianapolis, Ind. Pamphlet catalogue of 32 pages, devoted entirely to Cross-Cut Saws. Printed in two colors and showing in its contents all the various patterns made by this well-known company. The frontispiece gives an illustration of their extensive plant, which conveys an admirable idea of the extent of their important works. A very useful catalogue for reference purposes, and should be in the hands of every Hardware dealer.

PITTSBURGH STOVE AND RANGE Co., successors to Bissell & Co., Pittsburgh, Pa., issue a 16-page pamphlet catalogue, which is their supplementary catalogue No. 1, covering their Mystic Triumph Steel Ranges, which are made for hard or soft coal or wood, either right-hand or left-hand. The contents show a very handsome line of steel ranges with all the important improvements up to date, handsomely nickeled, and very attractive in appearance; also the Triumph Air-Tight Parlor Stoves, which are made in several designs.

PECK BROS. & Co., 127 Chestnut Street, New Haven, Conn. Catalogue H, covering a line of fine Brass Goods for water, gas, steam, oil and liquors. This catalogue is prepared with the aim to embody in it a line of goods adapted to meet the requirements of the Hardware trade, and water cooler, urn and refrigerator manufacturers, and while it represents but a small portion of the goods manufactured by this old company, it is condensed in such shape as to be attractive to the Hardware trade, covering as it does the more important lines of goods handled by them of this description. Embraced in its contents are lever bibbs, compression bibbs, beer or ale cocks, beer bungs or vent plugs, bar and counter cocks, cooler cocks in large variety, with milk cocks and urn gauges in wide assortment. It also includes the usual racking and lock cocks for liquor, together with bottling, liquor, kerosene and Globe cocks. The assortment includes a large variety of Hose goods, this catalogue only taking in the regular line of such goods adapted to the wants of the trade. Altogether it is a very useful catalogue for the Hardware trade, bound in muslin, of 50 pages, and of small quarto size.

PHILADELPHIA LAWN MOWER Co., Philadelphia, Pa. The 1901 catalogue of Philadelphia Lawn Mowers, very handsomely illustrated, of 64 pages, printed on colored paper, the illustrations being printed in darker color, and forming a very attractive display, and covering their entire line. The frontispiece shows the extensive works occupied by this company. The Philadelphia Lawn Mower Co. manufacture what are known as the Genuine Philadelphia Mowers, which are made with incased gears of open and solid cylinder pattern, having large and long bearings, which insure wear, knives of crucible steel, oil-tempered, castings of finest grade, and which are claimed to be so simple they are easily adjusted and kept in order. As indicated by the contents of this catalogue, they are made in many desirable styles, both in high and low wheels. All Genuine Philadelphia Lawn Mowers, the manufacturers state, have the name "Philadelphia Lawn Mower Co." cast in on the wheel of the same. This is a very large and important line of goods, and are known throughout the trade in every section of the country. The catalogue is

one that should be in the library of all dealers handling such goods.

SIMMONS HARDWARE Co., St. Louis, Mo., have recently issued one of the handsomest publications of its character we have ever seen, under the title of "Best Tools Made." A more artistic expression of the leading tools in the Hardware business in book form we think it would be difficult to surpass. It is comprised in 64 pages 4 1-4 x 7 1-4 inches, printed on heavy coated paper, the pages having gilt edges, and the pamphlet for general distribution having an embossed paper cover of artistic design. The selected lines of edge and other hand tools which are referred to in this case as the "Best Tools Made" are represented by superb half-tone illustrations, which are set in the text in the centres and corners and odd locations throughout the book. In some cases full-page groups of tools are shown as in the case of hammers, showing all the various styles; also shovels, saws and other tools, and a more perfect display it would be difficult to imitate by one not thoroughly familiar with the class of goods referred to. The publication is simply a beauty. The entire get-up of the paper, engravings and letterpress impress the reader completely that no mistake is made in announcing these as the "Best Tools Made." The pamphlet is published in English, French, German and Spanish, and is intended for distribution to the retail Hardware trade. The goods represented are all specialties that form a part of the stock of the Simmons Hardware Co., but, which is a rare thing in connection with anything so complete, there is almost a conspicuous absence of their name throughout the book in connection with these illustrations.

BALDWIN REFRIGERATOR Co., Burlington, Vt. Pamphlet catalogue of good size, 84 pages, printed in a pleasant tint on white paper, and embracing the entire line produced by this extensive plant. This has become one of the most important lines of goods manufactured in the United States, and every effort is made to embody in their construction all the improvements that have been made in connection with this industry for a number of years. Many of the improved devices for economy in the use of ice are noted in its contents, such as the lever-wedge lock, air-tight waste trap, elastic packing around edges of doors and lids, patent sliding and swing shelves with automatic inner door, to prevent ingress of warm air while the outer doors are open. All of these up-to-date improvements are well worthy of inspection. Ball-bearing casters are used on their refrigerators, varying in size according to weight of refrigerator. In the zinc-lined styles, adjustable shelves of corrugated metal are used, while in the popular and long-tried spruce-lined goods they are of good rock maple or birch. Both styles are neat, serviceable and strong, and have ample room between the slides for circulation of air. Articles placed on them will not tip over. The designs of refrigerators shown in this catalogue are of a very pleasing character, included in which is a line of solid oak refrigerators with or without porcelain-lined water cooler, which is a very attractive line for city trade. A large line is manufactured from solid ash, including almost every possible style required by the wants of the trade. Embraced in its contents are solid ash ice chests, grocers' chests, table-top refrigerators, sideboard refrigerators, in large variety, very handsomely finished and with a large number of improvements. Altogether it is a complete catalogue, and should be in the hands of every one of our subscribers handling this important class of goods.

## NEW GOODS AND SPECIALTIES.

### Defiance Garden Barrow.

The Defiance Box Co., Defiance, Ohio, are the manufacturers of the Defiance Garden Barrow, of which we give an illustration, and which they are marketing through the Hardware and implement trade. The Defiance Barrow is made of thoroughly seasoned hard wood, planed and smoothly finished.

DEFIANCE GARDEN BARROW.

ished. The frame is iron braced, and so constructed that the barrows can be easily folded down flat, enabling them to be shipped at the lowest rates of freight. They are constructed with round-spoke steel wheel, of double frame, and removable sides, taking but a moment's time to set up ready for use. In dimensions the handles are length over all 72 inches, with a bed of 27 inches inside length, and 22 1-2 inches inside width at handles, and 14 1-4 inches inside width at wheel, having a depth of 12 1-4 inches. The wheels are 20 inches in diameter, with tires of 11-2x5-16 inches, and round steel spokes of 5-16 of an inch, making them a very well constructed barrow for general purposes for garden use. The wheel is blacked, and the barrows are well painted, striped and varnished, and weigh 50 pounds.

### The Handy Riveter.

The Milwaukee Automatic Machine Co., Milwaukee, Wis., are manufacturing and introducing through the Hardware and supply trade the Handy Riveter, which we illustrate herewith, which will be found a very convenient little tool for the purpose designed. The machine is operated by turn-

THE HANDY RIVETER.

ing a thumb-screw, which is referred to as sufficiently powerful to enable any size of tubular or bifurcated rivet to be perfectly clinched. The body and screw are manufactured from malleable iron, while the sleeve is made of cold-rolled steel, and the plunger of hardened tool steel. As it weighs but five ounces, it can be readily carried in the pocket, and will be found extremely useful for such purposes as mending broken harness, straps, belts and a number of similar opera-

tions that are calculated to be within the reach of this labor-saving device.

### "Perfect" Tire Separator.

Milwaukee Automatic Machine Co., Milwaukee, Wis., are the manufacturers of the "Perfect" Tire Separator, of which we give an illustration herewith. It is made in two sizes, No. 1 being adapted for 11-2 inch tire, and No. 2 for 15-3

"PERFECT" TIRE SEPARATOR.

inch tire. It is claimed to be a great seller, and ought to be in every sundry catalogue for 1901. Every bicycle rider knows how annoying it is to have an inner tube sticking to the outer casing. This separator entirely overcomes a trouble of this description. The separator is inserted through the lacing opening of the tire, and the tube is pulled through the hole. The end of the tube being held, the outer casing is squeezed against the rollers, forcing the separator to travel through the casing. The inner tube will be loosened quickly, and without fail. The manufacturers will be only too glad to furnish sample and particulars upon application, and those handling bicycle sundries would find this an extremely salable addition to their assortment.

### Star Gas Stove.

The Electric Oil and Gas Stove Works, 295-297 Pearl Street, New York, are extensive manufacturers of oil and gas cooking stoves, running from the single stove, with but two wicks, to the larger size of similar construction, carrying six wicks. They also manufacture the "Pilgrim" Lamp Stove, which has attained a vogue throughout the Hardware trade, and meets with a ready sale. One of the principal specialties which they are introducing to the Hardware trade

STAR GAS STOVE.

is the Star Gas Stove, an illustration of which we present herewith, which is furnished in several sizes, running from 8 1-2 inches to 20 and 30 inches long. They are finished either in nickel-plate or in black japan at prices corresponding to the finish. They have proved an exceedingly popular specialty for use with gas, and those interested in the sale of goods of this description should make application for one of their catalogues.

**Linke Self-Cleaning Stone Filter.**

T. Linke & Co., 1559 Broadway, New York, are placing before the Hardware trade the Linke Self-Cleaning Stone Filter which has been only recently placed on the market. There has long been a demand for a perfect filter, one that would require but little attention, and still perform its mission in an acceptable manner. The ordinary cheap strainers

SECTIONAL VIEW LINKE SELF-CLEANING STONE FILTER.

that are constructed of a small amount of sand or charcoal have outlived their usefulness, being constructed on lines that are theoretically and practically wrong, arising simply from the fact that they are not packed close enough to prevent the organic suspended matter from passing through them, and in another essential particular should this detrimental matter by any possibility be held in the appliance, the good water required would have to pass through this objectionable accumulation held in suspension. A number of efforts have previously been made to obtain a successful filter, constructed on the lines of the one now under review. Heretofore the great obstacle to the successful introduction and use of all-stone filters has been the troublesome feature of cleaning them, when by their daily use they stop filtering. This had to be done several times a day when in use by taking the filter apart and brushing the stone, which few people have the time or patience to do. But in the improved Linke Self-Cleaning Stone Filter this feature has been carefully considered, and the result has been that already large sales have been made, running into the thousands, principally in New York city, where it has been accepted and approved, thanks to the patentees and manufacturers, whose sustained efforts in this special line have been brought to a successful

LINKE SELF-CLEANING STONE FILTER.

issue. In the country, brook, river or lake water is seldom used for drinking purposes, especially where well or spring water can be obtained. But for city use, the sources of supply are from brook, river and lake usually, which afford the only sufficiency. With proper filtering appliances this can be purified equal to spring water, and the manufacturers of the Linke Self-Cleaning Stone Filter claim that they have solved the problem completely. Their advertisement will be found on page 43.

**Indoor Arc Lamp.**

The New White Light Gas Lamp Co., 281-283 West Madison Street, Chicago, Ill., are manufacturers of high-grade Incandescent Gas Lamps, and "Monarch" Lighting Machines, which they manufacture in large variety. We illustrate herewith their No. 16 Indoor Arc Lamp of 500 candle-power. It is a lamp especially desirable for Stores, Churches, Public halls, Skating rinks, Saloons and Billiard rooms, its length being 28 inches and having a reservoir that holds three quarts, with air pressure supplied and with an overhead generator calculated to burn 14 hours. It is made entirely of brass and copper, and finished in oxydized copper. These lamps are constructed from the finest material throughout, and are fully guaranteed to operate precisely in accordance with the claims made by the manufacturers, if instructions are followed. By their use, the manufacturers claim that the farmer on his farm may enjoy the same advantages as regards light as those living in the most elegant mansions of any city. By the aid of lamps of similar construction manufactured by this company the streets of a village can be made as brilliant as any thoroughfare in a metropolis. They certainly have become a power in the land in regard to illuminating advantages, and now that the safety of the

INDOOR ARC LAMP.

use of gasoline has been so thoroughly assured by recent improvements in the construction of the gasoline lamp, its universal adoption is only a question of a short time. The company issue a handsome catalogue in regard to their lamps, calling attention to the same, and giving full descriptions. It would be well for the reader to write for the same, asking for Catalogue J.

**Japanese Swords.**

The blades of Japanese sabres are formed of a metal prepared from magnetic iron ores and ferruginous sand. The steel is produced in the form of thin laminæ, and the workman commences by fixing one of these to the end of an iron rod, which serves as a handle. To these are soldered other sheets until the mass has a length of six to eight inches, a width of two inches and a thickness of one-quarter to four-fifths of an inch. This bar, brought to a white heat, is doubled upon itself and hammered until it has taken its original dimensions. This process is repeated fifteen times. Four similar bars are then soldered together, doubled upon themselves, resoldered and heated, this operation being repeated five times. By this process the superposed layers of metal become so thin that a sabre is estimated to contain at least a thousand sheets of metal. Sometimes alternate layers of iron and steel are soldered together, and thus the blade presents a veined appearance.—*London Globe*.

55 Equitable Building, BOSTON.

### A Handsome Calendar.

We present our readers with an illustration of one of the most attractive calendars issued this season in connection with the Hardware trade. It was distributed to the patrons of the old established gun powder manufacturers, E. I. Du

Pont de Nemours & Co., Wilmington, Del., and it quite graphically tells its own story in the illustration herewith.

The Company announce that they will forward these calendars as long as the edition lasts, to any one who will inclose three cents for postage with their application.

### He Was Up to the Limit.

A young society woman in this city is telling a story of a very little newsboy who so appreciated her kindness to him at the newsboys' Thanksgiving dinner that he went to the extent of great suffering for her sake. At least, she thinks it was appreciation, but others have doubts. At all events, the young woman who, with a number of others, was engaged in serving the boys, noticed this little boy way off at one end of the table. Many of his larger fellows were already hard at work on the various good things, but this little fellow had evidently been neglected. Clearly here was a case of urgent charity, so the amateur waitress flew to his side, and for an hour she saw to it that he did not lack for anything. Plate after plate of turkey was literally showered upon him. Finally, as she set another piece of plum pudding in front of him, he rolled his eyes meekly toward her and said in muffled tones:

"Well, Miss, I kin chew, but I can't swaller no more."

### Association! Not a Trust!

On page 17 will be found a combination advertisement of The Smith & Hemenway Co., Utica Drop Forge & Tool Co., and Thomson Bros. & Co., the latter manufacturers of the Seavey Mitre Box.

L. P. Smith, President of the Smith & Hemenway Co., is a Southern man, born and bred in the good old State of Tennessee, educated in the Hardware business in Memphis and afterwards in St. Louis in one of the well-known jobbing houses in this branch of business.

Deciding to come East in 1895 in order to cast his lot with "the big fish," he formed the firm of Smith, Herlitz & Co., who were importers of Hardware specialties, and continued under that name for something over a year. His next venture was with J. B. Patterson, and the partnership under the name of Smith & Patterson was continued for two years, when early in 1898 an incorporated company with the name of the Smith & Hemenway Co. was formed on broader lines, and with J. F. Hemenway, a native of the "Empire State," as Secretary and Treasurer, whose earlier experiences as Manager and Treasurer of the Empire Wringer Co., of Auburn, N. Y., and as Assistant General Manager and Assistant Treasurer of the American Wringer Co., of Providence, R. I., and New York city, had eminently fitted him to take an active part in pushing to the front the new enterprise. They combined forces with a view of becoming leaders in their special line of business, that is, manufacturing Hardware and Hardware specialties. For less than a year they continued at the old stand, 10 Warren Street, New York city, but finding the place entirely inadequate for the growing business, they moved to larger and more commodious quarters at 20 Warren Street. After the expiration of another year they found these quarters entirely too small and moved to 296 Broadway, in order to have room enough to conduct their growing business on the lines they desired.

The Smith & Hemenway Co. succeeded to the business of the following concerns:

Smith & Patterson, Maltby-Henley Co., Bindley Automatic Wrench Co., Anderberg Importing Co., John Byrnes, glass cutter manufacturer, all of New York city.

Soon after their organization, the Smith & Hemenway Co. associated themselves with the Utica Drop Forge & Tool Co., of Utica, N. Y. The Utica Drop Forge & Tool Co. are successors to the Interchangeable Tool Co. and the Russell Hardware & Implement Mfg. Co. Their New York office is with the Smith & Hemenway Co., New York city, where all catalogues and quotations can be obtained. At the organization both companies were small, but both being composed of young blood, they forged their way forward until they have a line of Hardware specialties and tools second to none in the world, showing conclusively that young blood and energy will assert itself under all conditions. The Smith & Hemenway Co.'s line comprises a large number of different articles in the Hardware specialty line. The Utica Drop Forge & Tool Co. manufacture the largest line of nippers and pliers made by any one factory in the world.

The Smith & Hemenway Co. have recently organized The Schatz Hardware Mfg. Co., Mt. Carmel, Conn., for the manufacture of nail pullers and Hardware specialties.

In the Fall of 1899 the Smith & Hemenway Co. associated themselves with Thomson Bros. & Co., of Lowell, Mass., manufacturers of the well-known Seavey Mitre Box, and since that time have improved this article until they have to-day what they might call perfection in this individual line.

It would be well for all live, wide-awake Hardware houses to keep their eye on this young firm. They are making their mark and so deep that it will not be erased from the memory of the older Hardware houses all over the country. The Smith & Hemenway Co. issue a unique catalogue known to the trade as the "Green Book of Hardware Specialties," which will be sent gratis to any one on application.

REVIEW OF THE MARKETS.

**Wire Nails:** But little change is noted in the condition of the wire nail market, the manufacturers not having made any notification regarding any change in prices. The trade is very moderate, and will be in all probability until after inventories are completed, prices remaining the same as previously quoted, and are as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots	\$2.20
less than carload lots	2.25
To retailers in carload lots	2.30
less than carload lots	2.40

New York prices continue without change:

To retailers, carload lots on dock	\$2.48
less than carload lots on dock	2.55
Small lots from store	\$2.60 to 2.65

**Cut Nails:** The cut nail market is without special feature, the demand naturally light at this season of the year. Prices are without change, quotations being as follows, f. o. b. Pittsburgh, terms 60 days, 2 per cent. off in 10 days:

Carload lots	\$1.95
To jobbers in less than carload lots	2.00
To retailers in less than carload lots	2.10

New York quotations remain as previously reported:

To jobbers in carload lots on dock	\$2.13
less than carload lots on dock	2.18
To retailers in less than carload lots on dock	2.31
Small lots from store	\$2.30 to 2.35

**Barb Wire:** The prices on barb wire have been well sustained, and the demand fairly good for some time. Prospects are that the coming season will be an unusually good one. Prices continue as previously quoted, as follows, f. o. b. Pittsburgh, net cash 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots, Painted	\$2.50
Galvanized	2.80
To jobbers in less than carload lots, Painted	2.55
Galvanized	2.85
To retailers in carload lots, Painted	2.60
Galvanized	2.90
To retailers in less than carload lots, Painted	2.70
Galvanized	3.00

Ellwood and Baker Wire is 5 cents and Washburn & Moen Glidden 10 cents per 100 pounds higher than the prices above named.

**Plain Wire:** A slightly increased demand is noticeable for plain wire, indicating that a confident feeling prevails in the market. Manufacturers are purchasing their supplies of this description in a reasonable amount, and no immediate change is anticipated to any great extent. Quotations are as follows, f. o. b. Pittsburgh, terms 60 days, or 1 per cent. discount for cash in 10 days:

	Base sizes.	
	Plain.	Galv.
To jobbers in carload lots	\$2.15	\$2.55
less than carload lots	2.20	2.60
To retailers in carload lots	2.25	2.65
less than carload lots	2.35	2.75

Above prices are for the base numbers, 6 to 9. The other numbers of Plain Wire and Galvanized Wire take the several advances noted in the following table:

PLAIN FENCE WIRE ADVANCES (CATCH WEIGHTS).

Nos.	Base	Galvanized.
6 to 9	Base	\$0.10 extra
10	\$0.05 advance over base	.40
11	.10	.40
12 and 12½	.15	.40
13	.25	.40
14	.35	.40
15	.45	.40
16	.55	.40
17	.75	1.00
18	.85	1.00

**Stanley Rule & Level Co.:** Under date of January 1, 1901, The Stanley Rule and Level Co., New Britain, Conn., and 107 Chambers Street, New York, issue a new discount sheet applying to their important line of goods. No changes in discounts are noticeable from those given the trade a year

ago. A few changes are noted in list prices, to which they call attention, and we give them herewith, the printed discount on Boxwood Rules being 75 and 10 per cent., as before:

BOXWOOD RULES.

No. 4, list per dozen	\$11.00
No. 12, list per dozen	16.00
No. 18, list per dozen	6.00
No. 26, list per dozen	11.00
No. 27, list per dozen	13.00
No. 29, list per dozen	4.50
No. 66, list per dozen	10.00
No. 66½, list per dozen	10.00
No. 67, list per dozen	6.00

STANLEY PLANES.

No. 100, each	\$0.30
No. 130, each	.85

**Screws:** The screw manufacturers have at last decided upon concert of action in regard to prices of wood screws, finding outside competition developing too much strength. Quotations were decided upon after a conference which resulted in the following printed list of discounts, from which on large specifications an additional 10 per cent. may be obtained:

	Discount.
Flat Head Iron	85
Round and Oval Head Iron	80
Piano, Unpolished	80
Fillister Head Iron	80
Flat Head Brass	82½
Round and Oval Head Brass	77½
Flat Head Bronze Metal	75
Round and Oval Head Bronze Metal	72½
Flat Head Nickel Plated on Iron	70
Round and Oval Head Nickel Plated on Iron	70
Flat Head Nickel Plated on Brass	70
Round and Oval Nickel Plated on Brass	70
Flat Head Iron Screws, Blued and Black, 5 per cent. advance on net.	

MISCELLANEOUS SCREWS.

	Discount.
Felloe	85
Japanned Flat Head	80
Japanned Round Head	75
Kahala Flat Head	80
Kahala Round Head	75
Tinned Flat Head	80
Tinned Round Head	75
Bronzed Plated Iron Flat Head	75 and 10
Bronzed Plated Iron Round Head	75
Coppered Flat Head	75 and 10
Coppered Round Head	75
Brass-plated Flat Head	75 and 10
Brass-plated Round Head	75
Silver-plated Flat Head, Unpolished	75
Silver-plated Round Head, Unpolished	70

**Carriage Bolts, Machine Bolts, Etc.:** An advance of about 2 1-2 per cent. was made since our previous issue in the prices of Carriage Bolts, Machine Bolts and related goods. The new discounts are as follows, an extra 10 per cent. being given to the large trade:

	Discount.
Common Carriage Bolts	70 and 2½
Machine Bolts with H. P. or C. P. Plain Nuts	70 and 10 and 2½
Bolt Ends with H. P. or C. P. Plain Nuts	70 and 10 and 2½
Bolt Ends with C. & T. Nuts	70 and 2½
G. P. Coach Screws	75 and 15
Cone Point Lag Screws	80
Skein Screws	75 and 15
Forged Set Screws and Tap Bolts	65
Plow Bolts and Guard Bolts	60 and 10

**Nuts:** Advances were also made at same time in the prices of both Hot Pressed and Cold Punched Nuts. The regular quotations are now as follows, with the usual extras to large buyers:

	Off list.
Hot Pressed Square, Blank or Tapped	5.80c.
Hexagon	6.50c.
Cold Punched Plain, Blank or Tapped Square Nuts	5.40c.
Hexagon	5.80c.
C. T. & R. Blank, Square or Tapped Nuts	5.60c.
Hexagon	6.40c.

**Shot:** Under date of December 31 the Eastern manufacturers of Shot announce the following revised prices, net cash 30 days or 2 per cent. discount for cash in 10 days, with the usual abatement for ton lots.

Drop Shot, sizes smaller than B, per 25-lb. bag	\$1.35
B and larger sizes	1.60
Buck Shot	1.60
Chilled Shot	1.60
Dust Shot	2.10

**JAP-A-LAC**

is the hardest, smoothest, most elastic, brilliant and durable varnish on the market for floors and interior woodwork. Made in the following colors, which will stain and varnish by one application :  
Oak, Walnut, Mahogany, Cherry or Orange, Malachite Green, Ox Blood Red, Brilliant Black, Dead Black, Natural or Light, Ivory or White, Yellow, Spruce, Drab.

Architects should specify it. Painters should use it. Dealers should insist on it. Our Magazine advertising is creating a demand for JAP-A-LAC. Dealers should write for our money making proposition.

THE  
**CLIDDEN  
VARNISH CO.,**  
Cleveland,  
Ohio.

**Linseed Oil:** The Dean Linseed Oil Co., under date of January 2d, quote as follows:

In lots of less than 5 barrels.....57 cents per gallon.  
In lots of 5 barrels or more.....56 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.  
Calcutta Oil, 85 cents per gallon.

#### THE PHILADELPHIA TRADE.

The new year opens with most encouraging prospects. Manufacturers are generally busy—many of them report orders for several months in advance—while goods which are near the raw material are most heavily in demand.

Labor is generally employed at good wages, and we are informed the recent reductions in wages mentioned in the papers have been almost entirely in the furnace district, and do not affect general iron workers.

Stocks of manufactured goods throughout the country seem low, as shown by mail orders, which have kept up very nicely through the holiday season.

Of course, it is too early to talk about business, as stock-taking and the annual overhauling of salesmen's samples and prices are occupying almost the entire attention of jobbers. In a few days salesmen will once more be on the road, and we confidently hope for a good Spring trade.

The new year opens without any important changes in prices, and, while there is disposition in some quarters to advance prices, the general feeling seems to be a conservative course is advisable. Nevertheless, some goods now are so near, if not below, the cost of manufacture that prices on these lines must be readjusted in the near future.

BIDDLE HARDWARE CO.

#### THE BALTIMORE TRADE.

Business opens the first of the year with a rush which we hope will continue throughout the entire Spring season, and it is especially pleasant during these frosty mornings to warm up through the exercise necessary in dispatching a big bunch of orders. Our salesmen have gotten out early and are doing well. Collections are very good and whilst a few merchants will get off their financial balance or go skating into bankruptcy about this time of the year we fortunately can report for this section but few failures, and they are principally small.

Last year was, to the writer, one of the most trying he has ever experienced, as during the first six months it was closing out a business of about 50 years, standing in its entirety, and then without a day's intermission starting with another partner, new business at same stand and under same style firm. The sudden death, one year ago last Christmas night, of the senior member of the firm, who died intestate, leaving minor children, occasioned the change.

Our sales during the six months ending December 31, 1900, were nearly \$50,000, which is sufficiently encouraging to spur us on to deeds of greater valor, and notwithstanding our competitors are after us we'll give them a chase for the good plums.

II. W. WEBB & SONS.

#### THE PITTSBURGH TRADE.

"Happy New Century" is the greeting this year, and in the business world it bids fair to be fulfilled. Conditions are certainly favorable for good business at present, and while, of course, we must expect bad years to come along with their accustomed regularity, such progress is made in the good years as to carry us forward with tremendous strides. The export of our steel products has reached such limits that it will take no backward step, and this, added to our excellent home market, makes up a demand large enough for even the great capacity of our modern mills.

Inventory over, the figuring has to be done, and while this is in progress traveling men are being posted for another year's campaign, and general preparations made for Spring business. Weather conditions are favorable and collections good.

LOGAN-GREGG HARDWARE Co.

#### THE DAVENPORT TRADE.

The dealers who try to manage their business along the lines that were successful twenty or even ten years ago find they are rowing against the current. Trade conditions are rapidly changing. The people have ideas of their own as to how and where to buy their goods, and no amount of talk or argument can keep the consumer from buying quinine in a blacksmith shop, or a piece of dress goods in a tin and toy store. The howl of the "regular" dealer will not avail against the succotash shops any more than the yell of the "regular" doctor prevents patients from employing specialists. Quackery in medicines has forced many of the regularly educated doctors into specialty practice. A person with some disease of the eye now employs an oculist as readily as a person with the toothachs visits a dentist. So in trade, the much ridiculed and hence advertised free ten-cent stores have developed into mammoth department stores and catalogue houses. Who for one moment thinks that the specialist does not get more pay for less work than the regular old-fashioned physician, and who for one moment ever dreams that the storekeepers who have adopted the new methods of trade do not obtain a larger profit than the regular old-fashioned dignified merchant!

We must meet the conditions as they are and give up the idea of trying to change conditions to suit our own ideas. It is said that Barnum, during his experience in the show business, learned that the people enjoyed being humbugged, but it has taken the "regular" dealer a long time to learn it in trade. The few who first realized this, in disposing of nutmeg graters, calico and molasses, have made colossal fortunes, while the other fellows are still grinding in the old treadmill of "regular" notions of trade. When will we learn that this is a world of changes, that methods and practices of yesterday will not do to-day, and those of to-day will be passed to-morrow! If a person desires to send a dollar a thousand miles away from home for a fifty-cent pocket knife, how are you going to prevent it? The only way to secure that person's patronage is for some one fifteen hundred miles away to send a highly-colored catalogue and charge for the same article a dollar and a quarter. Uncle Sam charges no more for carrying merchandise three thousand miles than he does for carrying it three blocks. The regular trade will continue to handle staple profitless goods and ship them by freight to nearby customers, but the novelties and Dutchman's one per cent. profit-paying articles will continue to be sold and transported to distant points by our generous Uncle Sam.

SICKELS, PRESTON & NUTTING Co.

#### THE CHICAGO TRADE.

We are being kept full of orders. Holiday goods have been sold in abundance, an indication that the average people had a larger surplus to expend in this direction than has probably been the case for some time.

There is little change in the market, and the outlook is that prevailing prices will remain firm, although we do not anticipate advances of any great consequence in the near

future. The recent decline on screws, while rather severe, was not altogether unexpected, on account of the general cutting of prices indulged in by many of the jobbers and the fact that factory rates, considering ruling values on wire, were in line for a lower price. The present figures will no doubt remain intact for some time and insure a greater uniformity of prices than has been the case for the past few months. The outlook for our Spring business was never more promising, and we are now preparing for a large increase over former years.

WELLS & NELLEGAR CO.

#### THE SAGINAW TRADE.

The Hardware business in this section is as good as usual. Most of the small dealers are busy taking inventories. We are having cold weather, with ice thick enough to be harvested.

There are more coal mines being discovered here, and within the last month there has been organized a sugar beet factory, with capital of \$500,000, all paid in, and a plate glass factory, with capital of \$350,000, paid in. The railroads are doing fairly well, and could do more, if cars were more plentiful.

MORLEY BROTHEPS.

#### THE SAN FRANCISCO TRADE.

Night before last in this city at twelve o'clock the Hardware stores were ablaze to their fullest illuminating capacity, thus being in line with all other business houses in lending an effect of brilliancy to the passing of the nineteenth century and the birth of the twentieth. And now, the second day of the New Year, the Hardware trade, with cheerful anticipation, is busy stock-taking, each concern reporting having throughout the last fortnight enjoyed the best business swim within memory. Also the export trade of the San Francisco port was never better, and the demand for the northern mining regions and the Orient keeps the ships and shippers busy. The domestic distributive trade, too, is active, and the noteworthy develop-

ment of the oil fields in different parts of the State is exercising an indisputable influence on general business. Money continues plentiful at easy rates of interest and collections are reported exceptionally good. No complaints are heard from any quarter of merchandise trade, and our local failures are few and generally unimportant. We thus begin the new year and century in exceptionally good shape, and the weather thus far this season has been such that there is a general feeling of confidence in the results of the year 1901.

The third annual meeting of the Pacific Retail Hardware Association, a trade organization of Northern California, will convene at Woodland, January 16, and remain in session for two days. Secretary Boyd, of that association, has notified the San Francisco and Oakland Association that arrangements to attend the Woodland meeting have been made with the Southern Pacific Company for a 11-3 round trip railroad rate, and very cordially invites a delegation from the association of the two bay cities to attend the January 16th meeting, adding this observation: "Some of our members have

spoken of a connecting link between the two associations, and it might be advisable for your delegation to come prepared to discuss the advisability of such an arrangement."

The San Francisco and Oakland Retail Hardware Dealers' Association will hold a meeting January 11th, when Secretary Boyd's "connecting link" proposition will receive official attention.

TRADE PRESS ASSOCIATION.

## The London Can Exchange.

There are many curious societies in London about which the outside world knows nothing. Of such is the Milk Can Exchange.

In the basement of one of the huge, grim blocks of buildings in Chancery Lane is a snug little office with nothing unusual in its appearance. But leading from it is a larger room, dark and a trifle musty, and filled from wall to wall and almost from floor to ceiling with milk cans—old cans and new cans, giant cans that would hold gallons, and others so small that their capacity would scarcely suffice to quench the thirst of a baby. This is the headquarters of the Can Exchange.

J. Henry Stacey, the secretary, explained to a *Daily Mail* representative the object of the society, and incidentally related some interesting experiences which have befallen him as a hunter of lost and stolen cans. These belong to the milk dealers of London, who every year lose or are robbed of close upon 12,000 cans and 500 churns. December is the can thief's harvest time. During that month he deprives the milk dealer of over 2000 vessels of different kinds. November comes next with about 1800 cans, and May is third on the list with 1100, although, strange to say, in the previous month the can snatcher almost entirely ceases from troubling.

It is the society's duty to restore these thousands of cans to those of its members who lose them. It employs inspectors, or detectives, who operate under the personal direction of the secretary. Suppose that a report arrives that a number of cans have mysteriously disappeared in the Clapham Road district and that the local police have failed—as they nearly always do—to track down the thieves. Then the society sends its own inspectors to shadow the milkmen on their rounds, and if they suspect that one of the carriers is in the possession of cans to which he is not entitled they stop him and examine his barrow. The results of this system are admirable. Last year no fewer than 11,792 cans and 495 churns, all lost, stolen or strayed, were collected by the society. The question naturally presents itself, Of what use are these misappropriated cans to the milkman? One purpose to which he puts them is this: When he leaves his employer's dairy with his usual allowance of milk he makes for the nearest news or other places furnished with a tap. Having secretly added a considerable amount of water to the milk he fills the

stolen cans with the adulterated stuff and delivers it to his own customers. The danger his employer is unconsciously running will be apparent, for the sanitary inspector may at any moment come across the carrier and take a specimen of the "milk" for analysis. A prosecution and a fine would inevitably follow, but the dairyman and not his dishonest servant would suffer.

Then, again, an unscrupulous milkman on his rounds may run short of cans. He finds on the doorstep or on the area railings the cans of an opposition firm. Nothing is easier than to appropriate these to his own use. Many such cases of "slimness" have come to the society's notice. Thousands of these cans are never returned to their owners. One day an officer of the Exchange espied a milkman meandering toward his own home, bending under the weight of a sack which he was carrying on his shoulders. The sack was found to contain nothing but cans belonging to another firm in the neighborhood.

The most extraordinary case the society has dealt with lately was one in which an East End Jew was the offender. On his premises between thirty and forty missing churns were found. The Israelite's bed was built on hidden churns. The washing basin rested on two churns—artistically draped; three others, decorated in a similar way, served as a dressing table! The furniture was all churns.

In another case a Camdentown lodger left forty-seven stolen churns in liquidation of a long standing account! It is the duty of the Exchange to ferret out these leakages of milk cans and churns, and while restoring the missing articles to their owners to prosecute the offenders. As a rule, milk deliverers are an honest class of men, but there are black sheep among them. As illustrating the value of the work done by the Exchange it may be added that last year it recovered property worth over £4000.

### The Credit Man's Duties.

Unlimited opportunities for tact and diplomacy are afforded to the credit man of any large manufacturing or wholesale house.

One of the most difficult things which a credit man has to do is to gracefully turn down a concern starting in business and wishing to secure a line of credit. A man who is to open a new shoe store comes into our place of business and buys a bill of goods. When he is referred to me I endeavor to obtain from him a full and complete statement of his affairs, and at the same time to give him thoroughly courteous treatment. Before the goods are put up it is frequently necessary, in case of a new customer, to require of him that we shall receive the whole or a portion of the purchase money before the goods are shipped. If, after I have looked up a party and his account is not, in my opinion, a desirable one,

I have to tell him so, if possible, without offending him. I find, after long experience, that it is best to write a matter like that rather than to say it. Accordingly when I have a duty of that kind to perform I usually tell the dealer that I shall communicate my decision to him in the course of a day or two. The letter which I write is quite brief and to the point, and, of course, ends the matter so far as we are concerned.

While there are many men looking for credit who are not entitled to it, yet there are many others who will in time prove desirable customers, provided they are started in the right way. They have perhaps a small capital, but are honest in their intentions. Such dealers we like to have on our books, provided we do not have to take too great a risk at the beginning.

I find that intuition goes a great way in extending credit.

Baxter Schenkelberger & Co,

350 Congress street, Boston

Sometimes I am strongly prejudiced at once against a perfect stranger who comes to me to secure a line of credit. The man may be of good appearance, and his request, apparently, worthy of consideration, yet I feel intuitively that I do not wish to do business with him. I find that in such cases it is better to decline his request, although sometimes the men whom I have turned down in this way might have subsequently proved good customers. Yet there are many other instances where my intuition has proven correct, and the man himself an incompetent or swindler. Even if he proves to be successful, however, I still believe in following my intuition because I should worry enough over extending a line of credit in this way to more than counterbalance any profits which might be made on the transaction.

Of course credit men are not infallible in their judgment, and are liable to make mistakes at any time. I claim, however, that with a certain faculty which is born in a man for work of this kind, and with the experience which one acquires in the course of a few years' work in the harness, there should not be many serious mistakes made in the extending of credits. The brightest and most experienced credit men, however, are frequently taken in, and it requires eternal vigilance to guard against making losses. To sift

the good from the bad, the true from the false, and to play a most important part in the success or non-success of the concern is, in a nutshell, the credit man's position. There is no doubt that this position is a most delicate and difficult one to fill.

FREDERIC G. KIMBALL.

First Beggar—Why didn't you tackle that lady? She might have given you something.

Second Beggar—I let her go because I understand my business better than you. I never ask a woman for anything when she is alone; but when two women are together you can get money from both, because each one is afraid the other will think her stingy if she refuses. This profession has to be studied just like any other, if you expect to make a success of it, see!—*Harlem Life*.

"What kind of music," asked the leader of the mandolin orchestra, "do you think your wife will want?"

"Well," said the man who had called. "It's a sewing society of some kind that's to meet at the house. I guess any kind of ragtime music would be appropriate."—*Chicago Tribune*.

# He couldn't tell them apart.

*One was a hand cut file.*

*The other was an unmarked ARCADE.*

*He was the Superintendent of a big shop—a first rate mechanic, but had used hand-cut files for thirty years and never found anything to equal them. Didn't believe ARCADES could approach them in results, notwithstanding the difference in cost. Finally our man interested him in this proposition—we were to send him a gross of ARCADE Files, Weed's increment cut, unmarked, with the understanding that they were to be mixed up with the hand-cut files, used for a month, and if the two makes could then be distinguished, either in appearance or from results, we were to charge nothing for our files. This concern is still buying ARCADES, and we are willing to furnish files to anybody who wants them on the same terms.*

*ARCADE Files are the acknowledged standard by the best mechanics everywhere, and we guarantee them equal to the best English HAND-CUT Files.*

## HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Hardware Stores.

Aberdeen, S. D.—Culver Bros.  
 Andale, Kan.—Gerhart May.  
 Columbia, S. C.—H. A. Webb.  
 Des Moines, Ia.—Des Moines Iron Co.,  
 117 W. Court Avenue.  
 Kaufman, Tex.—Malone & Higgins.  
 Knoxville, Tenn.—Wm. Schuler, 210  
 Gay Street.  
 Lewiston, Me.—J. H. Stetson Co.  
 Lincoln, Neb.—American Range &  
 Hardware Co.  
 Richmond, Vt.—J. O. Olmstead.  
 Riverside, Cal.—Franzen Bros.  
 Roff, Ind. Ter.—Van Winkle Hardware  
 & Implement Co.  
 Sadorus, Ill.—N. R. Hixon.  
 Stockton, N. J.—Richard Chambers.  
 Watertown, N. Y.—Pool & Sill, 3 Bur-  
 dick Bldg.

### Changes and Improvements.

Aiken, S. C.—The firm of Powell Bros.  
 has been succeeded by the Powell Hard-  
 ware Co.  
 Beattie, Kan.—The firm of Bell Bros.,  
 Hardware, has changed hands. Cole &  
 Helverine have purchased the stock of  
 goods.  
 Denison, Tex.—The Hall-Leeper Hard-  
 ware Co. have just finished a new office in  
 the centre of their store.  
 Des Moines, Ia.—L. C. Kurtz, who re-  
 cently bought the building at 312 West  
 Walnut Street, will remodel it during the  
 coming season and as soon as his ground  
 lease at 308 West Walnut street, where  
 his Hardware store is now located, expires  
 will remove into the new quarters. Part of  
 the building purchased is two stories high  
 and part of it is a three-story structure.  
 The entire building will be occupied by  
 Mr. Kurtz.  
 Greenville, Tenn.—The extensive im-  
 provements on the brick store room on  
 Main street recently purchased from the  
 Allen heirs by the John M. Jones Hard-  
 ware Co., are about completed, and the  
 firm hope to occupy it soon.  
 Green Valley, Ill.—G. A. Firth is pre-  
 paring to build an addition to his Hardware  
 store.

Houghton, Mich.—The Hardware firm of  
 I. E. Swift & Co. will shortly enlarge its  
 store in the Shelden-Calverley Building by  
 occupying the room just west of the pres-  
 ent quarters.

Kaufman, Texas—The firm of A. E. Car-  
 lisle & Co. have sold out to Carlisle, Beaty  
 & Co. This is one of the largest Hardware  
 companies in Kaufman.

Lansing, Mich.—R. D. Hensel has sold  
 his Hardware stock to J. Stahl & Son, who  
 will consolidate it with their business.

Larned, Kan.—A. A. Doerr has pur-  
 chased the south half of the Wilson block

and will occupy the same with his large  
 Hardware and implement business in Jan-  
 uary.

Minneota, Minn.—W. C. Gowin, who  
 has been in the Hardware business at San-  
 born, has disposed of his interests there  
 and moved to Minneota and will assist  
 W. B. Gislason in taking care of the Cor-  
 ner Hardware.

Morning Sun, Ia.—J. F. Bonner has sold  
 his Hardware store to Mr. McCullough, of  
 Wyman, Ia.

Mt. Vernon, Tex.—Mrs. C. N. Koonce,  
 Hardware merchant, will go out of business  
 and has sold her stock to Dutton, League  
 & Majors.

New Windsor, Ill.—P. E. Nichols has  
 bought the Hardware business of Peterson  
 & Co.

Plymouth, N. Y.—Walter Butts and  
 Arthur S. Bartlett, who have run a gro-  
 cery, dry goods and Hardware business  
 here for the past year, have sold out to  
 Ransom Butts, of whom they purchased  
 the business.

Reading, Pa.—Henry F. Hertzog and  
 Elmer S. Heilman, proprietors of the Hard-  
 ware store at the northwest corner of Sixth  
 and Bingham Streets, have dissolved part-  
 nership by mutual consent. Mr. Hertzog  
 is now the sole proprietor and will con-  
 tinue the business.

Reidsville, N. C.—P. Houston Neal, of  
 Danville, Pa., has purchased the Hardware  
 business of W. M. Parker & Co., and  
 taken charge of the establishment.

Sioux Falls, S. D.—E. W. Hackman has  
 purchased the hardware business of C. H.  
 Vincent.

Thomasboro, Ill.—James Leonard has  
 sold his interest in the Hardware store to  
 Henry Fiedler.

Thomas, Okla.—Will Tracy has sold his  
 interest in the Hardware store to W. S.  
 Shepard.

Tivoli, N. Y.—Curtis and Vandebogart  
 are closing out their hardware store.

Toledo, O.—Work on the plans for the  
 new Hardware building for Bostwick,  
 Braun & Co. is progressing rapidly. It  
 will be located on Huron Street, close to  
 the Clover Leaf road, and a switch will  
 be run into the building.

Tully, N. Y.—James T. Irwin has bought  
 a one-half interest in the Hardware busi-  
 ness of F. C. Hayford.

Waukesha, Wis.—C. A. Haertel has dis-  
 posed of his hardware business.

Woodside, N. Y.—John Schreiner,  
 who has conducted a Hardware business  
 corner of Townsend Street and Jackson  
 Avenue, has sold his property and business  
 to John W. Petry, a hardware dealer of  
 Long Island City, and it is the expecta-  
 tion that the new owner will in the near  
 future open a first class store in the same  
 place.

### Business Embarrassments.

Buffalo, N. Y.—John D. Meister, whole-  
 sale Hardware agent, has filed a voluntary  
 petition in bankruptcy. His liabilities are  
 given as \$37,724.85, with \$13,044 as securi-  
 ties. His unsecured liabilities are set at  
 \$18,715.34. His assets are scheduled at  
 \$2,591.67.

Union Springs, Ala.—The Hardware  
 store of M. W. Johnston has been closed  
 up by United States officers, in the ab-  
 sence of Mr. Johnston, who immediately  
 returned. C. E. Gholson has qualified as  
 receiver.

### Fires in Hardware Stores.

Borup, Minn.—Anderson & Pepple.  
 Damariscotta Mills, Me.—Ira J. Oliver.  
 Dwight, Kan.—Swenson's Hardware  
 store.

Hanover, Ont.—B. F. Ahrens.  
 Meadville, Pa.—E. S. Mounin.  
 Stark, Kan.—Geo. B. Singleton.  
 Taftville, Conn.—Amede Pion. Loss,  
 \$2,000; insurance, \$1,600.

Titusville, Pa.—A midnight blaze has  
 caused a loss on the stock of S. S. Bryan,  
 Hardware merchant, amounting to \$3,000,  
 fully covered by insurance.

Winnipeg, Man.—Fire visited the Hard-  
 ware store of Robert Wyatt on Main Street,  
 and did damage approximately estimated  
 at \$3,000.

### Burglaries in Hardware Stores.

Hymera, Ind.—Cummins' Hardware  
 store.

Pueblo, Col.—J. M. Killin & Co., \$250.  
 Richmond, Kan.—Putnam's Hardware  
 store.

West Union, W. Va.—Kane & Keyser,  
 revolvers and cutlery.

Is unquestionably the best machine of its kind ever  
 offered to the public. It will cut without crushing  
 raw or cooked meat, sea food, fruit, vegetables, etc.,  
 into coarse or fine pieces, according to the cutter  
 used, of which three accompany each chopper.

It has eliminated all the objectionable features of  
 other choppers and has added several improvements  
 that are distinctly its own. It is always in order and  
 the knives require no sharpening.

An additional and exclusive feature of the Star  
 Food Chopper is a plate hinged at the top of the  
 hopper which, when pressed on the food to be cut,  
 forces it upon the feed screw, thus preventing the  
 possibility of injuring or soiling the fingers, which is  
 liable to occur in using other choppers.

For sale by all dealers.

CHAS. D. BROWN, Sole Agent,  
 160 Duane Street, New York City.

**Recent Victories!**

## HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Etc.

Augusta, Me.—Porter Sash Lock Co. of Kittery has been incorporated to manufacture and deal in patented sash fasteners or locks; \$10,000 capital stock. President, John M. Porter, Boston; treasurer, Edward S. Bailey, Reading, Mass.

Beaver Falls, Pa.—John G. Dixon and others of this city are forming a company with \$35,000 capital to engage in the manufacture by a new process of a white metal for use in table cutlery, harness ornaments, etc. The metal is intended to displace silver and, it is said, can be made very cheaply.

Buffalo, N. Y.—Jewett & Co. has been incorporated to manufacture stoves and ranges; capital, \$150,000. Directors—F. D. Locke, N. H. Jewett and F. H. Williams, of Buffalo.

Chicago, Ill.—American Tinware Mfg. Co. has been incorporated. Capital stock, \$5000; incorporators, Myer S. Emrich, Richard G. Marriott and Eugene L. Gilmore.

Cincinnati, O.—The United States Aluminum and Metal Mfg. Co. has been organized in Cincinnati for the purpose of manufacturing aluminum castings from acme aluminum, a special alloy of the metal. The company is just completing its plant at Hamilton and Vandalia avenues and Blue Rock street, Cumminsville, and will be ready for business in a short time. The manager of the plant is R. C. Sawyer and the superintendent Emerson Davis, who were formerly with the Indianapolis Brass Co.

Corry, Pa.—The Penn Shovel Co. has been incorporated; capital, \$50,000.

Crawfordsville, Ind.—The Crawfordsville Wire Nail Co. has been incorporated with a capital stock of \$50,000. Directors—Irwin A. Detchon, Clifford D. Vous, William P. Herron, Humphrey H. Ristine, Peter C. Somerville, Harry E. Greene and Benjamin Crane.

Des Moines, Ia.—J. M. Kelsey and C. A. Thompson, operating under the style of the Iowa Can Co., with headquarters on East First street, have concluded the purchase of about \$2000 of special machinery from the Manning Signal Lamp Co. This machinery they will use in the manufacture of tin cans for canning factory purposes, lard pails, milk tins, light tinware, separator covers, etc., largely increasing the capacity of their plant.

Glen Rock, Pa.—The State Department has issued a charter to the American Wire Cloth Co.. Capitalized at \$1000, and is mostly in the hands of local capitalists.

Meriden, Conn.—Charles A. Runge Mfg. Co. has been incorporated to manufacture Hardware. Capital \$5000. Incorporators:

C. A. Runge, J. Whitworth, C. J. Danaher.

Meriden, Conn.—The firm of Porter & Frank, organized about fifteen years ago in Meriden, as dealers in metal, have entered the industrial field as manufacturers. They have purchased and propose to manufacture saddlery Hardware in connection with other goods.

Indianapolis, Ind.—Modern Tool Co. has been incorporated to manufacture all kinds of tools. Capital, \$40,000. Incorporators: B. Wallace, F. Gallagher, G. E. Shafer, all of Indianapolis.

Muskegon, Mich. — The Automatic Wringer Co. has been incorporated with a capital stock of \$40,000.

Norfolk, Va.—Judge Hanckel has chartered the R. W. Whitehurst Co., for the manufacture of agricultural implements, machinery, &c. Capital from \$40,000 to \$100,000. Officers: R. W. Whitehurst, president and treasurer; Joseph B. Sanford, of Baltimore, vice-president, and E. K. Bonney, secretary. These, with George Gould and W. H. H. Trice, compose the board of directors.

Northfield, Conn.—The new corporation which has begun operations in Hopkinson's shop has revised its articles of incorporation so far as its name is concerned, and will do business as the Crescent Cutlery Co.

Worcester, Mass.—The business of Lord, Witter & Park, file manufacturers, 3 Foundry Street, has been incorporated under the laws of New Hampshire as the Lord Mfg. Co., with a capital stock of \$100,000. The business is the manufacture of a patent file.

### Changes and Improvements.

Cleveland, O. — Cleveland Pneumatic Tool Co. have increased their capital stock from \$25,000 to \$75,000.

East Chicago, Ind.—The Continental Chain Co. have erected large works for the manufacture of agricultural, wagon, railroad, marine and Hardware chains.

Indianapolis, Ind.—The Kokomo Wire Nail Co. has increased its capital stock from \$100,000 to \$200,000.

Milwaukee, Wis.—The Milwaukee Forge and Iron Co. have broken ground for the erection of their new plant. The company will manufacture large forgings for marine and other purposes.

Oneida, N. Y.—The Oneida Steel Pulley Co. has commenced the removal of the machinery of the Fulton pulley works to this village, and it is now being installed in the local plant in Cedar street. The local concern has just completed the erection of a large lumber kiln which has a capacity of 20,000 feet. It is expected that operations will be commenced by January 1, 1901.

Platts Mills, Conn.—The machinery used for the manufacturing of eyelets and tacks has been moved from the button shop to the factory across the street.

Rock Falls, Ill.—Cobb & Drew, of Plymouth, Mass., who operate a rivet factory at Rock Falls, Ill., are to build a wire-drawing plant in this place.

Wheeling, W. Va.—The Wheeling Iron and Steel Co. has begun the razing of the old Benwood Nail Works, one of the oldest manufacturing plants in the State, to make room for their new \$500,000 tube plant.

Winooski, Vt.—The Porter Screen Mfg. Co. has practically decided to rebuild the plant on the site of the one recently burned. It is the purpose of the company to make the new manufactory much larger than the one destroyed by fire, as the mill was taxed to the utmost capacity to fill the orders before.

Youngstown, O.—The Mahoning Foundry and Machine Co. are to build a large foundry and new machine shops.

### Recent Fires.

Bridgeport, Conn.—The E. S. Hotchkiss Hardware Co.'s building has been destroyed by fire, entailing a loss of \$80,000.

Carnegie, Pa.—A disastrous fire of unknown origin occurred at Carnegie recently, resulting in the total destruction of the extensive plow works of the A. T. Stewart Co. The loss is estimated at about \$40,000.

### Recent Embarrassments.

Anderson, Ind.—F. A. Walker, of this city, has been appointed receiver for the Northwestern Scraper Co., of Anderson. The company has been in operation for the past three years. The chief creditor is the Citizens' Bank, of Anderson. The liabilities are \$40,000, \$27,000 being held secured by the Citizens' Bank. The assets are estimated at \$50,000.

### Miscellaneous.

New Britain, Conn.—The directors of the North & Judd Mfg. Co have elected J. H. Whittemore of Naugatuck, formerly a director in the company, as president to succeed the late Charles S. Landers. Charles F. Smith was elected a director, making up the full board. The officers and directors are now as follows: President, J. H. Whittemore; vice-president, treasurer and general manager, H. C. Noble; secretary, E. M. Wightman; directors, J. H. Whittemore, H. C. Noble, G. M. Landers, C. F. Smith, William A. Griffin, A. J. Sloper and W. P. Champney.

Waynesboro, Pa.—The annual meeting for the election of nine directors of the Landis Tool Co. was held recently at the office of the company. These directors were elected: Dr. A. H. Strickler, Daniel Hoover, S. B. Rinehart, T. B. Smith, W. T. Omwake, F. Forthman, Wm. H. Snyder, Ezra Frick and Jay F. Shank. All were members of the board last year, except Mr. Shank, who succeeds Reuben Shover, deceased.

# You Can Sell It!

SARGENT'S GEM FOOD CHOPPER is an article for  
kitchen use, intended to take the place of chopping bowl  
and knife. It is carefully made and nicely tinned; self-  
cleaning and self-sharpening, with steel cutters that  
cannot break.

Chops all kinds of meat, both raw and cooked, fruits,  
vegetables and other articles of food. Chops quickly, quietly and easily;  
is easy to take apart, easy to put together, easy to adjust.

## SHOT GUNS! DO YOU HANDLE THEM?

Look into the merits of the **TOMLINSON  
CLEANER**, now in its 10th year. An absolute  
necessity to every owner of a shot gun. Has had a large sale both in this country and  
abroad. Four square inches of brass wire  
gauze in contact with the barrel, and although  
it cuts all foreign matter free, is too soft to in-  
jure the barrel metal. Can be handled with a  
good profit. We help you with liberal adver-  
tising. Made in all gauges from 8 to 20—fit any  
rod. Send for booklet of testimonials. "Used  
everywhere in the civilized world."

## BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Agencies, Etc.

Binghamton, N. Y.—There is to be a new cycle and sporting goods store in Binghamton. W. L. Montrose & Co. will be the owners, and it will be opened early in January at 172 Washington Street.

Camden, N. J.—A. J. Henry, of the firm of A. J. Henry & Co., of this village, dealers in cash registers and supplies and manufacturers of cash register paper, has bought the bicycle works on Main Street of John Schott, including the building, the machinery and fixtures.

Ft. Wayne, Ind.—The Meyer Cycle Co. has been incorporated with \$5000 capital. Directors, W. M. Meyer, C. F. Meyer and C. A. Meyer.

Indianapolis, Ind.—The C. G. Fisher Co. has been incorporated to deal in bicycles. Capital, \$15,000. Incorporators: C. G. Fisher, C. Koehring, G. Koehring, all of Indianapolis.

Los Angeles, Cal.—James Morris, Spring Street, between Sixth and Seventh. Marietta, O.—Knox & Henry.

Meriden, Conn.—A new industry is to be started in Meriden shortly for the manufacture of saddlery, Hardware, bells, dog collars, leather belts and in fact practically the same line of goods as was made by the Chapman Mfg. Co., now in the hands of a receiver. William E. Pepper, who was treasurer and general manager of the Chapman Mfg. Co. until a few weeks before the concern suspended business, together with Port & Frank, the Cedar Street junk dealers, are the men interested in this new concern. They have purchased of George W. Miller his factory at the corner of Mechanic and North George Streets, which consists of a roomy wooden building nearly 100 feet deep. Besides the factory and machinery a house just south of the factory was included in the deeds.

Norwich, Conn.—The Thames Chain & Stamping Co. has filed in the State Secretary's office a notice of change of business to conduct a general bicycle sundry business.

Oneida, N. Y.—George L. Dutton, of the firm of Munroe, Newkirk & Dutton, has formed a copartnership with H. B. Van Horn to engage in the bicycle business the coming season under the firm name of Van Horn & Dutton. Mr. Dutton is still a member of the first mentioned firm.

Ottawa, Ill.—Armstrong & Mitchell, repairing.

South Glens Falls, N. Y.—Howard Sherman is erecting a building which he will use for a bicycle repair shop.

Syracuse, N. Y.—The Brennan Mfg. Co. and the I. A. Weston Co. have taken the contract to manufacture for W. D. Andrews a new bicycle to be known as "The

Andrews." The wheel will be similar in style and color to the Frontenac.

Wolcott, N. Y.—Westfall & Sabin.

### Changes and Improvements.

Antioch, Ill.—Kelly & Garrett succeed William Kelly.

Bellevue, O.—H. W. Hillier has removed to Lorain.

Bowling Green, Ky.—C. S. Atkinson & Co. have bought out James Smith.

Boyden, Ia.—The Boyden Hardware Co. have sold out.

Clarksburg, W. Va.—W. Harrison has sold out.

Dakota, Neb.—Grieble & Brayhill have sold out.

Danbury, Conn.—The Hull Bros. Co. succeed Hull & Hoyt Co.

Davis, I. T.—Jarbo, Woolley & Davis have sold out.

East Pepperell, Mass.—Kemp & Dunlap have dissolved partnership.

Faribault, Minn.—Gus Thomas succeeds Robert Brown and C. Weber.

Faribault, Minn.—F. D. Orne succeeds Thomas & Orne.

Glastonbury, Conn.—Harry E. Welles is erecting an addition to his store.

Greenfield, Mass.—A. H. Davey has closed for the season.

Hebron, Neb.—E. J. Stewart succeeds E. A. Elder.

Indianapolis, Ind.—Fred Patee has bought the Outing Bicycle Co. and the Munger Bicycle Co., which have been in the hands of a receiver.

Kansas City, Mo.—A new wholesale sporting goods house will move to Kansas City this winter. Louis Erhardt & Co. of Atchison, Kan., have leased the four-story building at 806-808 Walnut Street and will move here about February 1.

Kenosha, Wis.—The Sterling bicycle plant has been sold by the American Bicycle Co. to Thomas B. Jeffery, of Chicago, late of the firm of Gormully & Jeffery. The consideration expressed in the deed is \$65,000. It is stated Mr. Jeffery will manufacture automobiles in the near future.

Lapeer, Mich.—B. F. Loder will sell out.

Leigh, Neb.—R. H. Goodge succeeds Dunn & Goodge.

Little Sioux, Ia.—H. L. Gilmore succeeds B. L. Jones.

Meriden, Conn.—E. D. Elster, the well-known dealer in bicycles, sporting goods, sewing machines, etc., will move during January from his present quarters, 133 Hanover Street, to the Penfield Building, nearly opposite. He will occupy the entire first floor of the large building.

Northville, Mich.—The big three-story addition to the Dubuar air-gun factory has been completed. Employment has been given to about fifty more people.

Ottawa, Ill.—The Ottawa Cycle Co. have certified that it has been dissolved.

Pittsville, Wis.—L. L. Dodd has discontinued business.

Plymouth, N. H.—J. T. Dole succeeds J. M. Kendall.

Portsmouth, N. H.—W. W. McIntire has removed to High Street.

Ravenna, Mich.—A. E. Burden succeeds E. E. Bartholomew.

Seattle, Wash.—H. Siegrist & Co. have sold out.

Smith Center, Kan.—E. S. Berger succeeds Wentworth & Co.

Smethport, Pa.—John C. Hamlin succeeds Hamlin & Redfield.

Tillamook, Ore.—Harley Morton succeeds W. V. Morton.

Tipton, Ind.—Thatcher & Kirtley have discontinued business.

Victoria, B. C.—Onions & Pimley have dissolved partnership.

Virginia, Minn.—A. Hankinson & Co. succeed A. Hankinson.

Waitsburg, Wash.—Macomber & McCann have sold out.

Wilmington, N. C.—A. H. Yopp has purchased the business of H. H. Helms, 209 Market Street.

Youngstown, O.—The Andrews Wheel Co. have discontinued business.

### Recent Fires.

Amarillo, Tex.—R. H. McAlpine.

Bridgeport, Conn.—Premier Cycle Co.

Buffalo, N. Y.—The plant of the McKaig-Dorntge Drop Forging Co., at Ebenezer Station, has been destroyed by fire. The company have been engaged in the manufacture of bicycle supplies.

Chicago, Ill.—The Fowler Bicycle and Carriage Works in Carpenter Street have been destroyed by fire. Loss on building and contents amounts to \$80,000.

Circleville, O.—Shell's bicycle store.

May's Landing, N. J.—J. E. Stillies; insured.

Oneida, N. Y.—J. Van Horn, Madison Street; slight damage.

San Francisco, Cal.—Fire in Ladd's gun store at 421 Kearney Street has completely destroyed the stock, valued at about \$30,000. Ladd's insurance was \$5000. Loss to building, \$10,000.

### Recent Embarrassments.

Chicago, Ill.—On petition of several creditors, Judge Kohlsaat in the United States District Court, has appointed the Chicago Title and Trust Co. receiver of the assets of the Otis Bicycle Co., of 114 Dearborn Street. This action followed the filing of a petition to have the firm declared bankrupt.

West Haven, Conn.—F. A. Norton & Co., dealers in bicycles and hardware at 187 Campbell Avenue, are in financial straits. Inability to meet the claims of creditors has caused attachment to be made, and the store in West Haven has been placed in charge of a sheriff's keeper. Norton & Co. have been unable to settle claims, and steps have been taken by the firm to go into bankruptcy. The firm has debts of about \$3500 and assets of about \$1000.

# OF COURSE, YOU TAKE A MAGAZINE,

Probably one in the subjoined list. If it is not, let us know, and we'll put it there. The first column shows the price you would have to pay for the magazine alone. The second column indicates the price at which we will send you "HARDWARE" and the magazine for a year. In many cases you will find the combined price is no more than the single one, and you know you can't afford to do without "HARDWARE." This offer applies to **New 1901 Subscribers only.**

### "HAVE FOUND YOU VERY USEFUL."

Alfred Field & Co., New York. [Cutlery, Guns, etc.]:  
 We can say in all sincerity that we have found you very useful, and we can most cheerfully recommend you to our friends in the trade.

### "RESULTS ARE SO SATISFACTORY."

Capwell Horse Nail Co., Hartford, Conn. [Horse Nails]: We have been liberal advertisers in your journal for years, and the results are so satisfactory that we expect to be much more liberal for many years to come.

## PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

## If it is a Food Chopper Without a Lid, Don't Buy It.

A distinguishing and exclusive feature of the STAR FOOD CHOPPER is a plate hinged at the top of the hopper which, when pressed on the food to be cut, forces it upon the feed screw, thus preventing the possibility of injuring or soiling the fingers, which is liable to occur in using the other choppers.

The STAR is unquestionably the best machine of its kind ever offered to the public. It will cut without crushing raw or cooked meat, sea food, fruit, vegetables, etc., into coarse or fine pieces, according to the cutter used, of which three accompany each chopper.

It has eliminated all the objectionable features of other choppers, and has added several improvements that are distinctly its own. It is always in order, and the knives require no sharpening.

No other chopper has the many merits of the STAR. None is more simple in construction or easier to understand or clean. From start to finish in the small points as well as in the large, the STAR FOOD CHOPPER is the best.

**CHAS. D. BROWN, Agent,**

**160-162 Duane Street, New York City.**

We make a specialty of making to order only, a superior quality of Cast Steel Wire Springs, either for extension or compression.

These Springs are all oil tempered and are made of an extra quality of wire drawn specially for our own use, of the same grade of stock as we use for the Springs that we put in our Spring Scales.

# Mr. Dealer

WE INVITE YOU TO WRITE  
FOR OUR PRINTED MATTER,  
WHICH IS CONFIDENTIAL  
TO THE TRADE

We are putting this advertisement in the leading  
popular magazines to help you sell them.

## Something New

PUT THIS ON YOUR PIPE,

The  
Fowler  
Automatic  
Draft  
Regulator

and you will notice the fol-  
lowing about your furnace,  
stove, or boiler:

Regular Draft at all times.  
No overheating of furnace.  
Less chimney fire danger.  
No burning out of grates.  
No escaping gases in cellar or  
room.  
Perfect ventilation.  
Retention of heat in furnace.  
Perfect combustion of fuel.  
Minimum of clinkers.  
Therefore, greatest economy of  
fuel and care in operation.

Prevention of fires burn-  
ing out on windy nights.  
A great coal and trouble  
saver.

Why? Because "The  
Fowler" Automatic Draft  
Regulator insures absolute  
and perfect regulation of  
draft under all conditions  
in any heating apparatus  
on which it is put.

Can be quickly applied  
even when heater is in use.  
All stove dealers have  
them.

Send your address and  
that of your stove dealer  
on a postal. We are sure  
the reading matter we send  
you will be interesting.

## Gibbs Lawn Rake

The strongest, lightest and finest looking *All Steel* tinned rake on the market.

Its closed head and simple construction (without any extra kinks or bends in either head or teeth) prevents any possibility of the rake not freeing itself from cut grass or leaves.

Note the shape of the teeth—rakes smooth, does better work and won't tear up the sod—one of the special features of the "Gibbs" Rake.

## LAWN RAKES & POST HOLE DIGGERS

The "GIBBS" DIGGER, with single blade, is easy to operate, does the work thoroughly and rapidly, and works successfully in all kinds of soil where others fail.

Selling Agents . . .

**JOHN H. GRAHAM & CO.,** 113 CHAMBERS ST., NEW YORK.

We offer the very best makes of these goods having an established reputation.

**WRITE FOR ILLUSTRATIONS AND PRICES.**

The success of the "COLUMBIA" DIGGER is its simplicity and durable construction, besides it has special patented features which are essential and not found in other makes.

"MODEL" and "OHIO GIRL" Lawn Rakes.

"COLUMBIA."

# THE NEW SHELBY LAMP!!

50 to 100 per cent more useful light.

Send for our pamphlet containing opinions and report of tests made by people you know.

Lamps almost invariably hang downward above the horizontal line of vision.

Objects to be illuminated are beneath.

Light travels in straight lines.

Therefore

THE USEFUL LIGHT is that passing through the end of the lamp.

Think it over.

You want the most light for current consumed.

Patent applied for.

Shelby 10 candle-power lamps consume 40 per cent less current than any make, 16 candle-power

Shelby 10 candle-power lamps give more USEFUL LIGHT than any single, anchored of double filament lamp of 16 candle-power.

Why do you consider efficiency or light wasted?

There is every reason why you should consider efficiency or cost of light utilized

Observe candle-power and efficiency in table below. Which is the most economical lamp or which gives the most light of value, for current consumed?

If reflectors are used, or if you consider reflected light from any source, Shelby lamps give an equal amount to reflect.

	C. P. Horizontal.	C. P. Vertical. (Useful Rays.)	When Efficiency Horizontal is	Efficiency (Useful Rays.)
16 C.P. SHELBY NEW TYPE TIPPED BULB	16 C. P.	14 C. P.	3.5 watts.	4 watts.

## WHY IS THE

PAT. 1898.

## O. K. WASHER THE BEST WASHING MACHINE? BECAUSE

- 1.—It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.
- 2.—The tub is made of Louisiana Red Cypress Lumber.
- 3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap-suds, and cleaning them without rubbing them to pieces.
- 4.—This washer is made by experienced mechanics, and will out-last any other washer on the market.
- 5.—The lid on tub closes tight, no escape of steam.
- 6.—Has a solid wringer box with iron brackets.

Manufactured by H. F. BRAMMER MFG. CO.,  
DAVENPORT, IOWA.

## AGENCY JOSEPH RODGERS & SONS, LTD.

# Agency of the Doran Lighting System

USED FOR INTERIOR AND STREET LIGHTING.

Remember the FIRST in the Field will reap the harvest. Our improved Doran Lamp is the height of perfection in Hydro Carbon lamps. DON'T confound this with the common 100 candle power gasoline lamp. We have something entirely new, pronounced by ALL who have seen it the BEST thing they ever saw.

We are appointing agents now for every town and city in the U. S. It will be profitable to you because we have *positively* the best system of lighting ever invented. It has absolutely *no faults*. Every lamp guaranteed to be perfect and give satisfaction when received. As to our responsibility we refer to any bank or mercantile agency in Chicago

## A Few of its Good Points:

1250 Candle Power.

No fount to fill and break mantles.

No shadow below, light all around.

Turned up and down instantly with a chain.

Simplicity. (It will surprise you.)

Practically Noiseless.

Handsome, looks exactly like the best electric arc lamp.

Last, but not least, the cheapest system on the market, both in first cost and in operation, which is 1-6 of any other light of its power.

EVERY LAMP SOLD SELLS ANOTHER.

ALL  
THE NEWS.

## HARDWARE

HARDWARE  
EXCLUSIVELY.

The name of the only Hardware Trade Journal in America with the motto "All the News; Hardware Exclusively."

It is published on the 10th and 25th of each month, which is as often as any dealer desires to receive a trade paper which he intends to read.

Has tabulated records of all new firms and companies and their various changes in the manufacturing line. All the new stores and business news among the jobbers and retailers of the country; with a Bicycle and Sporting Goods Record covering the changes daily occurring in that important line.

For the benefit of the retail dealer it has a "Prices Current" in every issue covering 32 columns of its pages. A careful consideration given to this department of the paper may save many dollars to its subscribers.

It offers to the advertisers advantages possessed by but few of its competitors in its legitimate field. In addition to foreign circulation, embracing 74 countries besides our own, it reaches within the limit of the United States every State and Territory, where trade and traffic have a foothold.

It has just completed its twentieth volume and is consequently in no experimental stage, waiting to establish a subscription list.

HARDWARE'S rate card is based on actual value. It is a paper for the Hardwareman, possessing the respect of the trade, the confidence of its patrons, the thanks of its subscribers and the courage of its convictions.

... PUBLISHED BY ...

THE HARDWARE PUBLISHING CO.,

275 Broadway, New York.

PRICE \$1.00 PER YEAR FOR 24 ISSUES.

# The Eclipse Cleanable.

(Made in Burlington, Vermont.)

The only removable ice chamber refrigerator that introduces cold dry air at the bottom of provision room, getting it under and between the food and forcing the warm, moisture-laden atmosphere upwards and away to the ice, the great condenser and purifier. This is positive circulation.

It is original and has no imitator or competitor. It is a success, and the dealer who wishes to build up a permanent trade in refrigerators can do it with the *Eclipse Cleanable*.

The people like it. It does good work economically, and is attractive in appearance. Made in plain and ornamental finishes. Every one sold is a standing advertisement.

We want your trade. Let us send you a couple of samples and we will get it. We have the utmost confidence in what we are offering you. There is money in it for you and ourselves. Our interests are mutual.

## A BUILDING'S CROWNING GLORY IS ITS ROOF

### P & B RUBEROID ROOFING

Is a "crowning glory" to any building. And it isn't a fleeting glory either! It is always *there!* Unlike its tar-and-paper or asphaltum imitators, it won't rot out or dry out. Its backbone is the best, strongest felt, specially prepared to resist weather, water, heat, steam, acids, gases, alkalies, etc., and *we can prove* that it will outlast any roofing made. Extremes of temperature will not affect it. It is clean and easily applied, tasteless and odorless. We'd like to send you samples.

# HARDWARE

F. C. Atkins & Co., Indianapolis, Ind., have just issued their 1901 catalogue, having reference to Saws and Saw Tools, under the name of the Sawyer's Hand Book. It is a very interesting publication covering this class of information, to which we hope to pay more attention in a subsequent issue.

The Spanish-American Directories Co., Charles E. Locke, President, Singer Building, Broadway and Liberty Street, New York, have now in press and anticipate publishing by February 1st, a commercial directory of Cuba, Porto Rico and the entire West Indies. A circular giving details of this important publication will be mailed upon request. Those interested in the matter will write for same.

The James C. Lindsay Hardware Co., Pittsburgh, Pa., announce the fact that their contention with the Simmons Hardware Co. over the trade-mark, "True Blue," has been decided in their favor by the Commissioner of Patents, who sustains their right to the exclusive use of the trade-mark. This was decided on the merits and "judgment of priority of adoption and use" of said trade-mark. They announce to the trade that the trade-mark is now their exclusive property and has been duly registered.

George B. Main, the indefatigable representative of the Allerton-Clarke Co., 97 Chambers Street, New York, departed on his usual trip covering Canada and the Northwest a few days ago. His anticipations are of the very highest for the future business of 1901, and he starts out fully prepared to capture his share of it. Representing as he does so many important concerns among the list of agencies controlled by this company, which includes the Arcade File Works, the Lockwood Mfg. Co., the F. & N. Lawn Mower Co., the H. B. Ives Co., etc., etc., there is not the slightest doubt but what his anticipations will be fully realized. Few travelers leaving New York are more cordially welcomed.

The McCaffrey File Co., Philadelphia, Pa., have added largely to their productive facilities by the completion of the extensive addition to their two-story buildings. This includes a new engine house, which has recently been finished, in which they are installing a 500 H. P. engine, so as to largely add to the motive power of the works, enabling them to fill their increasing orders with a greater degree of promptness. This inability on their part has affected their domestic trade to some extent, which will now be well taken care of, as well as their numerous export orders which have been greatly increased during the past few months.

Frederick Pfeifer, 88 Chambers Street, New York, who has long been identified with the sale of the popular specialties manufactured by the Payson Mfg. Co., Chicago, has made a change in his arrangements which will enable him to carry a much larger assortment of their leading goods in his stock, at the above address, than he has been able to do heretofore. He hopes by the aid of this arrangement to be able to make deliveries much more promptly than he has been able to of late, and he desires to hear from the trade handling this line, with the confidence in his ability to do justice to them. He will still be the exclusive representative of Payson Mfg. Co. in the East, and anticipates making his usual Spring trip in due season. A new catalogue is in contemplation by the Payson Mfg. Co., and will shortly be issued, which can be obtained upon request.

At the annual meeting of the stockholders of the Miller Bros. Cutlery Co., Meriden, Conn., held on the 15th inst., the following directors were elected: Henry J. Lewis, Charles L. Rockwell, Geo. W. Lyon, George Rockwell and Charles F. Rockwell. The directors subsequently elected the following officers for the coming year: Charles L. Rockwell, President; Charles F. Rockwell, Secretary and Treasurer.

At the annual meeting of the stockholders of the Cattaraugus Cutlery Company, Little Valley, N. Y., held on the 7th inst., the following persons were elected directors for the ensuing year: J. B. F. Champlin, Tint Champlin, A. E. Darrow, E. E. Kelley and C. L. Wilson. The Messrs. Champlin and Mr. Darrow were respectively elected President, Secretary and Treasurer.

Joseph Allen, 7-9 Warren Street, New York, has been made the export representative of the Torrent Pump & Fence Co., Cleveland, Ohio. He will also represent them in the East, and especially in New York, Boston and Philadelphia. This company manufacture a line of Pumps for various purposes, the distinguishing feature of which is the use of the Torrent Rubber Bucket, which in operation is attached to the chain, and carries air down into the water, thus aerating and purifying the supply thoroughly.

The St. Louis Retail Hardware and Stove Dealers' Association held a meeting on the 9th inst., at which its membership was well represented, and elected the following officers: F. A. Kansteiner, president; John May, first vice-president; August Steinmeyer, second vice-president; Adolph Geschwinder, secretary; Louis Behl, treasurer. Arrangements were entered into by which a large delegation will be present at the annual meeting of the Missouri Retail Hardware and Stove Dealers' Association, which will be held at Kansas City, February 19, 20 and 21. Reduced railroad rates have been secured having this purpose in contemplation.

## Missouri Retail Stove and Hardware Dealers' Association.

At the third annual meeting of the Missouri Retail Stove and Hardware Dealers' Association, to take place on February 19, 20 and 21, at Kansas City, the following programme has been arranged:

First day, Tuesday, February 19, morning session, 10 o'clock. President's address, report of secretary and treasurer, report of Executive Committee, report of Grievance Committee.

Afternoon session, 2 o'clock. Address, "How to Make the Association So Popular That It Will Be an Inducement for All Retail Hardware Dealers to Become Members," Fred H. Cozzens, Detroit, Mich. Discussion. Question box.

Second day, Wednesday, February 20, morning session, 10 o'clock, Executive session; report of special committee.

Afternoon session, 2 o'clock. Address, "The Benefits to Be Derived from the State and Inter-State Associations," H. A. Cole, Council Bluffs, Ia.; discussion; address, "Benefits of Local Organization," H. G. Koenig, St. Louis.

Third day, Thursday, February 21, morning session, 10 o'clock, Executive session; election of officers.

Afternoon session, 2 o'clock. Address, "The Relation of the Retail Merchant to the Jobber," Jas. A. Massie, Kansas City; discussion, question box, resolutions in writing.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

## Editorial Trade Review.

The Springlike weather, with only a few days of real Winter, during the past fortnight, has created an early demand for goods, which will be needed for the opening of Spring trade, so near at hand. Winter goods must take care of themselves, and the salesmen are doing the best they can to push sales of any excess of stock, which the inventories now under way are apt to make evident.

The inventories as far as they are progressing, show extremely favorable results for the year's business, and great encouragement is felt from the present condition of affairs in general that a period of prosperity in which but few setbacks of importance need be anticipated will be the crowning feature of the year, upon which the trade is now entering. Prices on staple lines are low on the average, and the output sufficiently large for present facilities to check any ambitious project for arbitrary and unjustified advances in quotations.

Every indication points to a large increase in the net business during this month, when comparisons are made with the volume of traffic for January a year ago; and as prices are over 20 per cent. cheaper on the average than prevailed at that time, a better showing could scarcely be given for the demands which may reasonably be anticipated for Spring requirements from the retail trade.

The pleasant weather conditions recently prevailing have stimulated the progress of improvements, which are contemplated by owners of real estate. It is possible from the sanguine views expressed by those familiar with the plans of many builders, that the coming season will be the most promising for the sale of Builders' Hardware

we have had in a long period. There is an abundance of money seeking investment, and the most lucrative field appears to be that associated with permanent improvement of real estate advantageously located.

The travelers for the jobbers already on the road report an excellent business, based on the prospects of an early Spring opening, and the fact that the dealers' stocks throughout the country are by no means of excessive volume. Greater efforts will be made this year than ever before by the larger jobbers, covering every coign of vantage with their indefatigable traveling representatives, opening up other routes for new recruits among their drummers, and designing to work to the fullest advantage for trade purposes all the opportunities that present themselves in the present prosperous outlook. They intend to be up and doing, believing this year will be the one when, if the business doesn't forge ahead, it will become dormant and unprogressive.

Orders from the manufacturers covering special wants needed in construction of certain lines of goods are no longer held in abeyance, but are being forwarded in good volume for future delivery. Factory orders are increasing rapidly, and while quotations are of such a satisfactory grade, but little hesitation is shown by the judicious buyer who realizes that to do business at all, one must have the goods in stock, and a slight difference in quotation is but of small moment when dates of delivery may be considered unexceptionally safe.

The one section of the country which will show a high scale of improvement in general health and prosperity will be the expanding South. There is abundant reason for the expectations of the jobbers being realized. The retail dealers were never in years in as prosperous a state as they are at present. Stocks are by no means large, and now that prices have reached a good common-sense level, from which any change would be upward, if at all, it is sound business judgment to expect a progressive movement to the industrial demands made on the jobbers for the customary Spring supplies. The former conditions no longer prevail in money matters. Collections are favorable in every way, and many are discounting their bills who formerly felt the necessity of indulging in all the time which they could possibly obtain by begging or grabbing it.

## Commercial Changes of a Decade.

A remarkable change has come over the commerce of the United States in the decade ending with the calendar year 1900. The figures of the Treasury Bureau of Statistics show that imports, which in 1890 were \$823,397,726, were in 1900 \$829,052,116, an increase of less than 1 per cent. in the decade; while the exports, which in 1890 were \$857,502,548, were in 1900 \$1,478,050,854, an increase of 72.4 per cent. In 1890 the excess of exports over imports was \$5,654,390; in 1900, it was \$648,998,738.

In our trade relations with the various parts of the world the change is equally striking. From Europe we have reduced our imports in the decade from 474 million dollars to 439 millions, while in the same time we have increased our exports from 682 million dollars to 1,111 millions. From North America imports fell from 151 million dollars in 1890 to 131 millions in 1900, while our exports to North America increased during that time from 95 millions to 202 millions. From South America the imports increased from 101 millions in 1890 to 102 millions in 1900, while to South America our exports increased from 35 millions to 41 millions. From Asia the imports into the United States increased from 69

millions in 1890 to 123 millions in 1900, while to Asia our exports in the same time increased from 23 millions to 61 millions. From Oceanica the importations in 1890 were 23 millions and in 1900 were 23 millions, while to Oceanica our exports in 1890 were 17 millions and in 1900 40 millions. From Africa importations increased from 3 millions in 1890 to 9 millions in 1900, and exportations to Africa increased from 4 1-2 millions in 1890 to 22 millions in 1900.

The changes in the movements to and from the continents are due to two great causes: 1st, the increase in home manufactures which were formerly drawn chiefly from abroad, and second, the diversification of products, by which markets are made for many articles which formerly were produced or exported in but small quantities. From Europe, to which we were accustomed to look for manufactures, our imports have fallen over 35 million dollars, while Europe has largely increased her consumption of our cotton seed oil, oleomargarine, paraffin, manufactures of iron and steel, copper and agricultural machinery, as well as foodstuffs and cotton, our exports to that grand division having increased 428 million dollars since 1890. From North America the imports have fallen 20 million dollars, due chiefly to the falling off of sugar production in the West Indies, the imports from Cuba alone having decreased from 54 millions in 1890 to 27 millions in 1900. To North America the exports have increased meantime over 100 million dollars, the growth being largely manufactures and foodstuffs, a considerable portion of the latter being presumably re-exported thence to Europe. From South America the imports have increased in quantity, especially in coffee and rubber, but decreased proportionately in price, so that the total increase in value in the decade is but a million dollars, while in exports the increase is 6 1-2 millions, chiefly in manufactures. From Asia the importations have increased more than 50 million dollars, the increase being chiefly in sugar and raw materials required by our manufacturers, such as silk, hemp, jute and tin; while to Asia the increase in our exports has been nearly 40 million dollars, principally in manufactures and raw cotton. From Oceanica the imports show little increase, though this is due in part to the absence of statistics of importation from Hawaii in the last half of the year 1900; while to Oceanica there is an increase in our exports of more than 20 millions, chiefly in manufactured articles. From Africa the increase in imports is 6 millions, principally in manufacturers' materials, of which raw cotton forms the most important item, while our exports to Africa increased meantime 17 million dollars, chiefly in manufactures.

The following tables show the imports and exports of the United States by grand divisions in the calendar years 1890 and 1900. In the figures showing the distribution by continents in 1900, the December distribution is estimated, though the grand total of imports and exports for 1900 is based upon the complete figures of the Bureau of Statistics:

Grand divisions.	Exports from U. S. to—		Imports into U. S. from—	
	1890.	1900.	1890.	1900.
Europe .....	\$82,585,856	\$1,111,456,000	\$474,656,257	\$439,500,000
North America.....	96,517,863	202,436,000	151,400,330	131,200,000
South America .....	34,722,122	41,384,000	100,959,799	102,000,000
Asia .....	22,854,028	60,598,000	68,340,300	122,800,000
Oceania .....	17,375,745	39,956,000	23,781,018	23,400,000
Africa .....	4,446,934	22,170,000	3,169,086	9,900,000

Why the Commercial Agencies Should be Given Trade Reports.

Having been a credit man for ten years and at present an agency man, possibly a remark on this topic will not be out of place.

If the leading agencies are not made distributors of these trade reports, whom would you choose to act in that capacity?

Can any plan of reciprocal reporting be effected whereby absolute justice will prevail? I submit that the theory of the credit clearing house is good, but I find credit men complaining that they live up to its requirements, but some one else

does not, and they feel that they are not getting justice. It will always be so.

I do not believe subscribers make a practice of calling for reports when they have no order. What if they do? You cannot prevent it by any feasible plan.

As to taking the risk of your salesman's time and expense in soliciting a customer and incurring the odium of refusing the order, it seems to me that such a proposition is presented by one who is looking for a return of the bread he casts upon the waters in too short a time.

What applies to your competitor also applies to you. When you read the trade opinion given by another house you get the same relative benefit which they get when they read your trade opinion. To attempt to narrow the subject down and detect the ratio of benefits and advantages others may gain will kill any attempt to effect progress in the matter of commercial reporting, because there is always a minority who think they may get the worst of it.

The interests of creditors are mutual, considered in a broad sense. Co-operation among credit men is necessary.

You use the agencies and your co-operation with them will greatly enrich their records, which are your guides. You give your money to the agencies, and their business should be to use it to the best advantage. I believe that they can put the money to no better use than to expend it in getting trade reports. I also believe that no credit man can afford to put any obstacles in the way of this advanced idea in commercial reporting. Don't wait until all conditions are perfect before you fall in with a progressive idea. Try it a while and trust to the future for further development.

F. PALMER CHURCH.

The Commerce of Great Britain with her Colonies.

British colonies furnished last year a market for over \$500,000,000 worth of British goods. The "Statistical Abstract for the several colonies and other possessions of the United Kingdom," which presents the details of the commerce and conditions of the British colonies in the year 1899, compared with preceding years, has just reached the Treasury Bureau of Statistics. It shows that the British colonies throughout the world imported in 1899 goods valued at over a billion dollars, and of this amount over \$500,000,000 was from the United Kingdom.

England's largest colony, of course, is British India. Its total imports in 1899 are given in round terms at £60,000,000 (or about \$300,000,000), of which £40,000,000 (or about \$200,000,000) were imported from the United Kingdom.

Next in importance is Canada, whose total imports amount to £28,000,000, but which takes only £6,678,000 in value from the United Kingdom; the chief reason of this small proportion being her immediate proximity to the United States, which can supply more promptly and conveniently her varied wants.

Next in importance is the group of Australasian colonies, whose reports show on the face an importation in round numbers of over £70,000,000 in 1899, though the fact that each colony counts as "an importation" anything coming from any other Australian colony, even though merely brought across the line from adjoining territory, makes this statement of Australian "imports" a misleading one. A careful analysis of the real import trade of the Australian colonies shows that their importations from countries outside of the Australian continent amount to about 55 per cent. of the sum which they name as "imports." Basing an estimate upon this analysis of the 1898 figures, it may be assumed that the imports of the Australian continent in 1899 were not far from £40,000,000, of which the United Kingdom, although located on the opposite side of the globe, furnished over £26,000,000 in value.

The value of the importations of the British West Indies in 1899 is £6,711,000 (or about \$33,555,000), of which £2,722,000 (or about \$13,610,000) were from the United Kingdom.

The African colonies show total imports of \$130,000,000 in value, of which \$85,000,000 are from the United Kingdom. At the Cape of Good Hope alone the imports of the year are in round terms \$100,000,000, of which \$65,000,000 are from the United Kingdom.

### Lockwood-Taylor Hardware Co.'s New Catalogue.

The Lockwood-Taylor Hardware Co., Cleveland, Ohio, have just published, in the interest of their customers and themselves, a very handsome catalogue, being fully illustrative and thoroughly descriptive of the Hardware contained in their large stock. The catalogue contains 784 pages 8 3/4 x 11 inches in size, exclusive of an index covering 17 pages, which is laid out in a manner to enable the user of its useful contents to find what he wants with very little exertion. A great deal of care is evident from the manner in which the goods are detailed throughout, the descriptions being readily understood and the facilities provided for intelligent ordering on the part of the dealer. They state in their prefatory remarks that the catalogue is issued for the convenience of their customers in making up orders, it being intended to include only such goods as they desire to carry in stock, and are in condition to furnish promptly; while at the same time it is conceded that their sales, as usual, will not be confined entirely to the goods shown in the catalogue, as their ability to provide fully for all the wants of the dealers on their list of customers is thoroughly recognized. It is the desire and intention of the company to sell nothing but first-class, high-grade goods. As they state, they have learned by experience it pays to sell good goods, as customers may be relied upon to remember quality when the cost is entirely forgotten. This is intended to refer more especially to the desirable lines which are handled by them exclusively under their own private brands. They put themselves on record as intending to do an exclusively wholesale business, no goods being sold at retail, and this enables them to give their undivided attention to the manifold wants of their customers. So much of the Hardware business is done to-day by the assistance of mail orders, and the saving of expense in repeated trips to the city, that catalogues of this description are the most advantageous portions of a Hardwareman's library, for when thoroughly understood, it is only necessary to have confidence in the house, and the dealer can sit at his desk at home and have almost every possible requirement filled intelligently. While catalogues of this description are always found an item of great expense to the jobber, still the advantages they provide for the perfect filling of mail orders amply repays for them in the absence of friction which is usually created without some such guide as is furnished in the construction of an intelligent catalogue. The catalogue opens with a title page, on which is depicted the fine store occupied by the company at 108, 110 and 112 Water Street, in the city of Cleveland. The volume is extremely well arranged, commencing with Builders' Hardware, and passing through a number of other similar goods required about a house. This is followed by other special departments of the Hardware business proper, embracing everything that could possibly be wanted by Hardware, housefurnishing goods and stoves and tinware dealers, who form the body of their patrons.

### Hardware Merchants and Manufacturers' Association.

The fifteenth annual meeting of the Hardware Merchants and Manufacturers' Association of Philadelphia was held at The Bourse on the 15th inst. President Hugh McCaffrey delivered his annual address, which teemed with evidences of the unprecedented prosperity of the manufacturing interests of that city. T. James Fernley, secretary-treasurer, in his report, stated that the membership had increased to 80, and that the Association now represented \$80,000,000. The following officers were elected: President, Hugh McCaffrey; vice-president, William C. Peters; secretary-treasurer, T. James Fernley. Board of Directors: William W. Supplee, Samuel Disston, John R. Griffith, James H. Ritter, Charles M. Ghriskey, William C. Peters, Thomas Devlin, Hugh McCaffrey, T. James Fernley.

### Annual Banquet of the Hardware Merchants and Manufacturers' Association of Philadelphia

Upward of one hundred members and guests of the Hardware Merchants and Manufacturers' Association of Philadelphia participated in the annual banquet of this Association, which was given at the Manufacturers' Club on the evening of January 17th. It was the fifteenth annual dinner of the Association, and was, as usual, a remarkably successful social function. The decorations of the tables were extremely distinctive in character, embracing as they did a great variety of Hardware specialties presented by a number of the members of the Association, who are annually among the benefactors in the department of souvenirs. The Banquet Committee, under whose direction the affair was conducted, consisted of William D. Supplee, chairman; James H. Ritter, Harry C. Disston, C. W. Asbury and J. H. Van Newkirk. The following invited guests were present: Hon. Samuel H. Ashbridge, John Bindley, Rev. John R. Davies, D. D., R. R. Williams, Archibald Paull Mitchell, James H. Kennedy, Henry Knight, George V. Cresson, Nathan T. Taylor, Thomas Hobson. The following menu was a distinctively interesting part of the proceedings, and was thoroughly enjoyed by all present:

MENU.  
Lynn Havens. Ginger Ale Cocktails.  
Consomme Duchess.  
Hors d'oeuvre.  
Terrapin, Maryland. Apollinaris, Sec.  
Saddle of Southdown Mutton.  
Fresh Mushrooms. Londonderry Extra Dry.  
Claret Frappé.  
Roasted Quail. White Rock, Brut.  
Salad Andalouse.  
Roquefort.  
Pudding, Diplomat.  
Coffee. Cigars.

In the absence of Hugh McCaffrey, who was to occupy the position of toastmaster, T. James Fernley presided, and no man is more thoroughly equipped for the position than the genial secretary-treasurer, every evidence of which was given before the proceedings terminated. Under his administration of the feast of reason, Hon. Samuel H. Ashbridge, Mayor of the City of Philadelphia, delivered an extremely interesting address on "The Twentieth Century Business Man and the Public Servant." He was followed by John Bindley, President of the National Hardware Association of the United States, who discoursed eloquently on "The Twentieth Century; The Man." The Rev. John R. Davies, D. D., pastor of the Bethlehem Presbyterian Church of Philadelphia, held the close attention of the auditors while he delivered an address on "The Obligations of Two Millenniums." He was followed by Charles B. Adamson, of Baeder, Adamson & Co., Philadelphia, who treated of the subject of "The Twentieth Century Manufacturer; What Are His Obligations to the Trade?" the speech-making proper being brought to a close by Charles W. Asbury, of the Enterprise Mfg. Co. of Pennsylvania, who proved to be thoroughly at home on the subject of "The Twentieth Century Woman." The addresses were all of an interesting and enjoyable character, and listened to attentively by the assemblage. Altogether, it was as interesting and enjoyable an occasion as the Hardware Merchants and Manufacturers have had since the formation of the Association.

✱

*The Boston Medical and Surgical Journal* says that a Boston physician was recently called to a family which he found in such destitute circumstances that he gave, in addition to his prescription, a \$5 bill. Happening in the next day, he discovered that his gift had been thus spent: Three dollars to the priest, which, of course, was all right, and \$2 to get another doctor.

Attend carefully to the details of your business.

## TRUSTS, THEIR POSSIBILITIES <sup>FOR</sup> GOOD OR EVIL.

Trusts, according to the understanding of the present day, seem to be confined to large aggregations of capital, and in accordance with this understanding, are considered in the nature of things, to be the enemies of all those who possess no other capital than that of their hands or their brains. This is an erroneous impression, and has been well defined by Andrew Carnegie in a recent contribution to the *Twentieth Century Supplement* of the *New York Journal*.

In that article he very aptly compares the entire industry of the country to a three-legged stool, and calls one of these legs capital, another business ability, which means brains, and the third labor. It must be apparent to any one that this comparison is not only apt, but expresses in concise terms, the relative values of these two great factors in a nation's industries. The comparison is faulty only in that it assumes the possibility of a failure on the part of capital in its ability to stand alone for the records of the past and the experience of the present, together with the reasoning faculties of man, all go to prove that when there is strife between these essential elements to a peaceful whole, that the strength to maintain itself, at least in a passive way, is with capital. It can not endure forever, it is true, but can endure until both business ability and labor shall have grown weary of the struggle and in a condition where capital can dictate, if it so desires, its own terms of peace.

It is, I think, safe to assert that in almost any branch of manufacturing, that capital is disposed to maintain peace and avoid strife with either of the other elements, and further, that the strife is really between business ability, represented by the management of a business, and labor, represented by the operatives who are, and should be, under the direct control of the management. If it is contended—as I think it will be—that the strife is between two classes of labor, which is entitled to the mastery in the struggle, and what is the best way to attain that mastery.

If I am advised correctly, the spirit that emanates the formation of trusts, so called, is a desire on the part of capital that the moneys which they have invested in manufacturing shall produce a return commensurate with the risks and the amount. If there is a failure to do this, the fault lies with the management, or that class of labor who call themselves brains, and not with those who act under their direction. If the latter, in the efforts of brains, to show a satisfactory return to capital are ground down to a point where the wages received is not sufficient to give them a respectable and decent living, there is certainly something wrong that should in some way be righted. It is the plea of brains that competition compels them to produce their particular article of manufacture at such a low price that no other course is open to them.

Every fair-minded man must concede that there is force to this argument, and I am glad to say that in the great majority of cases, the necessity for such action is deplored, and a remedy, if it could be found, would be eagerly seized upon and put into use, at least experimentally. If I am right, then the problem of the day is to find a remedy for competition, so that all classes, capital, brains and labor, may receive their just proportion of the profit which all will concede is necessary to the life of any manufacturing business.

I do not for a moment pretend that I have found a sovereign remedy that will cure in all cases. Like many medicines administered for disease that is difficult to treat, the general system must first be toned up until it is able to assimilate the powerful drugs necessary to attack and destroy the disease.

Therefore, my suggestion will be more in the nature of a tonic to the thought of all the classes interested. It will be harmless in the sense that if not appetizing to the palate, it need not be, but as tonics are rarely administered to those who are well and are usually taken by those who are ill in the hope that a time will come when they can discard them, I shall prepare the prescription and leave to the patient the choice of taking or not taking, that is, of thinking or not thinking, exactly as he chooses. This is a free country, and we have that, at least, to be thankful for.

I wish, then, to say a few words to brains as an introduction of the subject: If they are really in earnest in their desire to produce a better state of affairs for all concerned, why do they not cut down their own compensation at the same time that they do that of labor? Why do they continue to draw princely salaries and live lives of comparative ease, while so many have barely the necessities of life, and in some instances not even that? Are they doing to others as they would be done by in similar circumstances? Are the rights of those who perform common labor worthy of any consideration? Are they aware of the number of hours that are spent by this class in physical toil? Would they be able or willing to do the same work for the same compensation? If they had it to do over again, would they do as they have done in the matter of their own career? Would they prefer to occupy the position that they now hold or to perform common labor always?

So much for brains. Now we will address a few questions to labor. If you were in the position of brains as the manager of the business, would you do as he does, or if not, what would be your course? If you had your choice of occupations, would you be a man at the head of a business or would you prefer a subordinate capacity? If at the head, have you made any efforts to rise to such a position from your present one? If as a subordinate, what do you understand to be your first duty to those in authority over you?

If they are engaged in common labor, do they ever make any effort to improve themselves by reading? If they do, what is the character of that reading? Did they, in their early days, have any opportunity to attend school? Have they any desire to learn so that they may rise to something better than physical labor? Have they any desire to give to their children greater advantages than they had? Have the times when they were out of work through depression of business, strikes, or from their inability to obtain employment been spent at home or elsewhere? If elsewhere, what was the character of their surroundings? Calculated to improve, or simply to pass the time away?

If they had a large income, what use would they make of the increase over their present income or wages? If they have no use for greater comfort for themselves or their families, what is their ground of complaint against present conditions?

Now with this we will bring this article to a close, for we have, as it were, diagnosed the disease and are puzzled to prescribe a remedy until we get the answer from both patients, brains and labor.

If this medium does not reach those interested, perhaps this article may be copied and given a circulation to the classes that are interested. I hope this may be the case, and if so, have no doubt that other pens than mine may be enlisted in a discussion which may prove profitable in determining whether there is any necessity for a trust, and if there is, whether such a thing as a "good trust" can be organized.

ANDREW H. MACPHERSON.

### "Ore in Sight."

With the news that John Hays Hammond's proposal to take charge of the Independence gold mine had been accepted by the London owners came the report that the mine had been "worked out." This statement had been made many times before, and much doubt existed in the minds of interested parties when Mr. Hammond's latest report was received. This document showed that the property, which for a long time yielded a 40 per cent. dividend on a large investment, was still rich in ore, and capable of producing large profits. Mr. Hammond said that the "ore in sight" warranted him in guaranteeing a dividend of 10 per cent., or \$488,000, and that would leave about \$500,000 out of the year's profits to be used toward the further development of the property and locating new ore beds.

The phrase "ore in sight" is one that is well understood by people who are interested in the mining business, but it is misunderstood by the average layman. The ore is not "in sight" on the surface, but its existence is established by a series of operations which are in many instances exceedingly difficult, expensive and laborious.

Speaking on this subject, Dr. A. R. Ledoux said: "There is no way to determine the existence of gold ore, its quantity, quality or anything about it unless one gets on three sides of the deposit, and even then there is an element of uncertainty about it. Ore in sight is what has been found after 'blocking' out a certain section of ground. The 'blocking' is accomplished in various ways in keeping with the nature of the ground. Thus, by sinking a shaft of 20 feet in width 100 feet into the earth, and then running a level from this, say, 200 feet, to another shaft the same depth and width as the first, and then taking samples of the ore or rock from all parts of this block, one would have a good idea of the yielding qualities of that particular block. This block would be 400,000 cubic feet or about 20,000 tons, and the assays from the four sides, the two shafts, the tunnel and the surface would be the 'gold in sight.' The centre of the block, which cannot be reached until actual operations are begun, might yield much more than the assays indicated, and on the other hand it might be found worthless or barren rock. In cases where the block of 100 x 200 x 20 feet would be deemed insufficient for determining the value of the mine, another block of similar size may be laid out below or beyond the first, and by this series of blocking the value of the mine as a gold producer is estimated. It is a well known fact that gold is often deposited in 'shoots' that run in oblique and tortuous directions from the surface, and one must be posted on the geology of the country to arrive at a correct estimate of the value of the land that has been blocked out. A shaft, for instance, may run for 100 feet through rich ore, and another parallel shaft 200 feet away may not strike pay ore until a depth of 100 feet or more has been reached. The next shaft 200 feet further away may have to be sunk still deeper before the valuable rock is reached, and this would indicate that the 'shoot' runs diagonally from the surface. This is only one of the many phenomena in the matter of gold veins that present themselves to the miner, and no set rule can be followed in order to locate the valuable ore or to determine its extent. But the term 'gold in sight' or 'ore in sight' is usually applied to the block or to the series of blocks which have been examined and assayed on three sides."—*N. Y. Tribune.*

### The Sturges, Cornish & Burn Company.

The above is the name of a Corporate Company that has recently applied for a charter to the Secretary of State, Springfield, Illinois, with a paid-up capital of \$200,000. Its stockholders are: Frank Sturges, Lee Sturges, J. H. Cornish and W. H. Burn. The new Company takes over the Frank Sturges plant, located at Harrison, Green and Peoria Streets, Chicago, where the manufacture of Milk Cans, Milk Can Stock, Dairy and Sheet Metal Specialties will be continued.

They will absorb the well-known Dairy Supply House of Cornish & Co., of St. Paul, Minn., who have built up a reputation on their specialties, among them the Boyd Cream Ripener, Water Tube Boilers and Milk Heaters, which they control; also building complete Butter and Cheese Factories. Frank Sturges has been identified with manufacturing in Chicago for the past thirty-five years, and the large line of Milk Cans and Dairy Goods made in his factory have earned for him a reputation of which he may justly be proud. Mr. Sturges feels that after having been in the business for so many years, he is entitled to a rest, and while he has consented to take the Presidency of the new Company, he will shift much of the responsibility to his associates, who are younger and better able to carry the burden of a large business. His son, Mr. Lee Sturges, who has been with him in the business, and to whom the many improvements along the line of Deep Drawing are credited, will also be associated with the new Company. Mr. Cornish comes to the new organization with a thorough knowledge of the Dairy Supply business, gained during long experience, having been for many years Secretary and Manager of the Cornish, Curtis & Greene Co., and later President of Cornish & Co. Mr. Burn, who has been connected with Mr. Sturges for a number of years, is probably one of the best-posted men in the Milk Can business in the United States, and is well and favorably known to the Hardware trade, having called on them personally for many years. It is the intention of the new organization to continue at its present location until its new plant, for which plans have been drawn, and which will be erected on tracks at Western Avenue, between 15th and 16th Streets, is completed. In addition to the already large volume of business done by Frank Sturges and Cornish & Co., we bespeak for the new organization, The Sturges, Cornish & Burn Co., an increase which we feel sure cannot but be gratifying.

### Important Decision.

The Gem Cutlery Co., 34 Reade Street, New York, whose advertisement will be found on page 14 of this issue, have recently made the following announcement to the trade, which explains itself:

#### TO THE TRADE.

We take pleasure in informing you that the litigation against us, started two years ago, in January, 1899, by Kampfe Bros., has been decided in our favor on two of said patents; the third patent on which the decision was in favor of Kampfe Bros., WITHOUT COSTS, is for a feature which we have ceased manufacturing some time ago, and the Razor now made by us is protected by United States patent No. 664,177, granted December 16th, 1900. The patent opening feature of our Frame, which has made our Razor so popular, is retained by us and has been so decided not to be any infringement, and you have a perfect right to deal in our razors as at present supplied to the trade, and we will protect our customers against any lawsuits brought on in handling them.

Thanking you for past favors and soliciting a continuance of the same, we remain,  
Very truly yours,

THE GEM CUTLERY CO.

The Trans-Siberian Railroad will be completed at the present rate of working in about two years, the cost probably considerably exceeding the original estimate of \$175,000,000.—*Ex.*

"It's dreadfully queer," said the housewife, "that the potatoes you bring should be so much bigger at the top of the sack than they are at the bottom."

"Miss," said the honest farmer, "it comes about this way. P'tatoes is growin' so fast just now that by the time I get a sack full the last ones is ever so much bigger than the fust ones."—*Exchange.*

## CONSULAR COMMERCIAL COMMENTS.

### RUBBER IN GUATEMALA.

Frequent inquiries are received at this consulate concerning rubber, its cultivation, and the manner of its treatment. Many attempts have been made to manufacture a substitute for this valuable substance, but up to the present time nothing has been found to even partially serve in its stead.

To one contemplating the cultivation of rubber, the primary consideration is to locate suitable land. Some lands, while having all the elements required for fruitful production, lack the fertility necessary for quick growth. The time required for development depends entirely upon the soil and the advantages of location. Some lands will develop the growth of the tree so rapidly that in seven years it will produce milk, while others need from nine to ten years. Land located near the sea and at its level, having the full benefit of the sea breezes, will produce in much shorter time than land of a higher elevation and farther inland. In the cultivation of rubber one must also cultivate patience, for at least seven years are required before any return is made on the investment; however, cocoa, sugar cane, tobacco, and other marketable products can be raised at the same time, which will pay expenses for rubber cultivation.

The rubber tree is what is commonly called croton germ, and when any part of it is planted in soil favorable to rubber, it grows more rapidly than when seed is planted. In this case, it must be transplanted to the place set apart for its final development.

In Guatemala and all Central America, the *Castilloa elastica* is cultivated, and its product is of fine quality. The *Castilloa elastica* is a tall and well-shaped tree, having a smooth bark of a whitish-green color; it attains a height of 45 to 60 feet. The branches—few in number—grow very long and almost horizontal, and out of them spring two rows of long oval leaves.

The product or milk of this tree exists in the fibres located between the bark and the tree. These fibres are the vital part of the tree, which fact necessitates the greatest care in making incisions to extract the milk. Should one accidentally cut into these fibres, the life of the tree would be endangered. It is estimated by good authority that the milk of the rubber tree contains about 60 per cent. of water and other substances and about 40 per cent. of rubber; and, allowing for further losses in its treatment, one can count on 33 1-3 per cent. of the whole being rubber of good quality.

Only of recent years has rubber cultivation been seriously thought of. Before this time milk was taken from trees growing wild, and one spoke of "hunting" rubber.

The rubber tree must not be exposed to the extreme rays of the sun, and should therefore be shaded by other trees; but not so much as to prevent the free passage of air, for ventilation is essential to the growing plant.

Some planters insist that rubber and coffee will grow on the same land, and therefore plant the rubber tree to serve as a shade for coffee and cocoa. While the coffee and cocoa would undoubtedly be benefited by the shade of the rubber tree, the product of the latter would be of little value, as the sun would sap the vitality of the tree. Rubber trees at high elevations, though beautiful in growth, give but little milk. Not all trees produce milk even at a favorable altitude. The tree called the female yields the product; the male tree gives nothing. It is necessary, however, to plant the male species, for experience has demonstrated that a plantation of female trees alone would be fruitless and unproductive. Successful rubber planters from whom I get my information say that among every thirty-five female trees there should be one

or two male trees. The male tree, when the incision is made, gives out a puff of wind, but produces no liquid.

The soil where the rubber is planted should be loose and deep, with no clay or stones. The land should be clean for at least 3 feet around the tree. The ground must be well worked before the rubber seed is planted; the soil must be damp, and the seed must be placed about 2 feet apart. The seed should be picked in March, as it falls from the tree with a gum on it. If washed, it may destroy the seed. In about a year, the little plant will be 1 1-2 feet high. It must be stripped with the greatest care and the roots covered with dirt; it should then be transplanted. For the first year, the plant should be kept free from weeds or it will become choked. The transplanting method has always proven more efficacious than planting the seed; this also enables one to select the healthier plants and guarantee production. The rubber trees should be about 6 yards apart and, if the shade trees will permit, should be placed in rows. Weeding about the tree must be done at least four times a year during its early growth; this care lessens as the tree matures. Weeding is done with a machete. The weeds and some branches of neighboring trees are cut into small particles and strewn around the tree to act as a fertilizer.

Opinions differ about the time required for the mature development of the rubber tree, but, as before stated, much depends on the location and soil, as well as on the care given the growing plant. Some planters say that the rubber tree when fully developed will yield from 3 to 4 pounds of milk yearly, while others think this estimate too liberal. The life of a rubber tree is impossible to estimate; trees growing wild in the forests here seem to be hundreds of years old and still give milk as frequently as those of later cultivation, though not in such quantities. The tree can be bled twice a year with safety; more frequent tapping will injure it.

After the tree has developed, very little care is required other than to keep down the weeds, etc. The wild trees above mentioned each yield about 2 pounds of rubber yearly, without the least care other than what nature has given, showing that attention is alone necessary to increase the production and improve the quality. The tree should be bled at certain prescribed seasons; the best is when the leaves have fallen off and the tree is nearly stripped. The yield at this time is greater than at any other. The incision in the tree is made in the form of an S. One incision at the bottom of the tree is not enough, because the fibres are not good conductors, and the milk thickens by exposure and prevents free flowing. In making the incision, care must be taken not to cut the fibre, as above mentioned; the incision must extend through the bark only.

As to the treatment of the milk when extracted, opinions differ. The natives make a canal in the tree and let the milk run into a hole in the ground made particularly for that purpose, which answers as a receptacle. In the process of hardening or solidifying, dirt is taken in, and, of course, the rubber is not pure and is of less value. Some permit the milk to flow into a barrel, and the juice of a vine, "*quisbra-cajite*," is used to solidify. Alum, which has an almost immediate effect on the rubber, is much used. An indirect fire is also used to cause the evaporation of the water in the milk. Care should be taken to prevent the receptacle or vessel used from staining the rubber. Another process is to pour the milk into water; the milk hardens immediately and when taken out is in appearance much like a sponge. It should then be passed through a press and all the water squeezed out; an American wringer can be used for the purpose.

When this is done, the rubber is of a whitish color and is the pure product.

Every inquiry received desires data as to the probable cost of rubber production. This is difficult to give, as much depends on the person engaged in the work. However, these points must be considered: The cost of the land, its location, and the quality of the soil; the facility for securing workmen; the means for getting the rubber to the coast or railway, etc. It is estimated that 100,000 trees can be planted in one caballeria (about 115 acres), which land can be purchased for about \$100 an acre. The labor is cheap, the native workman getting about 6 reales, or 12 cents in United States currency, a day. Small, inexpensive huts must be erected on the plantation for the workmen. Plantains are the food used, and these can be grown in sufficient quantities without any expense whatever. After the trees are planted, very little cost is incurred, unless the planter is raising other marketable products. I know of no enterprise or business requiring as little money as the cultivation of rubber. After the seventh year, each tree can be counted upon to give a product worth at least \$1 gold per year, and sometimes \$2. When the tree begins to yield, it must be protected from rubber thieves, who not only steal the rubber, but slash and cut the tree so badly that it dies. Sugar cane, coffee, etc., can be grown at the same time, which will not only pay the expenses of the finca, but will yield good returns. Thus the cost of the cultivation of rubber is minimized. Part of the plantation can be reserved for the raising of cattle, which is very remunerative in Guatemala. The pasture land is of the best, and if water is near by the ranch can be established without further outlay.

The rubber lands in Guatemala are equal to any in the world, and with proper care and intelligent cultivation the product will command a price equal to any. There are two seasons here, commonly called Winter and Summer. The Summer season extends from October 15 until about May 1, and is the dry period. The Winter, or rainy, season lasts from May to October. The climate, soil, and atmosphere of Guatemala are entirely favorable to the cultivation, not only of rubber, cocoa, tobacco, coffee, and sugar, but of all vegetables and articles of domestic use. It is, in my judgment, the ideal land for the farmer, who, with the application of modern farm implements, could win a recompense for his labor much beyond that to be obtained in our own country. Two crops a year can be raised, and there is absolutely no limit to the articles of farm production which could be cultivated here.

JAMES C. McNALLY,

GUATEMALA, December 7, 1900.

Consul-General.

### "New Gem" Safety Razor.

The Gem Cutlery Co., 34 Reade Street, New York, are the manufacturers of the "New Gem" Safety Razor, whose attractive advertisement will be found in another part of this paper. That safety razors have come to stay there remains not the slightest doubt, and the popularity of the "New Gem" Safety Razor is unmistakable. We give an illustration herewith in Fig. 1, showing the frame, blade and handle in position ready for shaving, and in Fig. 2 the cut illustrates the frame entirely open for cleaning, which can also be done while shaving without removing blade. These razors are sent out by the manufacturers ready for immediate use. After taking from the box, operations are begun by holding the blade against the face at the angle usual with ordinary razors. Instead of moving directly downward, the movement is made in a slanting manner, slightly toward the mouth corner or the ear, which enables the hair to be more easily cut. When the operation of shaving is finished, a button is pressed which enables the razor to be opened readily, and then by holding the entire razor under running water, or shaking gently in a bowl, it is thoroughly cleaned. A slight pressure on the spring in the rear takes the blade from the frame, which enables both to be thoroughly dried.

This gives an idea with how much ease the operation may be accomplished. The blades of the "New Gem" Safety Razor are made of the finest English steel, every effort being made to impart an edge to so important an instrument

FIG. 1 "NEW GEM" SAFETY RAZOR.

that will make honing only occasionally necessary. This fact is guaranteed by the manufacturers by inclosing with every razor a ticket entitling the user to have the blades resharpened when necessary. They are not only put up singly in boxes for distribution to the trade, but are also furnished in sets and outfits, which make it an indispensable toilet essential, which once used will never be found missing thereafter. One method of distribution, through the Hard-

FIG. 2 "NEW GEM" SAFETY RAZOR.

ware trade, has been found extremely successful by the manufacturers. The company furnish a display case for which they make no charge, provided the necessary goods to fill it are purchased. This purchase would make necessary a half dozen "New Gem" Razors, two cases No. 1, one case No. 2, and one case No. 3; also one wood-handle stropping machine and strop. This would enable the dealer to have a small assortment displayed in a display case that cannot do otherwise than attract attention, and assist materially in sales. The display case is made of polished wood, lined with muslin, and has a sliding glass, so that easy access to the goods can be had.

"What are the names of that newly married couple in the next flat?"

"Oh, we can't find out for a few weeks; each calls the other 'Birdie.'"—*Ex.*

**Kansas Retail Hardware Dealers' Association.****MONDAY AFTERNOON SESSION.**

The third annual convention of the Kansas Retail Hardware Dealers' Association was held in the parlors of the Allmon House, Kansas City, Kansas, on Monday and Tuesday, January 14th and 15th.

The convention was called to order at 2.45 P. M., President Frank Rudy, of Paola, being in the chair, and forty delegates being in attendance. The reading of the minutes of the last annual meeting was the first business attended to. The minutes were approved as read, and President Rudy appointed as an auditing committee Oscar Roehr, of Topeka; W. H. Foucht, Topeka, and James H. Hamilton, of Arkansas City. The appointment of a Committee on Resolutions was deferred until Tuesday morning.

Remarks for the good of the Association having been called for by the president, W. H. Foucht, of Topeka, and James H. Hamilton, of Arkansas City, made a few brief remarks.

President Rudy then read his annual address, showing that the year had been a very prosperous one for the State, the Hardware trade having been benefited in accordance with its several opportunities, and thanking the members of the Association for the assistance they had given him during the past two years, and promising that he would give all the assistance he possibly could to the successor who would carry on the good work for the ensuing year. He urged the dealers generally to become members of the Association, assuring them in that way the best work could be accomplished by co-operation, and that no better time than the present could be found in which to continue the good work. The address, which was listened to attentively, was followed by applause.

Secretary J. A. Cole, of Topeka, then followed with his report, detailing to some extent the labors of his position, and giving every evidence of the fact that his duties had been followed up to the fullest extent, every effort being made to persuade the Kansas Hardware dealers to join the Association, which, while securing a number of new members, did not meet with the success desired, although he anticipated from the efforts already in contemplation that a much larger number of members will be the result. He referred to the formation of a National association called the Inter-State Retail Hardware Dealers' Association, of which the Kansas Retail Hardware Dealers' Association had become one of the charter members, which he was confident would result in a gratifying condition of affairs in the future.

George F. Anderson, of St. Mary's, then read a paper on "Some Wrongs That Need Righting in the Hardware Business." This is an article that we hope to give in a later issue of *Hardware*, it being a very plain-spoken one, and covering a number of points to which sufficient attention is not usually given. Mr. Anderson's paper met with the warm applause of all those present, as his ideas were sympathized with to the fullest extent. A number of brief remarks were made by several delegates, and the meeting adjourned to meet Tuesday morning, at 9 A. M.

**TUESDAY MORNING SESSION.**

The Tuesday morning session was called to order by President Rudy about 10.30 A. M., the first work of the day being the appointment of a Committee on Resolutions, which consisted of James H. Hamilton, Arkansas City; S. I. Gilbert, of Arkansas City, and T. H. Kiniry, Beloit.

During the morning, an interesting paper was read by James H. Hamilton, of Arkansas City, on "Competition in the Hardware Trade," in which he, in a very intelligent manner, detailed some of the trials and tribulations of the legitimate dealer with unfair competition in his special line of business. The address was listened to with much interest, and received the commendation of all those present.

J. M. Walters, of Robinson, had prepared an interesting

paper on "The Trials of the Country Merchant," which was read for the benefit of the convention by Oscar Roehr. We regret that our space is so limited in the present issue that we are unable to quote this characteristic address, which interested the members exceedingly.

The reading of Mr. Walters' address was followed by the reading by W. H. Foucht, of Topeka, of a paper prepared by E. I. King, of Logan, on "Jobbers and Retail Dealers; Their Relations to Each Other." This, while brief, was listened to with commendable interest, and considerable applause followed its delivery. The Auditing Committee then made their report, stating they had examined the secretary-treasurer's report, and found it correct.

The election of officers was then proceeded with, and resulted as follows: President, George F. Anderson, St. Mary's; vice-president, Oscar Roehr, Topeka; secretary, J. A. Cole, Topeka. Upon motion, President Rudy was requested to appoint five members of the Executive Committee for the ensuing year. This he did by appointing the following: James H. Hamilton, Arkansas City; E. I. King, Logan; T. H. Kiniry, Beloit; J. M. Walters, Robinson; F. W. Bartlett, Kansas City. It was unanimously voted that these men be elected as the Executive Committee for the coming year.

The Committee on Resolutions reported as follows through Chairman George F. Anderson, of St. Mary's:

*Resolved*, That this Association extend cordial thanks to the City Mercantile Club for its kind and courteous treatment of the members of this Association; also to the representatives of trade papers and press for their full reports of this meeting.

*Resolved*, That our thanks are also extended to the retiring officers for their earnest work in the past.

*Resolved*, That we express our sympathy with our absent members, E. I. King and J. F. Berger, on account of sickness, and trust they may not be again detained from meeting with us from same cause.

*Resolved*, That we condemn the action of manufacturers of standard makes selling their stock to catalogue houses, to be listed at prices that does not afford a small retail profit; that we all pledge our best efforts to the success of this Association, to the end that some of the wrongs that daily surround us may be righted.

The report was adopted and the committee discharged.

The choice of the next meeting place was left to the Executive Committee.

The meeting adjourned at 12.40.

**North Dakota Retail Hardware Association.**

The annual meeting of the North Dakota Retail Hardware Association will take place Wednesday and Thursday, February 20th and 21st, at Grand Forks, at the hall in Security Trust Block, opposite the Hotel Dacotah. As at present projected, the following will be the programme of proceedings:

**PROGRAMME.****WEDNESDAY, FEBRUARY 20TH.****Morning Session, 10 A. M.**

Payment of dues.  
Address of Welcome, by Mayor Dinnie.  
Response, by President H. T. Helgesen.  
Roll Call of Members.  
Enrolling of New Members.  
Appointment of Committees.  
Question Box Discussion.  
Adjournment.

**Afternoon Session, 2 P. M.**

As much of this session as desired will be devoted to the Jobbers, Manufacturers and their Travelling Salesmen, for discussions on matters of mutual interest.  
Enrollment of new members and payment of dues.  
*Paper*—"Are We Boxers" by Senator G. W. Wolbert, Casselton.  
Jobbers, Manufacturers and Travelling Salesmen, discussions or papers.  
*Paper*—"The Relationship and Effect of Department Stores Upon the Trade," by H. S. Delsem-La Moure.  
Question Box. Discussions.  
Adjournment.

**Evening Session.**

Programme for evening will be announced during Afternoon Session.

**PROGRAMME.**

THURSDAY, FEBRUARY 21ST, 1901.

Both sessions this day for members only.

**Morning Session, 10 A. M.**

Payment of dues.  
President's Report.  
Secretary's Report.  
Treasurer's Report.  
General Discussions.

**Afternoon Session, 2 P. M.**

Report of Nominating Committee.  
Election of Officers.  
Paper—"Credits," by M. G. Evenson, Sheldon.  
Paper—"Co-operation," by W. A. Fox, Ardoch.  
Paper—"Percentages," by H. L. Eastman, Wahpeton.  
Paper—"Store Character," by J. F. Jaberg, Sanborn.  
Paper—"Advertising," by Chas. C. Vick, Hoople.  
Reports from other committees.  
Question Box Discussions.  
Adjournment.

**The Shelby Incandescent Electric Lamp.**

The Shelby Electric Co., Shelby, Ohio, whose striking full-page advertisement will be found in this issue, are engaged in manufacturing the Shelby Incandescent Lamp, an illustration of which we give in the course of this article, which they claim to be far in advance of everything of a like character that has so far been placed before the users of an electric light. Incandescent lamps are used to give light. The light, of course, is designed to enable the user to see, and the greatest possible improvement that could be made would be to increase the power of the lamp used, by which the most positive and perfect results may be obtained. It is claimed by the Shelby Electric Co. that a useful light

NO. 1.

is a light that strikes the object beneath the lamp, and as the intensity of the light decreases at the ratio of inverse squares of the distances, the useful light must be distributed within thirty degrees of the vertical beneath the lamp. After a number of tests to ascertain the positive advantages of a lamp based upon this idea, they find that conditions differ in regard to the question, and each reader is, perhaps, better fitted to determine for himself the fact that a lamp gener-

No. 2.

ally found to give the best satisfaction should be located directly above the object it is desired to illuminate, if that object is a horizontal plane. The object of the incandescent lamp is to create artificial light with which to make visible natural objects when the natural light ceases to make them visible, and for this purpose the Shelby system shows by

actual tests that a 10 c. p. Shelby lamp emits from the tip end of the bulb 8 c. p., which is more than any anchored filament or single coil or double filament lamp of 16 c. p. emits through the tipped end; and when the light emitted horizontally from a Shelby 10 c. p. lamp is reflected, and the quantity of light so reflected added to the direct rays, it will be found that the total light distributed upon a table located four feet beneath the lamp will be greater when the lamp is a 10 c. p. Shelby lamp than it is when the lamp is a 16 c. p. lamp, made with other forms of carbon. From the results of tests thus obtained, it is claimed that by aid of the Shelby system the following points will be conceded: First, That a useful light is the light that enables you to see the objects with which you wish to work. Second, That the objects are beneath the horizontal line of vision. Third, That the lamp is above the horizontal line of vision. Fourth, That the light rays travel in direct lines. Fifth, That as the intensity of light diminishes in proportion to the inverse square of the distance traveled, reflection doesn't

NO. 3.

justify much consideration. Sixth, That as the horizontal intensity of the Shelby lamp is equal to the horizontal intensity of any other lamp of like candle power, any gain caused by reflection when one lamp is used would be an equal gain should another lamp be used. These six propositions being accepted, all that remains necessary in order to prove the Shelby lamps do produce more useful light than other lamps is to state that the light emitted from the tipped end of the bulb is of greater intensity than that emitted through the tipped end of the bulb of lamps made with other forms of carbon. The company distribute a series of pamphlets in connection with this system, which it would be well for our readers who are interested in the perfect conditions of an electric light to request.

"There, now, Clara, how would you like to be these people who can't get home from Paris because their funds gave out?"

"Well, dear me, Clarence, they are better off than we are, whose funds gave out before we started."—*Indianapolis Journal*.

## SAN FRANCISCO H'DW'E REMINISCENCES.\*

Mr. President and Fellow Hardwaremen: This is the first banquet of the San Francisco and Oakland Retail Dealers' Association—a Red Letter day in our guild, and marks a new era. I hope it is the commencement of something good for all of us, and it certainly is if we will appreciate the opportunity given to help ourselves and each other. Each one must feel himself an important link in the chain, and by so doing the chain will be strong.

This is the first time in all my experience of nearly thirty-five years in San Francisco as a Hardwareman that I have seen the retail Hardware dealers gathered together to eat, drink and be merry—to act as a unit. It is certainly an inspiring sight to see these long rows of good-looking men, to see in each face the sign of good fellowship, and to know that you are all retail Hardwaremen of San Francisco and Oakland. Who says the world does not move? Who says the millennium is not dawning?

Before entering into the contemplation of the subject assigned me this evening, permit me to indulge in a few reminiscences, dwelling not too long on the past, but briefly presenting to your mental vision that which will serve as a fitting background to the pleasant picture of the present moment.

About the year 1865, I first stepped into a Hardware store as a clerk; it was my brother's store, R. F. Osborn & Co., 751 Market Street. This location was then considered out of town. The centre of the business district was then about at the corner of Kearney and Washington Streets, and the nearer you got to Market Street the farther you would be from the centre. We all take an interest in pioneers of every line, and this is the proper place to recall those of our line. Some of you remember them, but I think the majority here will find them strangers. They were as follows:

Hiram Rosekranz, Montgomery and Bush Streets; Klein, Bush, near Pine Street; Helmken, Kearney, near Sacramento Street; Dillon, corner Kearney and Post Streets; Simmons & Rowe, Charles Hawley & Co., Justinian Caire, Mr. Webb, R. F. Osborn & Co., Marwedel & Otto and G. W. Guion. The latter was an old Englishman who had the only complete stock of mechanics' tools on the Pacific Coast. He was very peculiar, and if a customer asked to see a tool that was not convenient to get at—either in the window or on a high shelf—he would ask: "Do you want to buy or only look at it?" and he would not get it if the customer expressed a doubt. How do you think that plan would work now?

This covered a period up to 1872. From that time on other firms came in existence, many of which are members of this Association.

Instead of three jobbing houses, the present number, there were in those days about ten—Russell & Erwin Mfg. Co., Richard Patrick & Co., Jacob Underhill, Fleischmann & Sichel, Rockwell & Coye, Treadwell & Co., Conroy & O'Connor, L. B. Benchley, Hooker & Co., and Marsh, Pillsbury & Co.

I believe nearly every one of these pioneer Hardwaremen, both retail and wholesale, have gone to that "undiscovered country from whose bourne no traveler returns," and which ultimately will be our fate. But this fact will not mar the good pleasure of this hour.

The conventional signs in the days of which I am speaking were large Fore Planes, Padlocks and Anvils. In those days a great many of our tools, and much of our stock in

trade, came from England. The saw was a Spear & Jackson. I well remember when Henry Disston first brought his saw to California. He came into the store, and said he had a fine saw to show us. He took off his coat, laid it on the counter, and proceeded to show off his saw as one who had every confidence in his production.

The principal screws sold were of the blunt point pattern; our padlocks were of wrought iron principally, and of but few patterns; our mortise locks were 3½ inch, with iron or brass faces; knobs were of three kinds—buts, loose joint. How simple was the building trade then, as compared with it now!

We had few boxes for shelf goods; all were in paper wrappers. The samples were tied on, and one of the first things an apprentice was taught was to tie up a package in a true Hardwareman style. A peculiar loop was made to go around the sample, so it would hang straight, and when the tie was made, the ends were twisted and tucked under the twine.

The first Stanley iron planes were sold for \$25 for a set of three; No. 12 26-inch saw sold for \$4.50 and \$5; No. 62 rule, \$1.25. Oh, for such prices now, at present cost! In pioneer days all goods cost considerably more than at present.

I have given you a slight idea of the personnel and customs of the Hardware trade prior to and about the year 1872. From that time on there were general changes, firm after firm changing hands or going out of business.

About 1866 a Retail Hardware Association was formed, but it did not last long, and I remember but little about it. From 1870 to 1890 was an era of general prosperity to the retail trade. Up to the latter date manufacturing had been extensively carried on in lines very profitable to our trade. Large furniture and carriage factories were employing hundreds of mechanics who used tools and consumed large quantities of material. Low freight closed them out, largely destroying our trade.

We all know the conditions that have existed since 1890, and the causes that impelled us to form this Association. And what are our objects as an Association? I say objects, because there should be more than one object; there must be more than one object to insure permanency and continued success. The primary object is, of course, to make money; but that object, if not associated with and strongly influenced by broader and nobler objects, will fail to bring life, health and usefulness to our Association. Our declaration of principles in a general way states our views, but I will mention other objects which I think you will agree with me are necessary to keep in mind. We should have good fellowship, maintain prices, work together, learn from one another, be a strong link in the great national chain of Retail Hardware Dealers.

To get at results quickly, avoid bad debts, and last but not least, keep up these banquets. Let these be the objects of our Association, and for them let us all work. We must not expect perfection. He who aims and shoots at the sun will never reach it, but such an one will shoot higher than he who does not aim his arrow above the level. We may not accomplish all that some of our members would like to see accomplished, but as an Association we will do more than we could by individual effort.

There was a time when every locksmith, grocery, dry goods and drug store was not selling our goods, but that time is past, and now we see our staples used by other lines as leaders to sell their own at a profit.

These are, I think, the principal objects, and for their fulfillment as far as possible we are organized, and to speed them along, we have met to-night—to eat, drink and be merry.

\*An address delivered by Frank F. Osborn, President of the Osborn Hardware & Tool Co., at the banquet of the San Francisco and Oakland Retail Hardware Dealers' Association at San Francisco, Cal., December 7, 1900.

### The Torrent Pump and Fence Co.'s New Plant

The Torrent Pump and Fence Co., who are now at their new location, 1911-1925 Harvard Street, Cleveland, Ohio, announce under date of January 1st, that, having purchased the property and business of the Torrent Pump Co., successors to R. H. Roberts, whose business was established in 1861, and also the plant and business of the Williams Pump

THE TORRENT PUMP AND CO.'S NEW PLANT.

Co., successors to the Van Nette Water Purifier Co., have moved into their new factory, an illustration of which we give herewith. They take pleasure in stating that they now have every facility for turning out their important lines of goods with expedition and dispatch. They request the patrons of the old companies to which they succeed to continue the esteemed patronage with which they favored their predecessors, and assure them that everything in their power to please them will be done. The officers of the new company are as follows: J. M. Wright, president; G. P. Nash, vice-president; E. W. Branch, secretary; I. K. Hurt, general manager, and R. C. Bookwalter, auditor. The capital stock of the new concern is \$30,000. The New York office is at 7-9 Warren Street.

### The Enterprise Electrically Connected Rapid Grinding and Pulverizing Mill.

The progressive and up-to-date dealer is constantly on the alert for fixtures that will lessen the labor of himself and his clerks, and, at the same time, add to the appearance of his store, which, in the new century, is essential. The Enterprise Electrically Connected Rapid Grinding and Pulverizing Mill was designed to meet the demand for a mill that would either granulate or pulverize, and do so at a minimum cost. Twenty-five pounds of coffee can be ground ordinarily fine for one cent. They are made in a variety of

THE ENTERPRISE GRINDING AND PULVERIZING MILL.

sizes and styles, and the grinding capacity is from 3 to 10 pounds per minute, according to size. The machines are fitted with motors for either direct or alternating current, and to suit the conditions existing in any locality. Those for direct current are so constructed as to enable the operator to instantly change the speed from fast to slow, or vice versa.

The fast speed is intended to be used only when coffee is to be granulated, and the slow speed for pulverizing. The motor and mill have a direct connection, thus reducing loss of power to a minimum, which is a considerable saving as compared with mills run by motor having a belt connection.

### "Search-Light" Spring Extension.

Search-Light Mfg. Co., 358 Dearborn Street, Chicago, manufacture the "Search-Light" Spring Extension, illustrated in their ad. in another part of this paper. This Spring Extension runs smoothly and noiselessly, and automatically locks at any desired position, without the jar found in other extensions. This makes it peculiarly well adapted to Vapor Lamps, which carry mantles. The Extension, it is claimed, saves its cost in saving breakage of mantles in a short time. It is also well adapted for kerosene lamps, and it is predicted that discriminating buyers will insist upon having the "Search-Light" Spring Extension. When the Extension is locked, the Lamp may be removed and carried away to be filled, the Extension remaining in position to receive the Lamp, instead of flying up to the ceiling. The tension can be adjusted for any weight of Lamp. The design is an artistic one, and the finish is high-grade. The device is furnished in lacquered brass, bronze, nickel-plate or oxidized. As such a vast number of Vapor Lamps have been recently marketed, it is predicted that this Extension will have a phenomenal sale. The same company are placing on the market the

"SEARCH-LIGHT" SPRING EXTENSION.

Search-Light Vapor Lamp. Their Student style is shown with this article. The Lamps are especially designed to keep hot in a cold draught. They will burn steadily in any climate, and will not lose their heat and waver. The generator is cast solid, in which are all the working parts of the Lamp. The gas vent is a brass tip, easily replaced if necessary. The point of the tapered needle valve projects through the vent, automatically cleaning it each time it is turned low or out. It is claimed to never clog at the vent. The flow of gas is controlled at the vent, and the light can therefore be turned down to a blue flame, which will keep the generator hot enough to be turned up instantly. By turning out the light and filling quickly, and immediately relighting, no wood alcohol is required after the first lighting. The chimney frames are of stamped brass, each being an exact counterpart of the other. Their construction enables the mantle and glassware to be removed even while the light is burning. The draught and mixing device eliminate the annoying roar. This lamp burns 10 per cent. of hydro-carbon gas and 90 per cent. of oxygen, producing 100 candle-power light for fourteen hours on one quart of gasoline. The company fully guarantee this light and agree to keep it in repair for one year free. They make a variety of Lamps, including a 500-candle-power construction for lighting stores, etc. Many Hardware dealers find this a very remunerative line to handle. It seems to fit in well with their gasoline stoves and other goods. The reader will do well to write for a complete catalogue; in doing so, please mention *Hardware*.

## RECENT TRADE PUBLICATIONS.

JONES NATIONAL FENCE CO., Columbus, Ohio. Thirty-two page catalogue, covering a line of Plain, Coiled, Barbed and Ornamented Fences and Gates manufactured by this company. Well illustrated throughout, the goods fully described, list prices of each style being given. They also manufacture a line of specialties, including Bicycle Racks, Stock Fountains, National Wall Ties, Wire Girders, Wire Screens, etc.

F. E. MYERS & BRO., Ashland, Ohio. A series of pamphlet catalogues on thin paper for general distribution, under the following four titles: Myers' Power Pumps, Myers' Spray Pumps, Ashland Pump and Hay Tool Works and Myers' Force, Lift, Spray and Tank Pumps and Hay Tools. These are 16 pages each, and fully illustrated with all their many appliances quoted in accordance with the above titles. The descriptions throughout are full and complete and list prices are given upon every article illustrated.

SUN VAPOR STOVE MFG. CO., Detroit, Mich. The 1901 catalogue of their line of Sun Improved Odorless Quick-Lighting Gasoline Stoves. In this catalogue several additions to the assortment manufactured the previous season by this company, will be found illustrated and described, together with all the points that indicate the superiority of this line of stoves. The catalogue is well printed on good paper with very attractive illustrations, full descriptions throughout of each style represented, together with list price of each.

McINTOSH-HUNTINGTON Co., Cleveland, Ohio. The 1901 catalogue of Bicycles and Bicycle Sundries. Pamphlet catalogue of 64 pages covering a line of such goods as would naturally be found in the Bicycle department of a large jobbing house like theirs, covering everything desired on or about a wheel, and all the possible repairs that may be needed. Included in its contents are Brazing Forges and Enameling Ovens, Vulcanizers, etc. Incidental references are made to Fishing Tackle and Golf Goods, Guns and Revolvers, Sewing Machines and Baby Carriages, on all of which lines special catalogues are issued by this company, fully illustrated and priced throughout.

MONARCH REFRIGERATOR WORKS, Burlington, Vt. The 1901 illustrated catalogue and price list of the Monarch Cleanable Dry-Air Refrigerators, comprising Domestic and Sideboard Refrigerators, Water Cooler Refrigerators, Grocers', Ice Chests, etc. This catalogue embraces a complete assortment of popular sizes and styles. Is printed on excellent paper. The contents embrace the usual line of refrigerators marketed through the Hardware and housefurnishing goods trade, and the ordinary styles up to those containing the latest improvements, and constructed in an artistic and desirable manner, the Sideboard Refrigerators being extremely handsome and very attractive, and many of the other styles would command attention from their novelty of design and apparent utility.

PITTSBURGH STOVE & RANGE CO., successors to De Haven & Co., Ltd., Pittsburgh, Pa. Pamphlet catalogue of 128 pages, embracing the extensive line of Stoves and Ranges that are marketed by them under the name of the "Cinderella," including in the assortment Steel Ranges, in all the modern improved styles of construction, Cast Iron Ranges in large variety and modern degrees of excellence, and a line of cheaper Heaters for coal or wood is also shown among its contents, including Double Heaters and Franklins and Cylinder Stoves. Included in its contents is a line of Gas Ranges

in a complete variety, modern in style, and in addition thereto Hot Plates are also illustrated and priced throughout. The catalogue is an extremely handsome one, and many of the illustrations are superb half-tones, in which artistic excellence is a predominant feature.

McINTOSH-HUNTINGTON Co., Cleveland, Ohio. Publish a pamphlet catalogue of 84 pages of full catalogue size, evidently intended for general distribution; being printed on thin paper for mailing purposes, and is their catalogue of Fishing Tackle. It is replete in every respect with articles in the line of Sporting Goods of that character, including Bamboo, Jointed and Steel Rods of all the various styles and sizes in which they are marketed; Hendryx Reels in large variety, "Troba" Reels, Fishing Lines and Seine Twine of every possible style, together with a full assortment of Furnished Lines, Wood and Cork Floats, Sinkers of every description, Fishing Tackle Assortments put up in boxes, Trout Baskets, Slings, Straps, etc.; Tackle Boxes in large variety, Fish Hooks, Trout Flies, Spinners, Soft Rubber Baits, etc., etc. Included in the assortment is a large variety of Spoon Baits of every description including "Luminous" Fly Books, Fish and Frog Spears, Stringers, etc. The final pages of the book are devoted to Hammocks, Golf Goods, etc.

HIBBARD, SPENCER, BARTLETT & Co., Chicago, Ill., have issued this year, as has been the case for ten years past, their Buyer's Want Book, which is distributed to the customers of this well-known house. The edition this year is much larger in size, having more pages, and embraces a larger variety of goods on the pages devoted to their illustration than has been the case formerly, making it really a portable and handy catalogue of seasonable goods. This is not designed to be a daily calendar, but a general want book, in which the retail houses who form the body of their customers can place the customary and developing wants so certain to be noted in a general Hardware stock. Each right-hand page is ruled for this particular purpose, and the opposite pages are filled with illustrations and descriptions of goods, with list prices and such other data as would be desirable in a general publication of this kind. It is arranged in accordance with their larger catalogue of which this forms a desirable compendium. There is an exceedingly good index at the end, which is a valuable addition to its usefulness.

KEYSER MFG. CO., Chattanooga, Tenn. The 1901 catalogue of the "Odorless" Refrigerator manufactured by this company. Pamphlet catalogue of 40 pages, printed on excellent paper, and finely illustrated throughout, describing in full the manifold merits of the "Odorless" Refrigerator as compared with any other on the market, and representing a new line entirely, indicating an advance in the scientific preservation of food worthy of perusal. They are made in the latest and most improved style to which these goods have been subjected, including provision chambers that are zinc-lined, in 33 varieties, white enamel-lined in 28 of the various styles, and nickeloid-lined in an equal number, nickeloid being a nickelized sheet zinc, composed of zinc with pure nickel on one side. It is claimed to be as clean and bright as a new chafing dish, will not peel off nor lose its brightness. The company claim this to be the best non-conductor of cold ever invented, and not being subject to corrosion or rust makes it far in advance of the older styles of construction. Illustrations are given showing the improved plan of circulation embodied in the construction of these refrigerators.

## NEW GOODS AND SPECIALTIES.

### Barnes Patent Lawn and Vine Trimmer.

The E. H. Erk Hardware Specialty Co., Richmond, Ind., are placing upon the market through the Hardware and Implement trade, a very useful specialty for garden purposes, which is marketed under the name of the Barnes

(BARNES' PATENTS.)

Unexcelled for trimming the edges of a lawn next to the fence or curbing, around trees, shrubbery, or any place inaccessible with a lawn mower. Can also be used to trim bushes, grape vines, etc., without the use of a ladder.

This man uses a Canton Trimmer and does not suffer from backache.

SIMPLE,  
PRACTICAL,  
DURABLE  
AND  
INEXPENSIVE.

MADE FROM  
FIRST-  
CLASS  
MATERIALS  
AND  
IN FIRST CLASS MANNER.

A FINELY TRIMMED  
LAWN,  
EVERYONE'S  
PRIDE.

This man uses a Sheep Shears and has all kinds of aches.

### BARNES PATENT LAWN AND VINE TRIMMER.

Patent Lawn and Vine Trimmer, an illustration of which we present herewith. It is designed by the inventor to be used in trimming with ease and comfort the edges of a lawn adjoining the fence or curbing, around trees or shrubbery and in fact any place about the garden, in which it is difficult to use the lawn mower. It is also sufficiently convenient for utility to enable its use as a trimmer of grape vines, bushes, etc., without any necessity for using the ladder usually employed. For many of these operations a pair of hedge shears or sheep shears have been the only convenient tools obtainable, which compels an uncomfortable posture in their use, while this improved trimmer enables the gardener to keep an erect position, and operate with greater facility and positive ease of position. It will prove a taking specialty wherever introduced.

### Improved Ran-tan-ka-rus Razor.

The Smith & Hemenway Co., 296 Broadway, New York, have placed upon the market an improved form of razor, which is sold under the name of the Ran-Tan-Ka-Rus Red Devil Razor No. 427. It is manufactured in Sweden. The

FIG. 1—SHOWING CONSTRUCTION.

blade of this razor, as indicated in Fig. 1, is formed from a combination of about sixty small wires, which are cold drawn and hot forged into bar steel. This process, it is said, produces a Damascus effect, and is a new departure in the razor world. This method of manufacturing will be indicated by the formation shown in the above cut. The razor, when finished, presents the appearance of the usual razor that is sold in the trade, see Fig. 2, the appearance in every sense of the word being a superior one. The extra grinding to which it is submitted is referred to as an extra long Hamburg roll, which method of grinding, it is claimed, makes it impossible

to "dub" the edge in stropping, as the long roll acts as a guard toward keeping the cutting edge from striking the strop unnecessarily. It is guaranteed by the manufacturers that it is never necessary to hone this razor, and should it

FIG. 2.

become worn sufficiently to require honing, it will be exchanged for a new one. This razor has a large sale among barbers, being peculiarly suitable for their use, and is made in all the usual trade sizes for the many dealers handling such goods.

### Improved Manicure Instruments.

The Emil Forquignon Mfg. Co., 835 Broadway, New York, are large importers and manufacturers of manicure instruments of every description, among which the pocket manicure outfit, illustrated herewith, is one of the most popular. This is a nail file, designed for the purpose of cleaning, scraping, filing and shaping quickly in the operation of manicuring. It is provided with a bevel-edge cleaner, which removes the gatherings from underneath the nail without scratching or roughening. It also has a square edge back for scraping the top of nail and removing the burr after filing. The point is rounded for the purpose of lifting the cuticle adhering to

PATENTED JULY 4TH, 1899.

FILE IN LEATHER CASE, EXACT SIZE.

the root of nail, and scraping underneath without cutting. The rounded end is beveled for the purpose of pushing back the cuticle during the operation. These goods are highly finished, and are placed upon the market enclosed in a leather case. They are intended to be sold at a moderate price, and still pay the Hardware dealer a satisfactory profit. The manufacturers will mail their catalogue upon request, showing entire line of goods of this description and including in addition to manicure instruments, nail nippers, corn knives, and a variety of other goods of this class that may be added to a Hardware stock with the expectation of a profitable sale.

### Woodless Truss Frame Buck Saw.

The L. Weissenbach Co., 152-154 Lake Street, Chicago, Ill., are distributing through the Hardware trade the Woodless Truss Frame Buck Saw, upon which a patent was allowed January 20, 1900, and an illustration of which is presented here. The frame is a continuous piece of tubing bent in a manner that enables it to combine the greatest strength with the most perfect ease in operation, permitting by its peculiar construction the sawing of wood of fully two inches greater thickness than is possible by the ordinary wood saw, and in addition to which there are no joints to twist or stretching

rod necessary to prevent the frame from coming apart and avoiding the frequent tendency of even the stretching rod to break, or strip its threads. The blade is of the best blue-tempered round breast clock spring steel, and so fastened in the frame that it is prevented from becoming loosened, or the tension from becoming impaired. It is possible for the

TRUSS FRAME BUCK SAW.

saw to be filed without the necessity of removing the blade from the frame, and it is so constructed as to permit the use of any of the ordinary saw-filing devices. The saw in its appearance, utility and efficiency, presents novel features that are certainly unique, and in many respects is in advance of anything of a similar kind on the market.

#### Short-Blade Socket Firmer Chisels.

C. E. Jennings & Co., 101 Reade Street, New York, are meeting a demand in the trade for a set of short-blade socket firmer chisels, which is a special assortment of these goods that has long been desired. We give an illustration of the same herewith. The blades are 4 1-2 inches in length, and enable a mechanic from their handier size to get in closer connection with his work. The chisels are also considered to be the most desirable size for amateur use, also trade schools, which are more inclined to use tools more portable in their character than the general run of those used by skilled workmen. These chisels are put up in two forms: the No. 101 set having hickory handles, and the No. 401 set being

SHORT BLADE SOCKET FIRMER CHISELS,

provided with lignum vitae handles, the chisels proper in either set being the same. They come six chisels in a set, one each of the following sizes: 1-4, 1-2, 3-4, 1, 1 1-4 and 1 1-2 inches. Manufactured as they are from the finest quality of material, they are put forward by the manufacturers as being goods that are deserving of every recommendation. Quite a demand is anticipated for these special size tools from foreign buyers, who have created the necessity for the manufacture of goods of this description by repeatedly demanding them.

#### Sensitive Bench Drills.

The D'Amour & Littledale Machine Co., 129 Worth Street, New York, are manufacturers of the Sensitive Bench

Drills, which we illustrate herewith. Fig. 1 shows a 10-inch Sensitive Bench Drill mounted on column, which is designed for light rapid drilling and similar work within its capacity and is the result of several years' experience in manufacturing this class of drills, it being especially adapted for the use of manufacturing Jewelers, Electricians, Mathematical Instrument makers and light drilling generally. Fig. 2 shows their 10-inch Sensitive Bench Drill, intended to be fastened to the bench and designed for light, rapid drilling up to 5-16 inch hole. The spindle is driven by a 1-inch flat belt. It has two speeds, a cut steel rack and combination feed, and an adjustable stock to gauge the depth of holes. It is entirely relieved of belt strain, and is counterbalanced by a weight inside of frame, making it extremely sensitive and uniform to the touch. It is also provided with means for taking tip

FIG. 1, ON COLUMN.

FIG. 2, ON BENCH.

wear of lost motion, and has a nut below the taper for removing the chuck. These bench drills unless otherwise ordered are sent with the spindles fitted to 5-16 inch "Almond" and 11-32 inch "Skinner" drill chucks. The taper holes in both the "Almond" and "Skinner" chucks are the same. The counter-shaft is attached to the frame, and can be placed directly under the line-shaft, thus avoiding the trouble and expense of putting up a counter-shaft. They are designed to be run at a very high rate of speed, as the pulleys are turned inside and out, and all the rotary parts are perfectly balanced. Further information furnished on request.

#### Improved Bench Punch.

Charles Morrill, Broadway Chambers, 275 Broadway, New York, is manufacturing the improved Bench Punch, an illustration of which we give below. It is provided with interchangeable dies and plungers, varying in size from 1-8 to 3-8

IMPROVED BENCH PUNCH.

inch in diameter, although any size to 3-8 of an inch inclusive can be made to form part of the equipment. This improved tool is made from the best quality of iron and steel, and is designed for the punching of sheet metals. There is a gauge secured by a set screw on the right, which permits of a space of 1-2 inch between the edge and the punched hole. It has a very powerful leverage, being provided with a lever 21 inches long, and the device can be screwed or bolted to bench or table to accomplish the desired results. In addition to punching sheet metals, it is recom-

mended by the manufacturers for punching cardboard, veneering, paper, celluloid or in fact any fibrous material not over 1-2 inch thick. It would be found a popular specialty if brought to the attention of those who would be benefited by its use.

#### Magic Trolley Ladder.

Portland Ladder Co., 28 Plane Street, Newark, N. J., are introducing to the Hardware trade an entirely new Safety Fast-Rolling Store Service Ladder, which presents original features in its construction that make it especially adapted to all kinds of stores, bank vaults, public libraries, manufacturing, offices, etc., in which an application of this unique description would be found useful and beneficial. By the aid of this new appliance, it is possible for any one to reach the highest shelving, or travel the entire length of the store in the most expeditious manner. It enables one person to hand or deliver to several customers more goods in a given space

MAGIC TROLLEY LADDER.

of time than can be done without a labor-saving device of this character. Among the special features that may be noted in this store ladder service under review, its form of construction enables it to be used in a smaller space than many other similar devices now being marketed. At the same time the ladder can be used at any desired angle, or in any particular position, as may be desired. The ladders are so arranged as to run on noiseless, ball-bearing, rubber-covered rollers that do not require any corresponding track upon the floor. They are made of extra well-seasoned white ash, with a light wood finish, and are designed to be an extremely ornamental addition to the modern store equipment.

#### Peoria Vapor Lamp.

Peoria Vapor Lamp Co., Peoria, Ill., are the manufacturers of the Peoria Vapor Lamp which has been upon the market for some little time, and has been largely introduced throughout the United States and Canada. It is made entirely of brass, highly finished and lacquered, and sufficiently ornamental in appearance to adorn any church, store or parlor. In fact, it is so constructed that it may be hung up anywhere, and not be out of keeping with its surroundings. It is claimed to produce a pure white light of 100 candle-power at an extremely moderate cost. The manufacturers of this lamp had long experience in the business, and feel that they have succeeded in making a product which, while

simple in methods of construction, is still perfect in all the results that one could expect from an artificial light equal in many respects to electrical effects. It is claimed to be a soft and desirable light for the eyes, and being without the usual odor connected with the use of an ordinary oil lamp, makes it a very desirable acquisition for the purpose in any place where a perfect light can be made a source of enjoyment. The use of gasoline has created the necessity for a

THE PEORIA.

THE GEM.

lamp of this description to be popularized among consumers, as one gallon of gasoline, costing about 12 cents, with one of these lamps under review, is claimed to burn 72 hours, which, compared with city gas, makes a cost of about 5 1-2 cents per thousand feet for a corresponding light. The manufacturers are desirous of obtaining good, live agents throughout the United States, Canada and Mexico, and would be pleased to correspond with those in the trade who desire to add this specialty to the popular lines already handled by them.

#### The "Fama" Tripod.

B. P. Hogan, Erie, Pa., is manufacturing the "Fama" Tripod, which forms the subject of this article. Now that the Hardware trade is adding to their assortment of high-grade goods many articles of the photographic camera department, with its multiplicity of new devices, it is absolutely necessary that they should have their attention called to what is claimed to be the most convenient tripod for all sizes of Hand Cameras and Kodaks. It differs from all others in several important features that will appeal to every amateur photographer who uses a tripod. It is manu-

FIG. 1.

factured and finished in the best approved style, great care being taken in the selection of the spruce lumber of which the sticks are made, and they are neatly finished in orange shellac. The brass work in connection with its construction is highly polished and lacquered, and finely finished. The tripod is extremely compact, as when folded it occupies a

**PATENTS**

Preliminary Consultation Free.

**HENRY J. MILLER,**

55 Equitable Building,

BOSTON.

space of only 2x17-8x20 inches, including the head, so that the only thing necessary for the operator to carry beside the bundle is the camera screw, which is sufficiently portable to be carried in the camera, if required. It will be noticed by Fig. 1, showing the head and top of the legs, that the head

FIG. 2.

is made in three sections, adapted to engage in each other in such a manner that when the camera screw is put in place a complete head is formed, and the tripod can be handled the same as any tripod having a solid head, permitting the respective legs to fold down perfectly flat when disengaged. Among the other devices which claim consideration over the ordinary tripod, is the clamping device shown

FIG. 4.

in Fig. 2 used for the joints of the legs. There are no set screws that might possibly jar out and get lost, or even catch on obstructions and break, neither are there cams to loosen, and this is a feature that will be appreciated by the user. This cut represents the clamping mechanism of the upper joint. The knurled nut works on the screw securely riveted into a brass fitting, and when screwed up works against a brass washer and compresses the sticks, forming the upper section against the middle section. Thus, by reason of the slanting sides of the tongues and grooves, a greater degree of frictional surface is obtained than is

possible with straight, flat sides. In Fig. 3 another feature is noticeable, that this threefold tripod, notwithstanding it is near standard height, can be carried under the top tube of an ordinary Diamond-frame bicycle, which convenience in carrying, it is argued, will be appreciated by the large class

FIG. 3.

of amateurs who use the bicycle, but have avoided using a tripod in connection with it on account of the clumsiness of many previously on the market. The "Fama" tripod is 55 1-4 inches high, when opened, of a standard height of 56 inches, and its general appearance is shown in Fig. 4.

**Horseshoes, Nails and Hatchets.**

In one of those remote and well nigh impenetrable fastnesses with which the Law Courts building abounds was holden yesterday, at half-past two of the afternoon, a ceremony of exceeding solemnity and very grave import. This was no less than the payment by the Corporation of the City of London of the quit-rent service due to the Crown in respect of two tenements, the Forge and the Moors.

It is many years ago now—seven or eight hundred, to be precise—that Henry III. granted to Walter Le Brun, the blacksmith, a piece of land in the Strand with permission to build a forge thereon. Walter, in return, being a poor man and quite unable to provide a troop of horse or anything of that sort, must render annual service of six horseshoes and sixty-one nails for the same.

The Moors were a little place in Shropshire granted by the Crown to another mediaeval gentleman in return for two hatchets annually, of which one was to be good and the other not so good.

In course of time both the Forge and the Moors passed into the hands of the Corporation of the City of London. Both are now hopelessly lost. But the Corporation, in very zeal of honesty, insists that the Crown shall not be the loser for that. Besides, iron is a good deal cheaper than it used to be.

The hatchets, brand new and very fair to see, lay upon the table. Obviously, one was good. The other seemed to be not quite so good; it was, in fact, a mere billhook. In the immediate vicinity lay two of the thinnest faggots that the world produces—these to try the temper of the hatchets. Six pre-historic horseshoes of enormous proportions and a bristling pile of sixty-one nails of the latest patented pattern completed the collection.

The Queen's Remembrancer, Master George Pollock, explained the importance of the ceremony, for the benefit (as he said) of the ladies present. The clerk read from an ancient book.

Then "Perform your service!" thundered the Remembrancer.

Up rose the City Solicitor, and raising aloft his good hatchet smote upon a faggot, and severed it at one blow, and the piece flew about all over the room. The billhook (being not so good) naturally required two or three blows.

"Properly done," said the Remembrancer.

The Solicitor clanked the elephantine shoes and counted the nails in tens, and one over; the while every eye was riveted there, and every face was set and stern.

"A good number," said the Remembrancer.

Then he got down and explained what big horses they had in those days, and how valuable these nails had now become. —*The London Mail.*

## REVIEW OF THE MARKETS.

**Wire Nails:** There is nothing apprehensive about the conditions of the wire nail market. The trade is moderate, and the demand steady. The supply is held well in hand with every encouragement for a satisfactory volume of trade in the immediate future. Prices remain the same as previously quoted, and are as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots	\$2.20
" less than carload lots	2.25
To retailers in carload lots	2.30
" less than carload lots	2.40

New York prices continue without change:

To retailers, carload lots on dock	\$2.48
" less than carload lots on dock	2.55
Small lots from store	\$2.60 to 2.65

**Cut Nails:** As good a demand exists for this staple line as is usual at this early part of the season, few orders being entered for more than a month's supply, no immediate change being anticipated, quotations remain as follows, f. o. b. Pittsburgh, terms 60 days, 2 per cent. off in 10 days:

Carload lots	\$1.95
To jobbers in less than carload lots	2.00
To retailers in less than carload lots	2.10

New York quotations remain as previously reported:

To jobbers in carload lots on dock	\$2.13
" less than carload lots on dock	2.18
To retailers in less than carload lots on dock	2.31
Small lots from store	\$2.30 to 2.35

**Barb Wire:** While ordinary orders for future delivery are going forward in fair supply, large stock orders are anticipated for a later date when the Spring roads are more favorable for transportation purposes. The market is held firmly at the prevailing quotations, which are as follows, f. o. b. Pittsburgh, net cash 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots, Painted	\$2.50
" Galvanized	2.80
To jobbers in less than carload lots, Painted	2.55
" Galvanized	2.85
To retailers in carload lots, Painted	2.60
" Galvanized	2.90
To retailers in less than carload lots, Painted	2.70
" Galvanized	3.00

Ellwood and Baker Wire is 5 cents and Washburn & Moen Glidden 10 cents per 100 pounds higher than the prices above named.

**Plain Wire:** There is a limited demand for plain wire with prospects for an increase of orders at an early date, no change in quotations, which remain as follows, f. o. b. Pittsburgh, terms 60 days, or 1 per cent. discount for cash in 10 days:

	Base sizes.	
	Plain.	Galv.
To jobbers in carload lots	\$2.15	\$2.55
" less than carload lots	2.20	2.60
To retailers in carload lots	2.25	2.65
" less than carload lots	2.35	2.75

Above prices are for the base numbers, 6 to 9. The other numbers of Plain Wire and Galvanized Wire take the several advances noted in the following table:

PLAIN FENCE WIRE ADVANCES (CATCH WEIGHTS).			
Nos.	Base	Galvanized.	
6 to 9	Base	\$0.40 extra	
10	\$0.05 advance over base	.40	"
11	.10	.40	"
12 and 12½	.15	.40	"
13	.25	.40	"
14	.35	.40	"
15	.45	.75	"
16	.65	.75	"
17	.75	1.00	"
18	.85	1.00	"

**Hobart B. Ives Co.,** New Haven, Conn. The following are the present quotations on the goods manufactured by this company, as shown in Catalogue No. 10:

	Discount Per cent.
Window ventilating and mortise door bolts	60
Sash locks, wrought steel, also with bronze metal knob	60
Sash locks, wrought bronze and brass metal 55 and 5	60
Sash locks, cast iron, also with bronze metal knob	65
Sash locks, cast bronze and brass metal	62½
Window stop adjusters	25 and 40
Sash lifts, wrought metal	5
Sash lifts cast and shutter bars	45

Terms, 60 days net, less 2 per cent. for cash in 10 days.

**Lanc Bros. Co.,** Poughkeepsie, N. Y. The following are the present quotations on goods named, manufactured by the above company:

Lane's Barn Door Hangers:	
Standard	60 and 10%
Covered	50 and 10 and 10 and 5%
Special	60 and 10%
Lane's Parlor Door Hangers:	
Ball Bearing	per set, net \$4.00
Standard	3.25
New Model	2.75
New Champion	2.40
Lane's Rail:	
O. N. T., 1 in.	Per 100 ft. \$2.65
O. N. T., 1½ in.	3.50
Standard, 1½ in.	3.75
Lane's Wagon Jacks:	
Steel	33 1-3 and 5%

**Cordage:** The market is well sustained, Sisal being exceedingly firm and liable to advance at any moment. The following quotations represent the market:

	Pounds.	Cents.
Manila, 7-16 inch and larger	9%	
¾ inch	10½	
½ inch and 5-16	10½	
Sisal, 7-16 inch and larger	6%	
¾ inch	7½	
½ inch and 5-16 inch	7%	
Lath Yarn, Medium and Coarse	6%	
Jute Rope No. 1	6½	
No. 2	5½	

**Linseed Oil:** The Dean Linseed Oil Co. quote as follows:

In lots of less than 5 barrels	57 cents per gallon.
In lots of 5 barrels or more	56 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time.

Bolled Linseed Oil, 2 cents per gallon higher than Raw.  
Calcutta Oil, 85 cents per gallon.

### THE BOSTON TRADE.

The first month of the new century opened with encouraging conditions, and the rush so noticeable in December seems to have received an extension of time, and, on the first trips of the travelling salesmen orders came easily, showing that stocks in the retailers' hands were in a broken condition.

At the present writing, however, there seems to be a lull and the usual midwinter dullness is evidently with us.

The jobbers having finished their annual inventory are guessing at the outcome and wondering what the many depressions in values will have upon the profit and loss sheet.

Owing to the weakness in values of certain lines the trade have lost interest in any advances which were anticipated early in the month, and there seems to be an unwillingness to place orders for certain Spring goods for fear of further declines.

The prices on Hexagonal Netting and Wire Cloth are in a very much demoralized condition, and it is to be regretted that after having sold 80 per cent. of the output on these goods the prices could not have been better maintained.

FRYE, PHIPPS & Co.

### THE PHILADELPHIA TRADE.

It is pleasant to report the year's business is starting off in very satisfactory volume—stocks are evidently low throughout the country, and the demand upon the dealers seems more than fair.

Owing to the comparatively mild weather prevailing so far, we hear some little complaint that Winter goods are moving slowly, but this does not seem to have any effect in retarding the sale of Spring goods, such as wire cloth, poultry netting, screen doors and windows, etc., all of which are in active demand.

The changes in prices have been comparatively few, and there is an open tendency on the part of some manufacturers to stiffen prices, claiming material is costing them more

money, and it is impossible for them to maintain the low prices now existing on some special lines.

On the whole, the outlook is encouraging, and a fair and possibly a large trade may be expected in the coming Spring.

BIDDLE HARDWARE CO.

#### THE PITTSBURGH TRADE.

January trade opens well, orders both by mail and through travelers are frequent and for good quantities showing a good consuming demand. We find a very hopeful and confident spirit for this year's business among all classes and can see no reason why there should be any backset for at least the first half of the year.

The coming competition among the giant manufacturers will, of course, bring low prices when it gets here, but for the present steel manufacturers are getting their prices easily and do not worry over the future. This applies to the heavier class of manufacture, such as structural steel, steel bars, etc.

In general Hardware we find very low prices prevailing in some items; some are down to the lowest prices reached in 1898, while others are nearing that point. With the higher rate of wages and material used, some of these items must be very close to cost of production and are a good buy for the merchant. In the whole line, however, prices are steady and a general expectation of good business for this year.

LOGAN-GREGG HARDWARE CO.

#### THE CLEVELAND TRADE.

Now that Carnegie is to build at Conneaut, Ohio, we have a concrete illustrated cure for combinations and trusts that will cure the childish, frantic fear of yellow journalism. If we can now give some attention to the question of municipal corruption and find a cure for that, it will be well. This will be found in common sense, broad enough to banish politics from municipal elections.

Corporations that serve the public manage our municipal governments by dividing the people on partisan lines, and will do so until the people use common sense in choosing the local officers. Until they do this we shall have corruption and bear the disgrace and scoff of other nations. It is the crying evil of republican government that unless a cure is found its failure is predicted. Apart from this, the skies are everywhere bright.

January trade excels all past years, and the promise is in keeping with the wish. The increase in wealth is more widely distributed than ever before among any people, and is creating many wants that the people are in condition to satisfy, increasing the demand for goods out of all proportions to the increase in population.

All indications point to a fair Spring trade, but not to a boom. Conservatism seems to be gathering force, and it is likely to increase before the summer months pass. The intense strain will react and high prices will yield. There is always danger in reaction of overdoing things, and it is wise by anticipation to avoid them. Caution among the captains of industry is suggested by the prevailing condition of trade in England and Germany. The era of high prices will be only temporary, and prudence demands that we expect this.

Trade will be large, but to be permanent it must be at lower prices, and it will be better to accept this gracefully than to attempt to forestall it, as that will only increase the injury when it comes.

The tendency to flock together in times of high prices and to believe present conditions will be permanent is chronic, but it does not work in practice. It is scarcely probable that any nation can continue to increase in wealth at so rapid a rate as we have in the last decade. If we do, we shall be a gold-plated people.

We are told that the increase in wealth in the last century in this country exceeds all the accumulation from Columbus' discovery of America to 1800. When we are all talking of

big things, this may seem pessimistic and it will perhaps read better six months hence, but it may not be amiss to reflect upon as a possibility.

THE LOCKWOOD-TAYLOR HARDWARE CO.

#### THE SAGINAW TRADE.

As 1900 draws to a close, and we pause to retrospect a moment, we are impressed by several interesting things. Notwithstanding a decided shrinkage in values, an increase in volume of business has been enjoyed, which means a much larger increase in tonnage. Although on many lines manufacturers have been slow in making deliveries, they have not taken advantage of the situation and pushed up prices, as in the previous year. Trade for the first half of January has exceeded that for the same period any previous year. It would look as though an exceptionally heavy Spring business could be expected, and a steady market at least.

MORLEY BROTHERS.

#### THE CHICAGO TRADE.

The general situation with respect to the Hardware trade of Chicago has not changed to any extent in the past two weeks, excepting that our salesmen's orders for Spring goods are attaining a larger size, and customers as a whole seem to be better satisfied to make preparation for future business on a larger scale. As a rule goods seem to be finely held by manufacturers and customers feel that if any changes are to be made, that such changes will be for the betterment of prices, as we get nearer the Spring trade.

One quite encouraging feature of business just at the present time, is the fact that during the past ten days we have secured quite a number of new stock orders, with several others in sight.

WELLS & NELLEGAR CO.

#### THE DAVENPORT TRADE.

The high prices that have prevailed in some lines of Hardware are gradually losing their grip, and are slowly but surely drooping and dropping. Were stocks in the hand of dealers as large as they were a year ago, oh! what a toboggan slide there would be about these days, but stocks are exceedingly light, and therefore there is no decided slump looked for.

Trade for the first month of the new year compares favorably with that of a year ago, and collections are satisfactory.

SICKELS, PRESTON & NUTTING CO.

#### THE SAN FRANCISCO TRADE.

The fine opening business of the New Year, as noted in January 10th issue of *Hardware*, remains unchanged, and dealers without exception are finding a good lot of Spring trade, and as to the jobbers, scarcity of freight room on outgoing ocean steamers tells the story of the heavy export trade being done by the port. Crops are looking well all over the State, the remarkably even distribution of the rains thus far this season having compensated for the deficiency in the rainfall.

As indicated in this correspondence two weeks ago the San Francisco and Oakland Hardware Dealers' Association has held a meeting and decided without dissent that the suggestion from the Pacific Retail Hardware Association for the two societies to link together in oneness of interest for the common good of all, met with a hearty ratifying demonstration, so much so indeed that the following five members of the local association were appointed a committee with power to act, to attend the third annual convention of the Pacific Retail Hardware Association now in session at Woodlawn, eighty-six miles northeast from San Francisco, and aid in formulating any desired affiliation or State association ties: O. F. Sites, President of the local society; S. V. Armstrong, Chas. A. Bennett, Max M. Brown and John P. Maxwell.

The third annual convention of the Pacific Retail Hardware Dealers' Association was called to order in Masonic Hall, Woodland, by President J. C. White, of Marysville, at 9:30 o'clock, January 16, to continue two days. There were

# NICHOLSON.

**SOLD ALL OVER THE WORLD.**

*Supplied to 24 Foreign Governments.*

**FAMOUS FOR TEMPER  
AND CUT.**

NICHOLSON FILE CO., Providence, R. I., U. S. A.

about eighty members of the Association in attendance; also a number of wholesale Hardware dealers, and a delegation from the San Francisco and Oakland Association.

At the executive session the first day, the important business was the election of officers for this year, as follows: J. C. White, Marysville, President; Oscar C. Schulze, Dixon, Vice-President; William Earll, Chico, Treasurer; R. W. Boyd, Marysville, Secretary. The President, Vice-President, and George A. Legg, Nevada City, constitute the Executive Committee.

The second day's session was in reality a conference with several representatives of the wholesale Hardware dealers of the State for the purpose of adjusting several matters of controversy between them, says an Associated Press dispatch, the meeting being conducted in executive session.

It is understood, however, continues the Press dispatch, that the retail association demanded certain concessions in the matter of extended time for payments and costs of car-load consignments of goods. By reason of having been organized in their several branches, the wholesalers have been in a position to arbitrarily fix prices, and because of that fact principally the retailers effected an organization. And it was furthermore understood that all of the retailers' demands were conceded and as a result of the conference an agreement was reached that hereafter all matters of controversy shall be adjusted by the Executive Committees of the wholesale and retail associations.

A joyous banquet, tendered by the local members of the Association, closed the session of the convention, the fourth annual to be held at Nevada City, commencing the third Wednesday in January, 1902.

TRADES PRESS ASSOCIATION.

## THE ST. PAUL TRADE.

We enter the twentieth century with the greatest hopes for the future. All unpleasant happenings have been laid away with the old year and old century, and new ideas must prevail. It seems as though such divisions as new centuries make, have the effect of putting new life into everybody; and, with a condition of stability such as exists, we fully believe that a good foundation for all kinds of business is laid, and we expect to see prosperous times for some years.

The market values are not higher than a good lot of business calls for, and we hope that the experiences of 1899 and 1900 have taught the lesson of moderation so that we will not have any extreme ups or downs in prices.

Our own section had a short crop last year and the result is that we expect rather limited sales for the Spring, but we have faith and believe that next Summer will see us on our feet in splendid condition. C. W. HACKETT HARDWARE CO.

## THE GRAPHITE INDUSTRY.

It is too early in the year to give any definite idea of the actual results of the year's business, as inventory taking is a

slow and laborious matter for a large manufacturing concern, but in a general way the results are eminently satisfactory. Everything that has been produced in graphite has been more in demand with a number of new ideas started experimentally. In electrical work there seems to be a special field for graphite, and we are ready to encourage inventors by manufacturing exclusive shapes and designs to order. Indications go to prove our repeated assertions—that graphite occupies one of the important places in the industries of the world and necessities of mankind. The year opens with liberal orders throughout the entire line of the standard products, and we see no reason why general business should not put 1901 on the record-breaking list. We are more perfectly equipped for filling orders, by the addition of a large new plant, which has taken nearly a year to complete. Our chief cause for any delays now arises from inability to procure supplies with any degree of promptness. The head of our purchasing department is one of our busiest men. The high price of linseed oil has made it necessary for us to issue a new price list on Graphite Paint to cover the increased cost of manufacture. Otherwise the prices of graphite products remain as before.

JOSEPH DIXON CRUCIBLE CO.

## A Boston View of the Local Check Problem.

This subject of collection charges is not only a hackneyed one at the present time, but is a very disagreeable one as between the banks and their customers, and they are both to blame for it; the customer first and the bank next, and I think I can make it clear to you that this statement is true.

Those of you who were in business long ago remember the old methods, one of which was that the merchants paid in full, and to that end when they paid their bills for merchandise bought in Boston or New York they went to their bank in their own place, bought a check for the full amount and so settled the debt. Now it is different. Every man in the country draws his check on his own little bank where he is located, and sends it to the city merchant to pay his bill. This state of affairs grew out of the competition for business between the merchants themselves, and they paid the city banks in the old times for the cost of collecting the checks, charging it as an expense of doing their business. So they were the first offenders.

Next came the competition between the banks which finally resulted in transferring the charge for collection upon themselves, so that up to a short time ago the city banks were paying the expenses of the country merchants all over the United States. This was iniquitous, and the Boston banks have moved forward in their attempt to effect a remedy, and have brought the country customer and the country bank face to face to settle their differences, without annoying the city merchant. It is a clear case of evolution.

In old times the country customer went to his own bank

and bought a check on Boston or New York, and, if he ought to pay for it, did so. If his account was valuable enough for his bank to do it for nothing, it was done. Next he sent his own check and the city merchant paid the cost. Next the city bank took it off the merchant's shoulders, and now the city bank has thrown it where it belongs, upon the shoulders of the country bank, which should make every customer's check good who is worth having, and get rid of, or charge, the others who are not.

It is another application of the old Suffolk Bank system of redemption when every New England bank bill stood on an equality, being absolutely good everywhere. This New England system of redemption of checks is an application of the Suffolk Bank system of redemption of bills, and can be as easily applied all over the country as it is here, by means of different groupings, and only needs to be tried to succeed, and here is where the merchant becomes a factor in the case. If every merchant in the country were to demand of his bank that his checks be paid in full, with the condition of transferring his account to another bank if they were not, the problem would be solved in a day. We have a bank currency which is good for its face in every part of the country, even though it is issued by an institution in Maine or Texas, or Washington or Florida, because it has a place of redemption at par. If all the merchants see fit to demand of their banks the redemption of their checks in full, whether presented at their counter, by mail, or by hand, the demand will be acceded to, and we shall have a currency of mercantile checks which will also be good at any point in the country. For a long time past the great cities in the country have been paying the whole country expenses, and it is not right. The merchants of the country have the power in their own hands to rectify the evil.

What will you do about it, gentlemen? CHAS. R. BATT.

### American Commerce of the 20th Century.

From an address delivered by Col. J. R. Nutting, of Sickels, Preston & Nutting Co., at the first annual banquet of the "Local Knights of the Grip," at Davenport, Iowa, January 5th, 1901:

"Post D, Travelers' Protective Association of America—Ladies and Gentlemen:

"When Mr. Zeuch of your committee honored me with an invitation to say a few words to you on the occasion of your first annual banquet, he said I would not be expected to talk on a subject relating to the past or present of which I might possibly know something, but rather of the future, of which no one could speak with positive accuracy. Hence, if there should be any doubt about the truthfulness of any statement I may make as to 'American Commerce of the Twentieth Century,' you will please hold Mr. Zeuch responsible for the same.

"A few days ago, in a church in Richmond, Va., I stood in the pew occupied by Patrick Henry, where, on March 23, 1775, he delivered his famous speech on the Declaration of American Independence. In that address he said: 'I have but one lamp by which my feet are guided, and that is the lamp of experience. I know of no way of judging of the future but by the past.'

"Adopting the sentiment of this most eloquent and patriotic orator, I find to-night no other means of judging of the future than by the past.

#### LESSONS OF THE PAST.

"The present century is but five days old, and hence affords very little experience to contribute to our prophetic knowledge of the future, and therefore we must draw on the old 19th century, so rich in history and in sacred memories, for guidance in speculating on the development of the source of all the material comforts of this earth—its commerce.

"As a basis for our faith in the future rapid growth of commerce in this, our much beloved country, we take the

figures of the Secretary of the Treasury, Mr. Gage, in his report of the fiscal year ending June 30, 1900, in which he shows that, from the very small amount of business transacted at the commencement of the 19th century, our total exports have increased until in the year 1900 they were one billion three hundred and ninety-four million dollars, of which amount there was four hundred and thirty-three million eight hundred and fifty-one thousand dollars' worth of merchandise manufactured by us. Our imports for the same period were eight hundred and forty-nine million one hundred and forty-one thousand dollars, or a balance of trade in our favor in one year of five hundred and forty-four million five hundred and forty-one thousand. From these figures it is not difficult to imagine what the magnitude of American commerce may be before the close of the 20th century.

#### WATERPOWER AND WATERWAYS.

"During the first quarter of this century a canal will be constructed from LeClaire to East Davenport for the accommodation of boats, and will furnish waterpower for manufacturing purposes that will make Davenport the Lowell of the Middle West.

"The Illinois and Mississippi, familiarly known as the Hennepin canal, will be completed, giving Davenport water communication via the great lakes, Erie canal and St. Lawrence river, with the sea at New York and Quebec.

"A canal will be constructed from Lake Michigan to Lake Erie, and also from Lake Erie to the Ohio river at Pittsburgh, which will give us a short water route to the great iron manufacturing centres of the United States.

"There will be a water route established between Duluth, on Lake Superior, and St. Paul, on the Mississippi river.

"The Chicago Drainage canal will be merged into and become a part of a ship canal via the Illinois and Mississippi rivers from Lake Michigan to the Gulf of Mexico.

"The Nicaragua canal will connect the waters of the Pacific and Atlantic oceans.

"A ferry will be established between San Francisco and our new possessions in the Pacific—the Sandwich Islands and the Philippines. San Francisco and either Galveston or Port Arthur will become as important cities to the West and South as New York is now to the East.

"The railway cars and coaches will be built of aluminum, their form will be cigar-shaped.

#### RAILWAYS REVOLUTIONIZED.

"The lumbering old heavy weight coaches and cars running up and down steep grades on heavy rails and solid road beds, around sharp curves, frequently reversed, will be replaced with light, airy carriages, hanging from overhead tracks, with very light grades, and no short curves. These trains will be moved by electricity instead of steam, and with greater frequency, furnishing much better service than at present.

"Short haul local freight will be carried on trolley cars,

**THREE-BAR LEATHER**  
shoe-soles and top-lifts (for heels) are the best.

Write us; we'll give you points.

**Baxter Schenkelberger & Co,**

350 Congress street, Boston

making connections with every town, hamlet and city, will receive and deposit freight at warehouses and store doors. These changes will also infuse new life into small enterprises, encourage the large mass or middle class of people to greater individual efforts, restore the small operator in whatever line he may have chosen, to a place among commercial men, and enable him to again successfully cope with his wealthy competitors.

"To the traveling men of this country, so well represented in your association, too much credit cannot be given for the development and rapid increase of the immense commerce we now enjoy. Many of the gigantic corporations which have temporarily undertaken to dispense with your services, will realize their mistake, for the very life of commerce is and must forever be entrusted to the diligent personal efforts of your fraternity.

**IMPROVED CONSULAR SERVICE.**

"The consular service of the United States will be much improved when our consuls to foreign lands are selected, as they must be sooner or later, from your ranks. When this is accomplished American commerce will extend to every country on this globe. The products of our farms, mines and manufactories will be carried over every sea in ships built in our ship yards, owned and officered by American seamen. From every port where our vessels touch, there will be

railroads, constructed by our capital, enterprise and energy, and our locomotives, manned by American engineers, will transport these enormous commercial railway trains over steel rails and steel bridges, manufactured by us, into every nook and corner of our own and every foreign land.

"Gentlemen of the Travelers' Protective Association. It matters little whether my imagery becomes true or not, there will be great changes and important improvements in the methods used in commerce in the present century which is now begun. See to it that the superior intelligence you have gained by long experience and much travel is well directed. See to it that as representatives of commerce the occupation you have chosen for yourselves, shall continue to place you high among the very best workers for good, so that in parting hence, you will leave behind, well defined footprints on the sands of time."

**It is so Easy to do it in the Department Store.**

"Where are your razor straps?" asked the customer.

"Razor strops?" said the floorwalker, stroking his side whiskers. "Fifth aisle to the right."

The customer hunted up the notion department.

"Razor strops?" he asked.

"Razor straps?" the girl behind the counter said. "I think they must be in the notion department."

## WINSLOW'S ANKLE BRACE 1900.

Patented December 17, 1895.

**The only perfect Ankle Support made.**

**Can be attached to any skate.**

We desire to call your attention to Winslow's Ankle Brace. It can be attached to any skate. It is made of steel, handsomely nickel plated, with a rib running through the center which strengthens the brace and makes it light, strong and durable. They are trimmed with the best quality Russet Grain Leather.

There have been many attempts at making an Ankle Brace, but this is the only good one ever offered to the public.

Four years have proved it to be a splendid article. Each pair in a box.

PRICE  
75c.  
PER PAIR.

### Winslow's Double Runner Skate.

This skate is especially adapted for children learning to skate, is strapped and ready for use. The runners are so wide apart that a child can stand on them with perfect ease. They are adjustable and can be made from a 6 inch to a 9 inch skate by simply adjusting the thumb screw.

PRICE, 50 cts. PER PAIR.

THE ABOVE SPECIALTIES ARE MANUFACTURED BY

**The Samuel Winslow Skate Manufacturing Company, Worcester, Mass.**

## Improved Carpenters' Tools.

SOLD BY ALL HARDWARE DEALERS.

"Where is the notion department?"

"Next section. Three aisles back."

The customer hunted up the notion department.

"Razor straps—straps?" he said.

"You'll find them among the household goods in the basement," responded the girl in charge of the hairpin sub-department.

He went to the basement.

"Where are your razor str-raps?" he inquired of the first salesman he met.

"Last counter on the right."

He went to the last counter on the right.

"I'd like to see some of your razor straps."

"I think you'll find those in the notion department on the first floor."

"Been there. They sent me down there."

"Nearest we can come to it is dog collars. Suppose you try the razor department."

"Where is that?"

"First floor."

The customer hadn't thought of the razor department. He went back to the floor above, and appeared a few moments later at a counter presided over by a girl with large bangs and a lisp.

"Got any razor straps?" he demanded.

He was becoming reckless now.

"Ratthor thtrapth? No, thir. You'll find thothe in the leather goodth department on the thickth floor."

He took passage in the elevator for the sixth floor.

"Where's your blamed razor straps?" he inquired of the sixth floor walker.

"Eight aisles over. Leather goods department."

The weary pilgrim traversed the eight aisles.

"I want to see your razor straps," he said, with some fierceness.

"We don't keep 'em," replied the man behind the counter.—*Chicago Tribune*.

### For Sale.

AN UNUSUAL OPPORTUNITY.—Wholesale, retail stock of Hardware, good will business, located enterprising city, New York State. \$12,000 to \$14,000 consisting Builders' Hardware, Paints, Oils, Glass, Stoves, Ranges, Furnaces. Will be sold at bargain if bought immediately to close out partnership. Address G. M. S., care HARDWARE, 275 Broadway, New York. 172

We have on our desk the Twenty-second Annual number of *The Tradesman*, Chattanooga, Tenn. The Annual edition of this great Southern trade publication is always looked forward to as a reference book on the South—its material resources, manufacturing and business interests. *The Tradesman*, in its Twenty-second Annual has surpassed all previous efforts and presents, in this very complete number information of the highest value regarding the section it so ably represents. A special feature of this number is about fifty handsome half-tone illustrations of important points in the South. A glance at the table of contents shows articles on a large number of subjects of supreme importance to the South.

"Is he a friend of yours?"

"No, sir. I told my wife I had been with him the other night, when she waited up for me. The next day she happened to meet him, and, of course, referred to what I had said. The blamed fool didn't have presence of mind enough to go on and pretend that he knew what she was talking about."—*Chicago Times-Herald*.

# SEED SOWER.

FOR more than thirty years the **CAHOON SEED SOWER** has been upon the market, remodelled and improved from time to time as experience has shown such to be desirable, and to day it stands at the head, incomparable and unrivalled, acknowledged to be the only perfect seed sower of its kind. In every State and Territory in the Union, in every country on the globe where seed is sown, it is safe to say the **CAHOON** is known and used. It has never failed to give perfect satisfaction, and once used becomes the most valued implement on the farm.

Sows wheat, oats, barley, rye, buckwheat, rice, hemp, and all other grains and grass seed, five times faster than by hand, does its work perfectly, with one-third less seed than by any other method. Four to eight acres can be easily covered per hour. Sows wheat over a tract forty feet wide, other seeds in proportion to weight. Machine is simple, strong, durable, efficient, and when used according to directions, and with proper care, is guaranteed to perform its work with perfect satisfaction.

Take no substitute. Insist on having the genuine **CAHOON**. Wherever exhibited the **CAHOON** has always taken highest honors, and in two years took first premium at twenty-one State Fairs. This machine has just been awarded **SILVER MEDAL AND DIPLOMA** at the National Export Exposition—the highest prize awarded any exhibit.

Manufactured only by . . .

**Goodell Company, Antrim, N. H., U. S. A.**

## A Great Labor Saver.

## HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Hardware Stores.

Carthage, Mo.—The Keim & McMillan Hardware Co. has been incorporated. Capital stock, \$30,000. Incorporators: H. M. Keim, J. M. McMillan, Ada Keim and others.

Charlotte, N. C.—Finger & Pickens.

Cincinnati, O.—The Rendigs-Magill Hardware Co., capitalized at \$5,000, has been incorporated by Wm. Rendigs, W. P. Rendigs, Frank C. Magill, H. J. Power and R. C. McConaughy.

De Witt, Ark.—H. B. Dudley.

East Palestine, O.—A. R. Campbell contemplates opening a Hardware store in Sebring in the Spring.

Elgin, Tex.—The Elgin Hardware Co. has been incorporated with a capital stock of \$10,000. Incorporators: G. W. Preuitt, I. A. Preuitt and A. H. Davis.

Fort Dodge, Ia.—Articles of incorporation will be filed by the Ryan Implement & Hardware Co., which has just been organized with a paid up capital of \$20,000.

Granger, Tex.—The Granger Hardware & Lumber Co. has been organized here and will be capitalized at once for a large amount. The principal promoters of the scheme are J. W. Garrett, A. T. McCurdy and J. E. Holland.

Hico, Tex.—J. Newsom.

Laurel, Miss.—The Frank Gardner Supply Co. has been incorporated. Capital stock, \$30,000.

Le Roy, Minn.—The Le Roy Hardware Co. has been organized with \$10,000 capital.

Lexington, Ky.—Smith, Watkins & Co. has been incorporated with a capital stock of \$30,000 to engage in the wholesale Hardware business; Roger H. Smith, J. L. Watkins and H. F. Gee, incorporators.

Murfreesboro, Tenn.—J. S. Blumenthal & Co.

Paris, Tex.—Holley-Brooks Hardware Co. has been incorporated with a capital stock of \$50,000. Incorporators: J. B. Holley and B. H. Brooks.

Reading, Pa.—Howard W. Dippery, Tenth and Douglass Streets.

San Saba, Tex.—T. M. Gray.

Sylvan Beach, N. Y.—H. A. Spencer.

Tiptonville, Tenn.—The Secretary of State has granted a charter to the Tiptonville Hardware & Furniture Co. with \$12,000 capital stock.

Troy, N. Y.—Attorney Warren McConchie has filed with the Secretary of State a certificate of incorporation of the Sweet-Packard Co., of this city, to do a general Hardware business. The capital stock is \$20,000. The company will begin business with a cash capital of \$15,000. The stockholders and directors are Halbert D. Sweet, Harry S. Packard and Louis H. Baker, each having fifty shares.

Whitehall, N. Y.—The Wood Hardware Co. has been incorporated with the Secretary of State with a capital of \$10,000. The directors are William J. Wood, Chas. P. Wood and Willis G. C. Wood, of Whitehall, and Isaac A. Wood, of Fair Haven, Vt.

Wilson, N. C.—The George D. Green Hardware Co. has been granted letters patent by the Secretary of State. The incorporators are George D. Green, Samuel Hodges and Lattimer Williams. The capital stock is \$15,000, with the privilege of increasing it to \$30,000. The company will conduct a general Hardware and machinery business.

Woodbury, Tenn.—A. N. Brown.

Youngstown, O.—M. L. Otterman.

### Changes and Improvements.

Alden, Minn.—Clark & McConnell, Hardware merchants at this place, have sold their stock of goods to an Iowa party.

Alvin, Tex.—T. W. Carlton, who bought the Anderson & Son's Hardware stock several months ago, has sold the business to his brother, L. B. Carlton.

Bethel, Tex.—E. Swift retires from the firm of Swift & Bethel, Hardware dealers, and is succeeded by W. W. Sackwell.

Birmingham, Ala.—The capital stock of the Mayberry Hardware Co. has been increased from \$100,000 to \$150,000, and the board of directors has been increased to seven. H. H. Bailey, W. T. Bailey, Louis Minor and W. A. Chenoweth have been elected to the board of directors. W. A. Chenoweth has been elected first vice-president; T. J. Watson, second vice-president, and H. M. Bailey, secretary.

Blaine, Me.—Geo. W. Young has removed his stock of Hardware to one of the Lowell stores recently purchased by him.

Buffalo, N. Y.—Shelton and Walter Weed are now members of the firm of Weed & Co. A certificate to this effect has been filed with the county clerk. The original members of the firm were Hobart Weed and James R. Smith.

Cawker City, Kan.—F. E. Garrett has sold a half interest in his Hardware and implement business to C. H. Churchill.

Chanute, Kan.—C. A. Cave has purchased a half interest in Wallace Rankin's Hardware store, and the new firm will be Rankin & Cave.

Gladwin, Mich.—D. G. Fraser and P. W. Button, of Franklinville, N. Y., have purchased the Hardware store of B. S. Lewis.

Henderson, N. C.—S. Watkins will soon move into his large Hardware store in the rear of his dry goods store.

Martinsburg, W. Va.—A. A. Lamon has sold his entire stock of Hardware to Chas. E. Ridgeway, of Ridgeway, this county, and the store has been closed. Mr. Ridgeway will remove the stock to his store at Ridgeway.

Peoria, Ill.—Robert L. Wilson, of the Co., \$100.

Adams Street, has purchased the interest of his partner, Mr. Worschlag, and although Mr. Worschlag will retain a position in the store, the name hereafter will be Robert L. Wilson.

Schenectady, N. Y.—The firm of Lewin & Goodnoe, dealers in Hardware, etc., at the corner of State and South Centre Streets, has dissolved partnership and, by the disposal of Mr. Lewin's interest to the former bookkeeper, Elihu Curtis Teller, the new firm is now Goodnoe & Teller.

Wooster, O.—Miller Bros. have disposed of their Hardware stock to A. S. Tuttle and brother.

### Business Embarrassments.

Easton, Pa.—Charles B. Brady, of Phillipsburg, N. J., has been appointed receiver of the Lehigh Supply Co., a corporation under the laws of New Jersey and conducting a Hardware store in Easton.

Evansport, O.—O. O. Corwin, of Defiance, has locked up the Hardware store of Buehrer & Heer. J. N. Replogle was appointed receiver.

Lincoln, Neb.—O. W. Webster has been appointed receiver of the partnership assets of the Humphrey Hardware Co.

Montreal, Canada.—Alphonse Guimond, Hardware merchant, 2628 Notre Dame Street, has assigned at the instance of Amanda Lamelin, with liabilities of \$9,327.

Racine, Wis.—Max Walk, a dealer in Hardware, crockery and toys at 223 Main Street, has filed a petition in bankruptcy. His liabilities are \$3,200 and his assets \$1,600 in Hardware and toys.

Waterloo, Ia.—The Briden & Altland Hardware Co. has been closed by its creditors. It has assets more than sufficient to cover all liabilities and may begin business again.

West Haven, Conn.—Furman A. Norton, a West Haven Hardware dealer, has filed a petition in bankruptcy through his counsel, Attorney E. S. Thomas.

### Fires in Hardware Stores.

Cincinnati, O.—Kruse & Bahlman. Loss, \$200.

Colfax, O.—Geo. Pendry.

Reading, Pa.—Lerch Hardware Co. Loss, \$3,000.

Russellville, Ky.—H. Brister.

### Burglaries in Hardware Stores.

Ballard, Wash.—W. M. Curtis, \$20.

Brooklyn, Mich.—Green's Hardware store.

Colorado Springs, Colo.—Hooper Bros., \$250.

Jacobs Creek, Pa.—Federal Supply Co., revolvers, etc.

Jamaica Plain, Mass.—Samuel D. Balcom, razors, etc.

Philadelphia, Pa.—Geo. A. Suppler, 33 North Ninth Street, \$40.

Sharon, Pa.—R. A. Hannah, \$50.

Tarentum, Pa.—Tarentum Hardware

Co., \$100.

**THE BURR PATENT STEEL SAFETY LIFT BLOCK.**

A Perfect Self-Locking Rope Tackle Block.

Runs as freely as an ordinary rope tackle block.  
Holds more securely than a chain block.  
Locks instantly and does not cut the rope.  
Allows the load to be lowered safely and slowly, the operator using only one hand.  
Cannot stick nor jam when the load is to be lowered.  
Adopted by the Penna. R.R. Co., Western Union Tel. Co., and many others.

## HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Etc.

Birmingham, Ala.—The Birmingham Paint Mills Co. has been incorporated with a capital stock of \$3,000, divided into thirty shares of \$100 each. The incorporators are W. H. Priegel, O. E. Ringland and A. Eubank.

Camden, N. J.—The Peerless Belt Lacing Co. has been incorporated to manufacture Hardware, etc. Capital, \$30,000. Incorporators: E. Kelly, E. W. Spielman, F. Kelly.

Detroit, Mich.—The Dirigo Mfg. Co. has been incorporated for the manufacture and sale of washing machines. Capital, \$15,000. Incorporators: G. J. Robinson, F. J. Beaubien, G. L. Robinson, all of Detroit; E. R. Walker, of Cleveland, O.

Dover, Del.—The Eclipse Co. has been incorporated. Manufacturing and deal in tools, machinery, etc. Capital, \$100,000. Incorporators: C. W. Owston, Jr., W. J. Higgs, W. R. Payne, all of New York City.

Fairbury, Neb.—Fairbury Iron Works & Windmill Co. has been incorporated to manufacture and sell windmills, tanks, pump engines, etc. Capital, \$20,000. Incorporators: J. Simpkins, J. Gibson, A. D. McCullogh, P. H. Hanchett, all of Fairbury.

Findlay, O.—Duncan & Steel are fitting up a tool shop. All kinds of drilling and fishing tools will be manufactured at the new establishment.

Jeffersonville, Ind.—Charles Rose, who has been in business in Louisville, has entered the firm of Julius Louis, this city, in the manufacture of oil stoves.

Mayville, N. Y.—The certificate of incorporation of the Tangent Grip Pulley Co. has been filed with the county clerk. The business office of the new company will be located at Jamestown, and the concern is capitalized at \$20,000. The directors are Frederick W. Gurney, T. William, D. Addenbrook, Jamestown; Quincy R. Sage, Ernest H. Holter, Oberlin, O.; Harvey Bassett, Cleveland.

Mt. Carmel, Conn.—The Schatz Hardware Mfg. Co., a concern organized under the laws of New Jersey, has rented a factory in Mt. Carmel and has set up a number of machines there. The company intends to engage in the manufacture of tools and electrical devices invented by Mr. Schatz. The incorporators are L. P. Smith, J. F. Hemenway, Adolph Schatz, H. A. Schatz, J. A. Gouldrup. With the exception of the Schatzs the incorporators reside in New York City.

Portland, Me.—The Colonial Scale Co. has been organized for the purpose of manufacturing and dealing in scales and measuring instruments, with \$150,000 capi-

tal stock, of which nothing is paid in. The officers are: President, F. F. Holland, of Portland; treasurer, E. A. Chaplin, of Portland.

Pulaski, Pa.—The David Tod Paint Co., of Youngstown, has begun the erection of a paint factory in this place. The company is incorporated with \$50,000 capital. Umber of fine quality has been found in this vicinity and that influenced the location of the works here.

St. Louis, Mo.—The Gatling Plow Co. has been incorporated; manufacturing plows, etc. Capital, \$50,000. Incorporators: R. Gatling, of New York City; F. E. Bush, H. H. Henderson, F. J. McMaster, W. Somerville, all of St. Louis.

St. Paul, Minn.—The Law Mfg. Co. has been incorporated. Manufacturing farming implements. Capital, \$50,000. Incorporators: J. Law, of Mankato; W. A. Law, of Fairbault; G. Loudon, of Minneapolis; J. M. Hackney, L. S. Hackney, both of St. Paul.

Wellman, Ia.—Walt. Livezey and Gris Klockentager are erecting a building and will open a cutlery factory in the near future.

Youngstown, O.—George L. Fordyce and Jerry Morris, of this city, with other capitalists, are organizing a corporation known as the Penn Shovel Co. to manufacture shovels, having secured a portion of the plant of the Radiator works at Cory, Pa. The stock has been subscribed and the company will be organized as soon as a charter is received.

### Changes and Improvements.

Auburn, N. Y.—Ground has been broken in Aurelius Avenue for a new warehouse for the Ohio Tool Co. The building will be a frame structure 101x41 feet, and will stand adjacent to the company's buildings. Besides a warehouse it will be fitted up with office rooms.

Charleston, Ill.—J. W. Ramsey, proprietor of the Charleston Foundry Co., has purchased the buildings and grounds of the Charleston woolen mills, and will convert the property into a manufactory for steel ranges.

Chicago, Ill.—The American Pure Paint Co. certifies to a change of name to the Hartford Commission Co., and to a change of object to do a general brokerage business.

Conshohocken, Pa.—The Plymouth Rolling Mill has been leased by Enoch Stanford, of Harrisburg, to manufacture sheeting for use in making granite ware.

Des Moines, Ia.—Randelman & Sons, who recently established a factory in Capital Park for the manufacture of washing machines, have purchased the patents covering a mop roller, pipe tongs, patent fork and some other articles, which they will manufacture as a side line. To handle this business the capacity of the factory will be slightly increased and some additions made to the working force.

Duluth, Minn.—The Marshall-Wells Hardware Co. are building a large harness factory in connection with their wholesale store.

Elmira, N. Y.—The Clipper Chilled Plow Co., whose plant in Elmira was destroyed recently by fire, have purchased the hose factory on the corner of Oakwood Avenue and Eighteenth Street, Elmira Heights.

Granite City, Ill.—The Columbia Lead Works will erect two large buildings near the Markel Lead & Shot Works for the purpose of manufacturing supplies for the shot works. The buildings will be about 80 feet front by 125 feet deep and will be two stories in height.

Jefferson, Ia.—The Western Tool Co., of Jefferson, has begun the removal of its factory from that city to Des Moines.

Louisville, Ky.—Ohio Falls Varnish Co. will erect a one and two-story brick factory, east side of Fifteenth, north of Magnolia Street.

New London, O.—The Arnold Metal Wheel Co. will be moved to Geneva as soon as the details of the deal can be consummated.

Pawtucket, R. I.—The wire factory of the H. M. Williams Co. on Forrest Street has moved its site and preparations are on foot to substitute a big model factory for the firm, whose present quarters are too crowded. It will be a very acceptable addition to the town's growth, being two stories and perhaps three in height, and about 150x50 in ground dimensions.

Syracuse, N. Y.—A permit has been granted to the Syracuse Stove Works for the erection of a new building at its plant in South Gledes Street, near the Erie Canal. The structure will be of brick construction, four stories high and 50x100 feet in dimensions.

### Recent Fires.

Indianapolis, Ind.—Fire which started from an overheated stove in the office of the plant of the Keyless Lock Co., 1401 Newman Street, has caused a loss estimated by the firemen at \$2,000.

Long Island City, N. Y.—A one-story brick building on West Avenue, between Eighth and Ninth Streets, has been partly destroyed by fire. The place was occupied by M. G. Parlee, of 50 Lexington Avenue, New York, as a varnish factory. The loss was placed at \$600 and is believed to be covered by insurance.

York, Pa.—The new plant of the Standard Chain Co. has been damaged by fire to an extent of about \$15,000. The loss is covered by insurance.

### Recent Embarrassments.

Knoxville, Tenn.—Frank J. Leland, a leading business man of East Tennessee, who established a handle factory here and at Bristol, Tenn., and also at Huntsville, Ala., has filed a petition in bankruptcy. His liabilities are given at \$74,277, with assets about \$29,500.

## BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Agencies, Etc.

Brookline, Mass.—The Ward Automobile & Cycle Co. has been formed to take over the business of the Ward Cycle Co., and in addition to conduct an "automobile stable."

Newark, N. J.—Papers incorporating the Thomas Cycle Co. have been recorded in the county clerk's office. It is capitalized at \$400,000, and \$1,000 has been subscribed by F. L. C. Martin, of Newark, and the following from Buffalo, N. Y.: Edwin R. Thomas, Louis H. Bill, Henry Pokorney, Louis Ohnhaus and J. MacAdam. The object of the concern is said to be the manufacture and sale of bicycles, motors, automobiles and gas engines. The local agent will be F. L. C. Martin, of Newark.

New York, N. Y.—The Progressive Cycle & Automobile Supply Co. has been incorporated with \$6,000 capital, to deal in bicycles and automobiles. Directors: George Herrstadt, W. S. Hofstatter and Elias Pitzele, all of New York.

New York, N. Y.—The Motor Vehicle Cycle Co. has been incorporated under laws of Delaware, with \$100,000 capital.

New York, N. Y.—Frank F. Weston is established on his own account at 99 Chambers street. He will do a general jobbing business, with the Eclipse, Snell and Kirk bicycles and Bundy lamps.

Portland, Ore.—Henry Goodman, who recently resigned the management of the Columbia branch in Portland, Ore., is now in the East. It is his intention to continue in business in Portland on his own account and to do not only a retail but a jobbing business. He has already made several desirable connections, and will establish others before leaving for home.

Portland, Ore.—Studebaker Bros.' Northwest Co. has been incorporated for the purpose of establishing the business of manufacturing, buying and selling, storing, forwarding and transferring vehicles of all kinds, including wagons, carriages, sleighs, automobiles, bicycles, etc., and to do all things necessary to carry on said business. Capital stock, \$400,000, in shares of \$100. Edward M. Brannick, Edwin R. Kimble and Ossian F. Paxton are the incorporators.

### Changes and Improvements.

Bartlett, Tex.—G. A. Lindemann has discontinued.

Boston, Mass.—The Boston Cycle & Sundry Co. have succeeded the Boston Cycle Co. The new concern has been incorporated under Massachusetts laws with a capital of \$15,000. Its officers are M. A. Jackson, president; J. M. Linscott, treasurer, and F. A. Patten, secretary.

Boston, Mass.—The Barden Cycle Co.,

1449 Dorchester Avenue, have removed to larger quarters at 234 Adams Street.

Bozeman, Mont.—Rodgers & Crockett have discontinued.

Brookhaven, Miss.—C. H. Dahlstrom succeeds Dahlstrom Bros.

Browning, Mo.—Calhoun & Harvey; J. B. Harvey has sold his interest.

Cambridge, Mass.—The W. B. Churchill Co. have removed from 1900 Massachusetts Avenue to the Whitney Block, Massachusetts Avenue.

Camden, N. Y.—Fred Osborne succeeds John Schott.

Dalton, Mass.—W. L. Tower has retired.

Doniphan, Neb.—Hawk Bros. succeed Hawk, Lané & Co.

Downs, Kan.—I. A. Lutz succeeds D. M. Dalay & Co.

Ebensburg, Pa.—Brown & Son succeed H. A. Shoemaker.

Elkhart, Ind.—Gardner & Sternberg succeeds C. D. Carlton.

Emmetsburg, Ia.—The Steel Hardware & Supply Co. succeed Joe J. Steel.

Eureka, Kan.—Redman & Tucker; Jas. Redman retires.

Fordyce, Ark.—Brown & Eakins succeed J. E. Sparks & Co.

Fulton, S. D.—L. H. Holmes succeeds N. H. Swagood.

Grundy Center, Ia.—E. H. Dodd succeeds Dodd & Sauer Bros.

Hartford, Conn.—The Pope Mfg. Co. has reduced its capital stock from \$100,000 to \$5,000.

Huntingdon, Pa.—James E. Sponeybarger succeeds Sponeybarger & Coolidge.

Ida Grove, Ia.—Martin Sauer succeeds Sauer Bros.

Inwood, Ia.—Albertson Bros. succeed Baker Bros.

Keene, N. H.—The Wilkins Toy Co. has added a repair shop.

Manistee, Mich.—Leon A. Walters succeeds Parvey & Coolgers.

Meriden, Conn.—A. D. Elster, 133 Hanover Street, will remove to the Penfield Building.

Meriden, Conn.—The Bradley & Hubbard Mfg. Co. have bought from William A. Penfield, of the same place, his patent for an acetylene gas bicycle lamp. The merit of the idea is said to lie in the arrangement of the elastic filler cap.

Milwaukee, Wis.—The Diamond Cycle & Machine Co. succeed Bottrell Bros.

Minneapolis, Minn.—The Northwestern Motor Vehicle Co. succeed Wheeler Cycle Co.

Muscataine, Ia.—Bond Bros. succeed Bond & Young.

Newark, N. J.—In addition to their saddles the Newark Cycle Specialty Co. are in position to supply saddle clamps to the trade at large.

New York, N. Y.—George W. Bennett, who for several years has been a prominent figure in the cycle trade in Brooklyn, has been appointed to the position of manager of the Eastern branch of the Gormully & Jeffery Mfg. Co., with offices at 939-945 Eighth Avenue.

Norman, Okla.—W. J. Brown has discontinued.

Norwich, Conn.—The Thames Chain & Stamping Co. have filed in the State Secretary's office a notice of change of business to conduct a general bicycle sundry business.

Pleasant Lake, Ind.—Frank H. Chadwick has discontinued.

Plainfield, N. J.—Adolph Emery has removed from 430 Watchung Avenue to the Spencer Building, Somerset Street.

Plantville, Minn.—G. W. Smith succeeds Frank Stow.

Rockton, Ill.—N. R. Comstock is erecting an addition.

Rock Island, Ill.—The Central Trust & Savings Bank, receiver for C. A. Spencer, has sold the stock of bicycles and sporting goods at 1709 Second Avenue to Reynolds & Co., of Davenport. The latter firm is moving the stock to its store on the other side of the river.

San Francisco, Cal.—Best Bros. have retired.

Seneca, Kan.—Winkler & Bauer succeed Winkler & Bateman.

Sioux Falls, S. D.—The Hockman Hardware Co. succeeds C. H. Vincent.

Sisseton, S. D.—Carlberg Bros. & Norley succeed Jenkins & Hill.

South Bend, Ind.—Wm. R. Wade succeeds Woodworth & Wade.

Worthington, Minn.—J. M. Shanahan succeeds J. D. & W. L. Humiston.

### Recent Fires.

Circleville, O.—J. Shell, East Main Street.

East Grand Forks, Minn.—Balenger & Roberts.

Frederick, Md.—Shipley & Bropst. Slight loss.

Marcus Hook, Pa.—William McAllister. Total loss.

Montreal, Can.—J. Martineau, 2413 St. Catherine Street. Loss about \$6,000.

Norfolk, Va.—Cooper & Land. Loss heavy.

North Yakima, Wash.—Thomas Staton, Loss \$800, insurance \$600.

### Recent Embarrassments.

Leominster, Mass.—Henry W. Hagen, 12 University Street. Liabilities, \$2,785; assets, \$40.

New York, N. Y.—E. I. Horsman, who was one of the first to take up the sale of bicycles in New York, has filed a petition in bankruptcy. His liabilities are \$172,000.

St. Paul, Minn.—Fred C. Chase has filed a petition in bankruptcy, with \$804 liabilities and \$1,954.65 assets, all of the latter, however, being claimed as exempt.

## Columbian 1000-Shot Air Rifle.

Patented  
Oct.  
24, 1893.

**CHAMPION  
MODEL.**

This Air Rifle possesses advantages over all the Air Rifles now  
on the market. The materials used in its construction are  
the best. The appearance and workmanship is far ahead of  
any other Air Rifle made. It has an adjustable sight, it shoots stronger  
and more accurate, less liable than any other to get out of order, all  
parts are interchangeable. We think we have the right to claim this as  
the "Champion" of all Air Rifles. List, per doz., Framed, \$30.00; Full Nickel, \$42.00.  
Write for Discounts to Trade.

**WM. C. SMITH & CO., Mfrs.,** 1429 North 21st St., PHILADELPHIA, PA., U. S. A.

## THE ARGAND BURNER.

(ALL RIGHTS FULLY PROTECTED).

### POINTS OF SUPERIORITY.

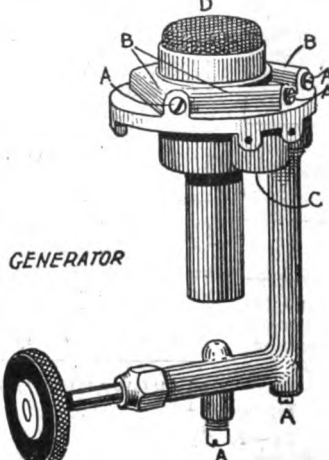

**Indestructibility.**  
This Generator is made of one brass casting. There is not a  
piece of brass tubing used in its construction. The needle-  
hole is drilled through one quarter inch of solid brass, thus  
preventing it from being made larger.

**Cleanability.**  
Every Generating Canal is easily accessible, and with a  
piece of wire and 10 minutes' time can be made good as  
new, without taking it apart! There's no other like it!

**Simplicity.**  
Not a curved generating duct in its entire construction.

**Generating Space.**  
Three-and-a-half inches generating space within a quarter of  
an inch of the flame insures perfect generation in any tem-  
perature, and the greatest amount of gas.

**Remember! This Generator can only be found on the Argand.**

A A A A—Cleaning Plugs.  
B B B—Generating Ducts.  
C—Lug for feed pipe.  
D—Double Gauze.

**Argand Vapor Lamp Co., DETROIT, MICH.**

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

## If it is a Food Chopper Without a Lid, Don't Buy It.

A distinguishing and exclusive feature of the STAR FOOD CHOPPER is a plate hinged at the top of the hopper which, when pressed on the food to be cut, forces it upon the feed screw, thus preventing the possibility of injuring or soiling the fingers, which is liable to occur in using the other choppers.

The STAR is unquestionably the best machine of its kind ever offered to the public. It will cut without crushing raw or cooked meat, sea food, fruit, vegetables, etc., into coarse or fine pieces, according to the cutter used, of which three accompany each chopper.

It has eliminated all the objectionable features of other choppers, and has added several improvements that are distinctly its own. It is always in order, and the knives require no sharpening.

No other chopper has the many merits of the STAR. None is more simple in construction or easier to understand or clean. From start to finish in the small points as well as in the large, the STAR FOOD CHOPPER is the best.

**CHAS. D. BROWN, Agent,**

**180-182 Duane Street, New York City.**

## WANTED.

The name of every good Hardware dealer who is interested in a good Air Gun or other Hardware specialties which sell readily and at good profits. We also want to hear from Hardware Salesmen who can sell this class of goods. We've got good sellers, goods that sell well and please most dealers, but we don't care to have them introduced by men who are salesmen in name only. Write us for further information.

Retail Price of the

# CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

## FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

## Gibbs Lawn Rake

The strongest, lightest and finest looking *All Steel* tinned rake on the market.

Its closed head and simple construction (without any extra kinks or bends in either head or teeth) prevents any possibility of the rake not freeing itself from cut grass or leaves.

Note the shape of the teeth—rakes smooth, does better work and won't tear up the sod—one of the special features of the "Gibbs" Rake.

## LAWN RAKES & POST HOLE DIGGERS

The "GIBBS" DIGGER, with single blade, is easy to operate, does the work thoroughly and rapidly, and works successfully in all kinds of soil where others fail.

Selling Agents . . .

**JOHN H. GRAHAM & CO.,** 113 CHAMBERS ST.,  
NEW YORK.

We offer the very best makes of these goods having an established reputation.

WRITE FOR ILLUSTRATIONS AND PRICES.

The success of the "COLUMBIA" DIGGER is its simplicity and durable construction, besides it has special patented features which are essential and not found in other makes.

"MODEL" and "OHIO GIRL" Lawn Rakes.

# Agency of the Doran Lighting System

USED FOR INTERIOR AND STREET LIGHTING.

Remember the **FIRST** in the Field will reap the harvest. Our improved Doran Lamp is the height of perfection in Hydro Carbon lamps. **DON'T** confound this with the common 100 candle power gasoline lamp. We have something entirely new, pronounced by **ALL** who have seen it the **BEST** thing they ever saw.

We are appointing agents now for every town and city in the U. S. It will be profitable to you because we have *positively* the best system of lighting ever invented. It has absolutely *no faults*. Every lamp guaranteed to be perfect and give satisfaction when received. As to our responsibility we refer to any bank or mercantile agency in Chicago.

## A Few of its Good Points :

- 1250 Candle Power.
- No fount to fill and break mantles.
- No shadow below, light all around.
- Turned up and down instantly with a chain.
- Simplicity. (It will surprise you.)
- Practically Noiseless.
- Handsome, looks exactly like the best electric arc lamp.
- Last, but not least, the cheapest system on the market, both in first cost and in operation, which is 1-6 of any other light of its power.

EVERY LAMP SOLD SELLS ANOTHER.

ALL  
THE NEWS.

## HARDWARE

HARDWARE  
EXCLUSIVELY.

The name of the only Hardware Trade Journal in America with the motto "All the News; Hardware Exclusively."

It is published on the 10th and 25th of each month, which is as often as any dealer desires to receive a trade paper which he intends to read.

Has tabulated records of all new firms and companies and their various changes in the manufacturing line. All the new stores and business news among the jobbers and retailers of the country; with a Bicycle and Sporting Goods Record covering the changes daily occurring in that important line.

For the benefit of the retail dealer it has a "Prices Current" in every issue covering 32 columns of its pages. A careful consideration given to this department of the paper may save many dollars to its subscribers.

It offers to the advertisers advantages possessed by but few of its competitors in its legitimate field. In addition to foreign circulation, embracing 74 countries besides our own, it reaches within the limit of the United States every State and Territory, where trade and traffic have a foothold.

It has just completed its *twentieth* volume and is consequently in no experimental stage, waiting to establish a subscription list.

**HARDWARE'S** rate card is based on actual value. It is a paper for the Hardwareman, possessing the respect of the trade, the confidence of its patrons, the thanks of its subscribers and the courage of its convictions.

... PUBLISHED BY ...

THE HARDWARE PUBLISHING CO.,

275 Broadway, New York.

PRICE \$1.00 PER YEAR FOR 24 ISSUES.

# The Eclipse Cleanable.

(Made in Burlington, Vermont.)

The only removable ice chamber refrigerator that introduces cold dry air at the bottom of provision room, getting it under and between the food and forcing the warm, moisture-laden atmosphere upwards and away to the ice, the great condenser and purifier. This is positive circulation.

It is original and has no imitator or competitor. It is a success, and the dealer who wishes to build up a permanent trade in refrigerators can do it with the *Eclipse Cleanable*.

The people like it. It does good work economically, and is attractive in appearance. Made in plain and ornamental finishes. Every one sold is a standing advertisement.

We want your trade. Let us send you a couple of samples and we will get it. We have the utmost confidence in what we are offering you. There is money in it for you and ourselves. Our interests are mutual.

Joseph H. Williamson, Business Manager of the Viennot Advertising Agency, deciding that it would be greatly to the convenience of his clients and others to be more centrally located than was the case at his Duane Street address, has recently moved from there to Room 719, Temple Court, New York, where he trusts his friends will have no difficulty whatever in finding him ready to pay attention to their wants.

The Joseph Dixon Crucible Co., Jersey City, N. J., among the specialties for which they are known, have added Dixon's Novelty Eraser. This eraser is very convenient, as far as size is concerned, either for the desk or pocket, and in its shape is adapted for erasing fine lines. It has perfect erasive qualities for both ink and pencil marks, and this naturally places it among the extremely necessary articles for book-keeper or business man to have in his business.

In the editorial notice given to the "Search-Light" Spring Extension in our previous issue, some confusion was caused by the cut being placed in reverse order. The notice, however, being sufficiently descriptive of the merits of this popular appliance, prevented the error from being as fatal in its effects as would have been the case in a briefer article.

One of the best recommendations that can be given a new article in a line already recognized as popular by the trade, is mentioned by the Miller Ladder Co., Chicago, advertised in this issue, whose improved product has reached sales worthy of note, in such far-off places as Victoria, B. C., and Los Angeles, Cal., which represent almost the extreme points of the compass for intelligent distribution.

The Cincinnati Screw & Tap Co., Cincinnati, Ohio, the well-known manufacturers of set, cap and machine screws, rivets, bolts, nuts, taps, dies, etc., have recently been enlarging their plant by an additional story, which will provide them with an extra floor space 50x170 feet in its dimensions. It is in contemplation to re-equip the entire plant in all its departments with new and modern machinery. This would have been started some time ago, but a largely increased business that has come to this company during the past year, has retarded such improvements, which will now be undertaken without interfering with their facilities for prompt delivery.

The Union Metallic Cartridge Co., Bridgeport, Conn., and 313 Broadway, New York, in their 1901 Calendar present a characteristic picture of "A Chip of the Old Block," which consists of a half-grown boy standing in the attitude of extreme complacency. He is adorned with the hunting garb of his paternal parent, carries a full-size gun, and from over his shoulder is suspended a brace of birds that he has successfully bagged, and he looks as though he enjoyed the operation exceedingly. His pockets bulge with cartridges, and at his feet is noticed a box of Nitro Club Loaded Shells, with which the execution has been effected, which wreathes his face with smiles. In the background is represented a wooded hillside in the customary autumnal coloring. Altogether it is a very attractive picture that is presented, and fully up to the standard of other artistic work of the Union Metallic Cartridge Co. in the same direction.

The calendar annually distributed by Bruce & Cook, 186-190 Water Street, and 248-250 Pearl Street, New York, reaches our sanctum with all the interest and friendliness of an old acquaintance. It is one of the few calendars which never gives any appearance of age in its general makeup, looking just as youthful in appearance as when we first greeted it, too many years ago to be sure of the date. Representing and advertising in this unchangeable manner a landmark among metal houses, it celebrates its 89th year of successful business.

In the intelligent distribution of trade reminders, E. C. Atkins & Co., Indianapolis, Ind., the extensive saw manufacturers, exercise rare discrimination. Scarcely a month passes but what something from their office informs the wide-awake dealer that they are after his business, and almost everything emanating from this source possesses distinctive merit from an advertising standpoint. We have recently ornamented our sanctum with a handsome floral calendar of liberal proportions, in which each of the six large leaves constituting the calendar shows a leading variety of the roses which the poets are supposed to rave about. If each of our subscribers hasn't already secured one, he ought to send for it at once.

The Snell Mfg. Co., Fiskdale, Mass., announce to the trade that on and after January 1, 1901, John H. Graham & Co., 113 Chambers Street, New York, will be the recognized general selling agents for the sale of all goods manufactured by the Snell Mfg. Co. They will receive all orders and make all quotations of prices. The goods will be billed by the company through John H. Graham & Co., to whom all remittances must be sent. The company state in connection with this important change that unremitting efforts will be made by the representatives of the company to maintain the same high standard of excellence in its product which it has enjoyed during so many years, and request the continuance of the esteemed orders of their customers through the new agents.

Miller, Sears & Walling have recently embarked in the Hardware business at 20 Reade Street, New York. It is their intention to carry on a wholesale business in general Hardware, carrying a complete line of Shelf and Heavy Hardware, Agricultural Implements and Mill and Railroad Supplies, with desire on their part to canvass the retail trade in near-by territory, New York, New Jersey, Connecticut, Pennsylvania, etc. They state they will be pleased to receive catalogues from any of our advertisers, and others, to which they will give their prompt attention. They have already arranged with several manufacturers to represent them in New York as their selling agents, and they should be pleased to correspond with others having this object in view. William S. Miller, the senior member of the concern, and also Burroughs B. Walling, the junior member, were for several years with the Sickels & Nutting Co., New York, and are well and favorably known in that connection, and consequently are thoroughly equipped to make their present programme a successful achievement.

## Editorial Trade Review.

The activity prevalent in the jobbing trade at the present time increases the confidence universally felt of a continuation of the satisfactory conditions with which the year opens. In a number of lines orders are coming in from the jobbers in satisfactory volume, with an apparent desire on their part to have a fair average working stock, but with no desire for excessive deliveries, especially on goods on which prices are considered by the dealers as being out of harmony with the general trend of current quotations. This applies to such goods as shovels, scythes, etc., now held at prices that are considered out of proportion to the cost of raw material, and partaking too much of the arbitrary character of a trust that controls the market. Such high-priced goods, when compared with the more moderate quotations formerly prevailing, behoove the dealer to go slow for fear of the sudden slump that occasionally astonishes.

A surprise was received by the trade on January 29th of an advance of 10 cents a keg on wire nails, and a corresponding advance on barb and plain wire. It was entertained with but little objection, although but few large buyers were enabled to take any advantage by the rise. The larger orders had not been coming in to the mills with the frequency which this time of the year should promote; so for fear the trade might imagine it was a weak market, it was braced up with a solid shove, which was enough, and had the effect of strengthening the demand and giving rigidity to the conditions of the market.

The decision arrived at by the associated makers of screws on February 1st, to make the base discounts on screws approach more nearly the selling conditions of

the market, was a wise one. When goods are selling at various extra discounts beyond the printed quotations on any special lines of goods, its lack of apparent strength in regular quotations affects many other lines, and makes a bidding market possible, to the detriment of a steady demand for other leading staples.

On a number of lines in Heavy Hardware the low prices prevailing have been modified to some extent, and the market consequently strengthened materially by this action of the manufacturers.

There is less apprehension among some of the leading buyers for large houses as to the probable tendency to a change in current prices than there is of a certainty of getting their orders delivered on specified dates. The sales for January line up with very satisfactory footings compared with a year ago, and a fear of losing a single sale for Spring trade through lack of the necessary stock is not to be entertained for a moment.

It is a satisfaction with most of the buyers that no possible slump in prices as important as the one which a year ago broke the back of the season's trade need be feared for the present business. The average of prices is at present so close to the expectations of the buying fraternity having a knowledge of cost of materials, that more than a trifling concession or advance need not be apprehended under any ordinary circumstances. Every indication seems to point to an increasing demand for the leading staples of the business as the season progresses, and the wants of the consumers are more systematically developed. Most of the leading factories are so well occupied with the filling of orders already received from their regular customers, which this season seem to loom up so largely on the commercial horizon, that their representatives on the road may leave the wants of the retail trade to be supplied from the nearest jobbing centre handling their line.

The disposition on the part of the wholesalers to carry more complete stocks than was the custom only a few years back, should lessen the manufacturers' anxiety to sell the large retail trade themselves, as the temptation formerly given of prompter remittances being obtainable from that class of trade is no longer placed in comparison with the larger trade, who are satisfied with the ordinary "dating ahead" now the principal concession.

## Suggestive Export Statistics.

No feature of the exportations of the calendar year 1900 has been more remarkable than that of manufactures of iron and steel. When the total for 1899 passed the \$100,000,000 line much surprise was felt in other parts of the world, and the opinion was expressed at home and abroad that the high prices which prevailed in the beginning of the year would cause a reduction of these exports rather than an increase. This expectation has not been realized. On the contrary the year 1900 made even a larger gain than did the year 1899, and brought the grand total of iron and steel, exclusive of iron ore, up to \$129,633,480, or more than \$100,000,000 in excess of the year 1890, when the total was a little above \$27,000,000 and more than double that of 1897 when it was \$62,737,250.

Almost every important article shows an increase in 1900 over any preceding year. Pig iron amounts in 1900 to four and a half million dollars, against three and a quarter millions in 1899 and two and a half millions in 1898. Builders' Hardware shows a gain of about one million dollars over 1899, and two millions over 1898. Steel rails amount in value to nearly eleven millions in 1900, against about six millions in 1899. Electrical machinery, which is greatly

in demand in all parts of the world, increased from two and a half million dollars in 1898 to five and a quarter millions in 1900. Sewing machines increased from three millions in 1898 to four and a half millions in 1900, and typewriters, from two million dollars in 1898 to nearly three millions in 1900.

The destination of the articles of American manufacture, and especially of our machinery, is literally to every part of the world. Our sewing machines, typewriters, and scientific instruments go to Asia, to Africa, and to the islands of Oceania; and what is more remarkable they go to experienced Europe with all her facilities for manufacturing and her skilled workmen. Of the \$6,788,000 worth of instruments for scientific purposes, including telephone and telegraph instruments, over one million dollars' worth went to the United Kingdom alone, nearly a million dollars' worth to France, and a half million dollars' worth to Germany. The United Kingdom and Germany each take over a million dollars' worth of our sewing machines out of a total exportation of four and a half million dollars' worth. Over a million dollars' worth of typewriters actually went to the United Kingdom and a half million dollars' worth to Germany. Of the total exportations of builders' Hardware, amounting in value to \$9,782,402, over two million dollars' worth went to the United Kingdom, nearly a million dollars' worth to Germany, about a half million dollars' worth to France, and another million dollars' worth to other Europe. Of the \$10,895,416 worth of steel rails exported in 1900, over a million dollars' worth went to Europe and nearly four million dollars' worth to British North America.

### Death of William D. Supplee.

William D. Supplee, treasurer of the Supplee Hardware Co., Philadelphia, Pa., died at his home in the suburbs of that city January 24th after an illness of only a few days. The funeral services were held at his late residence January 28th.

William Danforth Supplee was born in La Crosse, Wis., in 1862. With his parents he came to Philadelphia when quite young. He was educated at Rugby Academy and the University of Pennsylvania. After finishing his course at the University he entered the service of Lloyd, Supplee & Walton, who were succeeded by the Lloyd & Supplee Hardware Co., which subsequently became the Supplee Hardware Co. He was rapidly advanced while in the employ of Lloyd, Supplee & Walton, each position qualifying him still further for continued preferment until he reached the important duties of treasurer, which place he held from the organization of the present company until the time of his death. He was the only son of William W. Supplee, president of the Supplee Hardware Co., and who was for four years the president of the National Hardware Association of the United States, being one of its organizers. William D. Supplee was an active member of the Union League Club, the Hardware Merchants and Manufacturers' Association of Philadelphia, the Historical Society of Pennsylvania and several minor organizations. His illness commenced on Sunday, January 20th, when he was thought to be afflicted with only a severe cold, but, as is frequently the case, it rapidly developed into acute pleurisy and from that by quick stages into pleuropneumonia. The family had hopes that his unusually strong constitution, combined with his exemplary habits of life, would enable him to pull through safely, but the rapid progress of the disease proved all such hopes were vain, and he passed away on the evening of the 24th inst. He leaves a widow and two children. It is given to few young men

to show in so short a life the combination of successful business qualifications and thorough experience in his vocation that have been the principal characteristics of his dignified business career. He had everything before him that would argue a promising and successful future, and his death comes with a severe blow to his distinguished father and to the hosts of friends in the estimation of whom he was held in that high and affectionate regard that forms the most worthy ambition a young merchant can aspire to. At a largely attended meeting of the Hardware Merchants and Manufacturers' Association of Philadelphia, the following resolutions of sympathy were adopted:

WILLIAM D. SUPPLEE.

*Resolved*, That, as we are called together by the sad news of the death of our friend and fellow member, William D. Supplee, we cannot refrain, even in these inadequate words, from expressing in some measure our grief and sorrow in the great loss which has befallen the community, his family and ourselves.

It is now our mournful privilege to state in what high esteem we regarded him in all the varied walks of life, whether in the social or business world. Genial and cordial in manner, bright and cheery in all the vicissitudes of life, he was a manly man, a faithful and loyal friend, who spoke of all in charity and kindness, and his name will ever be associated with the many gracious qualities by which he endeared himself to all.

In business his numerous friends bear testimony to his upright and truthful character, his frankness and unfailing courtesy and his intense devotion to business interests and duties. By faithfulness and perseverance he fitted himself to be his father's stay and help, and our association has suffered a severe loss, though the name of William D. Supplee descends unsullied to his sons, and will ever be fragrant in our memories.

Our hearts go out in loving sympathy to the widow and sons who mourn a devoted husband and father, to the mother and sisters who are called upon to bear this great sorrow, and lastly to the father, so well known to all of us and who is now required to face this crushing grief.

As the ways of Divine Wisdom are inscrutable and past finding out, we can only defer in trustful faith to the God of all comfort and trust His consolation may rest upon all who mourn so deeply and in whose sorrow we feel we have a share.

•

A boy, carefully reared in courtesy toward his elders, was instructed, on going away to school, to telegraph home "Yes" if he found everything satisfactory. He did so, and the busy father, having forgotten the arrangement, and being therefore puzzled, telegraphed back: "Yes, what?"

The answer came: "Yes, sir!"—*Tit-Bits*.

### Marshall-Wells Hardware Co.'s New Catalogue.

The Marshall-Wells Hardware Co., Duluth, Minn., have recently issued an immense catalogue, which is a noteworthy achievement in the history of the Hardware business in the Northwest. It is as fine a catalogue in every respect as has been brought to our attention, and when that is said it includes paper, which is first-class, heavy super-calendered, and superbly bound with heavy beveled covers, leather back and corners, and deserves to be well taken care of and last certainly for five years. In its compilation every effort has been made to make it the convenient assistant to the Hardware dealer, which it is the mission of such a catalogue to perform. The index is arranged carefully, the articles included in the catalogue are under as many headings as it is possible to place them, so that a single reference in almost every instance furnishes the required information, and this is a very important fact as any one knows who has had to wrestle with a catalogue which did not possess an index of this description. Even the type used in the construction of the index calls for praise, a good, clear, black letter that catches the eye at once. The catalogue is arranged under eleven different departments, which are as follows: No. 1, Builders' Hardware, to which about 150 pages are given; No. 2, Mechanics' Tools, covering 200 pages; No. 3, Miscellaneous Hardware, which takes in nearly 300 pages; No. 4, Farming and Lumbering Tools, are encompassed in about 100 pages; No. 5, Milling and Mining Supplies, takes in about 80 pages; No. 6, Heavy Hardware, including Vehicles and Stoves, has 100 pages devoted to it; No. 7, Tinnners' Trimmings, Machines and Tools; No. 8, Saddlery Hardware, Harness and Strap Work, together, take about 200 pages; No. 9, Cutlery, has upward of 100 pages devoted to its exhibition, while No. 10, Sporting Goods, has 130 pages, the volume finishing with Fishing Tackle and such supplies, which take about 60 pages to complete the volume. It may readily be understood from the number of pages that the volume is a portly one, as it contains 1580 pages. As the company state in their prefatory remarks, the mail order department being a special feature of their business, it is evident that this catalogue has been constructed with a view to increasing that branch of their business largely. They have endeavored to use factory numbers wherever it was possible, or in the absence of factory numbers they have supplied their own, relying upon the trade using the catalogue to make use of these numbers in making out their orders, thus avoiding all possibility of error. They state they do not issue a discount sheet, on account of the possible fluctuations on a number of lines; this course has been considered desirable among many Western jobbers, but they express their willingness at all times to promptly quote prices upon receipt of inquiries. They adopt one very good plan in the compilation of the catalogue of giving the weight of each article underneath the article, so that the customer making up an order can readily ascertain the amount of weight which his order calls for, and thus make up the minimum weight required by the transportation company for the lowest freight rate. The weights given, they state, are approximate only, but near enough to actual for all practical purposes. They call attention to the fact that it is their aim to carry a large and well-assorted stock, enabling them to fill orders complete, and with dispatch, offering the best railroad facilities in all directions from Duluth to make this promise on their part justifiable. By comparison with other catalogues it is safe to assume that within the covers of this book there is grouped a much larger assortment of articles than is usually found in the stock of a Hardware jobbing house even of the largest dimensions, and this makes the book still more valuable to the dealer who cannot be otherwise than pleased to find in this one volume the articles that ordinarily take a number of catalogues from which to get the same amount of information. It certainly seems exhaustive. It is well illustrated throughout, such descriptions as are necessary are plain and easily understood. The ad-

vantages of numbering everything and leaving nothing to be especially described by letter will greatly facilitate the filling of wants based upon the descriptions in this catalogue. Differing from other catalogues of similar construction, instead of starting off with Axes and so going uniformly through the book in a semi-alphabetical manner, they commence with Builders' Hardware instead, making a very striking exhibit of the line that is carried in this particular department, and creating at once from the multiplicity of its contents a good impression to the dealer handling the catalogue for the first time and unfamiliar with the facilities of this house for filling orders promptly. It is a very commendable piece of work, and would not be out of place for the compiler's name to be engrossed on the title page, which is a handsome one, showing the magnificent proportions of the establishment occupied by the Marshall-Wells Hardware Co., which from the description given on that page, shows it covers nine acres of floor space, the main building being 200x220 feet, and the iron warehouse 100x210 feet. It is certainly a mammoth establishment.

### Empire Prepared Paint.

Wm. Connors Paint Mfg. Co., Troy, N. Y., whose attractive advertisement will be found upon the third page of the cover, are making an extremely liberal offer to the readers of our paper by which any dealer may secure a stock of Empire Prepared Paint manufactured by them. They offer 50 gallons of this popular paint, put up in regular assorted size cans and pails, all very neatly labeled, in gallons, half gallons, quarts and pints, for \$45, at the same time agreeing to supply a good amount of their up-to-date advertising matter, with which they have always been regarded as more than generous. An offer of this description should interest every dealer among our readers who handles paints and oils, and any one who will secure the agency for this superior brand of popular goods may rest assured that he has an article that will give the best of satisfaction, not only to the consumer, but also the dealer handling the same. The shades from which selections can be made are of the very latest tints and colors, and are considered most durable for either inside or outside use on any surface whatever. It will be remembered in connection with this old established house that they manufacture a full line of floor, roof, carriage and wagon paints, and are also grinders of fine colors, umbers, siennas, ochres, white lead and zinc, putty, roofing cement, stove and asbestos furnace cements. We should advise our readers to enter into communication with them and receive their price list on the entire line, which may be had for the asking.

### Reduction in Freight Rates.

A change has been adopted by the new special tariff on manufactured iron, particularly that governing Pittsburgh territory. It has been agreed upon by the Trunk Line Freight Committee of the Trunk Line Association, and became effective February 1st. It makes a uniform rate on such goods as are in this special schedule of 13 cents per 100 pounds in car lots, and 16 cents per 100 pounds in less than car lots from Pittsburgh and Buffalo on East-bound shipments, and this will cover the traffic over the various Trunk Lines forming the Association. It covers many goods that heretofore have been in fourth, fifth and sixth classes, among them Nails, Spikes, Bar Iron and goods of this general character, and extensively the product of Pittsburgh mills. Over the Pennsylvania Railroad at Philadelphia, from Pittsburgh, the rate for this special class will be 1 cent per 100 pounds less than to New York, and from Pittsburgh to Baltimore 11-2 cents per 100 pounds less than to New York. Steel billets, Pittsburgh to New York, will be \$2.40 per gross ton, and pig iron \$2.20 per gross ton. This is a matter of special interest to Hardwaremen and iron and steel merchants, and will affect delivery prices in a similar proportion.

## COMPETITION IN THE HARDWARE TRADE.\*

Competition in the Hardware trade is not confined simply to that between Hardware dealers.

In the world there seems to be an absolute law of the survival of the fittest. We see it throughout the whole realm of Nature.

Every fish in the mighty deep is surrounded by a host of deadly enemies, intent upon his destruction. They have no malice or ill will toward each other, but simply devour each other as a means to their own existence. It is said that the big fish eat the little ones; this is true, but it is not all truth of the matter for the blood sucking leech and the microbe live off of the larger organisms. The Hardware dealer is as truly surrounded by competitors for existence. In the average town, his legitimate competitors are probably of about his own size, financially and mentally, and were these all, his troubles would not be great. But on one hand he has the great monsters, the mail order houses, the department stores, and the jobbers who will sell to a country boy as cheaply as to a dealer. On the other hand, he has the leech and microbe kind—the grocery store trade—the dollar, dime and nickle racket stores—the baking powder and furniture polish gift enterprises—easy payment furniture stores, selling stoves on the installment plan, the second-hand stores, lumber yard selling items of Hardware, range peddlers and farmer agents. Is it any wonder that it requires exertion to exist? There is no business with which I am acquainted, that has so many insidious competitors.

With our legitimate competitors, the Hardware dealers, if they are honorable, we can have no ill will, but ought to have the most cordial relations. Yet, strange to say, in many places they are hardly on speaking terms. This ought not to be. True, we are all running for the same goal, SUCCESS. There has been no unfair means used in making the entry, we all have the same right to the track, we all have our friends to cheer us on. Is it fair, then—is it, friends? The time in which to reach the goal is too short, the road is already rocky and barren enough.

Yet there are some who think anything is fair that will down a competitor. Nails at three cents when they cost four. Loaded shells at 35 cents, when they cost 40. Barbed wire at 3 1-2 cents, when it costs more, and if I cannot sell a stove at a profit, my competitor shall not. This is poor business policy, even should you win.

Vinegar never catches flies, neither will a dollar come out of the sordid principle that says he shall not make anything out of that because I cannot.

You may break him up in his business, but by that time you will probably not be able to meet your own obligations.

It will, no doubt, be a proud satisfaction to know that you have impoverished him and his family, but while this has been done, how much farther have you progressed on the way to the goal of success, how much more able are you to compete with the new blood, and new capital that will take his place?

How much more pleasant to greet your competitor and his family as friends and allies, meet them socially, get better acquainted, talk over business matters and troubles, agree upon fair and reasonable prices, black list dead beats for each other, borrow and lend of each other, as necessity may require, be honorable and fair with each other, combine your forces to meet the common enemies, large and small; to defeat them is to build yourselves up. By combined experience, exertion and capital, we ought to be able to buy and

sell goods cheaper than our blood leech and microbe competitors, the grocery and racket stores. I am a strong believer in co-operative buying, although I have not had much experience in it.

It is not legitimate competition that compels a dealer to sell his goods at less than a good living profit. It is dishonorable competition. But there are dealers in the Hardware business who think that they cannot win trade save by price cutting and other unprincipled ways, but in the end they never succeed. They may continue to exist, but that is not success. SUCCESS is the attainment of our purpose. There are very few of us in business for our health, or for pastime. Our purpose is to prosper financially, and with it mentally and morally.

Price cutting never leads to financial success. In your own mind just recall a few of the most prosperous dealers indifferent lines of trade, inquire into their manner of doing business. You will find that they are not price cutters. In a certain community there will be just about so many goods sold in a year.

Because you are cutting the prices of nails does not induce a laborer or a merchant to build a new house, or because you cut \$5 on a steel range, does not induce a farmer to throw away a good cooking stove in order to buy a new one from you. No, sir; he would rather pay a range peddler \$68 for one, than to pay you \$45.

There are only so many bale ties needed in your community. You cut the price to 90 cents when they cost 99. Your competitor will follow your price, and neither of you makes a cent. He is not a good business man who does business in this way. The most successful, the only successful merchants, are those who always ask and get a fair margin of profit on all their goods.

What I have said is intended to apply only to regular dealers, in competition in staple and standard goods. Each one must treat grocery and racket store trade as he may deem best; their goods are generally of inferior quality. The grocery store trade, I consider contemptible and illegitimate on their part, and I will not buy groceries from one who does it. But the less attention the dealer pays to them the better, as we cannot get their trade from them. They have a cinch on the farmers, who must buy their cheap wares from them in order to get anything for their produce. As to the racket store trade, the only way to combat them is for all the dealers in town to meet their prices, and they will soon quit.

We have had several strong attempts to establish large racket stores in our city, and although backed by good men, with plenty of capital, they have had to pull out.

Our meanest competitor at home is the easy payment furniture house, selling stoves on the installment plan, and these so-called second-hand stores selling new, cheap goods, and the lumber yards that sell nails, roofing, cresting, etc., to their customers. For these blood-sucking leeches I know of no remedy, but to treat them as serpents; whenever you see a head, crush it, if you can.

Our friends in the large cities can, no doubt, tell us more about the blighting and destroying power of the great department stores. They are recent innovations in the commercial world, yet their progress has been marked by the death struggle of thousands of legitimate business ventures, and their success largely attained by the life blood, purity and virtue of multitudes of young men and women, so poorly paid that honor ceased to be a virtue.

What the department stores have done for the cities, the

\* An address by J. H. Hamilton, of Arkansas City, delivered on January 15th, before the Kansas Retail Hardware Dealers' Association at its third annual convention.

catalogue houses are doing in the country. Our brothers in the larger cities find it an up hill work to do a profitable legitimate Hardware business. I am personally acquainted with dealers in a large city who occupied the whole three-story buildings with a general stock of Hardware and house furnishing goods twenty years ago, who to-day do not need one single room to carry such an assortment as they deem necessary to supply their demands. Year by year the growth in size and number of the great catalogue houses show that they are sapping the life of the country dealers. Some writers say to meet their prices. That is very good; if you had the opportunity, but nine times out of ten you do not get a chance. But if you did, where is your profit, as on most standard goods they sell them as cheap or cheaper than your jobber does to you. I must confess that I do not know of any way to compete with them and live. Then there are some so-called jobbing houses, especially in sporting goods, heavy Hardware and machinery supplies, who will send you a catalogue and price list, soliciting your trade, and will send the same lists to any country boy who will write for them, and sell him the goods, too, if he will send the money.

You are all acquainted with the gift enterprise, of the baking powder, furniture polish and soap manufacturers. You have seen whole loads of enameled ware, roasting pans, carving sets, butcher knives, boys' wagons, etc., given away to induce people to pay a big price for an article otherwise not worth a penny.

But there are some honorable dealers, in other lines of goods, who so far forget their honor in business and the rights of others that they will make such gifts as the dry goods merchant giving away scales, the clothing dealer giving away sleds, boys' wagons, slates, etc., with every suit of boys' clothing.

It seems that nothing is suitable for gifts, excepting in the Hardware line.

Then last, but not least, we have the range peddlers. I honor the range peddler, he is no cut price, or gift enterprise competitor. He is indifferent to all competition. He works for his living, but, unlike my legitimate competitor, he wants good pay for his work, and he gets it just as easily as he could get half as much—you pay him his price, or he keeps his goods, and he makes money by it.

Now, my friends, I cannot tell you how to compete with all of these last competitors, but it is the object and purpose of this association to work out plans to that end, and to help to accomplish that which you can never do alone.

As individuals, we stand as powerless among a great host of illegitimate competitors, as the little snowflake upon the mountain side among the great boulders, but united in purpose, in plan, in demand, we become like the mighty avalanche that carries the boulders and all obstructions before it with irresistible force.

But remember, my friends, that the great avalanche was not formed in a day, or a week, or a year. It will take time, patience, labor, money, to accomplish our purpose.

### Warren's Catalogue and Stationery Cabinet.

The J. D. Warren Mfg. Co., Masonic Temple, Chicago, Ill., are the manufacturers of the Catalogue and Stationery Cabinet, of which we give an illustration in the course of this article. The original cabinet of this construction was demanded by the wants of one of the leading Hardware journals of this city, who were in need of a suitable place in which to place catalogues and stationery, and, if necessary, have a few drawers for electrotypes, as well as large sheets of paper, blank contracts, insurance forms and such other paraphernalia inseparable from a publishing department. In its construction the original design has been changed but slightly in order to fit it more properly for the demands of the average Hardware store, and as far as it has been introduced it has given the greatest satisfaction to

all who have thus made themselves familiar with its merit. The present methods of buying adopted by every large jobbing house in the United States would make some such cabinet as this practically indispensable, and there are very few buyers who would not be attracted at once by its great utility should they be placed within reach of the same. It is made in two designs, one of which the illustration is a perfect copy, and the other having railings at the top, which enables large catalogues to be placed in that position to permit of their more frequent use. In the one shown in the illustration the trade number is 1804; the one with the railing on top is 1805. The cabinet is constructed of antique oak, mounted with solid brass pulls, and card frames for num-

WARREN'S CATALOGUE AND STATIONERY CABINET.

bers or names; is provided with a sliding shelf in the centre, upon which to rest catalogues when referring to them, a very important feature. The cabinet is 4 feet 6 inches high, and 2 feet 5 inches wide, and 1 foot 3 inches deep, and contains 12 drawers, which are 12 inches wide, 14 inches long, and 3 inches high; 5 drawers 24 inches wide, 14 inches long, 4 inches high, and 3 drawers, 24 inches wide, 14 inches long, 13-4 inches high. The manufacturers express their willingness to forward illustrations and descriptive matter upon application, and we would urge upon our readers that they send for the same, because a little more familiarity with the subject will result in the addition of this convenience to a great many jobbing houses.

Minister—How's that, Jackson—you say you are glad when Sunday comes round, and yet I never see you inside the church?

Jackson—No, but the old woman goes, sir!—*Ex.*

Flora—How could you ever fall in love with such a homely man? His figure is something awful.

Dora—Yes; but he has a perfectly lovely one at the bank.—*Ex.*

## CONSULAR COMMERCIAL COMMENTS.

### FOREIGN TRADE-MARKS IN GERMANY.

On the 24th of September last, a report was submitted to the Department from this office, calling the attention of American exporters of manufactured goods to the complications which might arise through the registration and the usurpation of their trade-marks in Germany by unauthorized persons or firms. It was explained that under the very liberal trade-mark statute of this country any person can, upon payment of a nominal fee (30 marks, equal to \$7.14), secure the registration in his own name of any trade-mark which has not been previously registered at the imperial bureau, no matter whether the applicant has or has not previously used such trade-mark or has any antecedent or exclusive claim to it.

That report, having been published and copied in Germany, was attacked by a leading Berlin newspaper on the incorrectly assumed ground that it had stated that Americans were unduly discriminated against by the statute in question, and that it gives less protection to American than to native trade-marks, or than is accorded to German trade-marks by the laws of the United States.

What the report did seek to do was to call the attention of American exporters to the fact that, whereas under section 4938 of the Revised Statutes a person or firm claiming protection for a trade-mark in the United States must file a verified statement that the claimant "has the right to the use of the same, and that no other person, firm, or corporation has a right to such use," no such proof or certificate of title is required in Germany; the sole essential being that the trade-mark shall not have been previously registered in this country. The report therefore sought to point out the consequent danger which they or any other manufacturer, alien or native, might incur by selling in Germany goods designated by a trade-mark not legally registered in this country. This danger would obviously inhere more especially to foreigners, who might be most naturally ignorant of the ease with which any trade-mark not already protected in this country may be registered, and thereby usurped, by an unauthorized person under the provisions of the German law. That this is true will be fully illustrated by two instances of recent occurrence, as follows:

For several years past the Griffin Mfg. Co., of New York, has been selling to the German trade through its agents—a German firm in Hamburg—a polishing paste for leather, each box of which bore its duly registered American trade-mark, viz., a "griffin," the fabulous antique monster, with the body of a lion and the head and wings of an eagle. As the Hamburg agents neglected to register this trade-mark in Germany, a certain maker of varnishes and similar goods in Berlin did so in his own name, and then, in April last, warned the Hamburg firm that they must not handle or sell in Germany any more goods bearing the griffin trade-mark without first purchasing his right to do so. As proceedings were threatened to enforce this mandate, the manufacturers in America, not choosing to submit to what they considered a species of blackmail, sought to avoid further complications by devising a new trade-mark for their goods intended for Germany, in which the picture of the animal was omitted and a device substituted consisting of a capital "G" with the legend "Mfg. Co." printed on a scroll across the letter, the whole showing that the preparation was made by the "Griffin Mfg. Co., of New York. Thereupon the Berlin claimant returned to the attack, declaring that he had obtained exclusive legal right to the word "griffin," and threatening proceedings if any further goods were sold under the name of the Griffin Mfg. Co. This latter claim is probably

untenable, as article 13 of the German statute for the protection of trade-marks clearly provides that no person can be prevented from using his name, the name of his firm, his place of business, etc., either in full or abridged form on his products or on the wrappings or packages which cover or contain the same.

The second instance is technically similar but morally somewhat less aggressive, as the claimant acted under different antecedent conditions. This was a case in which a merchant in Berlin who had several years ago imported, advertised, and introduced a certain American fruit sirup found that it was being imported and sold by other dealers, and sought to obtain from the makers the exclusive handling of their product for the trade in this country. This being refused, he had the special name of the sirup registered as a trade-mark under the German law, and sought thereby to enforce his claim to exclusive control of its sale to dealers in this country, or, failing in this, to compel the American manufacturers to purchase his claim to their trade-mark. This he felt justified in doing for the reason that he had been instrumental in introducing their product in what had proved a profitable and permanent market.

All these complications may be avoided if Americans or other exporters who seek to introduce into Germany goods protected at home by a trade-mark will request their agents in this country to first register such trade-mark in Berlin. The intent of the German statute is to treat all comers with fairness and equity. Section 23 of that act provides as follows:

Whoever does not possess an established place of business in Germany, has right to protection under this law only when the government of the country in which his place of business is established offers to German trade-marks, through the provisions of an officially published statute, the same protection that is accorded to trade-marks belonging to its own citizens.

The demand for protection of a trade-mark and for the rights which accrue from its registration in Germany can only be made and maintained by an agent duly established in Germany. The latter—i. e., such duly established agent—is the authorized representative in all proceedings which may be brought under this law before the patent office, and is endowed with all civil rights for the protection of such trade-mark by legal proceedings. For all processes relating to the trade-mark against the person or firm by whom it has been registered, the court of the district in which the agent resides shall have jurisdiction, or, in default of such court in that district, such jurisdiction shall revert to the court of the district in which the patent office is located.

Whoever presents a foreign trade-mark for registration (in Germany) must present with such application proof that protection for such foreign trade-mark has been sought and obtained in the country in which the chief office of the claimant is established. The registration (in Germany) is then authorized—in so far as international treaties do not otherwise specify—only when the trade-mark complies with the requirements of this statute.

On the 22d of September, 1894, an official announcement was published in the *Reichsanzeiger* (the organ of the Imperial German Government) that German trade-marks receive in the United States the same protection as those of native American citizens, so that from that date the legal status of such property became, as between citizens of the two countries, practically reciprocal. FRANK H. MASON,

BERLIN, December 27, 1900.

Consul-General.

### Iowa Retail Hardware Dealers' Convention.

The Iowa Retail Hardware Dealers' Association will hold their third annual convention at the New Julien Hotel, Dubuque, on February 13th, 14th and 15th. The following programme has been arranged:

WEDNESDAY, FEBRUARY 13.

9:00 A. M.

Meeting of executive committee at New Julien Hotel.

10:00 A. M.

Open meetings at Convention Hall.

Registering new members.

Payment of annual dues.

Presenting written questions for question box.

2:00 P. M.

President's annual address.

Report of secretary.

Report of treasurer.

Report of special committees.

Question box.

8:00 P. M. EXECUTIVE SESSION.

Members only.

THURSDAY, FEBRUARY 14.

9:00 A. M. OPEN SESSION.

Paper, "The Mutual Relation of the Retailer and Jobber," H. E. Tredway, Dubuque.

Paper, "Retail Business vs. Banking," A. T. Nelson, Wilton Junction.

Paper, "Side Lines," G. L. Miles, Grinnell.

Paper, "Some Elements of Success," W. A. McIntire, Ottumwa.

2:00 P. M. EXECUTIVE SESSION.

Talk, by Fred H. Cozzens, Detroit, secretary Inter-State Retail Hardware Dealers' Association—"Organization, the Key Note of Twentieth Century Methods."—Discussion.

Election of officers.

Question box.

8:00 P. M.

Attend Opera House in a body. Complimentary from Dubuque jobbers and manufacturers.

FRIDAY, FEBRUARY 15.

9:00 P. M. EXECUTIVE SESSION.

Closing the convention work and outlining plan of action for 1901.

Miscellaneous business.

Adjournment.

### Minnesota Retail Hardware Association.

The programme for the approaching meeting of the Minnesota Retail Hardware Association, which will take place in Minneapolis February 27th and 28th and March 1st, is not yet fully prepared, but the following circular emanating from Thomas McCracken, the Secretary, whose address is Boston Block, Minneapolis, gives the latest information regarding the coming convention:

"Our next annual convention will be held in Minneapolis February 27, 28 and March 1, 1901.

"A fare and a third will be granted on the certificate plan, if 100 certificates are presented (of which there is no doubt), you to pay full fare in and take a certificate from your local agent which will entitle you to a one-third fare on return. Some of the hotels have also granted reduction in rates to membership of the association.

"Don't neglect to take certificates.

"Neat gold badges will be furnished our members at the membership of the Association.

"We will forward you soon a programme of meeting, and trust there may be no reason why you cannot be present. Railroad tickets will be in force three days before and three days after close of convention, giving you in all nine days to spend in the Twin Cities.

"We cordially invite every dealer in the State to be present. Many important questions will come up for consideration in which you are interested, and your voice is needed to help shape our course of action, and should not be withheld."

### The Ohio Hardware Association.

From all appearances the meeting of the members of the Ohio Hardware Association, in Cincinnati, February 26th, 27th and 28th, will be the most memorable in the history of the organization. Every effort is being made by the manufacturers and merchants of that city to welcome the visiting delegates of the Association, and make their sojourn with them filled with enjoyment and hours of interest from every point of view. They have already succeeded in creating a large fund for the entertainment of the delegates, and the possibilities are that Cleveland will have to look to her laurels, for Cincinnati is on the warpath with a view of making comparisons between the two cities greatly in her own favor. When it is realized that over 400 of the representative merchants of the State attended the Cleveland meeting of last year, it can well be understood that the Committee on Entertainment realize the amount of work they have before them in this connection. Every retail Hardware merchant in the State has had forwarded to him a folder which reminds him that "The best convention in the history of the Ohio Hardware Association will be held at Cincinnati the last three days of February." With the hotels of the city also hustling in the same direction, giving all the information in regard to rates, points of interest, etc., that would make a stay in Cincinnati intensely enjoyable, they await with confidence the arrival of the distinguished guests. The official programme of the meeting will shortly be issued, and the members of the Association await its arrival with feelings of expectation that are tempered by the knowledge of a good time in future.

### "Anchor" Brand Hack and Butcher Saw Blades.

H. D. Lanfair, Springfield, Mass., manufacturer of the "Anchor" brand hack and butcher saw blades, saw frames, etc., has appointed the Allerton-Clarke Co., 97 Chambers Street, New York, their general agents. The "Anchor" brand saw blades are claimed to be made from the finest quality hot-rolled tool steel. The teeth have an improved irregular set, which causes them to run quite smoothly and cut very fast. Being tempered evenly throughout, they are exceptionally tough, and, consequently, hard to break. The butcher saw blades have the finest quality of steel used in their manufacture, and they are placed upon the market tempered, polished and set in file ready for use. The output also includes the "Anchor" hack saw frame, which is furnished in several sizes: 8, 9, 10 and 12 inch; also, the Lanfair saw punch, manufactured more expressly for punching the end holes in butcher saw blades. This enables such blades, which are furnished by this manufacturer in coils of 50 feet, as well as the special several lengths usually carried in stock, to be cut from the coil, punched with the saw punch above referred to, and fitted to rigid frames of any required length.

### The "Comet" Sprayer.

In another part of the paper will be found an advertisement of the new lawn and garden force pump which is advertised as well as a perfect fruit tree sprayer. It is manufactured by H. B. Rusler, Johnstown, Ohio, who will furnish upon application a free catalogue that will give hints on spraying, and testimonials regarding the value of the "Comet" as a fast-selling sprayer. The "Comet" is placed on the market at an extremely moderate price that would place it in reach of any one in need of a sprayer. Mr. Rusler is one of the oldest manufacturers in this line of business, having been manufacturing the "Comet" for the past eleven years, from year to year greatly improving the same.

## PACIFIC RETAIL HARDWARE ASSOCIATION.

The third annual convention of the Pacific Retail Hardware Association was held in Woodland, Cal., January 16-17. The meeting was an important one from the fact that a larger number of the trade were present who were interested in the proceedings, and also from the manner in which the various questions that arose were carefully considered. The first day was devoted more particularly to executive work, which enabled the members present to fully discuss the different questions as they came up. It has been the custom on the second day of the convention to welcome and receive the manufacturers and jobbing houses and their representatives, in order that any questions which arose in which they were interested could be discussed in connection with the members of the trade who were present as delegates. On this occasion this privilege was fully exercised, and a very harmonious state of affairs was the result.

When the convention was called to order by President John C. White, nearly seventy members responded. An invitation was extended to the San Francisco and Oakland Retail Hardware Dealers' Association to be present at the convention, and a delegation consisting of President O. F. Sites, S. V. Armstrong, C. A. Bennett and M. M. Brown were present at the proceedings.

President White delivered the annual address, in which, among many other things of importance, he said:

The value of business friendship needs no advocacy at my hands. The more we know each other and become acquainted, the better we are fitted to join together and act harmoniously for the benefit of all, and meetings such as these of men engaged in similar business pursuits are of great value from every standpoint.

The purpose of commercial organizations will be much underrated if looked upon as mercenary only or to maintain or get better prices or increase the volume of business. The fierce struggle for business sometimes leads men engaged in like occupations to distrust each other and take unfair means to promote trade, but it is to be hoped that one result of our meetings will be that we become better acquainted with each other and learn that our fellow members are just as honest as ourselves, and form friendships which we had not before.

### TRADE WARFARE.

There are times, with traders as with nations, when war becomes almost necessary, but we all know what war means, and its definition by a great American soldier who was well acquainted with the subject, that "war is hell," should be borne in mind and make us pause and think of the results before we plunge into trade wars or conflicts. Exhaust every resource to reach proper and fair understandings. If you have an agreed price with each other in your local sphere of business, stick to it. Let the customer go. If this be mutual, you will get the next customer—both have made a sale and each a profit; but cut your price and your neighbor will cut the next time—each has made a sale but neither a profit. So, when an aggravating case or condition presents itself or when some one has misrepresented, call on him for explanation, and you will generally find that the explanation can be given; or if a mistake, due apology can be made, which will restore confidence. But if it is an unmistakable case, showing bad faith, declare war, and the hotter the war, the sooner peace follows.

### PROSPERITY OF THE COAST.

By all reports and from what we can learn from all over California and the Pacific Coast, the season has been good so far for grain and fruit men. The other industries of the coast are in a prosperous condition, and the low prices for agricultural products we can reasonably hope will be advanced as freight becomes cheaper.

The first business to feel good times is the Hardware and Agricultural Implement trade. So let us take such action as we can to get our fair share of the results of prosperity that we are justly entitled to, and do all we can to promote confidence, uphold and spread abroad the fame of the great State of California, and assist the various organizations of

business men who have certain specialties intrusted to them, such as forest preservation and irrigation problems and conservation of the waters of the State, and, above, all that of inducing a desirable immigration of industrious people to share with us the blessings which California is abundantly able to bestow on capital, energy and well directed labor.

Next in order was the report of the Executive Committee, which was read by Vice-President Oscar C. Schulze. It was found full of the interesting matter that makes association desirable. It was listened to attentively by the delegates present. After the reading of the report of the Executive Committee, the convention then entertained the question of differentials as now existing, and the Executive Committee was fully instructed as to the enlargement and extension of the differentials desired on various lines of goods. A general discussion then took place on special organization in towns and districts, which brought out a very interesting interchange of ideas as to respective methods of conducting a retail business. The following resolution was offered by Vice-President Oscar C. Schulze, and was unanimously adopted:

*Resolved*, That inasmuch as the San Francisco and Oakland Retail Hardware Dealers' Association, by a committee of four, has visited our body at its annual meeting, at our invitation, and there signified a willingness to link its association with ours, for the purpose of increasing the scope of our usefulness, it being conceded that the aims and objects of both associations are identical; therefore be it

*Resolved*, That our Executive Committee meet with the Executive Committee of the San Francisco and Oakland Retail Hardware Dealers' Association, for the purpose of establishing a uniformity of action and work, and for formulating plans conducive to the mutual welfare of both associations.

The Pettigrew Parcels Post bill, now before Congress, was then brought to the attention of the convention by G. A. Gutman, of the Executive Committee, which resulted in the following preamble and resolution being passed.

### THE PARCELS POST BILL.

*Whereas*, We are informed that a bill is at present before the Congress of the United States, known as the Pettigrew Parcels Post bill, whereby it is proposed to carry packages from any point to any point in the United States at a common rate of postage; and

*Whereas*, We believe the question of the enactment of this proposed law is one which is of vital interest to every legitimate jobbing house and manufacturing concern on the Pacific Coast, and of equal or greater interest to every legitimate retail dealer, not only on the Pacific Coast, but in every other section of the United States; and

*Whereas*, If the Government should proceed to carry packages at the rates mentioned, we believe it is plain to any one what the result would be in relation to purchases being made in this way by people all over the Pacific Coast; and

*Whereas*, It is known that even now great quantities of all classes of goods are brought into Pacific Coast territory from the large department houses throughout the United States; and

*Whereas*, We believe it would prove extremely detrimental to every concern doing a legitimate business, be they manufacturers, jobbers or retailers, on the Coast, if such a law be passed; therefore be it

*Resolved*, That this association in convention assembled agree unanimously with the preamble as herein set forth and that we are unanimously opposed to the enactment of any such law, and we recommend that each member of this association enter into correspondence at once with the Congressman of his district and Senator of the State, urging them to use their utmost endeavors to defeat the passage of the said Pettigrew Parcels Post bill as a matter of public policy.

It was suggested, in addition, that this Association send a copy of this resolution to each of the Congressional representatives of California.

The enormous combinations of capital largely affecting the interests of the Hardware trade then became the subject of discussion, being unprecedented in the history of that industry, and the convention on discussing the matter decided that it would lead to unsatisfactory results to the individual dealer, and through him to his customer, unless some check was placed upon this desire to control absolutely the output in certain lines. Many letters were read from different organizations in the Middle West having reference to similar views, and substantiating those advanced by the delegates present.

Nevada City, Cal., was chosen as the place for holding the fourth annual meeting.

The former officers were re-elected for the ensuing year, as follows:

John C. White, president, Marysville, Cal.  
 Oscar C. Schulze, vice-president, Dixon, Cal.  
 William Earll, treasurer, Chico, Cal.  
 Robert W. Boyd, secretary, Marysville, Cal.  
 G. A. Gutman, member Executive Committee, Germantown, Cal.  
 George A. Legg, member Executive Committee, Nevada City, Cal.

An Auditing Committee of three was appointed, consisting of Elam Biggs of the Elam Biggs Hardware Co. of Nevada City, John Simpson, Tehama, and J. F. Sersanus of the Estate of George W. Freeman of Willows, Cal.

An invitation was then received from the ladies of Woodland, expressing a desire to give the members of the Association present a reception, which invitation was received and accepted with many thanks by the Association. The entertainment took place Wednesday evening in the spacious parlors of the Hotel Julien, which had been profusely decorated for the occasion, and the members present, with their guests, were provided with a very enjoyable musical programme, after which dancing and card playing were participated in and refreshments were served by the ladies, concluding an evening that will linger long in the memory of all present.

Thursday morning session was assembled at 10 o'clock, and, in accordance with the invitation extended by the convention, representatives of the jobbing interests of San Francisco and Sacramento were present in force, most of them being represented by the principal members of the firm or company. Nearly twenty concerns responded to the invitation, in addition to which William R. Wheeler and A. C. Rulofson of the Traffic Committee were present, Thomas P. Smith, secretary of the Pacific Coast Hardware and Metal Association, and a number of others representing the commercial and manufacturing interests of the Coast. President White giving a resume of the deliberations of the executive session, and calling attention to the different subjects that engaged attention, brought on a free discussion of the points of interest, which was followed by a free exchange of individual ideas entirely on the future interest and well-being of the Hardware industry. The convention expressed themselves, through their president, as being exceedingly gratified to find that the views of the manufacturers of California were at one with the views of the Association on so many subjects of interest to each, the general result of which was believed to be that the retail and wholesale Associations would be found to draw much closer together than could reasonably have been anticipated.

The Executive Committee were endowed with full power to act in joint session with the Executive Committee of the various chapters of the Pacific Coast Hardware and Metal Association. This intimation, affecting the principal questions at issue between the jobbers and retailers, was received with much pleasure by the delegates present. The business of the joint conference having been concluded in such a satisfactory manner, the convention then adjourned.

Under the auspices of the Entertainment Committee of Woodland, the members of all the associations were invited to meet with some of the prominent commercial and pro-

fessional men of Woodland at a banquet, which enabled 200 guests to sit down to a most enjoyable and delightful affair. Under the inspiring music of the Woodland String Band, and the able direction of Mr. Biggs, who acted as toastmaster, many responses were made, and a happy entertainment was the result, concluding at a late hour. After the singing of "Auld Lang Syne" and "Home, Sweet Home" had reminded the assemblage that the end of an enjoyable day was already reached, everybody departed with feelings of gratification and a sense of satisfaction with the day's employment.

### The Necessity of Paint

Is demonstrated more strongly every day—and of good paint only. By this we mean those paints serving the purpose for which they are intended, i. e., to preserve and protect the surface to which they are applied, and not to be merely ornamental. The value of good paints can hardly be estimated; while they are not cheap in the ordinary sense, they are far more economical in the long run than the so-called "cheap" paints. If two houses of similar architectural construction are painted, one with a good lasting paint, and the other with a paint made to sell cheaply, the former will soon prove that it has been a paying investment, as its appearance, after a short period of time, in comparison with the latter, will be far superior, thus tending to enhance the value of the former, while the latter will have deteriorated.

The Harrison "Town and Country" Paints can be depended upon to look well and wear well; they have made a world-wide reputation for durability, brightness, covering capacity and uniformity, having been on the market as standard since 1875.

Other Harrison paints of great merit are the Harrison Floor and Deck Paints, and the Harrison Roof Paints, their purpose being indicated by their respective names. For radiators and bath tubs the Harrison Enamels and the Harrison Bath Tub Enamels will be found desirable. Among the household effects there are numerous articles that can be reclaimed by the use of a little paint. For this purpose the Harrison Interior Decorative Enamels, Varnish Stains, Wire Screen Paints, Blackboard Slating and the Household Ready Mixed Paints are suitable and reliable, and are put up in small packages convenient for use. For re-enamelling the bicycle the Harrison Bicycle Enamel. Buggies and wagons can be easily brightened with the Harrison Varnish Carriage Paints and the Harrison Wagon Paints.

The Harrison White Lead is well known for its extreme whiteness, fine grinding and covering, and the Harrison Oil Colors are considered the standard for purity and strength. The Harrison Superfine Coach Colors have made an enviable reputation for fine carriage and car painting.

For the prevention of rust on structural and other iron and steel work, the thoroughly reliable paints are the Harrison Red Lead for Priming, and the Harrison Antoxide for finishing. The demand for the Harrison Varnishes, since they have been made on an extensive scale, has steadily increased, proving them to be of the same high standard as the other Harrison products. The Harrison "1793" Vermilion is a bright Vermilion that does not fade nor turn black, and being much lower in price than English Vermilion, is consequently much more economical to use. The Harrison "Weatherproof" Enamels are for exterior use only, and will stand the most severe exposure test. They are especially adapted for marine and other work exposed to a salt, moist atmosphere, and will not chalk, crack or scale.

For any information on paints mentioned above or any other paint, Harrison Bros. & Co., Inc., will gladly furnish same. Address the Company at 35th and Gray's Ferry Road, Philadelphia; 117 Fulton Street, New York; 27 Lake Street, Chicago.

The one eternal lesson for us all is how better we can love.

### The Doran Lighting System.

The Acorn Brass Works, 19 H. Jefferson Street, Chicago, Ill., whose advertisement appears upon page 12, are the sole owners and general agents of the Doran Lighting System, which is claimed to be the ideal of perfection in hydro-carbon lamps. The system is one in which the use of gasoline is the important agent. It is in this system designed that the gasoline should be conveyed throughout an entire building through a flexible hollow wire that can be put through crevices or around corners, and concealed the same as electric wires. As many lights as are desired, both inside and outside of a building, can be supplied from the same tank. As the tanks are tested to 150 pounds pressure, there is claimed to be absolutely no danger, for in use they are not subject to more than 60 or 70 pounds pressure. The construction of the light is such that when it is once put into operation it is always ready for instant use through the medium of a by-pass operated by small chains hanging within easy reach attached to a lever that opens and closes a small valve. (See illustration herewith.) When the use of the light is desired, all that is necessary is to pull one of the chains, which opens the gas orifice to its full capacity. When not in use, the light is turned down to a very small flame, that is scarcely noticeable, yet high enough to keep

"DORAN" STREET LAMP.

the generator hot and the light ready for instant use. The generator is situated between the mantles, and the gasoline is conducted to the generator, where it is immediately changed into gas from the heat of the flame or mantles. The generator is the only wearing part of the entire outfit, and is interchangeable; any one can change it. An extra generator accompanies each light, which practically insures the light for years, for when a generator has shown a defect the user can change it for the good one and mail the defective one to the manufacturer, who will put it in shape or return a new one for it free of expense for two years from the time the lights are installed; thus the user is placed in direct communication and is assured that his lights will always be kept in order. This light is particularly desirable for factories, foundries, stores, churches, armories, halls, docks, picture galleries, open air and indoor gardens, bar and billiard rooms, restaurants, Summer hotels, grounds, piers and excavations. For photo-engraving, printing and half-tone work, in a general way this light is invaluable. Aside from being considered superior to the Electric Arc or Acetylene, the cost of installation and operation is fractional. The system lights are just as convenient as electricity or gas, as they are so constructed that it is only necessary to pull the chain to switch on the light. Once put into operation they are always ready for instant use. The expense of installation is nothing in comparison with electricity or gas, and the cost

of maintenance is away below either Electricity or Gas. Posts are also supplied for street lighting or gardens. The lamps that are used in the operation of this system present features of importance that are worthy of study. They should not be confounded with lamps limited to 100 candle-power gasoline. These are claimed to give 1,250 candle-power. They have no fount to fill nor mantles to break. In

GASOLINE TANK WITH PUMP.

operation there is no shadow below—light is thrown all around without obstruction. It is simple in operation and practically noiseless, and the ease with which it can be operated, turned up or down instantly with a chain, is a most attractive one. In use, the arc lamps possess every appearance of the best electric lamp, and, as the manufacturers demonstrate in the circulars that they send in connection with its introduction by agents, it is deemed by them to be the cheapest system on the market, both in first cost and in operation, over any similar light of comparatively as strong power. They desire to appoint agents for every town and city in the United States, and solicit correspondence having this object in view. Exclusive privileges will be given to the agents that will make it an object to cover the field, with a certainty of producing profitable results.

F. CORTEZ WILSON & Co., 239-241 Lake Street, Chicago, Ill. are the manufacturers of the Acetogen, which is an apparatus for generating acetylene gas. They recently issued an extremely interesting booklet on the subject of Acetylene Generation, in which is fully described the method of generating gas by this apparatus. As the literature emanating from this firm is prepared with a view to avoiding as many technicalities as is possible, the contents of the booklet are very easily understood by any one unfamiliar with gas-making processes. The process by which the Acetogen generates gas is a method that introduces the carbide to the water, and the superiority of the claims of this special method is set forth in the booklet under review in very convincing language. The book is attractively gotten up, with wide margins and small illustrations of various kinds adopted for the purpose of presenting the illuminating devices popular among the ancients. Illustrations are also given of the Acetogen and its method of construction and operation. It will be found well worthy of perusal.

## RECENT TRADE PUBLICATIONS.

MILWAUKEE AUTOMATIC MACHINE Co., Milwaukee, Wis., are distributing a handy blotter, composed of several sheets of blotting paper with a celluloid ornamental top to the same, very attractive in appearance and making a very neat piece of advertising.

GENEVA TOOL Co., Geneva, Ohio, send out on their own account a 1901 greeting commemorating their 55th birthday. This is a long time for one concern to be in business, and as they say, they have found in the progress of the number of years they commemorate the elixir of life, for they are at the present time younger than ever in everything that would count for success in their special line of business. A very clever little four-page booklet, printed in two colors on attractive paper, and would command attention wherever sent.

ECLIPSE REFRIGERATOR WORKS, Burlington, Vt. The 1901 catalogue of Eclipse Refrigerators, of 40 pages, shows this attractive line handsomely illustrated, and well printed on good paper. This covers a desirable line of goods manufactured with a removable ice chamber and possessing a positive circulation of dry air by means of removable flues, introducing cold air to the bottom of the provision chamber. It covers a line of domestic refrigerators with and without water coolers; also grocers' refrigerators, ice chests, etc. It is a desirable pamphlet for the approaching season for such goods, that should be in the hands of all of our readers.

GEORGE W. SOUTHWICK & Co., 147-149 Centre Street, New York. Four-page booklet having reference to Southwick's Wire Belt Lacing, which is referred to as possessing great economy in the saving of belting alone, as a joint properly made with this lacing is claimed to last ten times longer than most of the material used for that purpose. They also catalogue an Automatic Belt Hook Tool, which insures perfectly made joints, every joint being alike. In connection with this tool, they advertise a Cold-Rolled Steel Belt Hook, which when used with the Automatic Belt Hook Tool makes a perfectly made joint of great strength. Included in the contents of the booklet is reference to the Polar Belt Dressing, a leather preservative and dressing easily applied with a brush or a piece of woolen cloth.

SMITH & HEMENWAY Co., 296 Broadway, New York, have recently issued a new edition of that catalogue of theirs which they characteristically denominate "The Green Book of Hardware Specialties." This certainly is a publication in which a great many salable articles in the Hardware line are crowded, and makes the little pamphlet as full of interest as the latest novel. There is scarcely a page in the book but of which the Hardwareman would say: "If I had those goods in stock I could sell them at a profit." They are Hardware goods from the word "Go," and include the line of tools made by the Utica Drop Forge and Tool Co., the Engstrom Swedish Razor, the Ran-Tan-Ka-Rus Razor, a full line of Butcher, Kitchen, Shoe and Hunting Knives, Byrnes' Glass Cutters, Giant Nail Pullers, Giant Tack Pullers, etc., etc. They also publish in connection with this a memorandum book covering the entire year under the head of "A Daily Reminder of Important Matters," in which the line of products handled by them is incidentally referred to, and a lot of space left for important items to be needed day by day, being in the form of a diary, five lines constituting a record of each day in the year.

CLARK MFG. Co., Buffalo, N. Y. Pamphlet catalogue, oblong in shape, of 54 pages, covering the line of Clark's Blind Hinges, which have been made by this company for 33 years. This is a handsomely printed catalogue on extra fine paper, well illustrated throughout, showing the many improvements adopted in the construction of these desirable goods. Included in its contents, in addition to Blind Hinges, will be found their line of Gate Hinges and Latches; Loose pin door butts, with the manufacture of which they have been identified for many years; "Buffalo" and "Olympia" Spring Hinges; "Buffalo," "Eclipse" and "Square" Sash Pulleys and "Niagara" Stove Pipe Dampers, to which an additional reference is made in another column of this issue. It is a very complete catalogue on these lines of goods.

UNDERHILL, CLINCH & Co., 94-96 Chambers Street, New York, are the agents for the Geneva Tool Co., Geneva, Ohio, manufacturers of the superior line of goods which is marketed under the name of "Geneva." They are also noted for sending the trade occasionally something new and novel in the stationery line. Hardly anything emanating from the literary department of the company but what is well worth reading, and calls attention in a dignified way to the products of this well-known company. Underhill, Clinch & Co., following in their footsteps, issue a very artistic little booklet denominated "Little Preachment on the Up-to-Dateness of Geneva Steel Goods," in which attention is called to the immense assortment that is constituted under that name at the present time, and the fact that they carry in their stock in this city the largest and best assortment of agricultural steel goods possible. This line includes every description of hoes, rakes and forks, with the great variety of uses for which these goods are wanted. Underhill, Clinch & Co. have recently completed in their new sample rooms a magnificent display of the various types and styles of such goods which are the most important in the industry. They state that they have in course of preparation a catalogue that will illustrate the entire line, and it is their endeavor to make this catalogue the best of its kind representing this important branch of the business.

E. C. ATKINS & Co., Indianapolis, Ind. Pamphlet catalogue of 174 pages of Saws and Saw Tools, under the subtitle of "The Sawyers Hand Book." This includes their line of saws of every description for the Lumberman, together with the various appliances needed in the proper use of the same. It is filled with suggestions to lumbermen and sawyers in their use and care of saws, and also includes all additions and changes that has been required by their rapidly increasing business. This is not intended to cover the full Hardware line of saws, but only such as are of interest to lumbermen and sawyers, more particularly. In their several branch houses at Memphis, Tenn.; Minneapolis, Minn.; Atlanta, Ga., and Portland, Ore., E. C. Atkins & Co. carry a full line of saws of all kinds, also tools and other specialties of their manufacture, constituting a well-assorted stock of mill supplies. In connection with these branch houses, they have shops well equipped with improved appliances and tools, and a corps of skilled workmen by whom repairing will at all times be carefully and promptly done. The volume under review is an extremely interesting and very desirable one for the distribution of which it is more especially limited, and the lumberman or mill sawyer who does not send for a copy of it makes a big mistake.

## NEW GOODS AND SPECIALTIES.

### Rogers' Clothes Rack.

Rogers & Son, Kendallville, Ind., are manufacturing and distributing through the Hardware and house-furnishing goods trade a new and improved Clothes Rack, which we illustrate herewith. It is a very useful appliance of a house-keeping character, and is intended to be marketed at a low price, one that will bring it into general use. Among its many advantages, the manufacturers refer to the fact of its self-adjusting qualities, which permit of its being extended or constructed regardless of hooks, latches or any other mechanical contrivance, which makes it superior to the old-fashioned method of manufacturing similar household specialties, and the fact that it also operates equally as well with clothes upon it as when entirely free from them, makes it more convenient for closing and setting out of the way without the necessity of removing anything from it. It is also referred to as being well adapted for the airing of bed-

and adjusted in accordance with the height of the steps upon which the legs rest. The device has been regarded with great favor by progressive decorators, its utility for the combination of circumstances rendering such a step ladder desirable being fully recognized. The head of the ladder is protected from wrenching by a lug of band iron, and every step is braced on each side with a patent drive brace, which makes the whole structure absolutely rigid, while the metal tie bands in front hold the steps securely in their mortises and prevent spreading apart. The manufacturers claim that no trestles are needed by any one using this description of step ladder. Every care is taken in the construction of these ladders to make them perfectly safe and reliable. The braces that are attached are prevented from splitting by iron trimmings that are attached with real screws, not tacks. In the Miller No. 1 even coated wire nails are used in the construction, as they are considered exceedingly tenacious in their

ROGERS' CLOTHES RACK.

clothes, and even feather beds, being so constructed that its surface is much greater than would appear to be the case. It has a hanging surface of 36 feet; is made of hard wood with oil finish, and will no doubt meet with successful sales wherever it is introduced.

### The Miller Ladder.

The Miller Ladder Co., 204 Orleans Street, Chicago, Ill., are placing on the market, through the Hardware and House-furnishing goods trade, the Miller Ladder, an illustration of which we give in the course of this article. This is one of the strongest and most desirable ladders for the purpose that has been brought to our attention. In fact, it is a radical departure from the conventional style of step ladder. It has an individuality entirely its own, arising from the fact that it is made with or without a stairway attachment, which is shown in the illustration herewith. Hinging the legs above the top step makes that step as steady as the lowest one. The horizontal brace level with the top step gives a broad foothold or pail-rest. When the Miller Ladder is desired to be used with the stairway attachment, the longer extension is folded entirely out of the way, leaving the shorter one to be used independently, which can be used upon any stairway

THE MILLER LADDER.

holding powers and less likely to work loose. This is mentioned to show the care given to their construction. It is the policy of this company to establish local agencies in every town or city, thus making it extremely attractive for local dealers to interest themselves in pushing the sales of these ladders, enabling them to enjoy a fair profit therefrom. Dealers acting as their agents are furnished with advertising matter to assist them in pushing the sale, and the manufacturers state with authority that the demand steadily increases wherever they are introduced. Janitors, plasterers, plumbers, electric light construction men, as well as painters and decorators, find this a very desirable ladder to purchase on account of its important features of steadiness, rigidity and convenience, which qualities the conventional step ladder is frequently without.

### The Twentieth Century Model Clippers.

The Coates Clipper Mfg. Co., Worcester, Mass., have recently added to their line of popular barbers' hair clippers the Twentieth Century Barber Clipper, which bids fair to lead the procession in this important line. The Twentieth Century Model is the latest in the clipper line. It is a combination which the manufacturers thoroughly believe cannot be equalled for the purpose given, as it includes a right-hand, left-hand, No. 1, No. 2, ball-bearing, adjustable spring,

jointed and straight handled all in one. This would seem to indicate that it was the only clipper constructed on such principles as would provide it with so many estimable points. In working this clipper the hand is always in its natural position (Fig. 1). This has the advantage of enabling its use for a longer period of time without fatigue than the ordinary common clipper. By pressing the check the handles are enabled to assume any position that will meet the requirements of the operator. The handles are so designed that a simple movement makes an easy as well as a fine clipper.

TWENTIETH CENTURY BARBER CLIPPER.

The handles may be placed in any position, and the clipper will operate with the same facility. To insure a firm grip the permanent handle is checked, in the midst of which appears the name of the makers, "Coates." The handles of the Twentieth Century Barber Clipper are built on the same principle as a pair of pliers. While the fingers of the hand are moving on a perpendicular plane the plates are vibrating on a horizontal plane. The movable handle is of such a form that the fingers have no tendency to slip off. One of the most attractive features in connection with the sale of this clipper is the fact that it is adaptable for the use of different sized hands. It is well known a large hand requires a larger working space than a small hand. This ob-

FETLOCK CLIPPER.

jection is overcome with this particular clipper, for, as the manufacturers say, "All hands look alike to the Twentieth Century Model." This model is furnished with the No. 151 spring, which is always kept within its torsional limits, and the tension is the same throughout its entire pull. It is a pull spring, and the tension may be changed to suit the

strength of any hand. The comb used in connection with this model is extremely light, but very strong. The teeth are made of sheet metal inserted into a steel band. This enables the manufacturers to make a very strong tooth, and give them a fine polish, and by an improved process of manufacture it very materially adds to the readiness with which it goes through the hair, making it, in the estimation of the manufacturers, superior to a cast tooth for the purpose designed. In Fig. 2 is shown the Twentieth Century Fetlock Clipper, which is made upon the same principles covering the Twentieth Century Barber Clipper, except that it has a grasshopper spring between the handles, the same as the "Coates" old No. 71 model. By its aid the fetlock may be trimmed with equal facility by the right or left hand, and it is not especially necessary to lift the hoof from the ground. These goods are new, and their merits should be inquired into by those handling this line of products, as they will bear full inspection, and be found deserving of all attention given to them.

#### Self-Chalking Chalk Lines.

The Smith & Hemenway Co., 296 Broadway, New York, are just putting on the market the Automatic Self-Chalking Chalk Line. This is a very unique specialty in its way,

FIG. 1.

and is so constructed as to make it impossible for the line to get bound in its frequent operation. The flat spring with which it is provided keeps it wound perfectly tight, not only in drawing out, but also in closing up. The accompanying cuts, Figs. 1 and 2, will give those interested a good idea of the merit of the article, showing its general appearance

FIG. 2.

and its mechanical novelty. The above firm publishes what is known to the trade as "The Green Book of Hardware Specialties," which will be sent out to any one in the Hardware business on application.

#### New "Steel King" Ice Balance.

The Pelouze Scale & Mfg. Co., 133-139 South Clinton Street, Chicago, Ill., are the manufacturers of the new steel Ice Balance which is marketed under the name of the "Steel King." It is claimed by the manufacturers to possess all the good points that are considered requisite in the make-up of a perfect ice balance, and in addition it is more thoroughly constructed with a view to meeting the requirements of the ice trade, that one special feature being deemed of the

greatest importance. It is made entirely of steel, and therefore has no liability of broken castings, neither are there any screws to shake loose, and so impair its utility. The dial, as will be noticed, by comparison is much longer than many other makes, and is marked in a very distinct manner. It is handsomely nickel-plated, the figures being large and black. One peculiarity in the construction of this scale is that it is provided with a "limiter," which is an improvement preventing the spring from being strained beyond its

NEW "STEEL KING" ICE BALANCE.

capacity. When necessary, it can be quickly adjusted by simply removing the cap on top and slightly turning a screw. The simplicity of this movement insures a permanent scale. Any part can be supplied separately, and replaced by the owner without any necessity for returning the scale to the factory. It weighs, boxed, 4 1-2 pounds, and is made in three sizes, with a capacity of 200, 300 and 400 pounds respectively. Prices will be furnished on application, and the manufacturers solicit correspondence having this end in view.

#### Toe-Calks.

Among the advertisements in this issue of the paper will be found that of Leonhardt & Co., Berlin-Schoeneberg, Germany, who have been patrons of our paper for a number of years, and are known as the manufacturers of the H Toe-Calk, which has been noted for a long time as being one of the safest toe-calks possible to be used in the construction of a perfect shoe. By the use of this special calk all anxiety is overcome and all danger for the horse is set aside. The form of the toe-calk being the letter H, presents a number of advantages, which give a perfect grip, always stays keen and form a constant guard against the horse slipping, and the step becomes strengthened and steady. Smooth streets, roads covered with ice and snow, which have heretofore been the terror of all owners of valuable horses, require that every

TOE-CALK.

care and attention should be devoted to the providing of shoes properly protected. By the use of the H Toe-Calk the annoying and frequent tearing of the hoofs is obviated, and the harmful sharpening of the iron becomes superfluous. The general appreciation with which the H Calk has been accepted by the horseshoers is well deserved, and shown by the testimonials of thousands who have been benefited by the continuous use of this small specialty.

55 Equitable Building,

BOSTON.

#### Niagara Stove Pipe Damper.

Clark Mfg. Co., Buffalo, N. Y., among the numerous specialties which they have been manufacturing for a number of years, have had great success with the Niagara Stove Pipe Damper, an illustration of which we give herewith. This is one of the most popular Dampers that has ever been placed on the market, and has been uniformly liked by every stove dealer who has been made familiar with its merits. The tension is secured in the usual manner, and projections on the stem, bearing each side of the blade, prevent its turning. It

NIAGARA STOVE PIPE DAMPER.

is made in five sizes, running from three to seven inches by inches, and is made with either polished iron or japanned wood handle, as shown in the illustration. The manufacturers state that the sales are largely increasing from year to year, and it has received frequent commendation for its perfect construction and smoothness of castings.

#### Hollow Grip Horse Shoe.

The Hollow Grip Horse Shoe Co., Room 1303, Chamber of Commerce, Chicago, Ill., are placing before the Hardware trade the advantages to be derived from the use of the Hollow Grip Horse Shoe manufactured by them, and which should make them a popular article to be handled by that important industry. We illustrate herewith the article referred to. Fig. 1 shows the upper view of the shoe, and Fig. 2 shows the bottom, the hollow grip being indicated by the depression shown in the cut. In designing the Hollow Grip Horse Shoe it was the aim of the inventor to produce an article which, while possessing durability, would also afford the horse a secure hold upon the ground or pavement. At the same time the construction is of a character to relieve the muscles and joints from any strain or jar. It is claimed that this has been fully accomplished in the shoe as at present perfected, the sole or under side of the shoe being provided with an outer and inner circle, located at a convenient distance apart, which extends entirely around the inner and outer edge of the shoe, thereby forming a groove or channel. The two rims act as calks, and it will be observed that the inner rim extends below the lower edge of the outer circle at the toe, so that said inner part will first come in contact with the ground as the horse's foot is lowered, and as a means of relieving the muscles of the leg and shoulder from the strain generally experienced the inner rim is made elastic or resilient, and this effect is produced by sloping the same inwardly. It is enhanced somewhat by making the same relatively thin. The outer rim, as will be seen, is comparatively thick at the toe of the shoe, thereby securing rigidity at this place, which is frequently subjected to violent blows. From the preceding description it will be seen that as the foot is lowered the inner circle will strike the ground, and if the surface is hard it will spring upward, and then the thicker or outer circle will also strike the ground, but the blow will be materially lessened, and to such an extent as to cause no harm to the horse. Horse owners are constantly on the alert for an improved shoe that will enable the owner of the horse to proceed

will safety, at the same time utilizing the best advantages of the animal in the employment of which he may be engaged. Among the several advant-

FIG. 1—UPPER VIEW OF SHOE.

ages which are claimed for this shoe we may mention the following: It is relatively cheaper, because it must be fitted without heating; it will wear

FIG. 2.—BOTTOM VIEW OF SHOE.

longer, having no calks to sharpen; it is less liable to cause an accident to a horse, because it cannot get wedged in crossing railroad tracks, cable slot, etc. It lessens all fear of a horse interfering or cutting himself. It prevents a horse from slipping on smooth pavements or on ice. It greatly increases the knee action of the horse by its peculiar construction and the elasticity of the inner circle. As a driving shoe it has all the qualities for ease, comfort and safety obtainable from any form of horse shoe. In fact, it represents more nearly the natural hoof of a horse than any other shoe put on the market, and is claimed to be the only shoe that gives the horse absolute relief from the concurrent jar and strain of the muscles of the leg and shoulder. The utility of this article is well worth looking into, and we should advise those interested in the marketing of horse shoes to write to the company at the above address for a pamphlet they publish in connection with the same.

#### The Kelly Handle Bar.

The Kelly Handle Bar Co., Cleveland, Ohio, are manufacturing and distributing through the Hardware trade and dealers in bicycle sundries, the Kelly Handle Bar, which we illustrate herewith. They have been for five years engaged in the manufacture of these bars, and feel that to-day their production is of the most improved construction connected with this branch of the business, their handle bars having

FIG. 1.

already an international reputation, as many of them are sent abroad under a popular demand that has been created in foreign countries. In the manufacture of the Kelly Handle Bar nothing but the best of forged connections are used, and no brazed tubing. It is claimed that the advantages of a divided bar over a rigid or reversible are so many and various that they are especially popular from this their principal

tension. This is 20 inches wide and 22 inches when level, and is intended for racing and club men. Fig. 3 is their California Handle Bar, with 1-inch forward extension. This bar is 20 inches wide and 22 inches when level. The manufacturers claim there is no fear of their handle bars not

FIG. 3.

working, or of wearing loose. A correct pitch of grips is given in all positions. The Kelly Handle Bar can be converted from a drop to an up-turn by simply removing the locking screw and reversing handles. In fact, it is claimed by the manufacturers that by adopting the Kelly Bar the dealer is saved the expense and annoyance of handling a large assortment of bars to meet any of the special requirements.

"De man dat's dissatisfied an' shows it by workin'," said Uncle Eben, "kin be credited wid hones' ambition; but de man dat shows it by talkin' ain' nuffin' but a plain kicker."—*Ex.*

## REVIEW OF THE MARKETS.

**Wire Nails:** The trade was somewhat surprised to receive notice from the American Steel and Wire Co., under date of January 29th, that they had advanced Wire Nails and Plain and Barbed Wire \$2 per ton, the advance to take effect at once. The previous price had been maintained so long the supposition had been strong that when a change was made it might be one making prices a shade lower, and stocks were uniformly low, although some good orders had been placed. The recent reduction in freights agreed upon will make the advance slightly less than the 10 cents referred to, and the business done since the market was strengthened by this action of the company would indicate it was just the thing needed to stimulate orders, as business is referred to as being very good. Quotations based on the advance are as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots.....	\$2.30
"    less than carload lots.....	2.35
To retailers in carload lots.....	2.40
"    less than carload lots.....	2.50

New York prices are not affected seriously by the slight change, and are quoted as follows:

To retailers, carloads on dock.....	\$2.53
Small lots at store.....	\$2.55 to 2.60

**Cut Nails:** The manufacturers of Cut Nails were not long in taking advantage of the action of the Wire Nail producers, and agreed to advance their price 5 cents a keg. Quotations consequently are as follows, f. o. b. Pittsburgh, plus freight, terms 60 days, or 2 per cent. off in 10 days:

Carload lots.....	\$2.00
To jobbers in less than carload lots.....	2.05
To retailers in less than carload lots.....	2.15

New York quotations are as follows:

To jobbers in carload lots on dock.....	\$2.15
"    less than carload lots on dock.....	2.20
To retailers in less than carload lots on dock.....	2.30
Small lots from store.....	\$2.25 to 2.30

**Screws:** The manufacturers viewed the unsettled conditions of the screw trade with apprehension for the demand for Spring, which is usually a good one, and thus should be large. Reduced quotations have been decided upon to stop the floating of so many special discounts. The following reduced list of discounts was agreed upon, and the change being a radical one, concessions of moment are not looked for or anticipated:

	Discount.
Flat Head Iron.....	90 %
Round and Oval Head Iron.....	87½ %
Round and Oval Head Piano, unpollished.....	87½ %
Fillister Head Iron.....	85 %
Flat Head Brass.....	87½ %
Round and Oval Head Brass.....	85 %
Flat Head Bronze Metal.....	80 %
Round and Oval Head Bronze Metal.....	77½ %
Flat Head Nickel Plated on Iron.....	80 %
Round and Oval Head Nickel Plated on Iron.....	80 %
Flat Head Nickel Plated on Brass.....	80 %
Round and Oval Head Nickel Plated on Brass.....	80 %

Flat Head Iron Screws, Blued and Black, 5 per cent. advance on net.

**Barb Wire:** The advance of \$2 a ton applied also to this important line, and the advance not being a very important one, will have but little effect on the large demand anticipated for Spring trade. Quotations for domestic trade are as follows, f. o. b. Pittsburgh, net cash 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots, Painted.....	\$2.60
"    Galvanized.....	2.30
"    less than carload lots, Painted.....	2.65
"    Galvanized.....	2.35
To retailers in carload lots, Painted.....	2.70
"    Galvanized.....	3.00
"    less than carload lots, Painted.....	2.80
"    Galvanized ..	3.10

Ellwood and Baker Wire is 5 cents and Washburn & Moen Glidden 10 cents per 100 pounds higher than the prices above named.

**Plain Wire:** The mill prices of Plain Wire were affected by the advance the same as other Wire products, and changed the prevailing prices; business is noted as being quite fair, with a large demand in sight. Quotations are now stated as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. off for cash in 10 days:

	Base sizes.	Plain.	Galv.
To jobbers in carload lots.....	\$2.25	\$2.25	\$2.65
"    less than carload lots.....	2.30	2.30	2.70
To retailers in carload lots.....	2.35	2.35	2.75
"    less than carload lots.....	2.45	2.45	2.85

The above prices are for the base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the advances indicated in the following table:

Plain Fence Wire Advances (Catch Weights).			
Nos.	Base	Galvanized.	
6 to 9.....	\$0.05 advance over base.....	\$0.40 extra.	
10.....	.10	.40	"
11.....	.10	.40	"
12 and 12½.....	.15	.40	"
13.....	.25	.40	"
14.....	.35	.40	"
15.....	.45	.40	"
16.....	.55	.40	"
17.....	.70	1.00	"
18.....	.85	1.00	"

For even weight bundles, 50 pounds or over, 5 cents per bundle advance on above.

**Rivets:** The American Screw Co., Providence, R. I., under date of February 1st, quote as follows:

In Bulk.....	75 %
Tinners' in Bulk or Papers.....	75 %
Coopers' in Bulk.....	75 %
Block and Carriage in Papers of 100.....	75 %
Hame.....	75 %
Belt, with Burrs.....	75 %
Burrs for Rivets.....	72½ %

**Sink and Stove Bolts:** The present discount on these goods is quoted at 72 1-2 %.

**Tire Bolts:** Under date of February 1st the American Screw Co. quote as follows:

	Discount.
Norway, Philadelphia.....	82½ %
Eagle, Philadelphia.....	85 %
Bay State, Plain.....	77½ %
"    Fluted.....	77½ %

**Cordage:** The market is well sustained, Sisal being exceedingly firm and liable to advance at any moment. The following quotations represent the market:

	Pounds.	Cents.
Manilla, 7-16 inch and larger.....	98	4
¾ inch.....	101	4
½ inch and 5-16.....	105	4
Sisal, 7-16 inch and larger.....	71	½
¾ inch.....	71	½
½ inch and 5-16 inch.....	8	
Lath Yarn, Medium and Coarse.....	7	
Jute Rope No. 1.....	61	½
No. 2.....	51	½

**Linseed Oil:** The Dean Linseed Oil Co., under date of January 30th, 1901, quote as follows:

In lots of less than 5 barrels.....	.68 cents per gallon.
In lots of 5 barrels or more.....	.67 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time.

Bolled Linseed Oil, 2 cents per gallon higher than Raw.  
Calcutta Oil, 85 cents per gallon.

### THE PHILADELPHIA TRADE.

February opened with somewhat of a surprise, owing to the action of the American Steel & Wire Co. in advancing Wire and Wire Nails ten cents per hundred pounds. This, however, does not seem to check the demand, which continues in satisfactory volume, and the fact this advance has been successfully made, seems to foster a desire on the part of some other manufacturers to make similar advances in their lines. While this advance may or may not be justified by circumstances, it is undoubtedly true that some goods are entirely too low, considering the present cost of materials, and advances have likewise been announced on Picks, Mat-

tocks, Crowbars, Wedges, Chains and some other goods which lie near the raw material.

The price of screws, which, ever since the first of the year, has been greatly demoralized, now seems to be approaching stability by the issuance on the part of the American Screw Co. of a new discount sheet, which tends to put prices on a more even basis.

In Wire Cloth and Poultry Netting there is a very curious situation at present. The demand for both lines of goods has been abnormal. Possibly the cut prices tempted freer buying, with the result that jobbers have already sold a large portion of their quota, and find themselves unable to place new contracts at profitable prices, and already some hardening in prices is the result, and it looks as if the tide in these lines might be on the turn.

From many sides we still hear reports of a very flourishing business—the encouragement from the West being particularly strong—many manufacturers saying they are greatly crowded to their utmost capacity. BIDDLE HARDWARE CO.

#### THE PITTSBURGH TRADE.

The quantity of goods moving for this time of year is quite large. All reports show that January sales were the largest of any corresponding month on record.

Prices have been on a very conservative basis, and merchants feel safe in buying for their requirements for Spring business.

We hope this active demand will not lead manufacturers to advance prices above what will give them a fair margin for profit, for there is nothing that will shut off the demand so quickly as this course. The advance of \$2 per ton on Nails and Wire came quite unexpectedly to the trade, so that very moderate stocks were held. The price was thought to have been fully as high as it should be, and the present advance is only possible because the new makers are not yet ready to put their goods on the market.

Western Pennsylvania is fast becoming one big manufacturing city. One of the latest projects is to connect Pittsburgh and the coke regions by trolley cars, running through Homestead, McKeesport, Connellsville and smaller towns dotted along the route. There are plenty of people to make it pay, and we have no doubt before long the Shenandoah Valley will be connected in the same way, bringing New Castle, Sharon and Youngstown into street-car communication. LOGAN-GREGG HARDWARE CO.

#### THE CLEVELAND TRADE.

Wealth has become so common that it modifies the awe it once produced. This is well, for there is nothing more contemptible than an aristocracy based upon wealth. When it becomes arrogant, it justifies revolution. The question is more frequently being asked, "How was it attained?" and if manhood was sacrificed to get it, even church eldership fails to command respect. It is to be hoped the time will come when it will be "as easy for a camel to go through the eye of a needle," as for a disreputable millionaire to hold a high place in respectable society. It is easier to get rich than it once was, as accumulated knowledge makes it possible to crowd into a day what it once took months to accomplish. Accumulated capital in the hands of so many makes it easy to float humbugs; promoters multiply and prosper on the desire to get rich quickly. For a young man to fall in love with a bank account instead of a young lady is esteemed prudent by some, but marrying money does not open all doors to a beautiful home life. Everything seems balanced by compensations.

Wealth does not insure happiness; therefore, it is not the greatest thing in the world. However, the whole tendency of business life is to develop the best qualities and strengthen what is best in life.

January has been one of the best in trade for years. There is less spirit of speculation in business than usual; the demand for goods is based upon needs, and it is sure to decrease

if for any reason consumers' demand decreases. It will be wise to avoid advances if possible, as that is likely to restrict the demand from consumers, and if that is stopped, the back water will very soon reach the manufacturers, when we shall all be waiting for trade.

Farmers will refuse to build if they feel that they are imposed upon by trusts, and they are very sensitive.

THE LOCKWOOD-TAYLOR HARDWARE CO.

#### THE SAGINAW TRADE.

We are pleased to report that the recent advance of \$2 a ton on Wire and Nails has had a good effect on the Hardware trade. It has awakened many buyers who were dozing, and the feeling that other lines may follow in sympathy has given a general stimulus to buying. The general outlook for business this year seems to be exceedingly good, especially in the building line; that is, of course, if people are wise enough to avoid any labor difficulties.

A large plate glass factory has just been organized here, and building will commence as soon as the weather permits. The local coal developments seem to be progressing rapidly; 22 shafts are in operation within a radius of twenty-five miles, and 4 shafts will probably be put down this year. The excellent quality of the Saginaw coal, and other natural advantages, are attracting manufacturing industries to Saginaw. MORLEY BROTHERS.

#### THE COLUMBUS TRADE.

The closing of the nineteenth century (the first one we ever saw come to a close and certainly the last one we will ever see come to a close) was a very busy one. I wonder what the conditions of trade will be at the close of the twentieth century? Anyone now in business whether as manufacturer, jobber or retailer will not be here to see. The whole list, from the youngest man to the oldest, will be either playing a harp or shoveling coal a century hence; but when we come to think of it, it takes iron and steel to make harps and shovels, so we can still be in the Hardware business to a limited degree. I trust not any of us will have to handle shovels, as the profit is too small, and I am sure not any one will care to handle them in the way suggested, even if they could make 7 1-2 per cent., which would be fabulous compared with the present profit.

Well, shovels are not the only "scoop" on the dump, either. Jobbers are carrying on a merry war on a number of articles this year so far. The jobber is certainly the retailer's friend. He buys in carloads or trainloads to get an extra 5 per cent. and then gives it to his customers. If goods go up, the kind-hearted jobber has a stock and fixes his customers. When the drop comes, as it did on screws, Mr. Jobber gets fixed "nit," but he must immediately meet the cut prices. But the Good Book says we were put in the world to do good and I suppose the Hardware jobber thinks he is fulfilling his mission, but not filling his pocket. I wonder what the standard will be a century hence as to measurement, weights, etc? If dealers

would investigate sometimes what they are buying at some especially low prices, they would be surprised. One dealer sells full-sized Pails, Boilers, etc., and full-count tacks, also full-length Picture Cord, Fish Lines, etc., and wonders how his competitors can make the low prices he does; but if he measures, he will find a 10-quart bucket holds 8 quarts and a No. 8 boiler is a No. 7, and tacks, instead of having the marked count, will be 20 to 25 per cent. short. Picture cord and fish lines marked 25 yards have 18 to 21 yards and so on. This is no fairy tale, but will often account for the very low prices made by some manufacturers and jobbers, mostly by jobbers. The fellow who adopts such business methods should be made to shovel coal in the future.

Trade is starting out (or perhaps it is better to say continuing) first class. Those of us who have thus far escaped the pesky grippe have had more than we could do. We have done first what crowded us most. The demand for goods is earlier than usual. Merchants seem to be ready to buy further ahead each year. Goods that will be needed by customers in April are bought as early as December, and even November. Of course prices must be guaranteed and they must have April 1st dating. Often after goods have been shipped, you will get a letter saying they return the goods as they had forgotten the order had been placed with another house 60 or 90 days before. It is a bad policy to sell goods to the average retailer so long before he needs them. He is liable to get overstocked and it is the cause of many failures. Better by far wait until he is ready to sell the goods and then buy, and he will be money ahead in the long run.

The advance on wire and nails of 10 cents was somewhat of a surprise to the trade. The wording of the notice of the advance is nervy. It reads: "Owing to present conditions of the market we find it necessary to advance prices." After clearing over \$7,000,000 in 1900, it would seem that they could have squeezed along for a while yet. Evidently they decided the dealer and consumer had another squeeze coming and they are giving it to them. Prices as a rule are steady for the Hardware trade. The snow blanket we have had on the ground for the past ten days is fine for wheat, and is doing it great good. Sleighs and sleigh bells have been in good demand the past week, but few jobbers in Ohio carry much of a stock as snow is as uncertain as our street car franchise. The outlook for a good business during this year is very flattering. Money seems to be plenty in the banks and rates easy. Some fine business blocks will be erected in our city this year, and a large number of fine residences. Columbus is all right but some of our Councilmen are wrong.

THE SMITH BROS. HARDWARE CO.

#### THE BALTIMORE TRADE.

Due largely to the condition of country roads and the unfavorable weather, trade has been exceedingly quiet the past week, and collections are in sympathy.

The grippe has caught us all and experience meetings are quite frequent. Trade, we hope, will soon reopen with a rush, and all indications now point to a heavy Spring business.

H. W. WEBB & SONS.

#### THE CHICAGO TRADE.

The good results likely to come to the jobbing trade from the late advanced prices in steel and iron, and more especially in Nails, Barbed and Plain Wire and Fence Staples, are already being experienced by us in quite a largely increased demand for finished Hardware. These advances have had a tendency to show to the general trade that the time has arrived in which to call a halt on any further declines in the metal market, for the Spring trade at least, and for this we are truly thankful. As a matter of fact, both jobbers as well as retailers are better satisfied when there is a firm feeling with respect to prices and something like an advancing tendency in goods. Our traveling salesmen report that there is more than the usual preparations being made at this season of the year for building operations

throughout the towns and cities on their respective territories, and while it is to be hoped that nothing like a boom in price shall come to us, we have good grounds for believing that the Chicago wholesale Hardware trade is about to experience the most satisfactory business, if not the very largest trade, that we have ever had.

WELLS & NELLEGAR CO.

#### THE DAVENPORT TRADE.

Under the stimulus of two dollars per ton advance of the American Steel & Wire Co. on Nails, Wire, Barb Wire, etc., there is an active demand for these articles. It may be that this advance will influence the manufacturers of another line, the price of which is now fearfully demoralized, to screw up their courage to make a price more remunerative to themselves.

The Mississippi has at last frozen over and snow enough fell yesterday for the first time this Winter to make sleighing. It may be possible now to sell a few Skates, Sleds, Snow Shovels, Ice Tools and other Winter seasonable goods.

Architect Hammatt reports that the prospects for building the coming season are unusually bright; this being true, there will necessarily be a large demand for Builders' Hardware. On the whole it would seem safe to predict continued prosperity for Hardware dealers.

SICKELS, PRESTON & NUTTING CO.

#### THE ST. PAUL TRADE.

Conditions are improving, and as Spring gets nearer, we feel that we will have almost an average trade, though we must expect some bad conditions because of our short crop last Fall. Still, as this was exceptional, we feel that next season will prove at least up to the average, and that it will put us on a sound footing.

With the trust prices on such things as Sheet Steel, Galvanized Sheets, Nails and Wire, and all such things as are controlled by trusts or combinations, we have many contentions. The position taken by the American Sheet Steel Co. to control freight, is to us particularly aggravating, as we have sometimes been able to get a concession on freights, but the idea that we do not control our own freights is the worst feature. Why should this be so? Have we no rights which these people are bound to consider? Possibly we may find a worse condition some time, but just now this is the worst. We trust that all jobbers will contend for their rights to control their own freights.

C. W. HACKETT HARDWARE CO.

#### THE SAN FRANCISCO TRADE.

Only one discordant note in local trade is reported for this correspondence, but all the mercantile associations in the city, headed by Hardware dealers, are at work to correct the discordant note, the belief being that all will soon be again in agreeable concert tune. The trouble was the discovery that goods were being shipped from Eastern points to the Orient at lower rates than could be obtained from San Francisco. In other words, this city, standing at the Western gateway of the country, sees merchandise bought in the East for Oriental consumption shipped over its head, to its neglect as a shipping point. In more specific terms, the freight from Chicago to China is less than the freight from San Francisco to China. And so the sense of this business community is that there is something wrong when such an abnormal condition prevails, and that it is damaging the business of this port.

Otherise, from the trade standpoint, everything is indicative of good cheer. Collections were never better, and the business troubles to record in this connection, and there are only two, are not bad ones. The crop outlook is fine, as the weather has thus far this Winter been ideal, with enough rain and sunshine for the growing crops, and enough frost to keep plants and trees from prematurely developing, to their almost inevitable damage later on. With such a Winter it is believed by the trade that a highly successful Summer is assured.

# NICHOLSON.

FAMOUS FOR TEMPER  
AND CUT.

NICHOLSON FILE CO., Providence, R. I., U. S. A.

SOLD ALL OVER THE WORLD.

Supplied to 24 Foreign  
Governments.

Within the last fortnight the Board of Trade of San Francisco has reported the assets, \$5,182.48, of A. Watkinson, Hardware merchant at Corning, Cal., transferred to R. N. Nason for the benefit of creditors. Liabilities are listed at \$7,911.57. Also, that the assets of the E. P. Frost Co., Hardware dealers at Paso Robles, Cal., have been transferred to Sanford Bennett and Joseph Sloss, for benefit of creditors. The figures in this case are: assets, \$12,378.09; liabilities, \$9,267.61.

Progress is all the report there is to make at this time in furtherance of what was said in this correspondence two weeks ago relating to the formation of the California Association of Retail Hardware Dealers. A southern California association is in process of formation, and between these south coast brethren and the Pacific Retail Hardware Association of northern California, and the San Francisco and Oakland society, correspondence is now being exchanged with the view of selecting an all-around suitable time this month for delegates from these several associations coming together to effect the State organization.

The local trade is pleased to report among visitors now here enjoying themselves, President D. W. Simpson of the Wilcox Mfg. Co., of Aurora, Ill., and George W. Corbin of P. & F. Corbin, and Wm. E. Bartholomew, coast traveler for the P. & F. Corbin house.

TRADES PRESS ASSOCIATION.

## THE MINNEAPOLIS TRADE.

This is the time of year when people generally have finished taking inventory, closing up the past year's business and opening up for the new. Taking 1900 as a whole and by itself alone, we do not think it has been satisfactory to the trade at large. The volume of business has been fairly satisfactory, but the shrinkage in values from those prevailing at inventory time the previous year has been considerable. Of course, as a matter of fact, the two years, 1899 and 1900, should be taken together.

On account of the very mild weather and lack of any considerable quantity of snow, such building operations as were started in the Fall have been kept up. In consequence there is considerable work going on at the present time, and exceedingly good prospects for the coming season. There are several important buildings under way, and the architects report a great deal of work in prospect. It looks now as though there will be more building than for any time during the past ten years, while the prospect of business from the country immediately surrounding the Twin Cities is very good.

While we do not want to see a boom, there is every probability of an exceedingly good trade, and we believe there will be reasonable prices in all lines during the coming season.

The good weather we have been having has been excellent

for logging operations. Last year was disastrous. The stock of lumber we understand is moderate and fairly complete, with reasonable prices, which we understand are well maintained.

W. K. MORISON & Co.

## THE OMAHA TRADE.

The unseasonable weather prevailing for several months past in this locality still continues and makes the condition of trade a matter of considerable uncertainty. Season goods that should have been disposed of last Fall are still in stock and likely to remain with us until another season, while the demand for goods not ordinarily called for at this time of the year is considerably in excess of the supply. The volume of business is satisfactory and the general conditions throughout the territory apparently in excellent shape, though considerable complaint is heard regarding lack of moisture, which is necessary for the successful development of both agricultural and range interests. Collections are good.

RECTOR & WILHELMY Co.

## The Shipbuilding Industry of the United States.

"The Shipbuilding Industry of the United States and Its Relation to the Foreign Trade" is the title of a document just issued by the Treasury Bureau of Statistics. It discusses the economic conditions which surround the present state of the shipbuilding industry in this country in both their industrial aspects. Historically it finds that the use of ironclads in the Civil War sounded the doom of wooden ships as instruments of national defense, and thenceforth turned over maritime ascendancy to the iron-producing nations, in which Great Britain had then held the leadership. But with the ascendancy of the United States in iron and steel production and the advent of this country into the new era of oceanic responsibility, both commercially and politically, the present period of our maritime progress is clearly marked off from all that has preceded it. Historically our development in shipbuilding has reached the point at which the economic outlook is based upon the most favorable industrial and commercial conditions ever known in the history of our merchant marine. These conditions are shown first in the internal development of the shipbuilding industry. The influence of the naval policy on merchant shipbuilding has developed shipbuilding plants to a point of equipment with tools and machinery, and to a scale of production which, with a larger demand for ships, would almost put the best American shipbuilders on the same plane as British shipbuilders as to cost of production. The use of electricity in the operation of shipbuilding plants, the employment of pneumatic tools and the services of cranes and derricks in handling heavy materials at every stage have revolutionized shipmaking methods in the United States to such an extent that the best ship yards in America are even better equipped than those of Europe. The chief obstacle to shipbuilding in com-

THREE-BAR LEATHER  
shoe-soles and top-lifts (for heels) are the best.

petition with foreign shipbuilders is the lack of sufficient orders at our ship yards to keep them busy on a sufficiently uniform volume of work.

The difference in the labor cost of production in foreign and American ship yards is conceded to be about 25 per cent. greater on the hull, and 50 per cent. greater on the machinery in the American yard. This difference, if accepted as correct, it is held, must be overcome by the introduction of piece-work methods of labor and the standardizing of types and parts. The report finds that as compared with British ships, comparatively little progress has been made in this country in either of these respects, except in those located upon the Lakes. The Lake ship yards have turned out a volume of tonnage which has enabled them to utilize European methods of reducing cost more generally than is the case on the Atlantic seaboard.

The progress on the Lakes in productive economics has arisen largely from consolidation of plants, whereby specializing could be more generally developed and uniformity in type of construction introduced. The consolidation of shipbuilding plants with steel-making establishments seems to be another direction in which economics in productive cost of ships must be realized. Shipbuilders complain that the fluctuation of prices in the steel market have been among the greatest hindrances to the development of steel shipbuilding in the United States, as compared with European prices, which are more stable.

The second part of the inquiry is devoted to the study of the merchant marine as a part of the national distributive system. It cites the fact shown by statistics that with the growth in the volume of ocean commerce an increasing proportion of our surplus wealth has been handled by sea, so that the national interest has been forced to avail itself of agencies not of its own control in order to reach and maintain foreign markets subject to the discrimination of shipping lines organized in the service of our competitors. The growth in the volume of our foreign commerce is mainly responsible for the fact that American capital has practically overcome its timidity for investment in either shipbuilding or shipping. Under existing conditions, however, distribution by sea between the United States and the outside world is in foreign control. For the fiscal year ending June 30, 1900, imports and exports by sea aggregated \$2,089,528,666, only 9.3 per cent. of which value was carried in American vessels. Numerous tables are given, showing the growth in our foreign commerce and the decline in our foreign shipping.

### "USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [Traps, Locks, Chains, Pulleys, etc.]: We have found your paper very useful as an advertising medium.

### "The" Mouse Trap.

The J. K. Osborn Mfg. Co., Harrison, N. J., New York office, 487 Broadway, are manufacturing and distributing through the Hardware and housefurnishing goods trade an improved Metal Mouse Trap, illustrations of which we give in the course of this article. It is the invention of C. R. Botsford, who has combined in the design and plan of its operation a novel and unique article of its kind. (See Fig. 1.) It has among its great improvements the little bait box shown in Fig. 2, in which the crumbs of bait are placed

FIG. 1. "THE" MOUSE TRAP.

either before or after it is set. This enables the trap to be set in an accessible place frequented by mice with no fear of the bait being lost by the trap being moved. It is constructed entirely of metal, and consequently is not liable to warp nor split, these characteristics pertaining only to wood traps. Then again it can readily be kept clean and is easily washed. They are set on a regular hair trigger that is guaranteed not to spring of its own accord, but is quick acting

FIG. 2. "THE" MOUSE TRAP.

upon the touch of a mouse. It is extremely easy to set, and not at all dangerous. It is intended to be marketed at a very moderate price, the trade price being 75 cents per dozen, and the manufacturers desire to handle their production entirely through the jobbing trade, so that inquiries for "The" Trap addressed to the jobbing house patronized by the dealer will result in their being obtained in the readiest manner.

### "JUST THE PAPER RETAILERS WANT."

Keystone Saw, File, Tool and Steel Works,  
**PHILADELPHIA, PENNA.**

### Work.

Mr. Alfred C. Harmsworth is visiting the United States. He is the proprietor of the London *Daily Mail*, a millionaire in money, a millionaire in circulation and a millionaire in ideas. Although only thirty-five years old, he is the owner and conductor of many papers and periodicals.

It is claimed that the secret of his success lies in the fact that he is a restless and never-tiring worker. It is always the worker that accomplishes the best results. Bismarck urged hard work as the only safeguard for a true life. A few years before his death, when asked for a rule of life which could be simply stated and easily recommended, he said:

"There is one word which expresses this rule, this gospel—Work; without work life is empty, useless, and unhappy. No man can be happy who does not work. To the youth on the threshold of life, I have not one word, but three words of advice to offer, 'Work, work, work.'"

Don't be afraid that you have not the natural ability to win the coveted position. If you have the ability to work you

have the chief requisite. Dr. Halbrook claims that two persons of equal ability in youth will be of very unequal ability in mature age if one has a large experience in the world and the other a small one. Indeed, an inferior man in natural ability may outstrip a superior man if he will seek opportunities to improve himself and is willing to work hard.—*Graphite*.

Suitable Side-lines for a Bicycle Dealer.—One of the most difficult problems confronting the dealer in bicycles in all countries is what to carry as part of his stock that will enable him to at least pay running expenses during those months when the bicycle trade must necessarily be dull. An English paper suggests a list to its readers that may be of some service to all who are interested in this question. "Among the articles which one can select as suitable to the average cycle agent's limits," it says, "are typewriters, phonographs, guns and ammunition, safes, photographic apparatus, lamps, stoves and incandescent gas fittings, domestic machines such as washing and wringing machines, and the various ingenious American novelties which reach us in a never-ending stream."

## TWO AND FOUR PASSENGER

### "Home Comfort" Low Down Lawn or Porch Swing.

New and Novel in Construction.

Light, Strong, Durable, Easily Handled. Can be placed on any Porch under any Shade Tree or Arbor, or in any Room in the House. The backs are adjustable to any desired position. With one thrown back and foot rest raised, it makes a comfortable Swinging Couch. Adjustable Foot Rest to suit the Children, and it is so perfectly balanced that the smallest child can operate it. The "HOME COMFORT" is not only the best Lawn Swing Ever Invented, but is an Ornament to any Lawn or Porch.

## Improved Carpenters' Tools.

SOLD BY ALL HARDWARE DEALERS.

A 20th CENTURY PRODUCTION "THE" TRAP IS "AT THE TOP"

As compared with all other traps, it is SUPERIOR. It is ALL METAL and will never warp nor split like wood block traps. It can be washed and kept clean. "THE" Trap will never spring of its own accord, but will always spring for a mouse. It is easy to set. It has the safest set and quickest trigger ever produced.

TRAP SET.

The manner of baiting "THE" is superior, crumbs of bait being put in the bait box either before or after it is set, and "THE" trap can then be put in a less accessible place, frequented by mice.

The bait cannot be touched by mice without springing "THE" trap.

BAIT BOX, SEE?

"THE" stamped on every trap, and is a guarantee that it is the BEST.

## WHY IS THE

PAT. 1898.

## O.K. WASHER THE BEST WASHING MACHINE?

—BECAUSE—

- 1.—It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.
- 2.—The tub is made of Louisiana Red Cypress Lumber.
- 3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap-suds, and cleaning them without rubbing them to pieces.
- 4.—This washer is made by experienced mechanics, and will out-last any other washer on the market.
- 5.—The lid on tub closes tight, no escape of steam.
- 6.—Has a solid wringer box with iron brackets.

Manufactured by **H. F. BRAMMER MFG. CO.**

C., February 1, 1901.—Sealed Proposals will be received at this office until 2 P.M., Monday, March 18, 1901, to furnish during the fiscal year beginning July 1, 1901, the following classes of supplies, viz: Dry Colors, Hardware, Engravers' Supplies, Binders' Supplies, Lumber, and Plumbers' Supplies. Sealed proposals will also be received until 2 P.M., Monday, April 8, 1901, for the following classes of supplies, viz: Textiles, Grocers' Sundries, Rubber Goods, Oils, Chemicals, Paper, Postal Gum, and Brass and Iron Castings. Awards will be made only to established manufacturers of or dealers in the articles. Blank forms with specifications for proposals and further information desired will be furnished intending bidders on application to

WM M. MEREDITH,  
 Director of Bureau.

## HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Hardware Stores.

Benton, Tenn.—Jarvis Hillard.  
Camden, N. J.—Richard Chambers.  
Chicago, Ill.—Solle Hardware Co. has been incorporated with a capital stock of \$4000. Incorporators, Arthur D. Solle, Marie Solle and Daniel F. Flannery.

Des Moines, Ia.—Articles of incorporation of the Central Supply Co., with a capital stock of \$25,000, will be filed for record in a few days. The company has been organized to engage in the jobbing of all kinds of farm and well machinery, wagon stock, Hardware and Hardware specialties. The incorporators will be F. C. Pollard, C. K. Downs, H. H. Smith, J. Billingsley and James D. Burns. The company has leased the three-story building on West Second Street, abutting the Des Moines Union tracks on the south, and the work of putting the building in shape to receive the stock has been commenced.

Freeport, Ill.—Hoffman & Buss.  
Gainesville, Tex.—The Durant Hardware and Implement Co., of Gainesville, Tex., and Durant, I. T., has been incorporated with a capital stock of \$25,000. Incorporated by J. M. King, M. W. Stainporter and D. C. Jamison.

Gallatin, Mo.—The Lawrence Hardware and Implement Co. has been incorporated; capital stock, \$6000. Incorporated by J. L. Netherton, T. G. Netherton and M. W. S. Lawrence.

Greenwood, B. C.—The formation of the Russell-Law-Caulfield Co., Ltd., has been completed. The capital of the company is \$100,000. The principal shareholders are William Law, of the firm of Wm. Law & Co., groceries; J. J. Caulfield, of Caulfield & Lamont; Mayor Thomas Hardy and James Russell, of the Russell Hardware Co., and Duncan McIntosh, mining operator and capitalist. The aggregation is amply supplied with capital and will carry on both wholesale and retail trade in dry goods, Hardware and groceries.

Le Mars, Ia.—Smaltz Hardware Co.  
Mound Ridge, Kans.—Western Hardware Co. has been incorporated; capital stock, \$10,000.

New York, N. Y.—Woods-Bacon Co. has been incorporated to deal in Hardware; capital stock, \$25,000. Directors, B. R. Bacon, South Orange, N. J.; T. R. Sully and H. H. Meyer, New York City.

Quanah, Tex.—W. G. Lewis Hardware Co. has been incorporated with a capital stock of \$20,000. Incorporated by Mary B. Lewis, Alex M. Lewis and J. R. Sanders.

Redding, Cal.—James Young Hardware Co. has been incorporated; capital stock, \$25,000; principal place of business, Redding. Directors: A. E. Kinney, W. E.

Price, W. M. Campbell, G. C. Young and M. W. Kinney, of Redding.

Springfield, Ill.—Oscar F. Stebbins Co. has been incorporated; capital stock, \$15,000. Incorporators, Mary F. Stebbins, M. W. Stebbins and Mary S. Brown.  
Winthrop, Me.—Frank Libby.

### Changes and Improvements.

Alliance, O.—The Wright & Pennock block, including the entire Hardware stock of this pioneer establishment, has been sold. The sale was made by Arthur Wright and Mrs. Elizabeth Pennock. The new owners are John F. Kryder and Benjamin C. Allott, both of this city. An inventory of the goods is now being taken. As soon as this is completed, Messrs. Kryder and Allott will take full possession.

Angleton, Tex.—William Penman has sold out his entire stock of Hardware to John Faickney of Columbia. Mr. Faickney will run his store in connection with his Columbia business. Mr. Frank Faickney will be in charge of the business here.

Bowling Green, O.—A. J. Ross, of the Hardware firm of Ross & Avery, has disposed of his half interest to J. A. Folk, of Findlay.

Branchport, N. Y.—Edward C. Brown has purchased Pearce & Huntley's Hardware and implement business.

Cameron, W. Va.—J. I. Spragg is removing his Hardware store from the east business room at the Hotel Creed into the north room of the Hicks Building on Pike Street.

Canton, Pa.—The Hardware firm of Lindley, Ronan & Co., has dissolved. L. E. Manley retires. Lindley and Ronan will continue the business at the old stand.

Denton, Tex.—R. S. Taylor & Son are successors to G. W. Wilson & Co. in the implement and Hardware business.

Fairmount, W. Va.—J. M. Jacobs & Co. are taking an inventory of their stock of Hardware, which has been sold to Lee Hall of Palatine, who will soon assume control of this store.

Farmington, Ill.—The copartnership heretofore existing between F. E. Crane and W. J. Connell under the firm name of Crane & Connell in the Hardware business has been dissolved by mutual consent, W. J. Connell retiring from the firm.

Farmington, Minn.—The firm of F. Kloepping & Co., dealers in Hardware and machinery, have dissolved partnership. F. Kloepping retains the machinery business, and A. H. Sprute the Hardware business.

Greenfield, Mass.—William Henry Allen, the president of the Franklin Savings Institution, has retired from the firm of S. Allen's Sons, Hardware merchants, after being a member for fifty-two years. His son, Franklin Allen, takes his place. Franklin Allen has been employed in the store for many years. There will be no change in the firm name. Franklin R.

Allen continues the head of the firm.

High Bridge, N. J.—The High Bridge Hardware Co. is now located in the new bank building.

Hubbard, Ia.—George C. Cable has purchased the Webster Bros. Hardware building and stock and taken possession.

Jasper, Tenn.—S. T. Wood has sold out his interest in the Hardware store to Mr. Haven.

Kirkwood, Ill.—Harry Young has disposed of his interest in the Hardware store to his partner, P. W. Kessler, who will continue the business.

Morning Sun, Ia.—J. F. Bonner & Co. have sold their Hardware and implement establishment to McKinley and Vertress.

Mt. Sterling, Ill.—The Sumners Hardware Co. have moved across the street to the building formerly occupied by the Booth Mercantile Co.

### Business Embarrassments.

Brazil, Ind.—The Owl Hardware Co. of this city has gone into the hands of a receiver on petition of one of the stockholders, of whom there are four—three residing here and one at Greencastle. The liabilities are placed at \$6800; assets, stock \$3500 and \$3000 in accounts, one-third of which are collectible.

Fond du Lac, Wis.—William J. Bennett, a Hardware merchant, in a petition asking to be declared a bankrupt, sets forth that he owes \$1195.03. His assets foot up to \$2335.08, but of this amount goods valued at \$1295 are claimed as exemptions. The stock in trade is valued at \$850.

New Haven, Conn.—The Hardware establishment of George H. Baker, at 956 and 958 State Street has been attached by Deputy-Sheriff Beach in a suit for \$1200 brought by the Buckingham Hardware Co. of this city.

### Fires in Hardware Stores.

Albion, N. Y.—Tyler & Bennett.  
Elgin, Man.—Temple & Maguire.  
Elizabeth City, N. C.—Sharber & White.  
Fessenden, N. D.—H. M. Hendrickson.  
Junction City, Ark.—Junction City Hardware Co.

Matawan, N. J.—Chas. A. Gerau.  
Montreal, Canada.—Seybold Son & Co.  
New York, N. Y.—Bergen & Blumberg.  
Pittsburgh, Pa.—Demmler & Schenk.  
Reading, Pa.—Bright & Co.  
Twin Valley, Minn.—Naasgaards & Ramsey.

### Burglaries in Hardware Stores.

Eldorado, O.—J. M. Kimmel.  
Frederick, Md.—Central Hardware Co., \$125.

New York, N. Y.—John Hannon, \$75.  
Richview, Ill.—Wm. Sprout, \$40.  
South Bay City, Mich.—South Bay City Hardware store, \$26.

Waycross, Ga.—Blackshear Hardware Co., \$30.

Willimantic, Conn.—Jordan Bros., razors, etc.

## HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Etc.

Akron, O.—Akron is about to have another new industry added to the already large number which have their homes here. M. F. Christenson, who recently invented a device for the cold forging of ball bearings is at the head of the scheme. It is intended to build a factory in Akron for turning out this class of work.

Akron, O.—The Oyler Plow Co. has been incorporated; capital stock, \$50,000. Incorporators: John C. Immel, Fred E. Koerschner, William R. Oyler, George Doll and A. J. Commins. They will make plows and cultivators.

Baltimore, Md.—A certificate of incorporation of the American Manufacturers' and Savings' Association has been filed in the clerk's office of the Superior Court. The incorporators are Leonard H. Neudecker, Winfield E. Beveridge, Louis M. Elbersen, Harry Welles Rusk, Patrick H. Philbin, D. Eldridge Monroe and Clarence M. Kemp, who are also named as directors for the first year. The objects of the association are, as set forth in the charter, to manufacture and deal in house furnishing goods, cooking utensils and steam cookers and to procure by purchase or otherwise letters patent of the United States for new and useful inventions in housefurnishing goods and cooking utensils.

Chicago, Ill.—Scott Drive Well Point Co. has been incorporated. Capital, \$5,000. Manufacturing well supplies and Hardware specialties. Incorporators: John H. Scott, E. T. Osgood, L. N. Husted.

Davenport, Ia.—Articles of incorporation of the W. W. Whitehead Co. have been filed with the county recorder. The incorporators are J. H. Flick, Dr. A. L. Hageboeck and W. W. Whitehead. According to the incorporation papers, the general nature of the business will be the manufacture, building, buying and selling of engines, boilers, tools and machinery of all kinds and the general rebuilding and repairing of all machinery of a kindred nature and such general work of construction as pertains to the same.

Dexter, Me.—The papers of incorporation of Fay & Scott, for the purpose of establishing a plant for the manufacture of lathes, machines and tools for general use, have been filed at the office of the register of deeds.

Dover, Del.—The Secretary of State has granted a charter to the following company: The Columbia Lock Nut Co., with a capital stock of \$50,000, to manufacture and sell brass lock nuts. Its incorporators are from New York City.

Farmersville, Tex.—The Farmersville Mfg. Co. has been organized by prominent

citizens for the purpose of manufacturing a patent washboard with a patent obtained by a Collin County man.

Geneva, N. Y.—A new factory is soon to be erected for the manufacture of anti-rust tinware and will be located temporarily at East Geneva. At the start the new concern will employ from twenty to thirty men. Later on it is expected to increase the force to seventy-five. The stockholders have elected the following directors: William L. Young, Howard E. Merrill and O. J. C. Ross and Samuel D. Pearson, of Geneva, and J. E. Byrnes, of Newark, and the superintendent J. E. Byrnes. Howard E. Merrill is secretary and treasurer. The new concern is capitalized at \$15,000. A name has not as yet been selected.

Hartford, Conn.—The certificate of organization of the Fernside Mfg. Co. has been filed in the office of the Secretary of State. The purpose of the corporation is the manufacturing of circular-saw clamps. The company is to be located in this city and its paid in capital is stated to be \$1500. The subscribers are William B. Mucklow, R. P. Chapman, G. W. Fernside and Frank H. Bosson.

Lorain, O.—The stockholders of the Cleveland Metal & Stamping Co., a newly incorporated company, have selected the following directors: J. H. Hills, Rudolph and George Huffman, J. B. Chapman, Herman Barshaw, of Lorain; William Murbach and E. A. Rice, of Cleveland. The directors elected William Murbach, president; Rudolph Huffman, vice-president, and J. H. Hills, secretary and treasurer. The plant will be located in Cleveland.

### Changes and Improvements.

Akron, O.—The Falls Rivet and Machine Co. will begin the manufacture of nails in a short time. This addition to the company's products will result in an increase in the number of men employed. The company will engage in this particular line of manufacture on an extensive scale.

Akron, O.—A deal has been completed by which the works of the Dauntless Burner and Gas Stove Co. will be removed from Massillon to this city. The company has been in operation about two years and has developed into a very promising concern. The capital stock has been increased from \$6000 to \$30,000 and a large and well equipped plant will be erected here. About one hundred men will be employed.

Chicago, Ill.—Home Stove Works. Capital stock increased from \$12,000 to \$180,000.

Erie, Pa.—The Modern Tool Co., an Indianapolis manufacturing concern in which the late J. B. Wallace was the leading spirit, has been absorbed by the Erie Foundry Co.

Everett, Mass.—Everett is to have another industrial enterprise at the "Line." The New England Bolt and Nut Co. are to locate on the land adjoining Washburn's brickyard and the railroad. It will erect a building 125 by 175 feet. Work is to be started immediately.

Findlay, O.—In order to take care of the rapidly increasing business, the Chamberlain Cartridge and Target Works has placed two new target machines in position, and from now on the entire plant will be operated to its fullest capacity.

Fishkill, N. Y.—The Dutchess Tool Co. is to build a factory at Englewood, N. J.

Muncie, Ind.—The plant of the Enterprise Stove Co. has been ordered sold by the court to satisfy the claims of creditors.

Reading, Pa.—The Reading Hardware Works is pushing work on the equipment of the six-story annex on Willow Street, which will be ready to be put into service by the latter part of February. The firm is taking up several new lines of Hardware and these departments will be located in the new building.

Rochester, N. Y.—The Robeson Cutlery Co. has increased its capital stock from \$125,000 to \$150,000. The certificate of increase has been filed with the county clerk. The stock will consist of 1500 shares at a par value of \$100 each.

Spencer, Mass.—The Spencer Wire Co. has bought out a buckle-making concern in New Hampshire and will move the business to their Worcester works.

St. Louis, Mo.—The Ludlow-Saylor Wire Co., at a special meeting, voted to increase its capital stock from \$100,000 to \$400,000. The company recently built a large factory, at Newstead Avenue and the Wabash tracks, in addition to its large plant at Fourth and Elm Streets.

### Recent Fires.

Elizabeth, N. J.—Fire was discovered in the engine room of the Newark Wire Works on South Front Street recently. The fire consumed everything perishable about the plant before it was controlled. The loss is placed at \$50,000, partly covered by insurance. The wire works were organized three years ago and turned out some of the finest copper wire. Over two hundred were thrown out of employment by the fire.

Granby, Que.—Fire has destroyed the warehouse of the Granby Enamel Works, including several hundred bath tubs. The loss is partly covered by insurance.

Springfield, O.—The shops of E. W. Ross Co., manufacturers of feed cutters, etc., have been burned to the ground. The origin of the fire is a mystery. Loss \$75,000, partially covered by insurance.

West Cornwall, Conn.—Fire which broke out in building occupied by Union Shears Co. resulted in loss of \$4500, partly insured. Cause, defective flue.

## BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Agencies, Etc.

Baltimore, Md.—The American Mfg. Co., for the manufacture of guns, targets and novelties, has been incorporated by Halleck A. Penrose, Hiram H. Taylor, James S. Barnard, Campbell Carrington, Edward C. Carrington, Jr., and Frederick J. Morton. Capital stock, \$40,000.

Binghamton, N. Y.—W. L. Montrose & Co., 17 Washington Street.

Chicago, Ill.—E. W. Zander & Co. report the closing of a \$9,900 lease for three years with Ralph Temple, on stores at 293 and 295 Wabash Avenue. Mr. Temple expects to fit these premises up for a cosmopolitan automobile and bicycle salesroom.

Dover, Del.—The H. W. Vandever Co., of Wilmington, Del., has been incorporated to manufacture and sell bicycles, tricycles, &c.; capital, \$50,000.

Harrisburg, Pa.—A charter has been granted at the State Department to the Cambria Powder Powder Co. of St. Clair Township, Westmoreland County, with a capital of \$5000.

Portland, Ore.—Henry Goodman & Co. Southport, Conn.—Southport Bicycle Co. has reopened.

Syracuse, N. Y.—Breeze Cycle Mfg. Co. has been incorporated; capital, \$100,000. Directors: J. S. Bretz, G. M. Burns, and Bella I. Bretz, Syracuse.

Utica, N. Y.—The Wadman Cycle Co. has been organized. Capital, \$25,000. Directors: F. D. Crim, F. J. Wadman, and H. W. Millar, of Utica.

### Changes and Improvements.

Abington, Mass.—The Lamson Machine Co. have a new motor for attachment to a bicycle, which they expect to place on the market shortly.

Dayton, O.—Niehaus & Dohse have moved to 35 East Fifth Street, Central Block. They handle a full line of 1901 bicycles, including a full line of rubber goods, cameras and supplies.

Ellwood, Pa.—The Standard Seamless Tube Co., which was recently purchased by the powerful National Tube Co., will be continued under its old title, with general offices in Pittsburgh. Under the new organization F. J. Hearne will be president, and W. H. Latschaw, secretary and treasurer.

Erie, Pa.—Charles H. Lejeal has begun the erection of a factory at Seventeenth and State Streets. He believes that it would be greatly to his advantage to manufacture his own wheels, thereby enabling him to place them on the market at a much cheaper rate, and still be first class bicycles.

Indianapolis, Ind.—The Patee Cycle Co., which recently removed from Peoria,

Ill., to Indianapolis, has absorbed the business of J. D. Morris, of Rochester, N. Y., which will be removed to Indianapolis at once. Mr. Morris has perfected a gasoline motor which is well spoken of and which it is anticipated will be applied to the promised Patee motor bicycle. Mr. Morris will continue with Mr. Patee in Indianapolis.

Indianapolis, Ind.—Carl G. Fisher, an automobile and bicycle dealer at 112 North Pennsylvania Street, has sold his business to C. Koehring & Bro. The store will be maintained at its present location, and bicycles and automobiles will be sold exclusively.

Litchfield, Conn.—The Bantam Mfg. Co. have erected a fine shop at the old Slitting Mill dam in Bantam. It is 120x30 feet, two stories high and the company are placing machinery necessary for the manufacture of bicycle and wagon hubs and other heavy iron ware.

New York, N. Y.—Cornwall & Jespersen, dealers in sporting goods at 310 Broadway, are about to dissolve partnership.

New York, N. Y.—The well-known jobbing firm of E. A. Brecher & Co. has been dissolved by mutual consent. A. W. Steiner retires from the firm. Mr. Brecher, however, will continue the business at the same address and under the same firm name, assuming all liabilities and accounts of the copartnership.

New York, N. Y.—J. F. Hollingworth, former manager of the Electro Lamp Co., has been added to the staff of the Willis Park Row Bicycle Co., and is in charge of the sales department. H. M. De Silva, formerly the Southern and New England representative of the Delaware Rubber Co., has also been added to the Willis staff.

New York, N. Y.—Harris Parker has engaged with C. B. Barker & Co., the well-known jobbers of this city; he will have charge of their cycle and sundry department.

New York, N. Y.—The Straus Tire and Rubber Co. has entirely recovered from its recent visitation of fire, and are now in business at 351-353 East Sixty-first Street. The Straus people have abandoned bicycle tires, and now confine themselves to the production of solid rubber tires for carriages and other vehicles. They will continue, however, the manufacture of pedal rubbers, and other desirable cycle sundries with which they were identified.

Park View, N. J.—The old Newark Novelty Works in Elizabeth Avenue have been newly fitted up as a factory for making all sorts of sporting goods.

Philadelphia, Pa.—The Manhattan Storage Co. has thrown out an offshoot in that city, the Puritan Tire & Rubber Co.; the latter concern is at present dealing with tires only, but later, it is understood, sundries in general will be added.

Toledo, O.—An important business deal has been closed by which the bicycle lamp business of the E. P. Breckenridge Co. was formally disposed of to the National Cement Rubber Mfg. Co.

### Recent Fires.

East Boston, Mass.—Howard S. Hunter, Brooks and Princeton Streets. Loss, \$1200; insured.

Joliet, Ill.—Jas. McCann. Loss, \$1000. Perth Amboy, N. J.—A. J. Anderson. Loss, \$1000.

Philadelphia, Pa.—About \$3500 loss has been entailed by a fire which broke out at the factory of the Eclipse Cement & Blacking Co., 1238 Belmont avenue. The concern manufactured, among other articles, cements for the bicycle trade.

Rochester, N. Y.—The four-story brick building occupied by Francis L. Hughes, manufacturer of baby carriages, bicycles, and toys, 67-71 Exchange Street, has been destroyed by fire. The loss is estimated at \$40,000, with \$35,000 insurance.

Washington, D. C.—Fire has completely destroyed the building owned and occupied in part by the Columbia Bicycle Co., on Fourteenth Street, causing a loss of about \$100,000. The building was erected by the Pope Mfg. Co., four years ago, at a cost of \$87,000, and was designed as a model showroom for bicycles. The Columbia company used the first floor.

### Recent Embarrassments.

Akron, O.—The Union Cycle Co., wholesale and retail bicycle dealers, have made an assignment to Attorney W. A. Spencer.

Bristol, Conn.—George B. Parsons, who has just filed a petition in bankruptcy, has conducted a bicycle repair shop on Riverside Avenue for several years past. The assets as given in the schedule are \$446.23, and his liabilities are \$789.93.

### Miscellaneous.

Fulton, N. Y.—At the annual meeting of the Hunter Arms Co., the following officers were elected: Thomas Hunter, president; R. B. Hunter, vice-president; John Hunter, Jr., secretary; J. C. Hunter, treasurer; William Hunter, general manager. The board of directors are the above officers and Mrs. John Hunter, Jr.

Middletown, O.—The Miami Cycle and Mfg. Co. have elected the following officers and directors: P. J. Sorg, president; J. D. Alsop, vice-president and treasurer; P. J. Sorg, F. H. Ray, George H. Shafer, Harry Walburg and J. D. Alsop, directors.

Milwaukee, Wis.—The Milwaukee Patent Puncture-Proof Tire Co. have re-elected officers as follows: President, George H. Benzenberg; vice-president, G. Podoll; secretary and treasurer, W. D. Halsted; directors, George H. Benzenberg, G. Podoll, W. D. Halsted, Emil Durr and Thomas Spence.

## Columbian 1000-Shot Air Rifle.

Patented  
Oct.  
24, 1893.

CHAMPION  
MODEL.

This Air Rifle possesses advantages over all the Air Rifles now  
on the market. The materials used in its construction are  
the best. The appearance and workmanship is far ahead of  
any other Air Rifle made. It has an adjustable sight, it shoots stronger  
and more accurate, less liable than any other to get out of order, all  
parts are interchangeable. We think we have the right to claim this as  
the "Champion" of all Air Rifles. List, per doz., Enameled, \$30.00; Full Nickel, \$42.00.

## "BRIGHT AND NEWSY."

Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

## PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

## Eclipse CURRY COMBS

WE make the largest assortment of all that is best in Curry Combs of any manufacturer in the world. We are the sole makers of the **Patent Reform and Magic Self Cleaning Curry Combs.**

MADE OF THE FINEST  
Cold Rolled Steel  
and Brass. . . .

### NEW YORK STAMPING CO.,

North Eleventh and Berry Streets,

Brooklyn, New York, U. S. A.

Catalogue on Application.

## SPECIAL PAINT OFFER

WHICH POSITIVELY CLOSES MARCH 1st.

For the purpose of introducing the EMPIRE PREPARED PAINT to the trade, where not at present for sale, we have decided to make the following special offer:

We will send any dealer 50 gals. of EMPIRE PREPARED PAINT, selected from our special color cards of the latest and popular shades, for \$45.00. The goods are all put up in patent strip covercans and pails in assorted size packages as follows: 1 gal., 1/2 gal., 1/4 gal., 1/8 gal., and neatly labeled. Terms 60 days from date of shipment, or the usual 2 per cent. off if paid in ten days.

We fully guarantee these goods to be far superior to any on the market, and with this special offer we will send you a full supply of color cards, large slat sign for displaying colors, and also a glass sign; making the most complete advertising outfit on the market.

Bear in mind this sacrifice price is made to introduce the goods where not already for sale and positively expires on March 1st. If you are interested, we would be glad to hear from you and would take pleasure in furnishing color cards or any other information which you may desire.

**THE WM. CONNORS PAINT MFG. CO.,**  
**TROY, N. Y.**

### Brauer's Pat. Ankle Support

As shown in illustration is to be

Worn by Skaters with Weak Ankles.

for the purpose of supporting the ankle, and at the same time permitting flexibility of the wearer's foot. Made of Russet Leather; light in weight; easily applied and of moderate cost.

For Sale by all Jobbers handling Skates.

Manufactured by

**BRAUER BROS.,**

2004 Locust St.,

St. Louis, Mo.

### SELF-LUBRICATING Rotary Screw Ventilators

WHICH PRODUCE A  
VACUUM BY ROTATION.

The only positive cure for Smoky Chimneys, Poor Draught and Ventilation. Adopted and used successfully on Private Residences, Greenhouses, Hotels, Breweries, Public Buildings, etc., etc.

**E. G. WASHBURN & CO.,**

MANUFACTURERS,

47 Cortlandt St., New York.

Telephone, 3125 Cortlandt.

Send for Illustrated Circular.

## THE OGDEN

AUTOMATICALLY  
REGULATED  
LIQUID

## DOOR CHECK and SPRING

"The Ogden Check" in Brief is

The only check that controls the door entirely.  
The simplest and strongest check made.  
Easily applied by anyone of ordinary intelligence.  
Refilled with liquid, when necessary, through the filling chamber without removing from the door.  
Positively regulated under all conditions and cannot leak.

SIMPLICITY SIMPLIFIED.

## If it is a Food Chopper Without a Lid, Don't Buy It.

A distinguishing and exclusive feature of the STAR FOOD CHOPPER is a plate hinged at the top of the hopper which, when pressed on the food to be cut, forces it upon the feed screw, thus preventing the possibility of injuring or soiling the fingers, which is liable to occur in using the other choppers.

The STAR is unquestionably the best machine of its kind ever offered to the public. It will cut without crushing raw or cooked meat, sea food, fruit, vegetables, etc., into coarse or fine pieces, according to the cutter used, of which three accompany each chopper.

It has eliminated all the objectionable features of other choppers, and has added several improvements that are distinctly its own. It is always in order, and the knives require no sharpening.

No other chopper has the many merits of the STAR. None is more simple in construction or easier to understand or clean. From start to finish in the small points as well as in the large, the STAR FOOD CHOPPER is the best.

**CHAS. D. BROWN, Agent,**

**160-162 Duane Street, New York City.**

## THERE ARE OTHERS

but none which will sell for less than is anywhere near its equal. Our rifle is a seller and why shouldn't it be? It's the only Single Shot Air Gun that looks like a hammerless sporting rifle. When a boy sees it he won't be happy until he has it. All metal, all nickel finish, no wood to shrink—a splendid little arm.

Retail Price \$1.25. Write for trade prices.

We want good salesmen who know how to introduce good specialties to good Hardware trade.

## "SIMPLICITY" STUDENT LAMP.

A One Hundred Candle-Power Light for Six Hours' Service One Cent. The illuminant is gasoline, stored in compartments in the lighting fixtures, and on passing through a heating chamber reaches the orifice in the form of gas, which burns with a smokeless flame under a mantle heated to incandescence. The light is not affected by temperature, and will burn equally well in summer or winter. The lamp uses 74 stove gasoline, and is started by heating the burner with a small alcohol torch, supplied with each light. There is no odor like the old gasoline stove.

These lamps have been approved by the Board of Underwriters of Chicago.

Covered by eight patents in the United States and Canada. Ask for catalogue of complete line of lamps and our

**ONLY \$12.75. SEND NO MONEY**

if you live within 500 miles of Chicago, (if further send \$1.00), cut out and return this ad. Mention No. 671, and we will send you this HANDSOME ROLL TOP DESK by freight, C. O. D., subject to examination. You can examine it at your nearest railroad station, and if found perfectly satisfactory and exactly as represented, the greatest value you ever saw or heard of, the equal of desks that others sell at almost double the price, then pay the railroad agent OUR SPECIAL

PRICE, \$12.75 and freight charges. The desk weighs about 180 pounds, and the freight for each 100 miles will be about 50 cents; 500 miles, about \$1.50.

**THIS DESK** high. Made of carefully selected oak, beautifully finished in antique, full finished back, extension slides, quartersawn sycamore pigeonhole case, combination lock on drawers, spring lock with duplicate keys on curtain, 3 drawers on left side, lower partition for books, book closet on right hand side, drawers, pencil rests and card racks in interior, desk hand polished, dust proof curtains.

**THESE DESKS** of the largest and best desk makers in this country. Every desk is put out under the manufacturer's BINDING GUARANTEE, and our special \$12.75 price barely covers the cost of material and labor, with but our one small percentage of profit added. Address, **SEARS, ROEBUCK & CO., CHICAGO, ILL.**

## Gibbs Lawn Rake

The strongest, lightest and finest looking All Steel tinned rake on the market.

Its closed head and simple construction (without any extra kinks or bends in either head or teeth) prevents any possibility of the rake not freeing itself from cut grass or leaves.

Note the shape of the teeth—rakes smooth, does better work and won't tear up the sod—one of the special features of the "Gibbs" Rake.

## LAWN RAKES & POST HOLE DIGGERS

The "GIBBS" DIGGER, with single blade, is easy to operate, does the work thoroughly and rapidly, and works successfully in all kinds of soil where others fail.

Selling Agents . . .

**JOHN H. GRAHAM & CO.,** 113 CHAMBERS ST., NEW YORK.

# Mr. Dealer

WE INVITE YOU TO WRITE  
FOR OUR PRINTED MATTER,  
WHICH IS CONFIDENTIAL  
TO THE TRADE

We are putting this advertisement in the leading popular magazines to help you sell them.

## Something New

PUT THIS ON YOUR PIPE,

The  
Fowler  
Automatic  
Draft  
Regulator

and you will notice the following about your furnace, stove, or boiler:

Regular Draft at all times.  
No overheating of furnace.  
Less chimney fire danger.  
No burning out of grates.  
No escaping gases in cellar or room.

Perfect ventilation.  
Retention of heat in furnace.  
Perfect combustion of fuel.  
Minimum of clinkers.

Therefore, greatest economy of fuel and care in operation.

Prevention of fires burning out on windy nights. A great coal and trouble saver.

Why? Because "The Fowler" Automatic Draft Regulator insures absolute and perfect regulation of draft under all conditions in any heating apparatus on which it is put.

Can be quickly applied even when heater is in use.

All stove dealers have them.

Send your address and that of your stove dealer on a postal. We are sure the reading matter we send you will be interesting.

**WHY IS THE**

PAT. 1896.

**O.K. WASHER THE BEST**  
**WASHING MACHINE?**  
 — BECAUSE —

- 1.—It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.
- 2.—The tub is made of Louisiana Red Cypress Lumber.
- 3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap-suds, and cleaning them without rubbing them to pieces.
- 4.—This washer is made by experienced mechanics, and will out-last any other washer on the market.
- 5.—The lid on tub closes tight, no escape of steam.
- 6.—Has a solid wringer box with iron brackets.

THE

# Agency of the Doran Lighting System

USED FOR INTERIOR AND STREET LIGHTING.

Remember the **FIRST** in the Field will reap the harvest. Our improved Doran Lamp is the height of perfection in Hydro Carbon lamps. **DON'T** confound this with the common 100 candle power gasoline lamp. We have something entirely new, pronounced by **ALL** who have seen it the **BEST** thing they ever saw.

We are appointing agents now for every town and city in the U. S. It will be profitable to you because we have *positively* the best system of lighting ever invented. It has absolutely *no faults*. Every lamp guaranteed to be perfect and give satisfaction when received. As to our responsibility we refer to any bank or mercantile agency in Chicago

## A Few of its Good Points :

- 1250 Candle Power.
- No fount to fill and break mantles.
- No shadow below, light all around.
- Turned up and down instantly with a chain.
- Simplicity. (It will surprise you.)
- Practically Noiseless.
- Handsome, looks exactly like the best electric arc lamp.
- Last, but not least, the cheapest system on the market, both in first cost and in operation, which is 1-6 of any other light of its power.

EVERY LAMP SOLD SELLS ANOTHER.

## ACORN BRASS WORKS...CHICAGO

19 H JEFFERSON STREET.

Special Notice:—All infringements on this patent will be prosecuted to the full extent of the law. *Exclusive territory will be granted.*

**THE** steel clad champions of long ago were the Hardware Dealers' best friends.

To-day the steel clad **CHAMPIONS** are the dealer's best friends, because every **RANGE** sold means a satisfied customer who will come again, since Champion Ranges do all the work of any high grade range with  $\frac{1}{2}$  less fuel. The double flue hot blast does it. It is the nearest approach to perfect combustion yet known. Our catalogue explains it all. Ask for it.
